

We are excited to share that the City of Evanston is planning a \$1.35 million renovation of Cartwright Park

We need your help to shape the future of this valued community space!

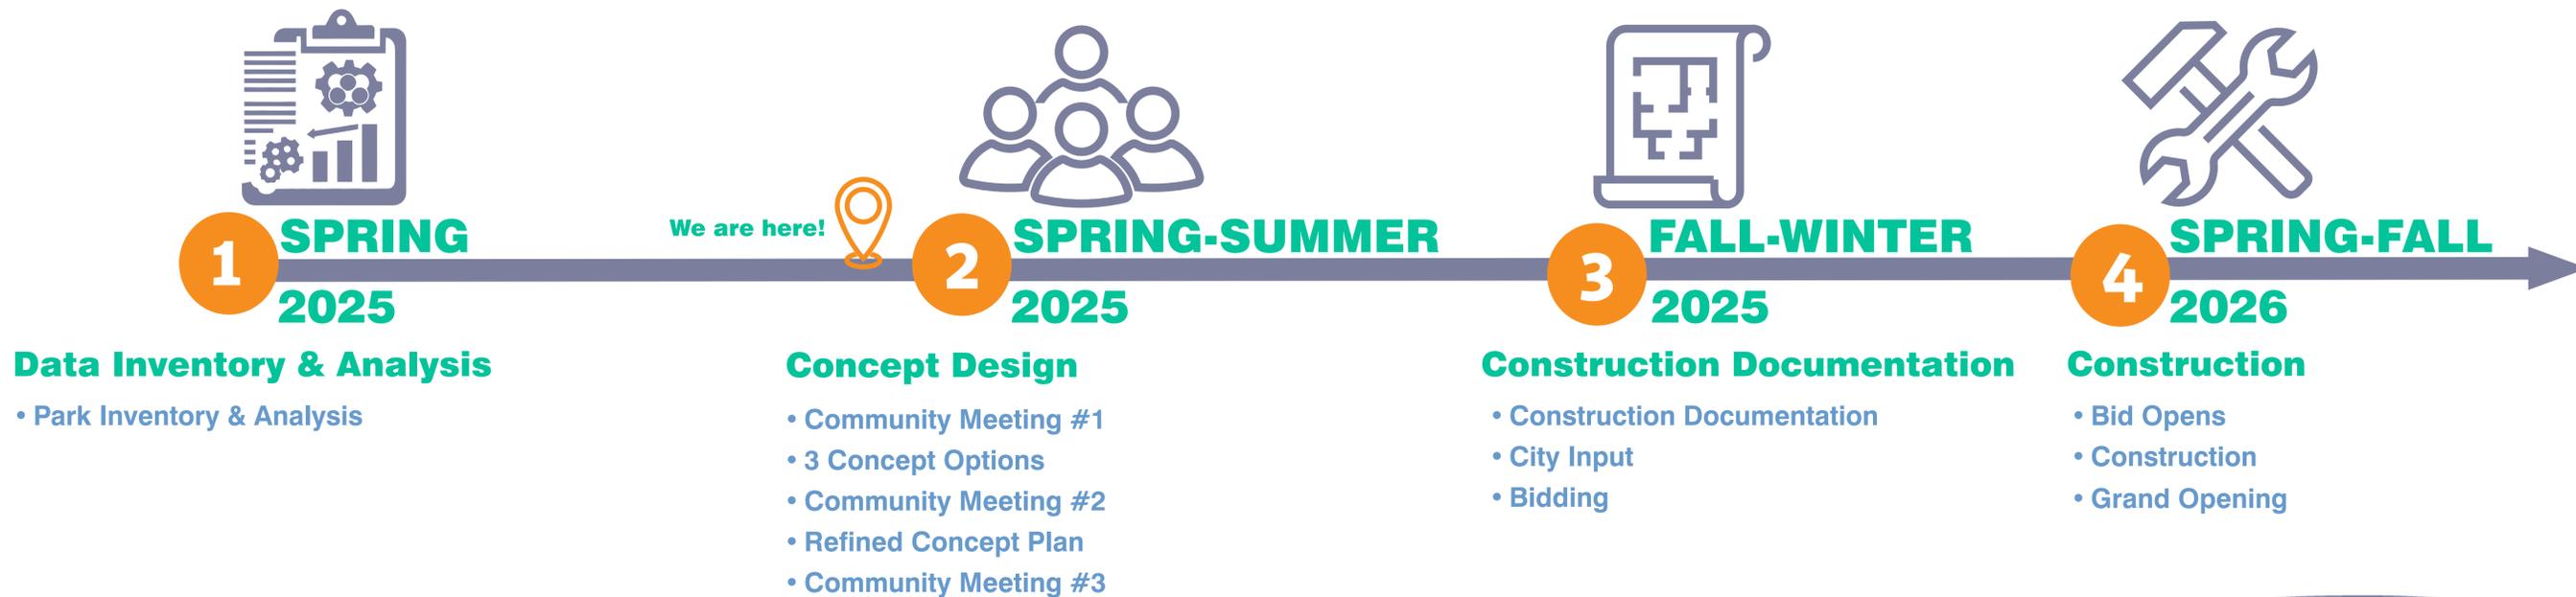

We are taking a close look at the entire park to identify what should be replaced, repaired, cleaned, or preserved. Some of the key features we will be reviewing include, but are not limited to, the playground, courts, drainage, landscaping, pathways, and shelter.

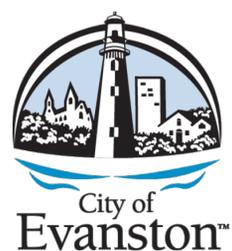

Your input will help guide how this budget is used and ensure the improvements reflect the needs and priorities of the community.

Timeline

This project is divided into four phases:
