

## **Dogs on Patios/Sidewalk Cafes Disinfectant Protocol**

- Wear non-porous gloves (vinyl or heavy duty rubber gloves).
- Exercise caution to prevent any body fluids from splashing into eyes, mouth, nose or open sores.
- Take care that body fluid does not get on clothing.
- Body fluids can be collected and soaked up using disposable paper towels or a mop and pail. Using an absorbent powder then sweeping up the fluids is another recommended method.
- Thoroughly clean the surface with a detergent and rinse with water. Dispose of paper towels in a leak proof plastic bag which is tied up and placed in a garbage receptacle that has a tight fitting lid.
- After area is cleaned, soak with high level disinfectant (1:10 bleach and water mixture) or equivalent, wipe up excess and let area air dry.
- Mop and pail are to be cleaned, rinsed with high level disinfectant (1:10 bleach and water mixture) or equivalent, wrung out and hung to air dry.
- Remove gloves and place in a leak-proof bag, then place in the garbage.
- Wash hands with soap and water.

I have read and understand the Disinfectant Protocol. \_\_\_\_\_ (Initial)
