Environmental Services

August 26, 2022

City of Evanston
2100 Ridge Avenue
Evanston, Illinois 60201

Attn: Mr. Paul Zalmezak

Subject: ASTM E1527-13 AAI Compliant Phase I Environmental Site Assessment conducted at 1917-25 Jackson Avenue & 1413-25 Emerson Street, Evanston, Illinois 60201

Dear Mr. Zalmezak:

In response to your request of August 12, 2022, Gabriel Environmental Services (Gabriel) performed this assessment at the property and improvements at 1917-25 Jackson Avenue & 1413-25 Emerson Street, Evanston, Illinois 60201. Gabriel rendered this investigation during the period of August 12 through August 26, 2022. The on-site visual portion of our inspection took place Wednesday, August 17, 2022.

The investigative research in this Phase I Environmental Site Assessment (ESA) consists of reasonably obtainable information from federal, state and local agencies, historical documentation, geographical and geological maps and records, personal inquiry with property owners, neighbors, and/or public officials, and any other information that is practically reviewable, coupled with a visual inspection of the property. This report is designed to identify recognized environmental conditions in connection with the subject property and meets or exceeds the guidelines presented in the American Society of Testing and Materials (ASTM) Standard Practice of Environmental Site Assessments: Phase I Environmental Site Assessment Process (E1527-13) and those within 40 Code of Federal Regulations (CFR) Part 312.

Any exceptions to, or deletions from, these practices are described in Appendix G of this report.

Gabriel appreciates the opportunity to be of service to you and City of Evanston . If you have any questions regarding this report or its findings, please feel free to contact me at (773) 486-2123.

Sincerely,

Steven C. Sawyer, C.H.M.M.
Executive Vice President

1.0 Executive Summary

This Phase I Environmental Site Assessment (ESA) was requested by Mr. Paul Zalmezak of the City of Evanston, the prospective purchaser, and initiated in order to determine the current environmental conditions and potential hazards at 1917-25 Jackson Avenue & 1413-25 Emerson Street, Evanston, Illinois 60201. In doing so, Gabriel reviewed pertinent federal, state and local databases, coupled with an on-site inspection and interviews with the site owner/key site manager, and various City, County and State agencies.

Site Summary Information

Site Address:	1917-25 Jackson Avenue & 1413-25 Emerson Street
Size of Property:	Approx. 41,640-square foot
Property Index Numbers (PINs)	10-13-211-009-0000 10-13-211-010-0000 10-13-211-011-0000 10-13-211-023-0000 10-13-211-024-0000 10-13-211-025-0000 10-13-211-026-0000
Number of structures on site:	Nine
Size of Buildings:	Varied
Number of stories:	One to two-story/ most with basements
Date of Construction:	Late 1800s/early 1900s
Construction type:	Brick and wood frame constructed/brick faced, shingled or vinyl sided
Current Use:	Vacant residential
Historic Use:	Residential, tin shop, metal works
Use of Neighboring Land:	Residential
Date of On-Site Assessment:	Wednesday, August 17, 2022
Name of Environmental Professional:	Nell Rhoades

We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527 of 1917-25 Jackson Avenue & 1413-25 Emerson Street, the property. Any exceptions to, or deletions from, this practice are described in Appendix G of this report.

This assessment has revealed **no** evidence of recognized environmental conditions in connection with the property. No further investigation is recommended at this time.

2.0 Purpose and Scope

2.1 Purpose

This survey is being performed as part of the environmental due diligence requirements for the purchase of the property, to address potential issues, with respect to the range of contaminants within the scope of Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) and petroleum products. As such, this assessment is intended to permit a user to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations of CERCLA liability (Landowner Liability Protections, or LLPs).

2.2 Scope

This practice constitutes all appropriate inquiries into the previous ownership and uses of the property consistent with good commercial or customary practice as defined by ASTM E 1527-13 and 42 U.S.C. 9601(35)(B).

We have addressed the following issues concerning Environmental Considerations consisting of Scope and Non-Scope Issues including (but not limited to):

- Site Information
- Surrounding Sites and Usage
- Regulatory Status and Environmental Conditions
- Standard Federal State and Tribal Environmental Record Sources
- Hazardous Substances and Petroleum Products
- PCBs
- Soil Conditions
- Vapor Migration
- Underground and Aboveground Storage Tanks
- Air Emissions
- Asbestos
- Water Sources
- Wastewater Discharges
- Storm Water
- Flood Plain
- Wetlands
- Mold

The scope of this practice includes research and reporting requirements that support the user's ability to qualify for the LLPs.

3.0 Site Information

3.1 Site Description

Ms. Nell Rhoades, an Environmental Professional of Gabriel Environmental Services Field Services Staff surveyed the site on Wednesday, August 17, 2022, where we were escorted by Ms. Monica Marroquin of MLC Management, the Property Manager. During this assessment, we attempted to assess the regulatory and environmental aspects of the property and surrounding sites. Representative photographs taken are included in Appendix D.

The weather conditions were sunny, with a temperature of eighty degrees Fahrenheit at the time of our inspection.

The subject property consists of two rectangular shaped parcels of land, bisected by a public alleyway, totaling about 41,640-square foot, located on the northeast corner of Emerson Street and Jackson Avenue, two blocks north of West Belmont Avenue and two blocks east of North Damen Avenue, on the north central side of the City of Evanston, Illinois (see Site Location Map in Appendix A). Evanston is a suburb of Chicago located directly north of the City.

Gabriel was not provided with a Plat of Survey for the subject property, although requested.

According to the Cook County Assessors Office, the property is identified by the following Property Identification Numbers (PINs):

10-13-211-009-0000 (1925 Jackson Ave)
10-13-211-010-0000 (1921 Jackson Ave)
10-13-211-011-0000 (1917 Jackson Ave)
10-13-211-023-0000 (1425 Emerson St)
10-13-211-024-0000 (1421 Emerson St)
10-13-211-025-0000 (1419 Emerson St)
10-13-211-026-0000 (1413 Emerson St)

At the time of inspection the subject property was surrounded with an approximately 8 foot construction fence with privacy liner. Ms. Marroquin of MLC Management, the Property Manager, indicated the buildings had been vacant for about six months to one year, with no electrical, gas, or water service to the property. The exterior portions of the site were not maintained, with dense and tall vegetation (5 ft) located in several areas, as well as large piles of dirt and pieces of concrete, which limited our view of the exterior walls of the subject buildings and the surfaces of the site. Also the interiors of the buildings were noted in various states of disrepair with areas of water damage and holes in floors, walls, and ceiling materials.

The north portion of the site is located on the east side of Jackson Avenue and is developed

with three, two-story, rectangular shaped, residential buildings, with basements, and one, one-story garage. The exterior portion of the site consists of weed, grass, and native vegetation lawns situated between the buildings and along the east and west sides of the property.

The north building, addressed as 1925 Jackson Avenue, is an approximately 1,180 square foot, two story, brick and wood frame constructed, painted wood shingled, single family building, with a gabled roof and a full basement. The basement is finished with concrete floors, brick walls, and a wood frame ceiling. The first and second floors are finished with hardwood or one square foot vinyl tiled floors, painted plaster/drywall walls, and ceilings.

The central building, addressed as 1921 Jackson Avenue, is an approximately 1,720 square foot, two and a half story, brick and wood frame constructed, vinyl sided, multi-family building, with a gabled roof, resting up on a slab foundation with no basement. The units are finished with hardwood floors and painted drywall walls and ceilings. Ceramic floor and//or wall tiles were noted in the bathrooms and kitchens. One square foot vinyl floor tiles were noted in the second floor east room.

A one-story, wood sided, two-car garage is located along the east side of the central property. Ms. Marroquin of MLC Management, the Property Manager, indicated she did not have access to the garage. From the exterior view it appeared as though a portion of the roof had collapsed.

The south building, addressed as 1917 Jackson Avenue, is an approximately 3,930 square foot, two and a half story, brick and wood frame constructed, painted brick and vinyl sided, multi-family building, with a gabled and flat roof, with a full basement. The basement is finished with concrete floors, brick walls, and a wood frame ceiling. The units are finished with hardwood, pergola, one square foot vinyl, and ceramic tiled floors, and painted plaster/drywall walls and ceilings.

The buildings on the north section of the site are located along the west side, along the Jackson Avenue frontage, with weed, grass, and native vegetation covered lawn, located between the building and to the east and west sides. A few piles of debris, including wood and old fence pieces, were noted in the lawn areas.

The south portion of the site is located on the northeast corner of Jackson Avenue and Emerson Street and is developed with four, one and two-story, rectangular shaped, residential buildings, most with basements, and one, two-story garage. The exterior portion of the site consists of weed, grass, and native vegetation lawns situated between the buildings and along the north and south sides of the property.

The west building, addressed as 1425 Emerson Street, is an approximately 2,080 square foot, two-story, brick and wood frame constructed, vinyl sided, multi-family building, with a gabled roof, with a full basement. The basement is generally finished with concrete

floors, painted brick and wood board walls, and a wood frame and plaster ceiling. The units are finished with one square foot vinyl and ceramic tiled floors and painted drywall walls and ceilings. Ceramic wall tiles were noted in the bathrooms.

