December 21, 2005

To the Honorable Lorraine H. Morton, Mayor
and Members of the City Council
City of Evanston, Illinois

Ladies and Gentlemen:

Transmitted herewith is the Proposed Budget for the City of Evanston for the fiscal year beginning March 1, 2006 and ending February 28, 2007. The annual budget is the policy document that sets the financial course for the city's operating goals in the next fiscal year. Together with the Capital Improvement Program, these two documents are the City's most important financial policy documents. They define my priorities for providing services we provide to the community over the next year.

Budget Overview:

In preparing this budget, I took the strong position that we need to ask for the minimal increase necessary to fund current services. I avoided requesting any new funding sources, but you will see some requests for increases in existing revenue sources. Later in this message you will see some options to either cut services to avoid a property tax increase altogether for the General Fund, with options to provide beach access that is currently funded by fees, to change it to provide access at no cost to residents.

The total budget proposed for the City of Evanston is \$ 181,711,265. This includes all funds. It represents a total increase of 3.55 % over the prior year budget. The General Fund is the fund where almost all daily operations of the city are budgeted, excluding fleet services, water, and sewer operations. The increase in the General Fund expenditures is 3.85 %. As a comparison the City of Evanston uses the Municipal Price Index (MPI) as a gauge to its expenditures. The Illinois Municipal Price Index (MPI) is designed to measure the increases in prices of goods and services purchased by Illinois municipalities. Last year the MPI had an increase of 4.13% compared to an increase of 3.3% in the Consumer Price Index (CPI). This comparison shows that the city's increase in our budget is both reasonable and necessary.

Unlike other surrounding municipalities, we are a full-service city that includes a public library and a parks and recreation department, rather than separate library and park districts. In evaluating our approach to property tax needs, I tried to look at our position relative to comparable communities. I am pleased to say that the City of Evanston's property tax rate is in the middle of the pack. Contrary to what many constituents believe, our tax rate in Evanston, given comparable services, *is not* the highest in the area. The following graphic shows the city portion of the property tax bill related to several comparable communities, when library and park services are included.

Revenues Highlights:

Based on past trends and various data, below are highlights of major revenue sources by fund:

Utility Funds: We are not recommending any increase at this time in Water or Sewer rates, pending final outcomes of the water rate study. Staff is reviewing with the consultant the water and sewer cost of services studies. We expect the final water rate study to be completed by February and will finalize recommendations at that time.

General Fund Major Revenues: The following are the major changes to the non-property tax revenues in the General Fund:

Revenue	FY 2006/07 Revenue	Increase/decrease from FY 2005/06	Percentage increase/(decrease)
Sales Tax – State	\$8,200,000	\$ 0	0 %
Home Rules Sales Tax	\$ 5,500,000	\$ 0	0 %
Income Tax	\$ 5,500,000	\$ 500,000	10.0 %
Licenses & permits	\$ 7,254,800	\$ (550,150)	(7.04) %
Parking Fines	\$ 3,790,000	\$ 190,000	4.12 %
Real Estate Transfer	\$ 4,000,000	\$ 0	0 %
Utility Taxes	\$ 3,900,000	\$ 150,000	4.0 %
Parking Taxes	\$ 1,500,000	\$ 0	0 %
Telecommunications	\$ 3,800,000	\$ 200,000	5.5 %

The reduction in permits reflects that there is no large project similar to Sherman Plaza far enough along in the planning stages to ensure revenues equal to the 2005/06 revenues. This reduction in revenue was projected by staff and discussed in the 2005/06 budget sessions.

Recycling fees:

Staff recommends an increase of \$ 200,000 to the recycling charge to cover the actual cost of providing recycling in the city. This means an increase of \$ 10.36 per unit per year or \$.86 per month. We have been operating in a deficit position for this service since 1999. Our contract with Groot Recycling Services continues through 2010. Since one of the proposed strategic visions relates to preserving our natural resources, over the next fiscal year staff will investigate ways to restructure the entire refuse and recycling function to shift the focus from a recycling charge to a plan that encourages recycling and reduction in waste overall.

Parking Ticket Fines:

Staff recommends an increase in the price of meter tickets from \$10 to \$15 per ticket, which will provide \$290,000 in new revenues to the General Fund.

Taxi Coupons:

Staff recommends an increase in the Senior Taxi Coupon of \$.50 per ticket, which will make the cost shared 50% by the senior and 50% by the City. Rates for the taxi coupons have not been raised since 1993. This revenue increase equals \$ 20,000. We have seen a significant increase in the use of taxi coupons and participants need to pay their fair share.

Cigarette tax:

Staff recommends the increase in cigarette tax to \$.50 per pack. This proposal would raise the tax on a pack of cigarettes from \$.32 to \$.50 per pack. This increase would generate an additional \$ 50,000 per year. The City of Chicago has approved increasing their cigarette tax by \$.48 to \$.68 per pack. By increasing our tax rate by only \$.18 we will still be competitive and should not experience a major drop in sales.

Property Taxes:

The property tax for the General Fund includes the taxes levied for the Library, Parks, Recreation and Forestry and the IMRF Pension. While we have tried to hold the tax to the minimum necessary, the 7.98% increase is reflective of our best estimate of the amount needed to fund employee pensions, and balance the budget with three labor contract negotiations pending. The allocation of the total dollar increase from \$16,700,000 to \$ 18,032,090 is broken down into the following functions that could have a separate tax levy, and shows the increase for each portion of the levy:

Illinois Municipal Retirement Fund	\$ 774,400	42.71 % increase
Parks/Forestry, & Recreation	\$ 277,000*	3.75 % increase
Evanston Public Library	\$ 139,500*	3.75 % increase
General Fund-remainder of tax	\$ 142,000*	3.75 % increase

* Net of other revenues

The IMRF portion of the General Fund levy requires more explanation. The reason the increase is so large this year, is that the amount to be funded is based upon an actuarial valuation. The IMRF uses a five-year moving average and this increase is reflective of poor investment performance over the past five years. This increase was anticipated and expected. It has little to do with the number of employees or retirees in the city. This is an unfunded mandate imposed by the State of Illinois.

The other property tax increase is for Police and Fire Pensions, of \$ 60,000 and \$ 505,118 respectively. Again, due to actuarial valuations, we are required to contribute an amount into the pension funds to cover current costs and a portion of the unfunded future costs, requiring tax increases of 15.64% for the Fire Pension Fund, and 1.47% for the Police Pension Fund. The increase in the Fire Pension Fund is due primarily to new benefits the firefighters have lobbied for and received over the past few years. This is an unfunded mandate.

The remainder of the tax levy of \$ 9,074,000 is for debt service on outstanding general obligation bonds.

The following graphics represent the breakdown of funds and services which are supported by property tax and at what level.

Expenditure Highlights:

Overview:

Once again during the preparation of the budget, various City departments identified areas where additional personnel and/or programs would enhance their operations. The original increase in total dollars for the General Fund was \$ 5.4 million, or an increase of 6.5% in overall expenditures. Given that the CPI has been between 3 & 4% this year, significant reductions in departmental requests were made in order to present the City Council with a responsible, balanced proposal.

Personnel:

A total of 18 new full-time positions, and 7 part-time positions were requested from the 13 departments, totaling more than \$1 million. Many of the budget requests were valid, but not affordable due to a lack of financial resources. Therefore, I am recommending approval of only 1.5 full-time equivalent (FTE) new positions. However, an equal number of positions were reduced, so the full-time equivalent headcount increased in the budget is zero, and the cost difference is a *savings of \$ 41,400*.

Overall, the FY 2006/07 proposed budget requires a modest but necessary increase in the property tax to pay for General Fund salaries and benefits. Health insurance is budgeted for a 10% increase.

Prior to considering a property tax increase or new revenue sources staff pared down the proposed budget to a very modest increase. Many of the additions to this year's budget are a result of mandated costs. Union contracts, federal and state requirements, and necessary utility costs all increase the cost of doing business. In order to meet this austere budget request each General Fund line item was reviewed and wherever possible reduced to coincide with its three-year expenditure history. A total of \$2.3 million was cut from the initial requests, including \$1 million in personnel costs.

The bottom line General Fund Budget request is shown below:

• Current 2006/07 Proposed Budget	\$ 85,900,000		
• FY 2005/06 Adopted Budget	<u>\$ 82,714,300</u>		
	\$ 3,185,700	3.85%	Increase

The following is a listing of the expenditures in the General Fund that have increased as a result of labor contracts, state mandates, utility costs, City Council requested tree planting and Dutch Elm Disease control services, and the addition of a Firefighter/Paramedic. These costs represent 3.27% of the total increase of 3.82%.

Salaries and Wages	\$ 2,336,400
Overtime	\$ 370,700
Health Insurance	\$ 902,100
IMRF Pension, FICA, and Medicare	\$ 867,300
Utilities	\$ 56,400
Firefighter (6 months)	\$ 25,000
Human Resources Learning and Performance Manager	\$ 63,900
Elimination of Assistant Finance Director	\$ (105,600)
Reduction of Human Relations Specialist (vacant) to part-time	<u>\$ (24,700)</u>
	\$ 4,491,500

In order to achieve an increase of only 3.85%, other costs had to be reduced over last year by \$ 1,305,800; \$ 728,600 of this decrease is the Dutch Elm Disease Control one time startup expenses. The remaining minor decrease of \$ 577,200 is a result of reductions in departmental operating budgets. The City continues to be in the position where it is required to do more with less.

Fleet Service Fund:

The Fleet Service Fund is stable and will require no additional General Fund subsidy. For the upcoming budget year, new equipment purchases will be limited to \$ 2,041,000.

Personnel Adjustments:

The FY 2006/07 budget has minor personnel adjustments. I am recommending that the Fire Department add one firefighter/paramedic position for next year beginning in September 2006. We reduced overtime expenditures to make this addition cost neutral.

The second addition to the personnel in the General Fund is to add one person in Human Resources to serve as the Learning and Performance Manager to provide training for all departments. Right now we

are unable to provide adequate training to the workforce and since professional development is a high priority in the draft Strategic Plan, this position is a must.

As stated earlier one full-time position was eliminated in Finance, and a second position was reduced from full-time to part-time in the Human Relations Office.

Tree Inoculation Service:

To support the Tree Inoculation Program, staff is recommending costs of \$ 229,400 for the second year of the program. This includes \$ 89,400 for materials to inject the significant trees and \$ 140,000 to fund the re-injection of the full program in 2008. This is a reduction of \$ 728,600 from the first year start up costs of the program. Due to the mid-year change in this program the associated revenue of \$ 384,800 has also been eliminated. This program is fully funded by property taxes and other General Fund Revenues.

Contributions to non-profit agencies:

In order to balance the city's budget, each department had to contribute to the cuts necessary. This year, I am recommending a 10% reduction in the funding of the Mental Health Board's allocation to other agencies. While I support many of the services provided in our community, we cannot continue to hold the line on primary services such as Police, Fire, Public Works, and Parks/Forestry & Recreation and not expect the outside agencies to share in our pain. This cut is equal to \$ 82,800.

Beach Access:

The Recreation Board is proposing two free days at all beaches. The impact on revenue of this proposal would be a reduction of \$ 43,000. Staff concurs that this will provide access to more residents without increasing property taxes. If beaches were totally free to Evanston residents the lost revenue would be \$ 466,800 while expenditures of \$ 426,400 would have to be covered by property tax revenue.

OPTIONAL CUTS OR DECREASED SERVICES:

If the City Council wishes to eliminate the need for any General Fund property tax increase, there are several options for you to consider that could supplement or replace the \$ 558,000 of general fund property tax recommended by staff:

Revenues:

1. Adopt a new revenue source. About the only new revenue source left to consider would be a 0.75% food and beverage tax, offset by a reduction in the poured liquor tax from 6% to 4%. This revenue source generates \$ 590,000 per year.
2. Increase the vehicle sticker fee by \$ 5 to generate an additional \$ 175,000. (Not recommended because our fee is higher than most cities.)
3. Reinstate the sticker program for yard waste bags generating \$ 90,000. This source is tied directly to the cost of disposal and composting. As a city that sets a "green" example, a change discourages bagging grass.

Expenditures:

1. Eliminate the Fleetwood -Jourdain Theater program.	\$ 122,000
2. Taxicab Program	\$ 144,000
*Net of coupon revenue	
3. Library Branches* –	\$ 260,000
*Retains one full time position to Main Library	
4. Reduce ECMC Community Television* -	\$ 30,000
*Reduction of 10% similar to recommended Mental Health reductions	

Summary:

I would like to thank the department heads and each of their employees for their efforts every day to make this a better community. I would also like to thank the department heads and those who assisted in the development of this budget document. Each year it is a difficult task to maintain the quality and quantity of services with limited resources. In particular, I express my deep gratitude to Patrick Casey, Director of Management and Budget, William Stafford, Director of Finance, Tracy Roberts, Management Analyst, and Alison Zelms, Management Analyst for all of their efforts in preparing this document.

Very truly yours,

Julia A. Carroll
City Manager

Interdepartmental Memorandum

To: Julia Carroll, City Manager
From: Patrick Casey, Director of Management and Budget
Subject: Final Changes to the Proposed FY 2006-07 Budget
Date: March 1, 2006

In December of 2005 the proposed FY 2006-07 Budget was presented to City Council. The proposed budget stated an expenditure level for all funds of \$181,711,265. Four Saturday Budget Workshops and one public hearing were held to review the proposed budget. The City Council made the following changes to the proposed Budget:

General Fund Expenditures

The City Manager's proposed budget was balanced as presented. The following is a list of changes to expenditures resulting from City Council deliberations.

Action	Expenditure
Beginning Balance	\$ 85,900,000
Restore Mental Health Reductions	\$ 82,800
Provide Funding for Youth Initiative	\$ 25,000
Reduce Termination Pay	\$ (280,000)
Fund Police Canine and Police Officer	\$ 57,000
Total Adjustments	\$ (115,200)
Total Approved General Fund Expenditures	\$ 85,784,800

General Fund Revenues

The City Manager's proposed budget was balanced as presented. The following is a list of changes to revenues resulting from City Council deliberations.

Action	Revenue
Beginning Balance	\$ 85,900,000
Revised Personal Prop. Replacement Tax	\$ 83,000
Building Permit Fee Increase (over 1 million) to 1.5% of construction value	\$ 528,000
Increase Fee for Exempt Transfers to \$100	\$ 55,200
Revised Building Permit Estimate based on submitted projects	\$ 100,000
Police Dog Donation from Private Source	\$ 60,000
Reduce General Fund Property Tax Levy	\$ (941,400)
Total Adjustments	\$ (115,200)
Total Approved General Fund Revenues	\$ 85,784,800

Council also voted to change the funding source for a \$290,000 increase in parking ticket revenue. The original proposal from staff would have required an increase in the cost of parking meter tickets from \$10 to \$15. Council approved an increase in the late fees for various parking tickets rather than an increase to the initial ticket cost. This change will still provide an increase of \$290,000 for parking ticket revenue.

The total expenditures for all funds will now be \$186,240,465.

2006-2007 Approved Budget Executive Summary

I. Introduction

The City of Evanston covers a stretch of four miles of Lake Michigan's picturesque Western shoreline. The City's 8.0 square miles include residential neighborhoods encircling thoughtfully planned business districts and recreational facilities. Ongoing development of both residential and commercial occupancies has brought the City of Evanston a hint of cosmopolitan flavor, while retaining a close-knit suburban atmosphere.

Evanston boasts a rich diversity in religious, racial, educational, and economic composition. Interspersed throughout the community are over 260 acres of parks. This includes over 30 tennis courts, five beaches, athletic fields, bicycling and jogging trails, and an indoor ice-skating facility.

The City of Evanston operates under the Council-Manager form of government. The non-partisan legislative component is comprised of ten elected officials, a Mayor and nine Ward Aldermen. Through the Council-Manager form of government, elected officials create policy and direct it to the City Manager for implementation. This form places the responsibility for day-to-day provision of services on a professional manager and staff.

II. Budget Summary

The total operating budget for FY2007 is \$181,711,265 prior to interfund transfers. This represents an increase of \$6,341,543 or 3.62%.

III. Fiscal Constraints

City budgets throughout the nation are sharing the burden of state budget constraints, as governors and state legislatures cope with balancing budget shortfalls. Illinois is no exception. Fiscal problems at the state level are part of the cause for Evanston's projection of nearly-flat revenues in the upcoming year.

Additionally, unfunded state mandates – particularly changes to funding requirements and eligibility and pay-out options for pensions – have caused major increases to pension funding that the City cannot avoid.

IV. General Fund

Expenditures

The General Fund budget for 2006-2007 is \$85,900,000. This represents a \$3,185,700 or 3.85% increase in expenditures.

Revenues

The City of Evanston depends upon a variety of revenue sources to fund services. Many of these revenues are subject to fluctuations in the economy, while demands for government services frequently are not. As a result, there is a continued interest in developing revenue sources that remain more insulated from economic effects while also seeking to appropriately tax those receiving benefits.

1. Property Tax:

The total proposed property tax levy is \$34,989,600. This is an increase of \$2,234,755 or 6.82%. The General Fund portion of this raises from \$16,700,000 to 18,032,600 an increase of \$1,332,600. Over half of the increase to the general fund, \$774,400 is

required due to funding mandated by the state for pension funding. The property tax continues to make up the largest percentage of City tax revenues. The relative economic stability and tax deductible feature of the property tax make it a desirable revenue source.

2. State Sales Tax:

General Fund revenue from the state sales tax is expected to remain at the \$8,200,000. This is an indication of the slow growth in the economy.

3. Home Rule Sales Tax:

Projections show \$5,500,000 of this revenue source for the General Fund. Once again the revenue remains flat due to the economic situation.

4. State Income Tax:

State income tax revenues are expected to increase by 10.0 %, bringing the expected revenue to \$5,500,000. This increase is due to the economic rebound. The revenue projected is still \$207,000 less than received in FY 2000/01.

5. Utility Taxes:

Revenues from utility taxes are comprised of electric, natural gas, and telecommunications taxes. For FY2006-2007, these are projected to total \$8,550,000, which is an increase of \$350,000, or 4.27%.

6. Real Estate Transfer Tax:

Real estate transfer tax revenue is expected to remain at \$4,000,000 for FY2006/07. This is mainly due to new development in Evanston. Staff does not believe this is the historic level which is still believed to settle in the future at a number nearer to \$3.0 million. The slight increase of \$55,200 is due to a change in the cost of exempt real estate transfers – which will now cost \$100.

7. Vehicle Licenses:

Vehicle license fees are expected to increase by about \$100,000 this year, to \$2,200,000. This revenue source is considered to be relatively insulated from economic fluctuations.

8. Licenses, Permits, and Fees:

Total licenses, permits, and fees are expected to generate \$7,254,400 in revenues, a decrease of \$550,550 over the prior year. The main reason for the decrease is an anticipated drop of \$663,000 in building permit revenue.

9. Fines and Forfeitures:

Parking ticket, regular and other fine revenues are expected to increase by \$236,500 to \$4,592,000. The majority of this increase is due to the proposed increase in the fine for parking meter violations. The proposed increase will generate an additional \$150,000 and raise the meter fine from \$10 to \$15 per violation.

10. Service Charges

Service charges are scheduled to increase by \$166,350. Included in the proposed budget is an increase in the recycling/refuse collection fee which adds \$200,000. Recreation revenues are scheduled to increase by \$159,700. The collection rate on ambulance billings has improved allowing a revised revenue increase of \$100,000. Due to the change in the format of the Dutch Elm Inoculation Program there is a decrease of \$384,800 – formerly the residents' share of funding for which has now been eliminated through the change in the program's structure.

11. State and Federal Aid

State and federal aid revenues will remain stable with a slight overall increase of \$11,700 resulting from an increase in the Law Enforcement block Grant of \$11,600.

V. Other Funds

Motor Fuel Tax Fund

Spending for the fund is budgeted at \$2,272,500 in FY2007. This is a decrease of \$1,567,500 from the FY2006 appropriation.

Emergency Telephone System Fund

Revenues for this fund are derived from the \$1.50 Enhanced 911 Surcharge and a share of the State of Illinois wireless surcharge. Budgeted expenditures for FY2006/07 are \$1,736,700 a decrease of \$453,600. Projected revenues are \$1,154,780, an increase of \$10,280. This includes wireless surcharge revenue of \$245,820.

Community Development Block Grant Fund

This accounts for funds granted from the U.S. Department of Housing and Urban Development. The amount for FY2006/07 is \$2,256,640 for Community Development related programs, a decrease of \$602,713 from FY2005/06 funding.

Economic Development Fund

Expenditures from the Economic Development Fund are budgeted to be \$1,515,400 for FY2007. Revenues for this fund are generated from the Hotel and Amusement Taxes.

Housing Fund

The Mayor's Special Housing Fund seeks to support housing related programs as adopted by the City Council. The FY2006/07 budget is \$190,000, a decrease of \$64,500.

Washington National Special Tax Allocation Debt Service Fund

This fund is expected to account for the payment of general obligation debt issued for this tax increment financing district bounded by Church Street on the North, Davis Street on the South, and Chicago Avenue on the East. Fiscal year 2007 budgeted expenditures are \$8,857,000, an increase of \$7,113,350 or 407.96% from last year. The increase is due to the payment of debt services cost for the Series 2002 A and 2002 B Bonds.

Special Service Area No. 5 Fund

Adopted by the City Council on June 27, 1994 Special Service District 5 compromises the City of Evanston downtown business district. FY2007 budgeted expenditures for this fund are \$435,600. This is a slight decrease in the budget of \$3,200.

