_____

The Community Emergency Response Team (CERT), part of the Evanston Citizens Corps Council, is established to assist the City of Evanston Departments and Agencies in times of extreme emergency or catastrophe. Its objective is to provide support for city departments by incorporating civilian volunteers so that public safety professionals and regular city employees serve where they are needed most. Generally, members will be used for large scale disasters, emergencies or other events.

It is encouraged but not required that volunteers be graduates of the Evanston Police Department's Citizen Police Academy, or equivalent training. Your completion of this application does not automatically enroll you in the CERT. By signing this form and submitting it to the Citizen Corp Council, you will be subject to a background check and other screening measures deemed appropriate by the City of Evanston. Appointments to the CERT will be made following successful completion of training.