The west central building, addressed as 1421 Emerson Street, is an approximately 1,390 square foot, two and a half story, brick and wood frame constructed, composite wood and shingled faced, single family building, with a gabled roof, with a full basement. The basement is generally finished with concrete floors, brick walls, and a wood frame ceiling. The first and second floors are finished with hardwood, carpeted or ceramic tiled floors and painted drywall walls and ceilings.

The east central building, addressed as 1419 Emerson Street, is an approximately 1,850 square foot, two-story, brick and wood frame constructed, stucco faced, single family building, with a gabled and dormered roof, with a full basement. The basement is generally finished with concrete floors, painted brick walls, and a wood frame and plaster ceiling. A room with paint tin paneled walls and ceilings was noted along the south side of the basement. The first and second floors are finished with hardwood or one square foot vinyl or ceramic tiled floors and painted plaster/drywall walls and ceilings.

A two-story, wood sided, car garage and storage building is located along the south side of the east central property. Ms. Marroquin of MLC Management, the Property Manager, indicated she did not have access to the building. The windows and doorways were boarded up. She was unaware what it was previously used for.

The east building, addressed as 1417 Emerson Street, is an approximately 660 square foot, one-story, wood frame constructed, painted shingle and plywood faced, single family building, with a gabled roof, with no basement. The interior is finished with one square foot vinyl tiled floors and painted plaster/drywall walls and ceilings.

The buildings on the south section of the site are located along the south side, along the Emerson Street frontage, with weed, grass, and native vegetation covered lawns, located between the buildings and to the north and south sides. Several piles of wood chips and mixed dirt, concrete pieces, and gravel were noted along the north side of the site. Ms. Marroquin, the Property Manager, did not know what the piles of wood chips or mixed debris were from.

Pole mounted transformers are located along the alleyway between the two portions of the subject site.

The property is relatively level in topography, with no significant grade change noted across the surface. The subject site is approximately 600-feet above mean sea level according to the Evanston, Illinois 7.5-Minute Quadrangle USGS Topographic Maps drawn for the area.

3.2 Site Vicinity General Characteristics and Use

The site is located on the near northwest side of the City of Evanston and is Zoned R5– General Residential District (2022). It is currently surrounded by the following:

North: The subject property is bordered to the north by residential dwellings.

East: The site is bordered to the east by a public alleyway and residential dwellings.

South: The property is bordered to the south by Emerson Street. Further south are residential dwellings, Wesley Avenue, and Evanston Fire Station 1.

West: West of the site is Jackson Avenue followed by a vacant lot and residential dwellings.

4.0 User Provided and Interview Information

The tasks below are to be performed by or on behalf of a party seeking to qualify for an LLP to CERCLA Liability (the User). The EP shall request that the User provide the results of these tasks as such information can assist the EP in identifying Recognized Environmental Conditions (RECs). Copies of information discussed in this section are included in Appendix A.

4.1 Title Records

Gabriel was not provided with an historical chain of title search including past ownership, deeds, environmental disclosures, environmental liens, environmental cleanup liens, leases/subleases, conveyances, and deed restrictions from the User.

4.2 Environmental Liens or Activity and Use Limitations (AULs)

Gabriel was not provided with Environmental Lien, Environmental Cleanup Liens, and Environmental Deed Restrictions and Environmental Use Limitations (AULs) for the subject site. We were not provided with a Commitment for Title or other Title documentation for the site, although requested.

Therefore, it is the responsibility of the User of this report to obtain and review that information for any environmental liens or AULs for the site.

4.3 Valuation Reduction for Environmental Issues

A recent appraisal was not provided.

The User should review an appraiser's valuation report to ensure the property is consistent

with the fair market value.

4.4 Interview Information and Specialized Knowledge

Ms. Victoria Kathrein, the current owner, indicated that she has purchased the properties over the years, with the first bought about 20 years ago and the last purchased about three years ago. She indicated that she had planned to demolish the properties, and had conducted asbestos inspections and completed Cook County environmental permits. Ms. Kathrein was not aware of any underground storage tanks on site.

Ms. Monica Marroquin of MLC Management, the Property Manager, indicated that they had been managing the property for about one year and that all but the 1421 Emerson Street building had been vacant since they started at the property. She indicated that the 1421 Emerson Street building has been vacant for about six months. She was not aware of any environmental issues at the subject site.

Mr. Paul Zalmezak of the City of Evanston, the prospective purchaser, indicated that plans call for the buildings on site to be deconstructed or demolished. The property will then be marketed for redevelopment with affordable or mixed-income housing.

If the user has any specialized knowledge or experience that is material to Recognized Environmental Conditions (RECs) in connection with the operation and use of the property, it is the User's responsibility to communicate any information based on specialized knowledge to the environmental professional.

4.5 User Questionnaire

An ASTM E1527-13 User Questionnaire was provided to Mr. Paul Zalmezak of the City of Evanston, the prospective purchaser. At the time of this report we had not yet received a copy the competed Questionnaire.

4.6 Other Information Provided

Gabriel was provided with seven Asbestos Inspection Reports performed for each residential building, performed by Benson Environmental and dated November 4, 2021. The asbestos inspections were performed due to the planned demolition of the buildings. None of the samples taken were positive for asbestos.

Samples taken and analyzed for asbestos content from 1917 Jackson Avenue included asphalt material from the roof and exterior wall, drywall, and two types of one-square foot vinyl floor tiles.

Samples taken and analyzed for asbestos content from 1921 Jackson Avenue included asphalt material from the roof of the house and garage, rubber material from the house roof, and drywall from two locations.

Samples taken and analyzed for asbestos content from 1925 Jackson Avenue included asphalt material from the roof, two types of one-square foot vinyl floor tiles, and drywall from two locations.

Samples taken and analyzed for asbestos content from 1413 Emerson Street included asphalt material from the roof and exterior wall, plaster, and two types of one-square foot vinyl floor tiles.

Samples taken and analyzed for asbestos content from 1419 Emerson Street included asphalt material from the roof of the house and garage, stucco wall exterior, plaster, and one-square foot vinyl floor tile.

Samples taken and analyzed for asbestos content from 1421 Emerson Street included asphalt material from the roof and drywall from three locations.

Samples taken and analyzed for asbestos content from 1425 Emerson Street included asphalt material from the roof and side of the house, drywall, and two types of one-square foot vinyl floor tiles.

No additional information was provided to us, including but not limited to: previous Environmental Site Assessment/Phase I ESAs, soil boring information, AULs, environmental liens, contact names and telephone numbers of previous owners, or other environmental information for the subject site.

5.0 Site History

The history of the site was investigated in order to determine whether previous usage of the property might affect current environmental conditions on the site. Copies of the historical documentation reviewed are included in Appendix B.

5.1 Local Municipality Information

A Freedom of Information Act (FOIA) was submitted to the City of Evanston, to review permits and records of environmental importance for the site.

The City Clerk responded via email the Fire Department did not have any records with regards to fire inspections, hazardous wastes, or underground storage tanks at the site.

Permit records for the site were also searched in the City of Evanston online database. Permits were found for the installation of a temporary construction fence, alarm installation, electrical work, exterior remodeling, and demolition. No records of environmental concern were found.

5.2 Fire Insurance Maps

Sanborn Maps for the site provided by Environmental Data Resources, Inc. (EDR) were available for the years 1899 through 2005.

The 1899 Map shows the north portion of the site as developed with three residential dwellings and three sheds. The south portion is developed with four residential dwellings, four sheds, and a building (current garage/storage building) identified as metal works/wagon shed. Many of the building appear to be portions of the present day subject buildings. West is Jackson Avenue followed by residential dwellings and vacant lots. East is a public alley and residential dwellings. South of the site is Emerson Street followed by residential dwellings and vacant lots. North are residential dwellings.

The 1920 Map continues to show the north portion of the site as developed with three residential dwellings and three sheds. The south portion is developed with four residential dwellings, four sheds, and a building identified as tin shop . West is Jackson Avenue followed by residential dwellings. East is a public alley and residential dwellings. South of the site is Emerson Street followed by residential dwellings and vacant lots. North are residential dwellings.

The remaining Maps (1946-2004) show the north portion of the site as developed with three residential dwellings and four garages/sheds. The south portion is developed with four residential dwellings, four garages/sheds, and a building identified as tin shop. West is Jackson Avenue followed by residential dwellings, with a vacant lot shown by 1987. East is a public alley and residential dwellings. South of the site is Emerson Street followed by residential dwellings and vacant lots, with a fire station replacing the vacant lot by 2004. North are residential dwellings.

5.3 City Directories

City Directories published between 1958 through 2017 were provided from EDR and included Haines Criss Cross Directory, EDR Digital Archive , and Hill Donnelly's Criss Cross Directory. Listings for the subject site were found from 1958 to 2017.

Listings for the subject site addressed as 1917-25 Jackson Ave & 1413-25 Emerson St include residential listings, consisting of individual tenant names, found from 1958 to 2017.