Southwest II Special Tax Allocation Debt Service Fund

Better known as the Howard/Hartrey District, the district consists of a 23 acre site located at 2201 Howard Street. A decrease of \$169,700 in projected expenditures brings the fiscal year 2007 budget for this fund to \$828,700.

Southwest Special Tax Allocation Debt Service Fund

This Tax Increment District consists of twelve acres of land bounded by Main Street, Pitner Avenue and the North Shore Channel. Budgeted expenditures for this fund will be \$315,800 a decrease of \$581,025.

Debt Service Fund

The property tax levy reported in this budget is stated on the full accrual basis. The property tax revenue represents the 2005 levy, almost all of which will be collected in the 2006-07 fiscal year.

The expenditures for the general obligation bonds represent debt service payments due in fiscal year 2006-07.

During fiscal year 2004-05 the City issued Series 2004B general obligation refunding bonds in the amount of \$11,730,000 to refund Series 1997 bonds. The City also issued \$13,355,000 Series 2004 general obligation bonds. Proceeds from this issue are being used to finance the Capital Improvement budget. The debt service payments budgeted in this fund is due in FY2007. Total budgeted expenditures are \$10,495,210.

Downtown II Special Tax Allocation Service Fund

On January 1985 the City Council adopted the Downtown II tax increment finance district consisting of 26 acres of contiguous land located in the northwest portion of the central business district of the city. Bonds were issued in 1986, 1992, 1996 and 1999. On June 29, 2000 the City sold \$37.1 million in Series 2000 Bonds which were used to pay for redevelopment costs, construction of a senior center and the construction of a parking garage.

This fund accounts for payment of debt service associated with the Downtown II Tax Increment Financing District whose expenditures will be \$7,257,115 for FY2007. This is a decrease of \$1,947,200 which is due primarily to a decrease in the cost of principal for the Series 2000C bond issuance.

Maple Avenue Fund

This fund is responsible for paying the operating expenses and debt service for repayment of bonds that were issued to fund construction of the Maple Avenue Parking structure. Total operating expenses for 2006/07 will be \$7,252,100.

Parking System Fund

The Parking System Fund has anticipated expenditures of \$3,692,800. This is a 4.25% increase and is inclusive of capital outlay, debt service, and transfers to the General Fund. Revenues are projected to be \$3,654,700. This includes no projected revenue from the Sherman Avenue Garage which is closed during construction of the new Sherman Plaza development and attached parking structure.

Water Fund

The Water Fund is expected to have total expenditures of \$13,702,800 which represents an increase of \$12,200 or 0.09%. Water Fund revenues are expected to increase by \$6,100. No water rate increase is proposed for FY2006/07.

Sewer Fund

A sewer rate study began in FY2006 and will continue through the end of the fiscal year. As a result, expenditures have decreased to \$16,648,800 as the scheduled 5% sewer rate increase for FY2006 was postponed pending the outcome of the rate study.

Fleet Services Fund

Budgeted expenditures for FY2007 are \$5,158,100. This is an increase of 5.69% totaling \$277,700. This year, no new bond sale is proposed for vehicles and all outstanding debt has been paid.

Insurance Fund

Fiscal year 2007 budgeted expenditures for the Insurance Fund increases to \$2,050,500.

Fire Pension Fund

Every Illinois Municipality having a population of not less than 5,000 and not more than 500,000 must have a Fire Pension fund as prescribed in Chapter 108 1/2 - Article 4 of the Illinois Revised Statutes.

Actuarially determined funding requirements indicate that a \$448,000 or 9.5% increase in funding requirements is necessary for FY2007, making the budgeted amount \$5,162,000. Presently, this fund is budgeted to levy for \$3,735,000, which translates into a 15.64% increase in the property tax levy.

Police Pension Fund

Every Illinois Municipality of not less than 5,000 and not more than 500,000 people must have a Police Pension Fund as prescribed in Chapter 108 1/2, Article 4 of the Illinois Revised Statutes.

Actuarially determined funding requirements indicate that a \$95,000 or 1.6% increase in funding requirements is necessary for FY2007, making the budgeted amount \$5,983,500. Presently, this fund is budgeted to levy for \$4,148,000, which translates into a 1.47% increase in the property tax levy.

VI. Conclusions

The 2006-2007 budget attempts to implement the goals and priorities developed by the City Council and City Staff. This is done with an understanding that long-term planning and fiscal austerity will help ensure the City of Evanston retains its position as one of the more respected communities in the Greater Chicago area.

City of
Evanston™

Strategic Plan

Creating the most livable city in America

MISSION:

The City of Evanston is committed to promoting the highest quality of life for all residents by providing fiscally-sound, responsive municipal services and delivering those services equitably, professionally with the highest degree of integrity.

The Evanston City Council unanimously approved the Evanston Strategic Plan on March 27, 2006. A Strategic Plan defines where our organization is going, how we are going to get there and measures success over time. It ensures the most effective use of the organization's limited resources by focusing those resources on key priorities.

The Evanston Strategic Plan was developed over a nine-month period that included public meetings involving the City Council, City staff and many of the citizens of Evanston. It is the framework by which the City organization will provide services and programs over the next five years to all members of our community.

Economic Viability

Economics Vision “Evanston will have a viable, renewable economic engine, which can support the needs and enhance the life-styles of those living and working in the community.”

Goal One: Create and implement a comprehensive economic development strategy, which results in a vibrant and diverse economy for the City of Evanston.

Objectives:

- 1A: Create an economic development plan which includes strategies and policies that are futuristic and conscientious of our heritage for:
 - a) Downtown development
 - b) Neighborhood development
 - c) Business retention
 - d) Business attraction
 - e) Creative class (entrepreneurial, technological, artistic) attraction
 - f) Citywide technological and communication needs
- 1B: Review the zoning and preservation ordinances in context of new economic development plan.

The Strategic Plan features an overall vision and mission (front page), as well as specific visions for economics, infrastructure, natural resources, partnerships, governance, neighborhoods and social programs. Each of these visions falls under one of three value areas: Economic Viability, Environmental Sustainability and Strengthening Community. The thirteen goals of the Strategic Plan address these visions with objectives that support the community's values.

Goal Two: Create policies and programs that result in a well-maintained, diverse housing stock throughout the City of Evanston.

Objectives:

- 2A: Assess existing housing programs and inspection services to identify strengths and gaps.
- 2B: Develop and implement a comprehensive inclusionary and affordable housing policy.
- 2C: Create workforce ownership and rental housing opportunities.
- 2D: Improve affordable housing provided in Evanston by regional housing agencies and local not-for-profits through exemplary tenant screening and enforcement of property standards.
- 2E: Continue advocacy of affordable housing choices throughout the northern suburbs.

Goal Three: Generate marketable job skills for Evanston residents.

Objectives:

- 3A: Initiate brainstorming roundtable session with ETHS and post-secondary educational institutions that serve ETHS students, as well as major businesses.
- 3B: Convene brainstorming roundtable session with State and Federal legislators to identify opportunities for system improvement.
- 3C: Convene brainstorming roundtable session with leaders of construction trade and labor unions that could provide training/entry-level jobs for ETHS graduates.
- 3D: Advocate for job skill development and vocational training for skilled trades through city contracting, internships, work-study placements, and policy-making boards.
- 3E: Convene (and communicate to) local businesses (including hospitals and NU) to brainstorm the job opportunities for Evanston residents and develop methods to match the job with the resident.
- 3F: Create a job training fund.

Environmental Sustainability

Infrastructure Vision “Evanston will have a highly effective infrastructure that enables the community activities of its citizens and businesses. Evanston is a destination that requires an infrastructure that takes into account multiple modes of transportation as well as the natural resources available to us.”

Goal Four: Create and maintain functionally appropriate, sustainable, accessible and high quality infrastructure and facilities.

Objectives:

- 4A: Council will provide direction regarding the futures of the Civic Center, Recycling Center, and Robert Crown Center.
- 4B: Update and continue implementation of Parks/Forestry & Recreation’s comprehensive long-range property/equipment plan, including trees.
- 4C: Continue to develop an environmentally sensitive lakefront master plan.
- 4D: Prepare & implement a comprehensive, long-range infrastructure plan including parking, streets, sewers, water mains, lighting, signs, traffic signals, alleys, pavement marking, sidewalks, and bridges.
- 4E: To better manage our buildings, prepare & implement a long-range and comprehensive facility maintenance plan.
- 4F: Continue to encourage the enhancement of reliability in gas and electrical distribution systems.

Natural Resources Vision “Evanston will be known as ‘The Green City.’
We will embrace the best ecological practices and policies in our government, services and infrastructure.”

Goal Five: Protect and optimize the City’s natural resources and built environment, leading by example through sustainable practices and behaviors.

Objectives:

- 5A: Review current City policies and procedures to identify and improve sustainable and environmentally-friendly practices for the City and its citizens.
- 5B: Identify and utilize new practices that will improve the quality of life to enhance the City’s sustainability.
- 5C: Evaluate the potential implementation of a City-wide Environmental Management System (EMS).
- 5D: Sustainably manage, maintain, enhance and preserve our natural resources, such as the North Shore Channel, canal lands and Ladd Arboretum.
- 5E: Protect and seek to expand, where possible, green spaces within the City.

Goal Six: Coordinate and influence transportation resources to provide an improved system that is safe, integrated, accessible, responsive, understandable, efficient, and meets the needs of all people.

Objectives:

- 6A: Complete a 20-year, multi-modal transportation plan for the City to identify disconnects in the transportation system and to develop strategies to make modal connections.
- 6B: Leverage funds and resources from a variety of sources.
- 6C: Promote energy-efficient and non-automotive transportation systems, including implementation of the Evanston Bike Plan.

Strengthening Community

Partnerships Vision “Evanston will build cooperative reciprocal partnerships with the educative institutions, not-for-profits, hospitals, and business constituents. We will continue to focus on nurturing current relationships and creating new relationships to provide a better life for our diverse population.”

Goal Seven: Continue to develop a collaborative and reciprocal relationship with Northwestern University.

Objectives:

- 7A: Inventory current relationships and perform needs and opportunities analysis.
- 7B: Research positive University/Government (Town/Gown) relationships to identify successful approaches to working together.
- 7C: Establish quarterly meetings between representatives of the City Council and Northwestern University Board of Trustees.
- 7D: Establish regular meetings between senior staff from the City and the University.
- 7E: Perform needs and opportunities analyses and develop common delivery of services such as dispatching (911), parking, recreation, employment opportunities, etc.

Governance Vision “Evanston will strive to create the most useful and efficient government and government services.”

Goal Eight: Create collaborative and productive partnerships with schools, hospitals, business organizations, arts organizations, and other not-for-profit groups and governments.

Objectives:

- 8A: Inventory and define existing relationships at both the Council and staff level.
- 8B: Evaluate objectives of current partnerships and determine future direction and appropriate action steps at facilitated strategy sessions with aforementioned groups.
- 8C: Expand and enhance the integration of the arts including the provision of public art in the business, social and educational environment of Evanston.

