Questions Received Regarding 2222 Oakton Street

Q1: Is there heat and air conditioning in the warehouse area (where the giant stacks of garbage carts are now)?
A1: There is currently heat, but no air conditioning in that part of the building.

Q2: Does the brick wall go all the way down to the floor behind the garbage carts?
A2: Yes, the concrete block wall extends to the floor.

Q3: What is the condition of the floor under the garbage carts (are there cracks, drains, etc.)?
A3: The floor is in good condition.

Q4: What's the black pipe on the ceiling with the boxes at the ends?
A4: This is part of the radiant heat system.

Q5: Are all the loading dock doors (garage doors) functioning at this time?
A5: Yes.

Q6: What is the ceiling height of the warehouse area?
A6: The ceiling height in the warehouse area of the building is approximately 30 feet.

Q7: What is the current electrical service?
A7: The current electrical service is 220 volt service.

Q8: Is the trailer in the back connected to anything?
A8: The trailer is not part of the offering at 2222 Oakton Street.

Q9: Does the 36,000 figure quoted for the size of the site end at the first fence or does it include the area with the wood pile between the recycling building and the animal shelter?
A9: The site only includes areas within the fence and does not include the wood pile.

Q10: Is there any information available about the James Park methane issue and does the methane leak affect the recycling center building/site?
A10: Information about James Park can be found here: http://cityofevanston.org/parks-recreation/parks/james-park-testing/