Listings for surrounding sites along Jackson Avenue and Emerson Street are generally residential, with a few commercial listings noted along Emerson Street (fire station, Rick's Food Mart, Cannon Bros, Frank's Record Shop, Robinson Service Station).

One record of environmental note was found for surrounding sites, consisting of Robinsons Service Station at 1332 Emerson Street in 1962. That issue is further discussed in Section 6.7-UST.

5.4 Aerial Photographs

Historical aerial photographs were obtained from Environmental Data Resources (EDR) for the years 1938 through 2017.

All of the aerials show the subject site developed with seven residential buildings and several sheds/garages. It is difficult to discern the exact number of sheds/garages on site over the years due to the small scale and poor image quality. Surrounding sites are heavily developed with residential dwellings. The fire station is noted to the southeast by 1999.

5.5 Topographic Maps

Historical topographic maps prepared by the United States Geological Survey (USGS) for Evanston, Illinois 7.5-minute quadrangle were supplied to us by EDR for the years 1899 through 2018.

The 1899 and 1928 maps shows the subject site developed with buildings (dark rectangles). Surrounding sites are heavily developed. Surrounding roadways are noted in their general current configuration.

The remaining maps from 1953 through 2018 show the area as shaded by the USGS which indicates dense development where only large structures and sites with general community interest (i.e. parks, churches, governmental buildings, and schools) are shown. A fire station is shown southeast of the site by 2012.

6.0 Scope Environmental Considerations

Ms. Nell Rhoades, an Environmental Professional (EP) of Gabriel Environmental Services Field Services Staff surveyed the site on Wednesday, August 17, 2022, where we were escorted by Ms. Monica Marroquin of MLC Management, the Property Manager. During the survey, we attempted to assess the subject property and surrounding sites with their relevance to environmental considerations with respect to recognized environmental conditions.

Selected photos taken at the time of our inspection are included in Appendix D.

6.1 Hazardous Substances, Petroleum Products and Wastes

At the time of inspection the buildings were vacant and unoccupied, and had been for about six months to one year, and no hazardous substances were observed on site.

No hazardous wastes were generated or observed on the subject property at the time of the property visit. The subject site is **not** listed as a current or former RCRA Generator of hazardous wastes.

As the buildings are vacant, no refuse is currently generated on site. No dumpsters were noted at the property.

6.2 Soil Conditions

Soil Classification

Review of the U.S. Department of Agriculture (USDA) Soil Conservation Service State Soil Geographic (STATSGO) dataset provided by Environmental Data Resources, Inc. (EDR) indicates that this property is underlain by Urban Land. Urban Land is not prime farmland, and further specific information (due to the mixed composition) is not provided. Other components of soils in the area of the site include silt loam, sandy loam, and sand.

Soil boring information was not provided to us or available for the site.

Visual Observations

No chemical spillage or staining was noted in the areas inspected in the subject buildings.

No evidence of dumping was noted on the exterior portions of the property, other than piles of mixed dirt and concrete, at the time of Gabriel's inspection.

6.3 Vapor Migration

There were no indications that Vapor Migration would be a concern for the site based on the identified historical and current usage of the property and adjoining sites.

6.4 Polychlorinated biphenyls, PCBs

Pole mounted transformers are located along the public alleyway situated between the north and south portions of the site. Transformers in the area are maintained by Commonwealth Edison, who is responsible for the maintenance and upkeep of the units.

Individual electrical panels and circuit breakers were noted in each building with various manufacturers and amp ratings. These types of electrical devices do not typically contain PCBs. At the time of inspection there was no electrical service to the subject site.

No elevators or hydraulic lifts were noted in the buildings.

6.5 Potable Water Source

The water supply for the subject site is from the City of Evanston. This supply is from Lake Michigan, not wells, and the water is treated before consumption by the public.

6.6 Wastewater Discharges

Wastewater discharges at the site consist solely of sanitary wastes. This effluent is discharged to the Metropolitan Water Reclamation District of Greater Chicago (MWRDGC).

No triple trap oil and water separator was noted in the buildings. There was no evidence of a septic system, storm water retention basin, pits, ponds, lagoons, or waste impoundment at the subject site.

6.7 Environmental Records Review

Data Base	Search Radius	Within 1/8 mile	1/8-1/4 mile	1/4-1/2 mile	1/2-1 mile	Subject site
NPL	**1.0 mile**	0	0	0	0	N
DNPL	**0.5 mile**	0	0	0		N
SEMS	**0.5 mile**	0	0	0		N
SEMS Archive	**0.5 mile**	0	0	0		N
CORRACTS	**1.0 mile**	0	0	0	**2**	N
RCRA-TSD	**0.5 mile**	0	0	0		N
RCRA-LQG	**0.125 mile**	0				N
RCRA-SQG	**0.125 mile**	**1**				N
RCRA-VSQG	**0.125 mile**	**2**				N
ERNS/SPILLS	**site only**					N
SWF/LF	**0.5 mile**	0	0	0		N
UST	**0.125 mile**	**7**				N
LUST	**0.5 mile**	**8**	**12**	**20**		N
AUL/EIC	**0.125 mile**	**2**				N
SRP	**0.5 mile**	**2**	**2**	**6**		N
BROWNFIELDS	**0.5 mile**	**1**	0	0		N

The list of definitions and content of these environmental databases can be found in Appendix E of this report.

Only the records deemed suspect Recognized Environmental Conditions are discussed in this section. A copy of the complete Environmental Data Resources (EDR) Radius Map Report is included in Appendix C of this report.

RCRA

There are **three** RCRA hazardous waste generator located within one-eighth mile of the subject property.

The closest RCRA site is a VSQG listed as Robinson Bus Service at 1332 Emerson Street and located about 100 feet southeast of the site, across Emerson Street. They are listed as generating ignitable wastes (hazardous waste code D001). No violations were found.

Based on the distance of that site, the absence of violations, and engineered barriers (roads, buried utilities), we do not believe that site would be a REC.

The remaining RCRA sites are located in excess of 275 feet away and based upon that distance and the prevailing soil types in the area, we do not believe they would be RECs.

USTs

There were **no** *registered* USTs (or ASTs) at the subject site. No visual evidence of USTs was observed on site at the time of inspection. No historical records were found indicating USTs on site.

There are **seven** registered UST sites located within one-eighth mile of the subject property.

The closest UST site is listed as Wesley @ Emerson E Corner Lot and addressed as 1332 Emerson, which is located about 100 feet southeast of the site, across Emerson and Wesley Street, and is currently improved with a fire station. That site was identified as Robinson Service Station on city directories from 1962. That site is listed as having two used oil tanks (550 and 1,000-gallon), listed as removed in 1995. That site **is** not included on the IEPA LUST database.

Based on the absence of a reported release at the time of removal, the distance of that site and engineered barriers (roads, buried utilities), and the general direction of groundwater flow, which is towards the east and cross gradient from the subject site, we do not believe that site would be a REC.

No visual indications of USTs were noted on adjacent properties when viewed from the public right-of-way.

The remaining UST sites are located in excess of 390 feet away and based upon that distance and the prevailing soil types in the area, we do not believe they would be RECs.

LUST

There are **eight** LUST sites located within 1/8 mile of the subject site.

The closest LUST site is listed in the database search as Robinson Bus Service/Robinson Bus Rental and addressed as 1528 Emerson Street, which is located about 390 feet southwest of the site. That site accounts for two of the LUST listings.

A diesel release was reported on January 18, 2000 and LUST incident #20000092 was recorded. 20 and 45-Day reports were completed for the site on April 19, 2000, and submitted to the IEPA for review. A Non-LUST letter was issued on January 5, 2001, indicating that tank is not subject to LUST regulations. Therefore it is possible that

contamination remains at that site.

A second diesel release was reported on June 24, 2009 and LUST incident #20090690 was recorded. 20 and 45-Day reports were completed for that site on July 30, 2009 and August 10, 2009, respectively, and submitted to the IEPA for review. They issued an NFR letter on November 16, 2010 closing the incident.

Based on the issuance of an NFR letter, the distance of that site, and the engineered barriers (roads, buildings, buried utilities) between that site and the subject property, we do not believe that site would be a REC.

The remaining UST sites are located in excess of 450 feet away and based upon that distance and the prevailing soil types in the area, we do not believe they would be RECs.

SRP

There are **two** SRP sites located within 1/8 mile of the subject site.

The closest SRP site is listed in the database search as Bishop Freeman Company and addressed as 1600 Foster Street, which is located about 450 feet west of the site. That site was enrolled in the SRP on November 15, 2011. A comprehensive NFR was issued on October 30, 2013, with engineered barriers consisting of concrete, BCT, and alternate barrier, use of the groundwater ordinance, and worker caution.

Based on the NFR status, the distance of that site, and the engineered barriers in between, (roads, old railroad tracks, buildings, buried utilities), we do not believe that site would be a REC.

The remaining SRP site is located in excess of 800 feet away, and based upon that distance, engineered barriers and the prevailing soil types in the area, we do not believe it would be a REC.