Goal Nine: More effectively utilize Boards and Commissions.

Objectives:

- 9A: Review the function, responsibility and structure of all Boards and Commissions to maximize effectiveness.
- 9B: Provide standardized training/orientation for members and assigned staff.

Goal Ten: Promote a standard of excellence and collaboration between staff and the City Council to provide outstanding customer service to the citizens of Evanston.

Objectives:

- 10A: Create a comprehensive and continuous customer service training program that fosters an environment of creative problem solving at all staff levels and ensures the staff is responsive, knowledgeable, courteous and friendly at every staff level.
- 10B: Provide an integrated system that allows customer input on service performance.
- 10C: Recruit, retain and develop the most qualified individuals for all City departments.
- 10D: Investigate and implement best practices and national models of service delivery.

Strengthening Community

Neighborhood Vision “Evanston will maintain and build upon the uniqueness and strengths of its neighborhoods and parks. We will provide a high quality of life for all members of our diverse population.”

Goal Eleven: Define Evanston neighborhoods and ensure that they are safe, clean, and attractive.

Objectives:

- 11A: Define neighborhood unit and develop an inventory of organizational resources, assets and needs.
- 11B: Identify existing service gaps, opportunities and threats.
- 11C: Develop an action plan to incorporate more multi-generational features in our parks, recreational programs and facilities.
- 11D: Respond effectively and efficiently to the identified needs of Evanston neighborhoods.
- 11E: Evaluate and refine public safety strategies to promote a safe environment throughout the community's neighborhoods.

Social Programs Vision “Evanston is a socially-conscious and active City. We will address the social needs of all our citizens where additional help and support is required.”

Goal Twelve: Provide opportunities for and engage Evanston youth and young adults to become active and productive citizens of the Evanston community.

Objectives:

- 12A: Assess youth and young adult services and develop recommendations to address service gaps.
- 12B: Partner with others to increase participation and interest of youth and young adults.
- 12C: Address the recreational needs of youth and young adults.

Goal Thirteen: Strive to ensure that all Evanston residents have access to healthcare as well as basic food, housing and shelter.

Objectives:

- 13A: Regularly assess community health and wellness and the need for human services.
- 13B: Assess the effectiveness and responsiveness of human services programs.
- 13C: Support and promote a collaborative network of human services programs in Evanston.

City of
Evanston

PART II

CHARTS AND SUMMARIES

City of Evanston Organizational Chart

General Information

Evanston and its Government

The City of Evanston is a Home Rule community located in Northeastern Illinois along Lake Michigan. The City is governed by a Council-Manager form of government, which includes a Mayor and nine ward elected Aldermen. The city provides a wide variety of services. These include fire protection, law enforcement, water and sewer utilities, health and human services, recreation, public works, libraries, and community development.

The City of Evanston's 8.0 square miles include over 30,000 housing units for 74,239 residents. Evanston also hosts two institutions of higher learning: Northwestern University and National-Louis University. In addition, the City is home to several other non-profit and philanthropic organizations.

By combining a high quality of life and close proximity to the City of Chicago, Evanston continues to be a highly desirable residential community. The quality of Evanston's earliest neighborhoods has been preserved and enhanced by foresighted planning and zoning. Due to cultural opportunities and flourishing commercial districts, the City of Evanston is increasingly a destination for business and pleasure alike, rather than a purely residential community.

Budget Process

Summary of Proceedings:

The City's fiscal year begins on March 1 of each year. The City Manager submits to the City Council a proposed operating budget in December for the fiscal year commencing the following March 1. The operating budget includes proposed expenditures and the means of financing those expenditures. The City Council holds public hearings (two Saturday morning public hearings were held prior to adoption of the 2004/2005 budget) and then may modify the budget prior to adoption.

The City Manager is authorized to transfer budgeted amounts between departments within any fund (such as the General Fund); however, any revisions that alter the total expenditures of any fund must be approved by the City Council.

Preparation and Adoption:

Budgets are legally adopted on a basis consistent with generally accepted accounting principles (GAAP) except that 1) property taxes are budgeted as revenue in the year for which they are levied; 2) debt service payments are budgeted upon tax levy for such purposes and 3) encumbrances are recorded as the equivalent of an expenditure for budget purposes. For purposes of preparing the General Fund schedule of revenues – budget and actual, GAAP revenue and expenditures have been adjusted to the budgetary basis. The budgets of the governmental type funds are prepared on a modified accrual basis. Debt service payments and a number of specific accrued liabilities are only recognized as expenditures when payment is due, and revenue is recognized only when it has actually been received.

Related Legislation:

The Evanston City Council has adopted three primary pieces of legislation which govern the budget process.

Resolution 67-PR-79 establishes a Budget Policy for the City of Evanston. This policy provides guidelines for determining the amount of property tax to be levied, the funding for the Police and Fire Pension Funds, and the re-appropriation of fund balance.

Ordinance 57-0-79 provides for the adoption of the annual budget. This ordinance establishes the following:

Fiscal Year - The fiscal year of the City of Evanston shall commence on March 1 each year and close on the last day of February each year.

Passage of the Annual Budget - The annual budget shall be adopted by the City Council before the beginning of the fiscal year to which it applies.

Compilation of the Proposed Budget - Each year the City Manager shall prepare and submit a proposed budget to the City Council on or before the last day of December. The proposed budget shall contain estimates of revenues available to the City for the fiscal year along with recommended expenditures for the departments, boards and commissions.

Revision of Annual Budget - Following City Council adoption of the budget, the City Council, by a vote of two-thirds of its members, shall have the authority to revise the budget by transferring monies from one fund to another or adding to any fund. No revision of the annual budget shall increase the budget in the event monies are not available to do so.

Public Hearing, Notice and Inspection of Budget - The City Council will hold a public hearing on the annual budget prior to final action by the City Council. Notice of this hearing shall be published in a local newspaper at least ten days prior to the public hearing. Copies of the proposed budget will be available for public inspection in printed form in the office of the City Clerk for at least ten days prior to the hearing.

Resolution 6-PR-78 establishes a policy concerning municipal budget procedures. The primary components of this resolution include the following:

In advance of the submission of the City Manager's proposed budget to the City Council, the Administration and Public Works Committee shall publicize and conduct a public hearing to receive input from citizens concerning municipal appropriations for the coming year.

Sufficient copies of the proposed budget shall be placed on file with the City Clerk, the Public Library, and all library branches, and will be available for public inspection at these locations.

The City Council budget meeting agendas will be available to the public prior to the initial special meeting of the City Council on the proposed budget.

Each special meeting of the City Council on the proposed budget shall designate a period of time for citizen testimony concerning budget matters discussed during that special meeting. The length of such time shall be determined by the chairman prior to the budget meeting process.

Financial Control Procedures:

The City reports financial results based on generally accepted accounting principles as promulgated by the Governmental Accounting Standards Board (GASB). The accounts of the City are divided into separate self-balancing funds comprised of its assets, liabilities, fund equity, revenues and expenditures, as appropriate.

The City's expenditures are monitored on a regular basis by the Finance Department and Budget Department. Disbursements are made only if the expenditure is within the authorized appropriation. For each major expenditure, a purchase order is prepared and approved and the related appropriation is encumbered before a check is issued.

City of Evanston

Budgetary Basis of Accounting

The City was incorporated in 1863. The City operates under a Council-Manager form of government, is a home rule municipality as defined by Illinois state law and provides the following services as authorized by its charter: general management and support, public safety, public works, health and human resource development, recreational and cultural opportunities and housing and economic development.

The City uses funds and account groups to report on its financial position and the results of its operations. Fund accounting is designed to demonstrate legal compliance and to aid financial management by segregating transactions related to certain City functions or activities.

A fund is a separate accounting entity with a self-balancing set of accounts. An account group, on the other hand, is a financial reporting device designed to provide accountability for certain assets and liabilities that are not recorded in the funds because they do not directly affect net expendable available financial resources.

Funds are classified into three categories: governmental, proprietary and fiduciary. Each category, in turn, is divided into separate "fund types."

Governmental funds are used to account for all or most of the City's general activities, including the collection and disbursement of earmarked monies (special revenue funds), the acquisition or construction of general fixed assets (capital projects funds), and the servicing of general long-term debt (debt service funds). The general fund is used to account for all activities of the City not accounted for in some other fund.

The City follows these procedures in establishing the budgetary data reflected in the financial statements:

1. The City Manager submits to the City Council a proposed operating budget for the fiscal year commencing the following March 1. The operating budget includes proposed expenditures and the means of financing them.
2. Public budget hearings are conducted. Taxpayer comments are received and noted.
3. The City Manager is authorized to transfer budgeted amounts between departments within any fund; however, any revisions that alter the total expenditures of any fund must be approved by the City Council.
4. Budgets are legally adopted on a basis consistent with generally accepted accounting principles (GAAP) except that (1) property taxes are budgeted as revenue in the year they are levied, (2) debt service payments are budgeted upon tax levy for such purposes and (3) encumbrances are recorded as the equivalent of expenditure for budget purposes. For purposes of preparing the combined statement of revenues, expenditure and changes in fund balances - budget and actual, GAAP revenues and expenditures have been adjusted to the budgetary basis.

The following funds have legally adopted budgets:

General

Special Revenue: Motor Fuel Tax, Community Development Block Grant, Economic Development, Emergency Telephone System, Special Housing, Special Service District No. 4

Debt Service: General Obligation Debt, Central Business Tax Increment District and Southwest Tax Increment District

Enterprise: Water, Motor Vehicle Parking System, Sewer

Internal Service: Fleet Services

Pension Trust: Firefighters' Pension, Police Pension

The level of control (level at which expenditures may not exceed budget) is the fund. All unencumbered annual appropriations are lapsed at the fiscal year-end.

Encumbrance accounting, under which purchase orders, contracts and other commitments for the expenditure of monies are recorded in order to reserve that portion of the applicable appropriation, is employed as an extension of formal budgetary integration in the General Fund and some Special Revenue Funds. Encumbrances outstanding at year-end are reported as reservations of fund balances since they do not constitute expenditures or liabilities

The budgets of general government type funds (for example, the general fund itself and MFT funds) are prepared on a modified accrual basis. Briefly, this means that obligations of the City (for example outstanding purchase orders) are budgeted as expenses, but are recognized only when they are actually received.

The enterprise funds (water and sewer), on the other hand, are budgeted on a full accrual basis. Not only are expenditures recognized when a commitment is made (through a purchase order) but revenues are also recognized when they are obligated to the city (for example, water user fees are recognized as revenue when bills are produced.).

