Situation Report - November 23, 2022

Cases: Evanston reported 101 new confirmed COVID-19 cases over the last seven days, compared to 111 for the week prior. [The current seven-day moving average of daily confirmed cases](#) is 14.43.

New Cases per 100,000 Population (7-Day Total)	129.30

Indicator	Metric	Evanston Community Risk Level
New COVID-19 admissions per 100,000 population (7-day total)	6.40	LOW
Percent of staffed inpatient beds occupied by COVID-19 patients (7-day average)	3.17%	LOW

COVID-19 Community Risk Level: [LOW](#). The Risk Level increased from Low to Medium this week due to an uptick in the number of local COVID-19 hospital admissions.

Hospitalizations: [View local COVID-19 hospitalizations](#). To date, Evanston has had 17,399 total confirmed cases, and 157 residents have died of illness or complications related to COVID-19. [View the City's interactive COVID-19 dashboard](#) ([view on mobile](#)).

Stay up to date on your COVID vaccines

Everyone 5 years and older is strongly encouraged to [stay up to date with their COVID-19 vaccines](#). Contact your local pharmacy or primary care physician to get your updated Pfizer or Moderna bivalent booster, or visit [vaccines.gov](#) to schedule an appointment. If you're homebound due to a

medical condition or are otherwise unable to visit a provider, complete the [City's In-Home Bivalent Booster Vaccination Survey](#).