EIC

There are **two** EIC sites located within 1/8 mile of the subject site.

The EIC site is listed Bishop Freeman Corp and addressed as 1600 Foster Street, which is located about 450 feet west of the site. It is listed as having institutional and engineering controls consisting of engineered barriers (concrete, BCT, alternate barrier), industrial/commercial land usage, worker caution, and the use of the groundwater ordinance. The site was issued an NFR letter through the SRP in 2013.

Based on the NFR status, the distance of that site, and the engineered barriers in between, (road, old train tracks, buildings, buried utilities), we do not believe that EIC site would be a REC.

The remaining EIC site is located in excess of 800 feet away, and based upon that distance, engineered barriers and the prevailing soil types in the area, we do not believe it would be a REC.

Brownfields

There is **one** Brownfield site located within 1/8 mile of the subject site.

The Brownfield site is listed Bishop Freeman Corp and addressed as 1600 Foster Street, which is located about 450 feet west of the site. That site is listed as a 2.34 acre site with contaminants listed as hazardous substances. The completion date is listed as November 17, 2010.

Based on the NFR status, the distance of the site, and the engineered barriers in between, (road, old train tracks, buildings, buried utilities), we do not believe that Brownfield site would be a REC.

7.0 Non-Scope Considerations

The following environmental issues have no bearing on CERCLA liability as defined by the ASTM E1527-13 standard, but do pose environmental business risks that may impact the value of the subject property.

7.1 Air Emissions

At the time of inspection the buildings on the property were vacant and unoccupied and had been for about 6 months to over a year. Natural gas fueled furnaces or boilers were noted in some of the residences, however, there was no natural gas service to the property. Therefore no air emissions were noted on site.

7.2 Asbestos

At the time of this inspection, we looked for potential asbestos containing materials. No sprayed on or thermal systems insulation was observed.

We observed plaster/drywall (tape and joint compound) throughout the residential buildings inspected. Those materials were in fair condition, with several areas of holes or water damage noted.

Ceramic floor and/or wall tiles of various colors were noted in the buildings addressed as 1921 and 1925 Jackson Avenue and in 1419, 1421, and 1425 Emerson Street. In our experience, ceramic tiles and their associated mastic do not contain friable asbestos.

One square foot vinyl tiled floors of various color s were noted in the buildings addressed as

1921, 1917, and 1925 Jackson Avenue and in 1417, 1419, and 1425 Emerson Street. These materials were all in fair condition with areas of broken or missing tiles noted.

Asbestos Inspection Reports were performed for each residential building and associated garages, performed by Benson Environmental and dated November 4, 2021. The asbestos inspections were performed due to the planned demolition of the buildings. Materials sampled included asphalt or rubber material from roofs or siding, drywall, plaster, and vinyl floor tiles. None of the samples collected and analyzed were found to contain asbestos.

Based on the 2021 Asbestos Inspection Reports it appears that no asbestos containing materials are located in the subject buildings on site.

7.3 Lead Paint Hazards

Areas of flaking or peeling paint were observed in the interiors of the buildings. Due to the age of the buildings, constructed in the late 1800s/early 1900s, it is possible that lead paints were used in the past (lower layers).

Gabriel recommends that contractors performing demolition activities be notified of the possibility of lead paints so that they can use Lead Safe Work practices to minimize exposure.

7.4 Radon

The Illinois Department of Nuclear Safety recently conducted a statewide screening for indoor radon to determine whether there are particular regions within Illinois, which are more prone to indoor radon problems than others. The results of this study indicate that the radon tests conducted in Cook County found that 17-21% of tests conducted are above the EPA guideline of 4.0 pico Curies per liter (pCi/l).

Several of the buildings have basements, however, all of the buildings were vacant and unoccupied at the time of inspection. Plans called for the current buildings to be demolished.

If in the future usage of the property, if any below grade areas will be used as residential space, it would be prudent to perform a preliminary radon screening in those areas to determine radon levels and if further action or radon mitigation would be required.

7.5 Storm Water Discharges

Under the current NPDES permitting program, the subject property is not required to obtain a storm water discharge permit because the operations conducted on-site do not meet the definition of "industrial activity" and the site is in an area with a combined sewer system.

Any excess storm water discharge from the property flows to the City of Evanston combined

storm sewer system along Jackson Avenue and Emerson Street.

7.6 Flood Management

The FIRM Map (Map Number 17031C0265J dated August 19, 2008) classifies the site and surrounding sites to be in Zone X “areas of minimal flooding”.

7.7 Wetlands

We did not observe any wetlands located on the subject property. Wetland maps published for this area did not find any jurisdictional wetlands on the property.

7.8 Mold

No mold growth or flowering was observed in the buildings on site.

8.0 Findings and Opinion

This Phase I Environmental Site Assessment was requested by Mr. Paul Zalmezak of the City of Evanston, the prospective purchaser, and initiated in order to determine the current environmental conditions and potential hazards at 1917-25 Jackson Avenue & 1413-25 Emerson Street, Chicago, Illinois 60657. In doing so, Gabriel reviewed pertinent federal, state, and local databases, coupled with an on-site inspection.

The subject property consists of two rectangular shaped parcels of land, bisected by a public alleyway, totaling about 41,640-square foot, located on the northeast corner of Emerson Street and Jackson Avenue.

The north portion of the site is developed with three, two-story, rectangular shaped, multi-family buildings, with basements, and one, one-story garage. The south portion of the site is developed with four, one and two-story, rectangular shaped, residential buildings, most with basements, and one, two-story garage. At the time of inspection the buildings were vacant and unoccupied and had been for six months to over a year, with no current water, electricity, or natural gas service.

The exterior portion of the site consists of weed, grass, and native vegetation lawns situated between and in front/back of the buildings. It should be noted that the vegetation in several areas was high and dense limiting the views of the exterior portion of the site.

According to the various sources of information reviewed the subject site was developed with portions of the current residential dwellings by the late 1800s/early 1900s. The property appears to have mostly been used residentially with the two-story garage on the south portion of the site historically used commercially (metal works, tin shop).

Recognized Environmental Conditions (RECs)

Following completion of this Phase I ESA, we found **no** suspected recognized environmental conditions (RECs). No further investigation is recommended at this time.

9.0 Conclusions

We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E 1527-13, at 1917-25 Jackson Avenue & 1413-25 Emerson Street, Evanston, Illinois 60201. Any exceptions to, or deletions from, this practice are described in Appendix G of this report.

This assessment has revealed **no** evidence of recognized environmental conditions in connection with the property.

All years referenced herein denote the applicable tax year (i.e., the year for which taxes were assessed). Parcels may from time to time be consolidated or subdivided. If information regarding a particular PIN appears to be missing for one or more tax years, it is possible that the PIN has changed due to a consolidation or subdivision. Users may contact the Cook County Clerk's Office for information regarding PIN lineage. Users should also note that the information displayed on this site does not include special assessments (which are billed and collected by municipalities) or omitted taxes (which are assessed on an ad hoc basis by the Cook County Assessor's Office). Please direct inquiries regarding the status of special assessments to your municipality. Questions regarding omitted taxes should be directed to the Assessor's Office.

Note: This printout cannot be used as a tax bill.

Legend

SEE FIS REPORT FOR DETAILED LEGEND AND INDEX MAP FOR FIRM PANEL LAYOUT

SPECIAL FLOOD HAZARD AREAS
- Without Base Flood Elevation (BFE) *Zone A, V, A99*
- With BFE or Depth *Zone AE, AO, AH, VE, AR*
- Regulatory Floodway

OTHER AREAS OF FLOOD HAZARD
- 0.2% Annual Chance Flood Hazard, Areas of 1% annual chance flood with average depth less than one foot or with drainage areas of less than one square mile *Zone X*
- Future Conditions 1% Annual Chance Flood Hazard *Zone X*
- Area with Reduced Flood Risk due to Levee. See Notes. *Zone X*
- Area with Flood Risk due to Levee *Zone D*

OTHER AREAS
- NO SCREEN Area of Minimal Flood Hazard *Zone X*
- Effective LOMRs
- Area of Undetermined Flood Hazard *Zone D*

GENERAL STRUCTURES
- Channel, Culvert, or Storm Sewer
- Levee, Dike, or Floodwall

OTHER FEATURES
- 20.2 / 17.5 Cross Sections with 1% Annual Chance / Water Surface Elevation
- Coastal Transect
- Base Flood Elevation Line (BFE)
- Limit of Study
- Jurisdiction Boundary
- Coastal Transect Baseline
- Profile Baseline
- Hydrographic Feature

MAP PANELS
- Digital Data Available
- No Digital Data Available
- Unmapped

N

The pin displayed on the map is an approximate point selected by the user and does not represent an authoritative property location.

This map complies with FEMA's standards for the use of digital flood maps if it is not void as described below. The basemap shown complies with FEMA's basemap accuracy standards

The flood hazard information is derived directly from the authoritative NFHL web services provided by FEMA. This map was exported on 8/15/2022 at 5:19 PM and does not reflect changes or amendments subsequent to this date and time. The NFHL and effective information may change or become superseded by new data over time.