The Comprehensive Annual Financial Report (CAFR) shows the status of the City's finances on the basis of "generally accepted accounting principles" (GAAP). In most cases this conforms to the way the City prepares its budget. Two exceptions are the treatment of depreciation expense (these are not shown in the budget although the full purchase price of equipment and capital improvements is, while purchases of capital improvements are depreciated in CAFR for enterprise funds) and compensated absences (accrued but unused sick leave) are treated slightly differently in the budget and in the CAFR.

The Comprehensive Annual Financial Report shows fund expenditures and revenues on both a GAAP basis and a Budget basis for comparison purposes.

City of Evanston

Budget Policy (Revised May 24, 2004)

In ongoing efforts toward formally addressing long-term budgeting provisions, the City of Evanston has endorsed a Budget Policy. The City Council initially adopted this Budget Policy in December 2000. This policy is revised as follows:

I. Budget Process

A. Preliminary Pubic Hearing

In September of each year prior to submission of the City Manager's proposed budget to the City Council, the Administration and Public Works Committee shall publicize and conduct a public hearing to receive input from citizens concerning municipal appropriations for the coming fiscal year.

B. Mid- year Budget Workshop

Each September the Administration and Public Works Committee shall schedule and hold a mid-year budget workshop. The workshop shall review but not be limited to:

- A revenue and expenditure report for the current fiscal year.
- Structural or legislative issues affecting the current or future fiscal year.
- Revenue and expenditure forecast for the upcoming fiscal year.
- Other issues of policy or indicators that will affect the upcoming fiscal year budget.

All members of the City Council shall be invited to participate in the Budget Workshop.

C. Quarterly Financial Update

Following the end of each financial quarter, the City Manager shall present a report summarizing budgeted vs. actual revenues and expenditures.

D. Review of the Comprehensive Annual Financial Report

The Administration and Public Works Committee shall review the Comprehensive Annual Financial Report. This review shall take place at the earliest meeting date following publication.

E. Copies of the Proposed and Final Budget

Sufficient copies of the proposed and final budget shall be placed on file in printed form with the City Clerk, the Public Library, all library branches, and will be available for public inspection at these locations. An electronic version of the proposed and final budget shall be posted on the City of Evanston Website. The City of Evanston may offer for sale a printed and electronic copy of the proposed and final budget for a fee not to exceed the cost of preparation, printing, and distribution of the budget.

F. Submission of the Proposed Budget

The City Manager will submit a balanced budget to the City Council by December 31. (Ordinance 57-O-79)

City of Evanston

Budget Policy (Revised May 24, 2004)

II. Fund Policies

A. General Fund

The General Fund budget will be balanced with property tax, only after all other revenue sources and expenditure reductions have been exhausted. In addition, all new unfunded mandates must be itemized within the budget. One-time revenues shall not be used to fund current operations.

B. Parking System Fund

This is an enterprise fund and as such is expected to be self-sufficient. Any revenues generated, especially from sales, should be retained to maintain the fund. Fees should be periodically increased sufficiently to fund operating costs, depreciation, and a reserve. The General Fund will continue to be properly compensated for administrative expenses, which support parking system activities.

C. Water Fund

This is an enterprise fund and as such is expected to be self-sufficient. Rates should be maintained at sufficient levels to meet the costs of water programs, fund depreciation, and build reserves for future capital needs. Rate increases to the Northwest Water Commission and the Village of Skokie will conform to the current contractual agreements. Water rates for City of Evanston consumers will be reviewed on an annual basis. The Return on Investment (ROI) transfer to the General Fund shall be reviewed on an annual basis. Other transfers for reimbursement of administrative expenses should reflect true program costs.

D. Fire and Police Pension Funds

The Fire and Police Pension portion of the general levy will be increased to meet the annual actuarially determined funding requirements.

E. Emergency Telephone System Fund

This fund must be maintained at a level adequate to provide for maintenance of current operations, the capability to respond to unforeseen events, funding of long-term capital improvements, and needed upgrades. The fund shall be entirely supported by revenues received from the imposed surcharge of \$1.50 for landline network connections and the \$.75 State of Illinois imposed wireless surcharge. Although none is anticipated, any increase in rates would require a referendum.

F. Motor Fuel Tax Fund

The expenditures intended for Motor Fuel Tax Revenues must not exceed the amount of funds available from the State of Illinois Motor Fuel Tax Fund. These revenues should be used only for street improvement and repair, as allowed by State of Illinois law.

G. Insurance Fund

The Insurance Fund must be maintained to meet the City's current insurance liability requirements. Requirements include current budget year obligations and building a reserve over seven years to prepare for anticipated claims and losses. The City Manager shall be required to present an annual report itemizing all of the City's current and long-term claims and liabilities. Each year City Staff will

City of Evanston

Budget Policy (Revised May 24, 2004)

review worker compensation, liability, and property insurance policies to determine if coverage meets current financial and operational needs. The City Manager each year will recommend to the City Council insurance policy coverage and limits and include the necessary funds in the operating budget.

H. Fleet Services Fund

The City of Evanston shall maintain vehicles and equipment, which are safe and adequate for the demands of the operating departments. General obligation debt shall not be used for Fleet Services purchases of vehicles. Vehicle purchases from Fleet Services will be supported by fully funding depreciation.

I. Debt Service Fund

General Obligation Debt of the City means debt (viz., bonds) for which an unlimited real property tax levy is made or pledged for payment. General Obligation Debt shall be allocated into two categories. Self-Supporting General Obligation Debt shall mean General Obligation Debt which, at the time of issuance, is expected and intended by the Finance Director to be payable out of a source of funds other than the City's general real property tax levy, thus permitting the abatement and avoidance of the property tax levy to pay such bonds; examples of Self-Supporting General Obligation Debt include (without limitation) bonds payable from the Water Fund or the Sewer Fund, bonds payable from special assessments, bonds payable from tax increment financing areas, and bonds payable from Motor Fuel Taxes. Tax-Supported General Obligation Debt shall mean all other General Obligation Debt, which is expected and intended to be paid from a general real property tax levy. General Obligation Debt shall not include any obligation of the City not denominated a bond, including, without limitation, short term notes or warrants or other obligations which the City may issue from time to time for various purposes and to come due within three (3) years of issuance. General Obligation Debt does not include bonds which have been refunded or defeased and which, as a consequence of same, are provided for from a dedicated source of funds or investments. Self-Supporting General Obligation Debt shall not be limited by this Budget Policy. Tax-Supported General Obligation Debt shall not exceed \$90,000,000 in aggregate principal amount, which limit is expressly subject to increase from time to time by action of the City Council as the needs of the City may grow. General Obligation Debt issued as so-called zero coupon bonds or capital appreciation bonds shall be counted as debt in the original principal amount issued. The Finance Director shall at all times keep a book or record of all General Obligation Debt and its proper allocation. The Finance Director's statements as to the allocation of General Obligation Debt into these two categories shall be conclusive. Notwithstanding this statement of policy, all bonds or other obligations by whatever name designated of the City duly authorized to be issued by the City Council shall be valid and legally binding as against the City, and there shall be no defense of the City as against any bondholder or other obligation holder on the basis of this policy.

J. Economic Development Fund

Expenditures for the Economic Development Fund should not exceed projected Hotel Tax Revenues.

K. Sewer Fund

This is an enterprise fund and as such is expected to be self-sufficient. As a result, rates should be scheduled to increase to meet costs of sewer programs. In compliance with Ordinance 12-O-00, and

City of Evanston

Budget Policy (Revised May 24, 2004)

13-O-03, rates are scheduled to increase in fiscal years 2001 (12%), 2002 (10%), 2003 (10%), 2004 (5%), 2005 (5%). Transfers to other funds for administrative expenses should be maintained to reflect true program costs.

L. Expenditure Analysis

City Council shall review all significant operational, economic, program, and expenditure proposals in regard to the short term and long-term budgetary and economic impact. The appropriate City Department and Staff shall provide the budget analysis for the review and consideration by the City Council.

III. Fund Reserve Policy

The Fund Reserve Policy is as follows:

A. General Fund

A minimum of 8.3% or one month of operating expenses shall be maintained as a reserve. Any monies over a 10% reserve in this fund shall be re-appropriated to other funds that have not met their reserve requirements. Once all funds have met their fund requirements additional funds shall go to the Capital Improvement Program. A minimum of a 5% reserve is required, per bond agreements.

B. Parking System Fund

A minimum of 10% expenses shall be maintained as a reserve; in addition a sufficient reserve shall be maintained to meet bond requirements. A portion of the fund reserve shall be used to fund depreciation and capital improvement needs. A minimum of 5% is required, per bond requirements.

C. Water Fund

A minimum of 10% expenses shall be maintained as a reserve; in addition a sufficient reserve shall be maintained to meet bond requirements. A portion of the fund reserve shall be used to fund depreciation and capital improvement needs. A minimum of a 5% reserve is required, per bond agreements.

D. Sewer Fund

A minimum of 10% expenses shall be maintained as a reserve, a sufficient reserve shall be maintained to satisfy both bond requirements and Illinois Environmental Protection Agency (IEPA) loan requirements. (A minimum of a 5% reserve is required, per bond agreements) A portion of this fund reserve shall be used to fund depreciation and capital improvement needs.

City of Evanston

Fund Descriptions

GENERAL FUND

General Fund - to account for resources traditionally associated with governments which are not required to be accounted for in another fund.

SPECIAL REVENUE FUNDS

City Funds

Motor Fuel Tax Fund - to account for the operation of street maintenance programs and capital projects as authorized by the Illinois Department of Transportation. Financing is provided from the City's share of gasoline taxes.

Economic Development Fund - to account for costs associated with economic development activities of the City. Financing is provided primarily by real estate transfer tax revenues.

Emergency Telephone System Fund - to account for revenues and expenditures for 911 emergency telephone service. Financing is provided by network connection surcharges.

Library Fund - to account for the activity of the funds donated to the library. These funds are invested at the direction of the library board and are used for library acquisitions.

Neighborhood Improvement Fund - to account for a portion of the sales tax revenues derived from retail sales of the Home Depot U.S.A. Inc. store in Evanston. Sales tax revenues allocated to this fund are to be expended on public projects that will benefit the immediate neighborhood of the store.

Mayor's Special Housing Fund - to account for costs associated with housing related programs of the City.

HOME Fund - to account for the activity of the HOME program. Financing is provided by the Federal government to be used to create affordable housing to low-income households. Expenditures are made in accordance with the requirements of Federal law.

Community Development Block Grant Fund - to account for the revenues and expenditures of the community block grant program. Financing is provided by the Federal government on a reimbursement basis in accordance with Federal formula. Expenditures are made in accordance with the requirements of Federal law.

Community Development Loan Fund - to account for residential rehabilitation loans to residents.

Special Service District No. 4 Fund - to account for promotion, advertisement and street maintenance costs of the area located in the City's central business district. Financing is provided by the City through an annual property tax levy.

DEBT SERVICE FUNDS

General Obligation Debt Fund - to accumulate monies for the principal and interest payments on bonds, notes and contracts of general obligation to the City.

Special Service District No. 5 Fund - to accumulate monies for the principal and interest payments on unlimited ad valorem tax bonds issued for this special taxing district.

City of Evanston

Fund Descriptions

Central Business Tax Increment District Fund - to accumulate monies for the principal and interest payments on debt issued for this special taxing district.

Southwest Tax Increment District Fund - to accumulate monies for principal and interest payments on debt issued for this special taxing district.

Howard Hartrey Tax Increment District Fund - to accumulate monies for principal and interest payments on debt issued for this special taxing district.

Washington National Tax Increment District Fund - to accumulate monies for principal and interest payments on debt issued for this special taxing district.

CAPITAL PROJECTS FUNDS

Capital Improvements Fund - to account for the City of Evanston capital improvement program. The program includes, but is not limited to, improvements to public buildings, the paving of city streets and the improvement and development of recreation facilities. Financing is provided principally by grants and general obligation bond proceeds.

Central Business Tax Increment District Fund - to account for the purchase of land and other related costs of the research park. Financing is provided from general obligation bond and note proceeds.

Special Assessment Fund - to account for capital improvements financed by special assessments on property holders and public benefit contributions from the City.

ENTERPRISE FUNDS

Water Fund - to account for the provision of water services to the residents of the City and the sale of water to the Village of Skokie, Illinois and the Northwest Water Commission. All activities necessary to provide such services are accounted for in this fund, including, but not limited to, administration, operation, maintenance, financing and related debt service and billing and collection.

Motor Vehicle Parking System Fund - to account for the provision of public parking services for a fee. All activities are accounted for including administration, operations, financing and revenue collection.

Sewer Fund - to account for the provision of sewer repair and improvement services to the residents of the City. All activities necessary to provide such services are accounted for in this fund, including administration, operations, financing and billing and collection.

Maple Avenue Garage Fund - to account for the provision of the public parking facility on Maple Avenue. All activities are accounted for including administration, operations, financing and revenue collection.

INTERNAL SERVICE FUNDS

Fleet Services Fund - to account for the costs of operating the municipal service center maintenance facility for transportation equipment used by other City departments. Such costs are billed to the user departments at actual cost. Actual costs include depreciation on the transportation equipment.

Fund Descriptions

Insurance Fund - to account for the costs of administering general liability claims and workers' compensation programs. Such costs are billed to the General Fund.

TRUST AND AGENCY FUNDS

Pension Trust Funds

Firefighters' Pension Fund - to account for the accumulation of resources to pay pension costs. Resources are contributed by fire personnel members at rates fixed by state statutes and by the City through an annual property tax levy.

Police Pension Fund - to account for the accumulation of resources to pay pension costs. Resources are contributed by police force members at rates fixed by state statutes and by the City through an annual property tax levy.

Expendable Trust Fund

Employer Pension Contribution Fund - to account for the recognition of applicable tax revenues and employer contributions to the Pension Trust Funds. These contributions represent the City's pension expense for Police and Firefighters.

Agency Funds

Special Assessment Fund - to account for cash received from property owners on capital improvement special assessments. Such amounts collected will be forwarded to bondholders. The City is not obligated in any manner for this debt and is only acting as agent for the property

Summary - All Funds
(prior to interfund transfers)

**Total Appropriation All Funds
2005-06 vs. 2006-07
(Prior to Interfund Transfers)**

In this summary, the total budgets for all funds are compared with the approved fund totals for FY 2005-06.

All budget totals in this summary are gross figures prior to adjustment to eliminate double counting of expenditures due to interfund transfers. Each interfund transfer appears as an appropriation in two funds.

Fund	2005-06 Appropriation	2006-07 Approved Appropriation	Net Change	Percent Change
General	\$ 82,714,300	\$ 85,784,800	\$ 3,070,500	3.71%
Parking	\$ 3,542,100	\$ 3,692,800	\$ 150,700	4.25%
Water	\$ 13,690,600	\$ 13,702,800	\$ 12,200	0.09%
Fire Pension	\$ 4,714,000	\$ 5,162,000	\$ 448,000	9.50%
Police Pension	\$ 5,888,500	\$ 5,983,500	\$ 95,000	1.61%

Analysis of Appropriations for Transfers to Other Funds
FY 2006-2007 Approved Budget

General Fund

Various 62305 Accounts	Transfer to Fleet Service Fund	\$4,317,800
2690.68305	Debt Service - Recycling and Vehicle	\$175,000
1610.66020	Transfer to Insurance Fund	\$1,900,000
1615.66020	To Capital Improvements	\$200,000

Total General Fund Transfers **\$6,592,800**

Parking Systems Fund

7005, 7015.62305	Transfer to Fleet Service Fund	\$111,800
7005, 7025.62675	Transfer to General Fund for Pension	\$128,000
7015, 7025.66132	Transfer to General Fund for Insurance	\$85,300
7050.62685	Transfer to General Fund for Administrative Expense	\$470,600
7050.66134	To General Fund for Parking Lot Maintenance	\$27,600

Total Parking Systems Fund Transfers **\$823,300**

Emergency Telephone System

5150.62680	Transfer to General Fund for Information Systems Support	\$60,000
5150.62685	Transfer to General Fund For Administrative Expense	\$66,000
5150.62675	Transfer to General Fund for Pension	\$53,000

Total Emergency Telephone System Fund Transfers **\$179,000**

Motor Fuel Tax Fund

5100.62720	Transfer to General Fund for Street Maintenance	\$650,000
5100.66136	Transfer to General Fund for Engineering Services	\$122,500

Total Motor Fuel Tax Fund Transfers **\$772,500**

CDBG Fund

Various CDBG Accounts	Transfer to General Fund for Pension, Health & Life Ins.	\$112,800
Various CDBG Accounts	Transfer to General Fund for CDBG Supported Programs	\$796,700

Total CDBG Fund Transfers **\$909,500**

HOME Fund

5450.61455	Transfer to General Fund for Salary	\$32,700
Various HOME Accounts	Transfer to General Fund for Pension, Health & Life Ins.	\$6,600

Total HOME Fund Transfers **\$39,300**

MAPLE Garage Fund

7000.66132	Transfer to General Fund for Insurance	\$43,000

Water Fund

7100, 7115, 7120.62305	Transfer to Fleet Services Fund	\$331,200
7100, 7105, 7110, 7115, 7120.62675	Transfer to General Fund for Pension	\$437,800
7125.66138	Transfer to General Fund for Public Works Support	\$18,500
7160.66020	Transfer to General Fund - Return in Investment	\$2,531,300
7125.66132	Transfer to General Fund for Insurance	\$140,400
7125.66139	Transfer to General Fund for Worker's Compensation Expense	\$31,000
7180.66140	Transfer to General Fund - Operating Cash	\$162,300
7125.62680	Transfer to General Fund for Collections and Information Systems	\$90,700
7125.62685	Transfer to General Fund for Administrative Expense	\$484,000

Total Water Fund Transfers **\$4,227,200**

Fleet Service Fund

7705, 7710, 7715.62675	Transfer to General Fund for Pension	\$171,500

Economic Development Fund

5300.66131	Transfer to General Fund	\$390,000
5300.62675	Transfer to General Fund for Pension	\$10,000
5300.66127	Transfer to Maple Avenue Garage Fund	\$650,000

Total Economic Development Fund Transfers	\$1,050,000

Sewer Fund

7400.62305	Transfer to Fleet Service Fund	\$258,600
7410.62675	Transfer to General Fund for Pension	\$129,800
7410.66132	Transfer to General Fund for Insurance	\$108,400
7410.66139	Transfer to General Fund for Worker's Compensation Expense	\$39,400
7410.62680	Transfer to General Fund for Collections and Information Systems	\$69,700
7410.62685	Transfer to General Fund for Administrative Expense	\$72,500
7420.66138	Transfer to General Fund for Public Works Support	\$123,800

Total Sewer Fund Transfers	\$802,200

Capital Improvement Fund

416051	Transfer to General Fund for Engineering for Capital Projects	\$300,000

Housing Fund (special assessment)

Transfer to General Fund for Administrative Expense	\$31,800

TIF Funds

5800.62685	To General Fund From Downtown II Expense	\$325,000
5800.66128	To Maple Ave. Garage fund From Downtown II Expense	\$4,502,000
5800.66129	To Washington National TIF from Downtown II Expense	\$845,315
5470.62685	To General Fund From Washington National TIF	\$144,800
5500.62685	To General Fund From Howard Hartrey TIF	\$135,000
5540.62685	To General Fund From Southwest TIF	\$23,000

Total TIF Transfers	\$5,975,115

Grand Total Transfers	\$21,917,215

* Prior to the 2005-2006 budget year, the property tax increase was levied only across the General Fund, Debt Service, and Pension Funds.

** The remaining "Other General Fund" appropriation is the portion of property tax that is used to support general fund activities other than IMRF Pension funding, Recreation Programming, and Library functions.

REVENUE SOURCES, ASSUMPTIONS AND TRENDS

The following is a summary of major revenue sources, trends and assumptions for FY2007:

PROPERTY TAXES – Evanston property owners pay property tax to multiple entities including the City of Evanston. The City portion of the property tax increased 3.98% in the FY2006 budget. The FY2007 proposed budget includes a 2.92% increase to the City of Evanston portion of the property tax bill. Sixty percent of the total increase is the result of pension funding mandated by the State. The general fund includes a proposed increase of 2.34%. Additionally, there is a 15.64% increase in the fire pension fund; 1.47% increase for the police pension fund; and no increase in the debt service fund. Increases in the police and fire pension funds are mandated by the State of Illinois and remained flat this fiscal year. The portion of property tax assessed for debt service was maintained by restructuring the financing for the fund. Property taxes pay for general operations, debt service and police and fire pension funding in the City.

SALES TAXES – The City receives two types of sales taxes – one from the state and the other from a sales tax Imposed through the City's home-rule status. The state tax rate is 1% and the local home rule sales tax rate is 1%. The City has experienced almost no increases annually on its sales tax growth during the last four years. However, compared to other local governments in the region, maintenance of a non-growth sales tax during the current economy is good. Evanston's steady sales tax revenue position is attributed to a good local economy and solid growth in sales from the City's TIF (Tax Increment Finance) districts. It is estimated that the sales tax will remain constant in FY2007.

INCOME TAX – Income tax is a state shared tax that is distributed on a per capita basis and is based on the average income statewide. Because Evanston's 2000 census population increased at a smaller percentage than that of the state's overall population its state allocation of income tax funds decreased. There was an additional decrease due to a move by the Governor's office that occurred in the summer of 2003 and the state has under-allocated funds for cities portions of the state income tax for the last several years. In FY 2005, the Local Government Income Tax Distributive Fund contributed to alleviate this under-funding and it cost the City \$6.48 per resident – resulting in almost a \$500,000 decrease in annual income tax revenue. The City projects an increase of \$500,000 in income tax revenue for FY2007 – the result of a rebounding economy.

