City of Evanston Public Works Agency

Sewer Structure Lining

March 30, 2026

Project Description

The City of Evanston is rehabilitating sewer structures at various locations throughout the City. The work includes cleaning, surface preparation, and lining of the sewer structures using a geopolymer lining system to extend the useful life of the structure. The contractor hired to perform this work is National Power Rodding Corp. A map showing the locations of the sewer structures to be rehabilitated is on the back of this newsletter.

Work Schedule

The work is scheduled to begin **April 8th** and will last approximately seven weeks, weather permitting. The contractor will coordinate with community members and businesses to minimize any inconveniences caused by the work. "No Parking" signs will be posted as necessary 48 hours in advance of any work.

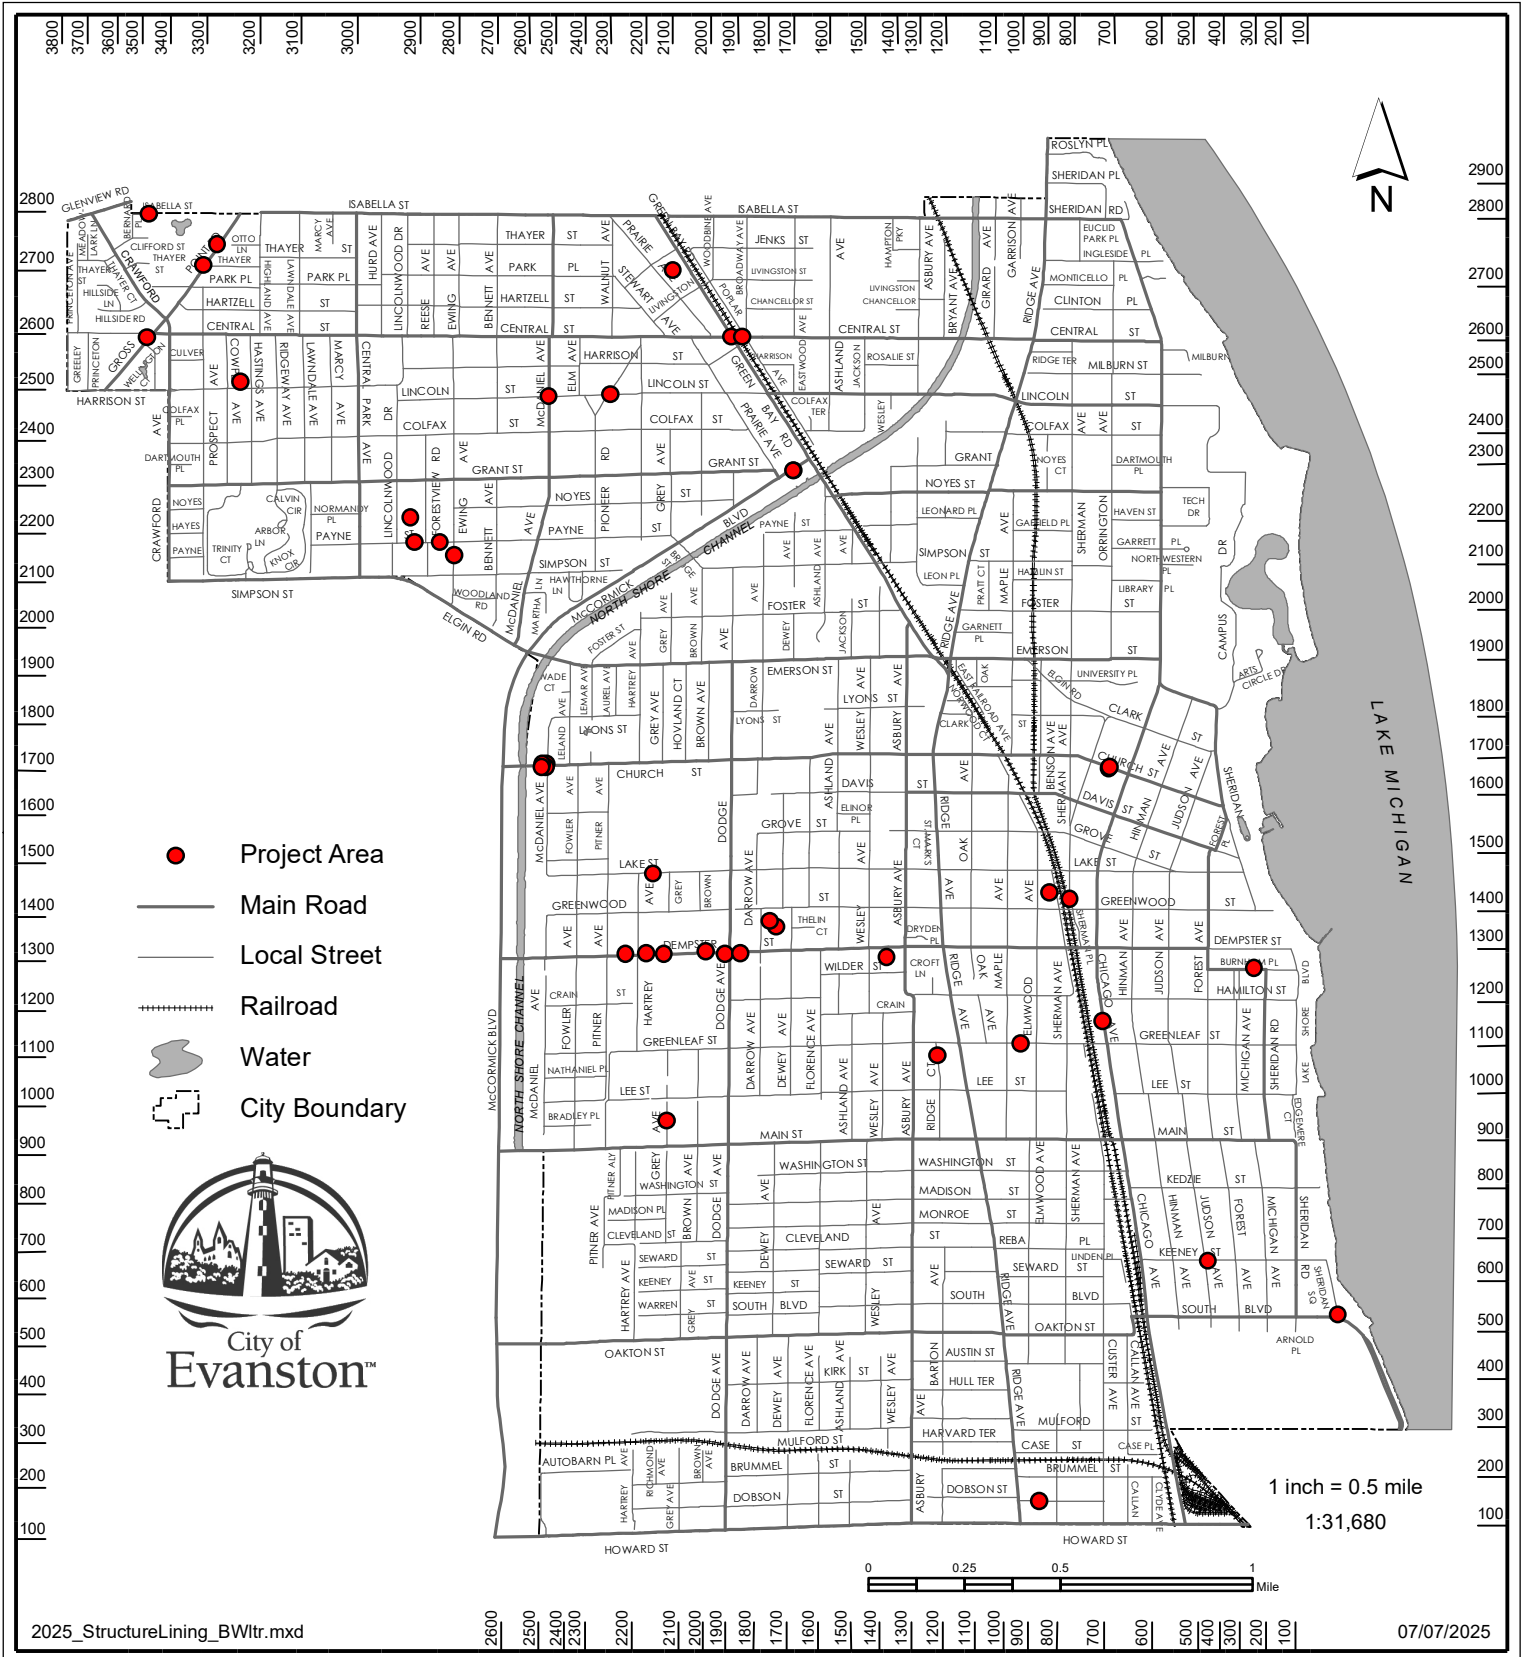

City Monitoring

This project will be monitored by the City's Capital Planning & Engineering Bureau. If you have any questions or concerns, please do not hesitate to contact James Knuth, Civil Engineer II at (847) 448-8280 or jknuth@cityofevanston.org.