This map image is void if the one or more of the following map elements do not appear: basemap imagery, flood zone labels, legend, scale bar, map creation date, community identifiers, FIRM panel number, and FIRM effective date. Map images for unmapped and unmodernized areas cannot be used for regulatory purposes.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Gabriel Environmental Services were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

Site Name:

1917-1925 Jackson Ave/1413-
1917-1925 Jackson Ave/1413-
Evanston, IL 60201
EDR Inquiry # 7089761.8

Client Name:

Gabriel Environmental Services
1421 North Elston Avenue
Chicago, IL 60622
Contact: Nell Rhoades

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

Search Results:

Year	Scale	Details	Source
2017	1"=500'	Flight Year: 2017	USDA/NAIP

EDR Historical Topo Map Report

08/17/22

Site Name:

1917-1925 Jackson Ave/1413-
1917-1925 Jackson Ave/1413-
Evanston, IL 60201
EDR Inquiry # 7089761.4

Client Name:

Gabriel Environmental Services
1421 North Elston Avenue
Chicago, IL 60622
Contact: Nell Rhoades

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by Gabriel Environmental Services were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDRs Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

Search Results:

P.O.# 0802214 NR
Project: 0802214 NR

Coordinates:

Latitude:	42.052506 42° 3' 9" North
Longitude:	-87.69243 -87° 41' 33" West
UTM Zone:	Zone 16 North
UTM X Meters:	442701.61
UTM Y Meters:	4655837.85
Elevation:	601.00' above sea level

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527-21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

EXECUTIVE SUMMARY

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal RCRA generators

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 06/20/2022 has revealed that there are 2 RCRA-SQG sites within approximately 0.25 miles of the target property.

RCRA-VSQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-VSQG list, as provided by EDR, and dated 06/20/2022 has revealed that there are 5 RCRA-VSQG sites within approximately 0.25 miles of the target property.

Lists of state and tribal leaking storage tanks

IL LUST: The Leaking Underground Storage Tank Incident Reports contain an inventory of reported leaking underground storage tank incidents. The data come from the Illinois Environmental Protection Agency's LUST Incident Report.

A review of the IL LUST list, as provided by EDR, and dated 04/18/2022 has revealed that there are 40 IL LUST sites within approximately 0.5 miles of the target property.

Lists of state and tribal registered storage tanks

IL UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the Illinois State Fire Marshal's STC Facility List.

A review of the IL UST list, as provided by EDR, and dated 04/18/2022 has revealed that there are 20 IL UST sites within approximately 0.25 miles of the target property.

Lists of state and tribal brownfield sites

IL BROWNFIELDS: The Illinois Municipal Brownfields Redevelopment Grant Program (MBRGP) offers grants worth a maximum of $240,000 each to municipalities to assist in site investigation activities, development of cleanup , objectives and performance of cleanup activities. Brownfields are abandoned or underused industrial and/or commercial properties that are contaminated (or thought to be contaminated) and have an active . potential for redevelopment

A review of the IL BROWNFIELDS list, as provided by EDR, has revealed that there is 1 IL BROWNFIELDS site within approximately 0.5 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 06/20/2022 has revealed that there are 15 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the EDR MGP list, as provided by EDR, has revealed that there are 2 EDR MGP sites within

approximately 1 mile of the target property.

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 7 EDR Hist Auto sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

EDR RECOVERED GOVERNMENT ARCHIVES

Exclusive Recovered Govt. Archives

IL RGA LF: The EDR Recovered Government Archive Landfill database provides a list of landfills derived from historical databases and includes many records that no longer appear in current government lists. Compiled from Records formerly available from the Illinois Environmental Protection Agency in Illinois.

A review of the IL RGA LF list, as provided by EDR, has revealed that there are 6 IL RGA LF sites within approximately 0.5 miles of the target property.

IL RGA LUST: The EDR Recovered Government Archive Leaking Underground Storage Tank database provides a list of LUST incidents derived from historical databases and includes many records that no longer appear in current government lists. Compiled from Records formerly available from the Illinois Environmental Protection Agency in Illinois.

A review of the IL RGA LUST list, as provided by EDR, has revealed that there are 36 IL RGA LUST sites within approximately 0.5 miles of the target property.

Environmental Interest/Information System:
ACES (Illinois - Agency Compliance And Enforcement System) is the Illinois EPA Project to facilitate the permitting operations
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and

Environmental Interest/Information System:
ACES (Illinois - Agency Compliance And Enforcement System) is the Illinois EPA Project to facilitate the permitting operations
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FINDS:
Registry ID: 110005814146

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
ACES (Illinois - Agency Compliance And Enforcement System) is the Illinois EPA Project to facilitate the permitting operations
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
Registry ID: 110055085090

Hazardous Waste Summary:

Waste Code:	F001
Waste Description:	THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING:

PUBLIC STORAGE INC (Continued) **1000284440**

TETRACHLOROETHYLENE, TRICHLORETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F002
Waste Description: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F003
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F005
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: U044
Waste Description: CHLOROFORM (OR) METHANE, TRICHLORO-

Waste Code: U220
Waste Description: BENZENE, METHYL- (OR) TOLUENE

Waste Code: U226
Waste Description: ETHANE, 1,1,1-TRICHLORO- (OR) METHYL CHLOROFORM

Waste Code: U239
Waste Description: BENZENE, DIMETHYL- (I,T) (OR) XYLENE (I)

Environmental Interest/Information System:
AFS (Aerometric Information Retrieval System (AIRS) Facility

UNITED STATES POSTAL SERV-EVANSTON (Continued) **1004478336**

Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.
ACES (Illinois - Agency Compliance And Enforcement System) is the Illinois EPA Project to facilitate the permitting operations
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
ACES (Illinois - Agency Compliance And Enforcement System) is the Illinois EPA Project to facilitate the permitting operations
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
ACES (Illinois - Agency Compliance And Enforcement System) is the Illinois EPA Project to facilitate the permitting operations
US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
ACES (Illinois - Agency Compliance And Enforcement System) is the

JOHN J CAHILL INC (Continued) **1000614020**

Illinois EPA Project to facilitate the permitting operations
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.
AIR EMISSIONS CLASSIFICATION UNKNOWN
ACES (Illinois - Agency Compliance And Enforcement System) is the Illinois EPA Project to facilitate the permitting operations
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and

BP SERVICE STATION #5309 (Continued) **1000453104**

corrective action activities required under RCRA.

Hazardous Waste Summary:

Waste Code:	D000
Waste Description:	Not Defined
Waste Code:	D003
Waste Description:	REACTIVE WASTE
Waste Code:	F001
Waste Description:	THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLORETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
Waste Code:	F002
Waste Description:	THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND

INDUSTRIAL ELECTROPLATING LABS (Continued) **1000428334**

F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F006
Waste Description: WASTEWATER TREATMENT SLUDGES FROM ELECTROPLATING OPERATIONS, EXCEPT FROM THE FOLLOWING PROCESSES: (1) SULFURIC ACID ANODIZING OF ALUMINUM; (2) TIN PLATING ON CARBON STEEL; (3) ZINC PLATING (SEGREGATED BASIS) ON CARBON STEEL; (4) ALUMINUM OR ZINC-ALUMINUM PLATING ON CARBON STEEL; (5) CLEANING/STRIPPING ASSOCIATED WITH TIN, ZINC, AND ALUMINUM PLATING ON CARBON STEEL; AND (6) CHEMICAL ETCHING AND MILLING OF ALUMINUM.

Waste Code: F007
Waste Description: SPENT CYANIDE PLATING BATH SOLUTIONS FROM ELECTROPLATING OPERATIONS.

Waste Code: F008
Waste Description: PLATING BATH RESIDUES FROM THE BOTTOM OF PLATING BATHS FROM ELECTROPLATING OPERATIONS IN WHICH CYANIDES ARE USED IN THE PROCESS.

Waste Code: F009
Waste Description: SPENT STRIPPING AND CLEANING BATH SOLUTIONS FROM ELECTROPLATING OPERATIONS IN WHICH CYANIDES ARE USED IN THE PROCESS.

Narrative:	Not reported
Follow Up:	Please note this report from 11/30/2021 has been amended to show gasoline added within a 1600-gallon tank. Also, please see the content of the email from Christopher Cailles, dated December 1, 2021; Mr. Martin, Thank you for your time. As discussed, please find attached a print out of the incident report for 20210983. I am amending the release to include gasoline per the direction of the OSFM fire inspector that is presently on-site for the tank removal process. I have added comments to the attached to denote the additions required. I have also added the below discussion to the narrative portion at the end of the report (presently there is no narrative). Initial report of diesel release was based upon detectable concentrations of contaminants below the Illinois EPA's most stringent levels as identified by pre-removal soil sampling. The addition of the release of gasoline is per OSFM direction due to field observations during the tank removal. All three of the tanks have been removed, the two (2) 10,000-gallon diesel tanks on November 30, 2021, and the 6,000-gallon gasoline tank on December 1, 2021. Also, the additional detection of gasoline was discovered at 8:45 am on 12/1/2021. Thank you for your time and assistance in amending this incident. Sincerely, Christopher Cailles DAI Environmental, Inc. 27834 North Irma Lee Circle Lake Forest, IL 60045

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

LF SPECIAL WASTE: Special Waste Site List

These landfills, as of January 1, 1990, accept non-hazardous special waste pursuant to the Illinois EPA Non-Hazardous Special Waste Definition. List A includes landfills that may receive any non-hazardous waste, Non-Regional Pollution Control Facilities are so noted. List B includes landfills designed to receive specific non-hazardous wastes. List B landfills are designated as a Regional Pollution Control Facility by RPCF, or Non-Regional Pollution Control Facility by Non-RPCF.

LUST TRUST: Underground Storage Tank Fund Payment Priority List
In case sufficient funds are not available in the Underground Storage Tank Fund, requests for payment are entered on the Payment Priority List by "queue date" order. As required by the Environmental Protection Act, the queue date is the date that a complete request for partial or final payment was received by the Agency. The queue date is "officially" confirmed at the end of the payment review process when a Final Decision Letter is sent to the site owner.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

SSTS: Section 7 Tracking Systems

Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HWAR: Hazard Waste Annual Report

Each year, Illinois hazardous-waste generators tell the Illinois EPA the amounts and kinds of hazardous waste they produced during the previous year. Generators indicate by code the types of wastes produced and the steps they took to manage these wastes. If some or all of these wastes were sent to commercial treatment, storage, and disposal facilities (TSDFs), that information and the identity of each receiving facility also are submitted. Illinois TSDFs likewise report the types and quantities of wastes received from in-state and out-of-state generators; they also report the procedures they used to manage these wastes.

UIC: Underground Injection Wells

Injection wells are used for disposal of fluids by "injection" into the subsurface. The construction of injection wells range from very technical designs with twenty-four hour monitoring to simply a hole dug in the ground to control runoff. As a result of this diversity, the UIC Program divides injection wells into five different classes.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations
EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health

Elevation:	601 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	10692637 EVANSTON, IL
Version Date:	2018

EDR’s GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

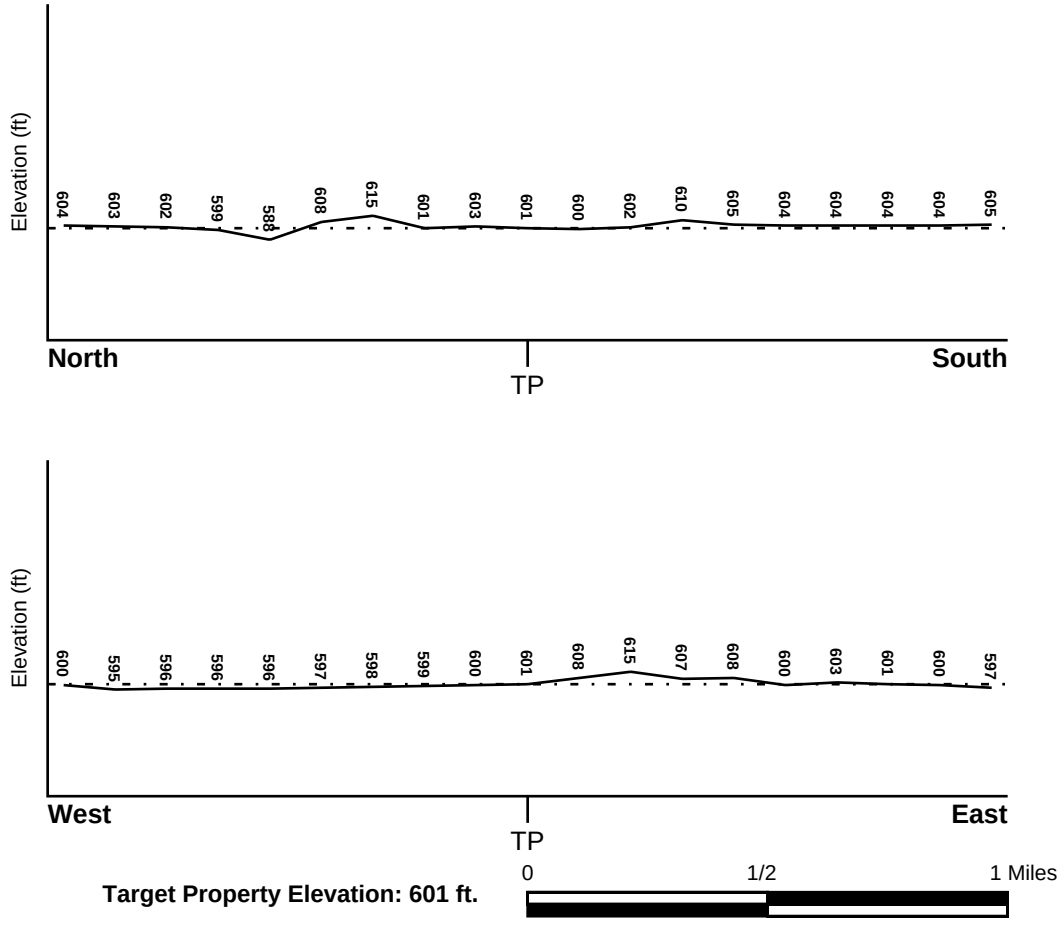
TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General West

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES



Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
17031C0265J	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
17031C0255J	FEMA FIRM Flood data
17031C0260J	FEMA FIRM Flood data
17031C0270J	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
EVANSTON	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

For additional site information, refer to Physical Setting Source Map Findings.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era:	Paleozoic
System:	Silurian
Series:	Middle Silurian (Niagoaran)
Code:	S2 *(decoded above as Era, System & Series)*

GEOLOGIC AGE IDENTIFICATION

Category: Stratifed Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBANLAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Bedrock Max: > 0 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification			
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)
1	0 inches	60 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: silt loam
fine sandy loam
loam
fine sand

Surficial Soil Types: silt loam
fine sandy loam
loam
fine sand

Shallow Soil Types: sandy loam

Deeper Soil Types: silt loam
sand
loamy sand
loam

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: Illinois State Geological Survey
Telephone: 217-333-4747

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

APPENDIX E: DEFINITIONS

Air Emissions: The Clean Air Act (CAA), enacted in 1970 and most recently amended in 1990, seeks to protect the public's health and welfare by safeguarding and improving the quality of our air. Under the CAA, the EPA sets air quality standards and relies on the states to develop programs to attain those standards. While the CAA regulates both "stationary" and "mobile" sources of air pollution, the stationary source restrictions are of primary concern to business. All facilities must meet applicable permit requirements, even if that requires new control technologies in new or expanded facilities.

All Appropriate Inquiries: That inquiry constituting all appropriate inquiries into the previous ownership and uses of the property consistent with good commercial and customary practice as defined in CERCLA that would qualify a party to a commercial real estate transaction for one of the threshold criteria for satisfying the Landowner Liability Protections.

Asbestos: Is a term used to refer to six naturally occurring silicate minerals that are composed of long and thin fibrous crystals. These crystals are made of many microscopic fibrils that can be released into the atmosphere by abrasion and other processes. Asbestos is an excellent electrical insulator, resistant to heat/fire, and chemicals.

The site was inspected for asbestos in accordance with the USEPA guidelines set forth in the "Guidance for Controlling Asbestos Containing Materials in Buildings" issued in 1985. We seek to identify the extent to which presumed friable (as being crumbled, pulverized, or reducible to a powder with hand pressure) asbestos containing materials (ACM) were used at the site. As a result, we have made no mention of items such as cement or roofing materials. This inspection only covers building materials readily visible and accessible (not under flooring, behind walls or ceilings) to our asbestos building inspector.

Bona Fide Prospective Purchaser Liability Protection: A person may qualify for this protection if such person made "all appropriate inquiries" into the previous ownership and uses of the facility in accordance with generally accepted good commercial and customary standards and practices". Knowledge of contamination resulting from all appropriate inquiries would not generally preclude this liability protection. A person must make all appropriate inquiries on or before the date of purchase and must have been purchased after January 11, 2002.

Brownfield's: Brownfield's are abandoned or underused industrial and/or commercial properties that are contaminated (or thought to be contaminated) and have an active potential for redevelopment.

Business Environmental Risk: A risk that can have a material environmental or an environmentally driven impact on the business associated with the current or planned use of a parcel of commercial real estate.

Comprehensive Environmental Response*, Compensation, and Liability Information System (CERCLIS)*: The list of sites compiled by EPA that EPA has investigated or is currently investigating for potential hazardous substance contamination for possible inclusion on the National Priorities List.

Contiguous Property Owner Liability Protection: A person may quality for this protection if, among other requirements, such person owns real property that is contiguous to, and or may be contaminated by hazardous substances from other real property that is not owned by that person. Furthermore, such person conducted all appropriate inquiries at the time of acquisition of the property and did not know or have reason to know that the property was or could be affected by a release or threatened release from the contiguous property. The all appropriate inquiries must not have resulted in knowledge of the contamination. If it does, then such person did "know" or "had reason to know" of contamination and would not be eligible for the contiguous property owner liability protection.