UTILITY TAXES – Utility taxes consist of taxes on electric, telephone and natural gas use. Utility taxes have increased steadily by 3 to 5 percent a year from 2003 to 2005. Deregulation of natural gas and electricity, created competition and a decrease in tax collection rates which resulted in a decrease in tax revenues in 2006. In 2005, the Council increased the Gas Use Tax, which is a tax on consumers of brokered gas, from a rate of \$.0095/therm to \$.25/therm, strengthening the performance of that revenue source. Overall, utility tax revenues are expected to perform well in FY 2007 with a projected increase of 4.27%.

REAL ESTATE TRANSFER TAX – The real estate transfer tax is imposed at \$5 dollars per \$1,000 increment of value on the sale or transfer of real estate in the City. This tax has seen solid growth from 2003 thru 2005. Because of the tremendous revenues received in FY2005 and a slight decrease in the number of transfer stamps sold through the end of 2006, it is assumed that even if home prices continue to rise, the inventory in the City cannot continue to sustain this high level of sales. It is therefore estimated that these tax revenues will peak at \$4.0 million 2006 and then fall to a regular level of about \$2.5 million in future years. The council approved an increase in exempt property transfer tax fees, to \$100 per transfer. As a result, a slight \$55,200 increase is projected for FY 2007.

WATER REVENUES – Water revenues from Evanston's water utility customers are expected to remain constant over the next year with slight changes to Skokie and Northwest Water Commission Estimates. This is due to cost of living escalators built into water contracts with outside entities such as the Village of Skokie and the Northwest Water Commission who Evanston supplies water to. Revenues generated by City residents are expected to remain at current levels and vary only depending on heat and precipitation levels in the summer.

SEWER REVENUES – The City opted not to enact the last year of a four year increase in sewer rates in FY 2006. Instead, a study of the sewer rate structure was undertaken and the rates were frozen at 2005 levels. The effect on the FY 2007 budget is a decrease of almost 4% in anticipated revenue. Sewer revenue is used to pay for a \$199 million sewer improvement program the City embarked on several years ago. Over 75% of this project has been completed and the increased revenues will go towards paying off Illinois EPA loans which have been used to fund the capital improvements. Usage estimates have been revised due to the sewer study undertaken during the summer of 2005. Revenues are expected to be realized at \$16,499,900 for 2006 and 2007.

PARKING REVENUES – The City operates parking meters, lots and two major garages which generate revenues. Parking revenues have fluctuated slightly over the last several years, with 2003 revenues increasing due to expanded enforcement hours. However, with few changes to parking enforcement in 2004 and 2005, parking related revenues have remained flat for several years. Revenues are projected to increase by approximately 10.40% in FY07 due to a change in the parking fee structure that increases cost recovery and dedicates \$220,000 of the parking tax to the fund.

City of Evanston

Debt Service Funds

The primary objective in debt management is to keep the level of indebtedness within available resources and it's imperative to keep the debt within the stated City Council debt limitation. Because the City of Evanston is a Home Rule Municipality there is no legal limit on the amount of debt that the City can issue. However, the Evanston City Council has established a limit of \$110,000,000 in general obligation debt as a City debt service policy.

On July 28, 2005 the City sold \$29,270,000 Series 2005 General Obligation Bonds. Proceeds were allotted as follows:

- A. \$23,000,000 for capital improvements
- B. \$ 1,500,000 for special assessment alley improvements
- C. \$ 4,770,000 for refunding

The public debt in the City of Evanston satisfies the current budget policy and is sufficient to meet the community needs. The City of Evanston retained its Moody's Aaa rating during 2004.

The following is a statistical breakdown of the City of Evanston's debt services profile.

Debt per capital (2004)	\$ 2,876
Debt as a percentage of assessed valuation	5.40 %
Debt services as a % of General Fund Expenditures (FY 2006)	10.6 %
Bonds Rating (Moody's) – Current	Aaa
Bonds Rating (Fitch) – Current	aaa
Equalized Assessed Valuation - 2003	\$1,727,147,885
Net General Obligation Debt (2005)	\$93,905,000

Performance Report on FY 2005-2006 Major Program Objectives

A moratorium on the issuance of building permits on Central Street between Bennett and Marcy was introduced and approved in March and renewed twice. This was done to allow the Plan Commission to discuss potential modifications to zoning in that area.

The Zoning Ordinance was amended in B and D districts concerning building to the lot line.

A Council member suggested Radio Evanston as a way to have better Citywide communications during emergencies, which was implemented when Radio Evanston 1650 on the AM dial was activated.

The City Council passed a resolution that recognized and commemorated the health care services provided by St. Francis hospital to the Evanston community. The Council voted to raise the parking tax on all parking facilities of the City, raised parking meter rates, and voted approval of a security camera surveillance system in City buildings. The Weapons Ordinance was amended and updated by the City Council.

A controversial issue in the community was the proposal to create an Elm Tree Injection Program to save public elm trees. The Council voted to enact a program in which all water utility customers would pay a portion of the cost of this program so that all elm trees above 10-inches in diameter would be inoculated. The ordinance was reconsidered, and Council voted to inject signature trees of 30-inch diameter or greater and significant trees by location.

The City Council passed Bond Series 2005 in an amount not to exceed \$32.5 million with \$6.5 million for capital improvement projects, \$3.5 million for water and sewer projects, \$500,000 for the private portion of the 50% match on alleys, \$14 million for the Sherman Avenue Garage, and \$6.3 million for refunding of \$8.5 million Series 1998 bonds.

The Council passed an amendment to the Zoning Ordinance eliminating the Preservation Commission mandatory review and comment of developments on non-landmark properties in federal, but not local, historic districts.

After a public hearing by the Joint Review Board on the West Side TIF, the Council adopted a Tax Increment Redevelopment Plan & Project, designating the project area and tax increment allocation financing for the project.

The Council passed a resolution that urged the orderly and rapid withdrawal of United States troops from Iraq.

The Council passed the West Evanston Neighborhood Plan on the recommendation of the Plan Commission

2006-2007 Department Initiatives

1. A strategic plan for the City will be adopted
2. Revitalization and redevelopment of downtown will continue
3. Land use and density issues will continue to be important to downtown and in neighborhoods
4. There will be continued review and consideration of inclusionary and affordable housing
5. Continued support to neighborhoods and business revitalization of Evanston's West Side

City of Evanston

City Council

1300 – City Council

Description of Major Activities

The City Council consists of the Mayor--elected at large and a non-voting member of the Council--and 9 aldermen, one elected from each of the 9 wards for a term of four years.

The City Council formulates policies to guide the orderly development and administration of the City, determines the use of tax dollars and other funding sources to meet the City's needs, holds public hearings to provide citizens with opportunities to be heard; participates in conferences, forums and meetings of legislative groups and associations; keeps its constituency informed of City issues and activities through ward meetings and public forums; and responds to citizen requests for services and information.

FY 2006-2007 Objectives

- Continuation of the downtown revitalization and redevelopment program
- To address land use and density issues, especially in established neighborhoods
- Continued review of inclusionary and affordable housing issues
- Continued support of neighborhood and business revitalization of the west side
- Determination of the direction of removal, rebuilding, or replacement of the Civic Center

Total Revenues:	\$ 18,920	\$ 24,610	\$ 22,465	\$ 22,160

Notes for Financial Summary

The cost of the BOCA codes has gone up because the new international codes, adopted by the City Council, are a combination of three codes which make the book much larger.

Performance Report on FY 2005-2006 Major Program Objectives

A new program of tracking FOIA requests/denials has been put into place with a data base.

Four-dozen municipal-candidate and in-person absentee voting packets were provided for residents for the April 5 consolidated election.

Conducted a canvas of election results and provided them to Cook County and the State of Illinois.

2006-2007 Department Initiatives

1. To provide support and backup to Cook County Department of Elections for early voting, the March 21, 2006, primary election, and the November 7, general election
2. To coordinate a first-step program to bring the City Code up to date through a legal review of the current City Code with Sterling Codifiers
3. To continue enhancing the system for FOIA requests in order to have an accurate count of requests and denials
4. To begin logging in those to whom we render notary services; we are notarizing at least one document each work day

City of Evanston

City Clerk

1400 – City Clerk

Description of Major Activities

The City Clerk is secretary to the City Council and staff to special Council committees. The clerk produces official minutes of all Council meetings, is responsible for maintaining the City Code and official City and township records, serves as the local election official, is the deputy registrar for voter registration, and performs other election-related activities. The City Clerk also assists the Mayor, aldermen, and staff with special projects and activities, and represents the City at various meetings.

Services provided by the City Clerk's Office are:

- Collecting the real estate transfer tax and issuing exemptions from the tax
- Providing administrative and clerical services associated with appointed boards, committees, and commissions of the City
- Issuing 90-day placards to disabled persons
- Providing information services and tracking Freedom of Information requests to departments
- Preparing and publishing the official municipal directory and annual calendar of meetings
- Updating meeting changes on the web calendar
- Maintaining the municipal library
- Assisting citizens with information, directions, and referrals
- Selling publications, including City maps, and distributing community information to new residents
- Providing notary services to staff and citizens, where full-time office personnel are official passport acceptance agents for the U.S. Department of State
- Performing ombudsman services to citizens
- Receiving lawsuits in which the City is named
- Signing all general obligation and revenue bonds, processing all surety bonds and international codes adopted by the City
- Issuing Illinois hunting and fishing licenses and certifying residency for retirees

FY 2006-2007 Objectives

- Work with the Cook County Department of Elections in order to hold a fair and impartial primary election on March 21, and general election on November 7
- Initiate a program of legal review with Sterling Codifier as a first step in a process of updating the Evanston City Code
- Continue to enhance the administration of FOIA requests for the City
- Begin keeping a log of all notarizations in the City Clerk's Office

Total Revenues:	\$ 26,850	\$ 29,200	\$ 26,300	\$ 29,900

Notes for Financial Summary

The overage in the City Manager's Office is related to the contract for the new City Manager in 2005-2006.

Outside copy services will cover the cost of agendas and miscellaneous items that are sent to FedEx Kinko's per the City's contract for copying. The average actual expenditures for copying have been split between Copy Machine Charges and Outside Copy Services.

Funding for the Sister City program has historically been accounted for in the Other Charges line item. We have created a new line item for Sister City funding.

The increase for printing in the Public Information budget will cover the cost of a new initiative to create new resident packets for distribution.

The budget for Postage Chargebacks was partially shifted to Postage to reflect the actual cost of taking the quarterly Highlights to the Post Office for mailing rather than using our mail room.

The Overtime Pay line item for the Farmer's Market coordinator was shifted from the CMO budget to the Farmer's Market budget.

Performance Report on FY 2005-2006 Major Program Objectives

CMO has initiated a process by which directors, working in teams, determine the topics to be presented at the monthly Managers' Meetings. Topics have included diversity, hoarding behavior, FOIA compliance, personal identity protections, as well as training on the newly adopted Ethics Code.

