

Evanston Stormwater Master Plan
Table of Contents

1. Executive Summary
 - 1.1. Background
 - 1.2. Purpose
 - 1.3. Scope of Stormwater Master Plan
 - 1.4. System Overview
 - 1.5. Existing Conditions and Projected Future Conditions
 - 1.6. Evaluation of Alternatives
 - 1.7. Recommendations
2. Introduction
 - 2.1. Background
 - 2.2. Purpose (discussion of precipitation trends will be included)
 - 2.3. Scope and Approach
 - 2.4. Evanston Sewersheds and Drainage System
3. Modeling Approach and Methodology
 - 3.1. Introduction
 - 3.2. Hydrology
 - 3.2.1. Catchment Delineation
 - 3.2.2. Soil Classifications
 - 3.2.3. Land Use
 - 3.2.4. Precipitation
 - 3.2.4.1. Bulletin 75
 - 3.2.4.2. Method for developing Projected Future Rainfall
 - 3.2.4.3. Projected Future Rainfall
 - 3.3. Hydraulics
 - 3.3.1. Data Collection
 - 3.3.1.1. Evanston As-builts
 - 3.3.1.2. MWRD
 - 3.3.1.3. Field
 - 3.3.2. Representation of Inlets
 - 3.3.3. Boundary Conditions
 - 3.4. Additional Modeling Topics (for example, selecting break points for the models)
4. System Evaluation
 - 4.1. Model Calibration and Verification
 - 4.2. Critical Duration Analysis
 - 4.3. Level of Service Definition
 - 4.4. Existing System Performance
 - 4.5. Existing System Performance for Projected Future Storm Events
 - 4.6. Problem Area Identification
5. Development and Evaluation of Improvements
 - 5.1. Conceptual Improvements
 - 5.2. Estimated Costs for Conceptual Improvements
 - 5.3. Refined Conceptual Improvements for Combined Sewer Basin 07
 - 5.4. Constructability Review
6. Summary and Recommendations

List of Tables

List of Figures

List of Exhibits (more to be added as needed)

Sewersheds

Elevation data

Land Use

Soils

Flow Paths

Sewer Model Maps

Existing Conditions Inundation Maps

Existing System with Projected Future Storm Event Inundation Maps

Locations of Conceptual Improvements

Proposed Project Inundation Maps

References

Appendices (more to be added as needed)

Flow Monitoring Report

Cost Estimates for Conceptual Improvements

DRAFT