Controlled Recognized Environmental Condition (CREC): A recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a No Further Action/Remediation Letter (NFA/R) or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances of petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity use limitations, institutional, or engineering controls).

CORRACTS list: The list maintained by EPA of hazardous waste treatment, storage, or disposal facilities and other RCRA-regulated facilities (due to past interim status or storage of hazardous waste beyond 90 days) that have been notified by the U.S. Environmental Protection Agency to undertake corrective action under RCRA. The CORRACTS list is a subset of the EPA database that manages RCRA data.

Data Gap: A lack of or inability to obtain information required by this practice despite good faith efforts by the environmental professional to gather such information.

De Minimis Condition: A condition that generally does not present a threat to human health or the environment and that generally would not be the subject of enforcement action if brought to the attention of appropriate governmental agencies.

Engineering Controls (EC): Physical modifications to a site or facility (for example, capping, slurry walls, or point of use water treatment) to reduce or eliminate the potential for exposure to hazardous substances or petroleum products in the soil or groundwater on the property.

Environmental Lien: A charge, security, or encumbrance upon title to a property to secure the payment of a cost, damage, debt, obligation, or duty arising out of response actions, cleanup, or other remediation of hazardous substances or petroleum products upon a property.

Environmental Professional: A person meeting the education, training, and experience requirements as set forth in the ASTM Standard.

ERNS/SPILLS: The EPA's Emergency Response Notification System List of reported CERCLA hazardous substance releases or spills in quantities greater than the reportable quantity, as maintained at the National Response Center. Notification requirements for such releases or spills are codified in 40 CFR Parts 302 and 355.

Hazardous Substance: Pursuant to CERCLA 42 U.S.C. §9601 (14), as any element, compound, mixture, solution or substance designated, hazardous waste under RCRA, any toxic pollutant, any hazardous air pollutant and any imminently hazardous chemical substance.

Hazardous Waste: Any hazardous waste having the characteristics identified under or listed pursuant to section 3001 of RCRA, as amended, (42 U.S.C.§6921 (but not including any waste the regulation of which under RCRA (42 U.S.C. §6903-6992k) has been suspended by Act of Congress). RCRA is also sometimes identified as the Solid Waste Disposal Act. RCRA defines a hazardous waste, at 42 U.S.C. §6903, as: "a solid waste, or combination of solid wastes which because of its quantity, concentration, or physical, chemical, or infectious characteristics may cause, or significantly contribute to an increase in mortality or an increase in serious illness; or pose a substantial present or potential hazard to human health or the environment."

Historic Recognized Environmental Condition (HREC): A past release of any hazardous substances or petroleum products that has occurred in connection with the property, and has been addressed to the satisfaction of the applicable regulatory authority, or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls (e.g.: property use restrictions, AULs, institutional and engineering controls).

Innocent Landowner Defense: A person may qualify as one of three types of innocent land owners: (i) a person who "did not know and had no reason to know" that contamination existed on the property at the time the purchaser acquired the property; (ii) a government entity which acquired the property by escheat, or through any other involuntary transfer or acquisition, or through the exercise of eminent domain by purchase of condemnation; and (iii) a person who acquired the facility through inheritance." To qualify for the innocent landowner defense, such person must have made all appropriate inquiries on or before the date of purchase. Furthermore, the all appropriate inquiries must not have resulted in knowledge of the contamination. If it does, then such person did "know" or "had reason to know" of contamination and would not be eligible for the innocent landowner defense.

Institutional Controls (IC): A legal or administrative restriction (for example, "deed restrictions," restrictive covenants, easements, or zoning) on the use of, or access to, a site or facility to reduce or eliminate potential exposure to hazardous substances or petroleum products in the soil or groundwater on the property, or to prevent activities that could interfere with the effectiveness of a response action, in order to ensure maintenance of a condition of no significant risk to public health or the environment.

Lead in-Drinking-Water: In 1991, EPA published a regulation to control lead and copper in drinking water. This regulation is known as the Lead and Copper Rule (also referred to as the LCR). The major source of lead and copper in Drinking Water is leaching from plumbing materials or water service lines used to bring water from the water main to the building. Lead and copper can leach into drinking water through contact with the plumbing, solder, fixtures and faucets (brass), and fittings. The amount identified in drinking water will be influenced by the type and amount of minerals in the water, how long the water stays in the pipes, the amount of wear in the pipes, the water's acidity and its temperature. Exposure to lead and copper may cause health problems ranging from stomach distress to brain damage.

Lead Paint Hazards: Heavy metals have historically been added to paint to enhance their aesthetic appeal, gloss, hardness and longevity. Lead-based paint was banned from household paint production in 1978. Painted surfaces containing lead which are flaking, peeling, and subject to wear, abrasion, and remodeling activities, including scraping, sanding, and burning, can result in lead dust release, leading to a potential health hazard by inhalation or ingestion. The Lead-Based Paint Poisoning Prevention Act (LBPPPA) requires Public Housing Projects to be inspected for lead-based paint. Under the LBPPPA, a lead-based paint is defined as having a lead concentration of 0.5% (equivalent to 5,000 mg/kg). When Lead Based Paint is present workers should be cautioned to use Lead Safe Work Practice.

LUST: Leaking Underground Storage Tanks (LUST). A release of fuel product or hazardous substance from an underground storage tank that can contaminate soil, groundwater, surface waters, or affect indoor air spaces. We evaluate a list of reported LUST sites (a non-verified, unconfirmed list, which should not be used or considered as a final Agency determination regarding whether releases have occurred) at sites listed.

Mold: Molds are organisms that belong to the Fungi Kingdom. Molds can produce toxic substances called mycotoxins that may result in human health effects. Some compounds produced by molds are volatile and are released directly into the air. These are known as microbial volatile organic compounds (mVOCs). Standards or Threshold Limit Values (TLVs) for airborne concentrations of mold, or mold spores, have not been set by the American Council of Governmental Hygienists. Currently, there are no OSHA or USEPA regulations or standards for airborne mold contaminants.

NPL: The National Priorities List (NPL) identifies and ranks targets for long-term remedial action, updated by the Environmental Protection Agency once a year. It identifies the worst uncontrolled or abandoned hazardous waste sites in the United States. Factors taken into consideration prior to national priority status include: the types and quantities of wastes involved, the number of people potentially exposed, the likely pathways of exposure, and the importance and vulnerability of the underlying supply of groundwater.

Petroleum Products: Those substances within the included within the meaning of the petroleum exclusion to CERCLA, 42 U.S.C. §9601 (14), as interpreted by the courts and EPA, that is: petroleum, including crude oil or any fraction thereof which is not otherwise specifically listed or designated as a hazardous substance under Subparagraphs (A) through (F) of this paragraph, and the term does not include natural gas, natural gas liquids, liquified natural gas, and synthetic gas usable for fuel.

Polychlorinated biphenyls (PCBs): PCBs were once widely deployed as dielectric (askarels) or coolant fluids in electrical apparatus. They were also found in fluorescent light ballasts, carbonless copy paper, recycled/used oil, and heat transfer fluids. They are specifically regulated by the Toxic Substance Control Act (TSCA) of 1980. Our survey examines items that could contain, or may have been contaminated with PCBs.

Radon: Radon is a colorless, odorless radioactive gas produced by the decay of radium, uranium, and thorium. When radon becomes trapped in buildings and concentrations accumulate and increase indoors, exposure to radon can become a concern. Sometimes radon enters the home through well water. Radon is the second leading cause of lung cancer in the United States, and because it is heavier than air it is a special concern when offices or apartments are below grade.

RCRA: The Resource Conservation and Recovery Act (RCRA) of 1976 implemented Federal and State programs for the regulation of land disposal of waste materials and the recovery of materials and energy resources from the waste stream. RCRA seeks to limit releases of hazardous waste into the environment by controlling the wastes from point of generation through to disposal ("cradle to grave"). RCRA permitted TSDF facilities are sites/facilities, which treat, store, of dispose of RCRA wastes defined in 40 CFR 261.

RCRA generators are grouped into categories, depending on the amounts of hazardous wastes that are generated and the length of time these wastes are stored at the facilities. A site is listed as a Large Quantity Generator (LQG) if it generates in excess of 1,000 kg/month of non-acutely hazardous waste or over 1 kg/month of acutely hazardous waste. A site is listed as a Small Quantity Generator (SQG) if it produces between 100 kg and 1,000 kg of non-acutely hazardous wastes each month. A Very Small Quantity Generator (VSQG) produces below 100 kg/month of non-acutely hazardous waste or below 1 kg/month of acutely hazardous waste. Generators of hazardous waste must send their waste to a RCRA permitted TSD facility, which either has interim authorization or has received its Part B permit.

Recognized Environmental Condition (REC): The presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment.

Release or Threatened Release: A release or threatened release of any hazardous substance or petroleum product includes: spilling, leaking, pumping, pouring, emitting, emptying, discharging, injecting, escaping, leaching, dumping, or disposing into the environment (including the abandonment or discarding of barrels, containers and other closed receptacles containing any hazardous substance, petroleum product or pollutant or contaminant).

SRP: Each state provides a Site Remediation Program (under various names) of sites designated for clean-up. These sites include voluntary clean-ups that have been started and/or completed, Federal Facilities, Pre-Notice, Completed Remedial Action, Proposed and Pre-proposed NPL and Notice Response Action sites.

Storm Water Discharges: The USEPA published its final rule on National Pollutant Discharge Elimination System (NPDES) permitting of storm water discharges in 1990. All facilities included under the definition of "storm water discharge associated with industrial activity" must obtain an NPDES permit. Under this ruling, "storm water discharge associated with industrial activity" is defined as storm water directly related to manufacturing, processing or raw materials storage areas at an industrial plant. Regulated storm water includes discharges from industrial yards, immediate access roads, and rail lines used by carriers of raw materials, material-handling sites, refuse sites, etc., as described in the rule.

Superfund Enterprise Management System (SEMS): The Superfund Program has deployed the Superfund Enterprise Management System (SEMS), which integrates multiple legacy systems into a comprehensive tracking and reporting tool and tracks hazardous waste sites, potentially hazardous waste sites, remedial activities performed in support of EPA's Superfund Program across the United States. It should be noted, however, that a site included on a SEMS list does not necessarily pose a threat to the environment. Once a site is put on the SEMS list, the EPA performs a Preliminary Assessment which determines whether the site requires additional investigation, or whether no further action is needed. The site will remain on the SEMS list regardless of the outcome of the preliminary assessment.

Superfund Enterprise Management System Archive (SEMS Archive): The SEMS Archive tracks sites that have no further interest under the Federal Superfund Program based on available information. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken. The decision does not necessarily mean that there is no hazard associated with a given site. It only means that, based upon available information, the location is not judged to be potential NPL site.

SWF-LF: Solid wastes refers to non-hazardous residential, commercial, institutional, and industrial solid waste, which is commonly disposed of in general waste landfills. The map does not include wastes such as demolition materials or special industrial process wastes, which are disposed of in other than general waste landfills; nor are issues related to private on-site disposal of waste by industrial or other establishments included.

Underground Storage Tanks: An underground storage tank system (UST) is a tank and any underground piping connected to the tank that has at least 10 percent of its combined volume underground. Regulated USTs store either petroleum or hazardous substances. Our assessment includes a search of the UST database provided by the Office of the State Fire Marshal (OSFM). We also visually inspect the site for obvious signs of tank placement, such as gas pumps, fill ports, and manways. Not so obvious tank related items such as vent stacks, petrometers, pipes, valves, raised concrete, etc. are also included in our inspection.

User: The party seeking to use Practice E1527 to complete an environmental site assessment of the property. A user may include, without limitation, a potential purchaser of property, a potential tenant of property, an owner of property, a lender or a property manager. The user has specific obligations for completing a successful application of this practice.

Wastewater: Water that is or has been used in an industrial or manufacturing process, conveys or has conveyed sewage, or is directly related to manufacturing, processing, or raw materials storage areas at an industrial plant. Wastewater does not include water originating on or passing through or adjacent to a site, such as stormwater flows, that has not been used in industrial or manufacturing processes, has not been combined with sewage, or is not directly related to manufacturing, processing, or raw materials storage areas at an industrial plant.

Water Sources and Discharges: The water source (public or private) is evaluated with respect to compliance with regulations and the maximum contaminant levels set by the Safe Drinking Water Act and the Illinois Environmental Protection Agency. The Clean Water Act (CWA), was promulgated to "restore and maintain the chemical and biological integrity of the nation's waters." Any company that discharges wastewater into the nation's "navigable waters" or a public sewer system must comply with CWA requirements. The CWA contains extensive enforcement measures. In addition to the "self-enforcement" of businesses and publicly owned treatment works (POTWs) imposed by the CWA's monitoring and reporting requirements, the Act includes broad inspection powers and many enforcement approaches, including administrative orders, civil suits, and criminal prosecution.

Wetlands: Wetlands are evaluated using three indicators: hydrology, hydrophytic vegetation, and hydric soils. The Clean Water Act requires a permit before dredged or fill material may be discharged into regulated wetlands (known as Jurisdictional Wetlands). The Army Corps of Engineers has primary responsibility for making wetlands jurisdictional determinations and issuing wetlands permits.

APPENDIX F: SIGNATURES OF ENVIRONMETNAL PROFESSIONALS

We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in 312.10 of 40 CFR 312.

We have the specific qualifications based on education, training and experience to assess a property of the nature, history and setting of the subject property. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Submitted by:

Nell E. Rhoades .
Project Manager
Environmental Professional

Reviewed by:

Natalie K. Neuman
Group Leader Assessment Services
Environmental Professional

Qualifications of the persons noted above who were involved with this ASTM E1527-13/AAI compliant Phase I Environmental Site Assessment and employed by Gabriel Environmental Services can be found below.

Nell Rhoades: Project Manager

Related Experience

Ms. Rhoades has more than 19 years of environmental experience. Ms. Rhoades also has two years of experience as a lab analyst in Gabriel's NELAC certified laboratory.

For the past 18 years, Ms. Rhoades has performed hundreds of Phase ½ ™ and Phase I Environmental Site Assessments. She has extensive experience in conducting investigations of industrial, commercial, and residential properties throughout the Chicagoland area.

Ms. Rhoades qualifies as an Environmental Professional (EP) under the EPA's All Appropriate Inquiry (AAI) regulations.

Education

University of Miami, FL, B.S. Marine Science and Biology, minors in Chemistry and Geology, 2000.

NATALIE K. NEUMAN: Group Leader Assessment Services

Related Experience

Ms. Neuman has over twenty years' experience in the environmental services industry. Each year, she personally performs numerous Phase I Environmental Site Assessments, is responsible for assigning and reviewing all incoming Phase I projects, has conducted air monitoring, wet chemistry laboratory analysis, lead paint inspections and radon testing. She has also completed coursework in the Microscopic Identification of Asbestos and performs asbestos identification.

Ms. Neuman specializes in Phase I surveys of industrial properties, gas stations and dry cleaners, and has extensive experience in the review of Phase II Soil Investigations, soil analysis reports, regulatory data, and available historical resources.

Education

University of Illinois at Chicago, B.S. Biology, 1994/Governor's State University, Graduate Courses in Environmental Biology - ABT, 1996-1998

Professional Designations

McCrone Research Institute, Chicago, IL, Microscopic Identification of Asbestos

APPENDIX G: SIGNIFICANT ASSUMPTIONS/STATEMENT OF LIMITATIONS & REFERENCES

Significant Assumptions

The following assumptions are made by Gabriel in this report. Gabriel relied on information derived from secondary sources including governmental agencies, the client, designated representatives of the client, property contact, property owner, property owner representatives, computer databases, and personal interviews. Except as set forth in this report, Gabriel has made no independent investigation as to the accuracy and completeness (or lack thereof) of the information derived from secondary sources including government agencies, the client, designated representatives of the client, property contact, property owner, property owner representatives, computer databases, or personal interviews and has assumed that such information is accurate and complete. Gabriel assumes information provided by or obtained from governmental agencies including information obtained from government websites is accurate and complete.

Groundwater flow and depth to groundwater, unless otherwise specified by on-property well data, are assumed based on contours depicted on the United States Geological Survey topographic maps.

Gabriel assumes the property has been correctly and accurately identified by the client, designated representative of the client, property contact, property owner, and property owner's representatives, and/or by a Plat of Survey.

Statement of Limitations

The environmental assessment detailed in this report has been performed in accordance with generally accepted methods and practices of the environmental laboratory engineering profession. The scope and depth of this study were as directed, and as agreed to, by the client.

Gabriel uses experienced and trained professionals in attempting to locate and identify hazardous materials or conditions. We do not warrant that all such materials have been identified. It is possible that some materials containing a hazardous substance were not visible or accessible to the surveyor, or, for various other reasons, were not sampled.

All findings are based on documentary review, conversations, and analytical data proved by the laboratory as noted in this report. These findings are not to be considered scientific certainties. The intent of this study was to identify environmental concerns, which would be obvious to a skilled, knowledgeable professional applying accepted standards. This report is not intended to represent an exhaustive research of all potential hazards that may exist at this site.

This report also does not purport to be representative of future conditions or events. Activities, which transpire subsequent to this report, which result in adverse environmental impacts, are not to be construed as relevant to this study.

This report has been performed for the exclusive use of the client. Our report and its findings shall not, in whole or part, be disseminated to any other party, nor be used by any other party without prior written consent by Gabriel Environmental Services.

This report is site specific, in that it relates to assessment of environmental conditions on a specific parcel. This practice does not address additional issues raised in transactions, such as business entities or interests therein of their assets that may involve environmental liabilities.

This report is valid for 180 days from the report date by the User.