CMO has implemented a weekly report on the status of aldermanic requests and established standards for informing the departments of requests and making the departments accountable for responses.

We have standardized the format of some agenda items and have provided examples to the departments. We have set firm deadlines for submitting agenda items to allow for more thorough review. Departments are abiding by the new deadline.

We have discussed zoning, preservation, and inclusionary housing ordinances, as well as parking and liquor codes, and recommended changes to the appropriate Council committees.

CMO has created an information packet with samples of required documents that can be distributed by request.

Construction of Sherman Plaza project has begun and will be completed in 2006.

The City Manager has met with Northwestern University officials on an occasional basis to discuss issues of mutual concern.

City of Evanston

City Manager's Office

The Civic Center Committee continues to meet for discussion of alternatives.

2006-2007 Department Initiatives

1. Oversee implementation of the City's Strategic Plan, including reviewing the role and structure of boards and commissions and developing a collaborative relationship with Northwestern University
2. Continue to lead Managers' Meetings, emphasizing professional development
3. Continue to refine and effectively utilize the process for responding to aldermanic requests, citizen inquiries and police-service requests, providing updates to the aldermen
4. Refine and streamline the agenda process
5. Continue to work with the Legal Department and other departments as appropriate to review the various City codes and propose amendments and/or updates as necessary
6. Coordinate efforts to improve customer service throughout the organization
7. Oversee implementation of changes to the development review process

City of Evanston

City Manager's Office

1505 – City Manager's Office

Description of Major Activities

The City Manager and the staff of the City Manager's Office develop and analyze public policy alternatives and direct the administration and execution of the policies and goals formulated by the City Council. Responsibilities include: advising the Council on present and future financial, personnel, and program needs; implementing immediate and long-range City priorities; establishing procedures which will assist the City in serving its citizens; and supervising all City departments. Additionally, staff is involved in coordinating large-scale, economic development projects as well as program evaluation and policy analysis.

The City Manager's Office coordinates the preparation of the City Council agenda, reviews all items before governing body consideration, and responds to inquiries from citizens and elected officials. Its members work closely with the public to resolve service delivery problems as well as disseminate information about the City's policies. Staff monitors legislation both in Springfield and Washington, D.C. to determine the potential impact on Evanston residents, businesses, and government. Additionally, the office staffs the Council Rules Committee, and works with the committee to coordinate lobbying efforts. The office is also responsible for issuing a number of permits, including loudspeaker, film and raffle licenses, and responds to a wide variety of general inquiries.

FY 2006-2007 Objectives

- Oversee implementation of the City's Strategic Plan
- Continue to lead Managers' Meetings, with an emphasis on professional development
- Continue to refine and effectively utilize the process for responding to aldermanic requests, citizen inquiries and police-service requests, and to provide updates to the aldermen
- Refine and streamline the agenda process
- Continue to work with the Legal Department and other departments to review the various City codes and propose amendments and/or updates as necessary
- Coordinate efforts to improve customer service throughout the organization

City of Evanston

City Manager's Office

1510 – Public Information

Description of Major Activities

The City Manager's Office of Public Information provides information to the community on a broad range of programs, services, issues, and policies through publication of the City Newsletter, the City website, and other media. The community information coordinator prepares press releases, creates brochures and other informational materials, and organizes educational efforts to better inform community members.

The coordinator works to distribute publications to all City facilities and other appropriate audiences. Also, the coordinator plans and conducts public relations programs, activities, and special events designed to create, improve and maintain a favorable public image for the City.

The coordinator works daily with the City's website to confirm that all information is timely, to determine the priority and presentation of content, and to assist department staff in creating more copy when necessary. The coordinator works closely with the Information Systems webdeveloper and programming staff to create appropriate webpages and interactive programs to improve community communications.

The "City Beat" employee newsletter is produced monthly by this office to improve internal communications, educate employees on programs and policies, and increase morale.

The community information coordinator manages operations of the City-owned radio station on a daily basis, in cooperation with Facilities Management staff.

FY 2006-2007 Objectives

- Continue work with Evanston Chamber of Commerce on a comprehensive relocation package for new members of our community
- Create video production for Summer Youth Employment Program
- Continue to make economic development information available on the website
- Work to automate the distribution of minutes, agendas and announcements from committees, boards, and commissions using the website and listservers
- Develop a communication plan that will direct the activities of the Public Information Office

City of Evanston

City Manager's Office

1515 – Farmers' Market

Description of Major Activities

The City Manager's Office coordinates a Farmers' Market in downtown Evanston from the third Saturday in May through the first Saturday in November. Farmers from surrounding metropolitan areas, Wisconsin, Michigan, and Indiana participate by bringing and selling their goods. Stalls, from which fresh produce, bread, meat, cheese and flowers are sold, can be rented on a seasonal or weekly basis. A market manager oversees several area youth in the set-up and take-down of the weekly events, and the youth serve as shopping-cart attendants. Every Saturday one of Evanston's not-for-profit organizations is at the market to sell fresh baked goods to support their organization's work. Additionally, one Saturday each year is set aside as "Non-profit Day" at the market. Thirty to forty non-profits serving Evanston residents participate in this event to promote awareness of their work in the community. The market is a very popular event, not only for residents of Evanston, but visitors from all over.

FY 2006-2007 Objectives

- Continue to provide a pleasant environment for the Farmer's Market in downtown Evanston

Ongoing Activity Measures	2004-2005 Actual	2005-2006 Actual	2006-2007 Projected

Notes for Financial Summary

The Budget Office is underexpended in FY06 due to delayed hiring of two new management analysts - with only one being filled as of November 2005. In FY07, the remaining unfilled management analyst position will be transferred to the Finance Department.

Increases in the contingency business unit are due to anticipated cost of living increases for salaries and an increase in pension contributions required to maintain solvency in the fund.

The GIS Division and Administrative Adjudication Division both reflect underexpenditure due to vacancies that were filled toward the middle and end of FY 2006.

Performance Report on FY 2005-2006 Major Program Objectives

Budget: Staff continued their support of the JD Edwards implementation and participated in developing an integrated Budget User Entry system, added budget book enhancements, and continued to increase budgetary controls and monitoring utilizing the JD Edwards financial system. Also, staff worked with all divisions to collect performance measurement data as a participant in the Chicago area performance measurement consortium. The Division also worked with the Liquor Commission, members of the community, and Council to revise the Liquor Ordinance and increase penalties for liquor violations.

Information Systems: Staff continued to facilitate the implementation of the JD Edwards financial system including user administration and report generation; continued upgrades to the telephone system and voice mail; continued tracking cellular and landline telephone costs; replaced personal computers not meeting minimum performance standards; continued deployment of Microsoft Windows and Windows XP; began implementation of a citywide IT strategic plan; improved usability of the city website by upgrading software interfaces, increasing online transaction capabilities and implementing a content management tool; completed installation of a new video camera surveillance system; and began migration of data center operations to Service Center and Police as well as began developing Server redundancy to improve reliability and disaster failover.

GIS: Staff continued to assist city departments, elected officials, and residents with obtaining geographic data and added additional geographic layers to the City's GIS. Additionally, staff created a zoning focused web application for residents and city staff that assists in investigating zoning information and prepared and implemented a GIS data delivery specification that has been utilized in several public works, construction and other projects.

Office of Management and Budget

Administrative Adjudication: A new administrative law judge was hired with specific duties emphasizing the training of city departments in ticket writing and the hearing process - one training session has been completed with plans to hold regular sessions. Additionally an assessment of the division was completed resulting in the filling of the full time administrative adjudication manager position. Staff continued to work collaboratively with the departments that utilize adjudication services and provide a high level of customer service to community members who require services.

2006-2007 Department Initiatives

- Continued research and support for implementation of backend systems and additional functionality of the JDEdwards financial system.
- Conduct analysis of Administrative Adjudication outcomes and Law Judge performance evaluations to determine whether any changes should be made to the system.
- Work with Parking Systems, the Collector's Office, Police Department, and Property Maintenance to decide what type of parking and adjudication software to use.
- Complete the review of departmental Information Systems needs and move forward with the citywide technology plan.
- Investigate the feasibility of converting to a two year budgetary cycle and develop an implementation plan.

City of Evanston

Office of Management and Budget

1605 – Budget Office

Description of Major Activities

The Budget Office prepares the annual City Budget. Responsibilities include balancing revenues and expenditures, developing program objectives, and producing the proposed and approved budgets. During the City Council's budget review, the Budget Office prepares memos and performs other analysis in response to Council questions. The Budget Office monitors departmental revenues and expenditures and performance of departments and divisions throughout the year. The Budget Office also supervises the operation of the Information Systems, Geographical Information Systems, and Administrative Adjudication divisions and provides staff support for the Emergency Telephone System Board and the Liquor Control Commission. Finally, this division completes special projects and studies as directed by the City Manager's Office.

FY 2006-2007 Objectives

- Investigate the feasibility of converting to a two year budget cycle and develop an implementation plan
- Investigate the advantages and difficulties of altering the fiscal year to match the calendar year
- Continue improvements to the online Budget Entry System (BES)

1610 – Contingency

Description of Major Activities

The General Contingency element provides funds for purposes unanticipated at the time of budget adoption. For example, to fund unanticipated salary adjustments for City employees and for other purposes for which it is necessary to appropriate funds mid-year. In addition, over expenditures or over estimation of revenues within the General Fund are balanced through the use of funds in this program element.

1615 – Information Systems

Description of Major Activities

The Information Systems Division provides technology and services that fulfill the City's broad based information technology needs. Information Systems plans resource commitment and provides a stable direction for the future. Information Systems also keeps abreast of state-of-the-art developments in information technology. This division has co-responsibility for product purchases and development projects, which include initiation, management, and successful installation. Duties include the responsibility and authority for review, control, Help Desk support, and improvements in such as areas as:

- Office automation – Text processing, interoffice and interpersonal communications systems, printing services, archival storage, filing systems, and image storage and processing.
- Personal Computers and microprocessors – The proliferation of computers as well as portable and hand-held devices capable of independently processing data and interfacing with other systems.
- Network and application servers – The acquisition and overall management of various server platforms.
- Communications – Data communications, internal and external electronic mail, building to building wide area network, and the management problems of transmission of information.
- Special-purpose systems – Computer-aided software engineering; expert systems as decision-making tools; cooperative work group systems; ticket and badge readers; and a host of other specialized systems or devices that must interface to the City's information systems.
- Telephony – Telephones, PBXs, cabling, call accounting, and voice mail.
- Training – Providing a Citywide training function, which includes desktop productivity tools, answering help desk calls, support documentation, and managing a training facility.
- Internet – WEB site hosting and WEB application deployment.
- Help Desk – Providing city wide hardware and software computing assistance.
- Other duties include:
 - Ensuring the security of all data
 - Computer and Information System Data Center operations
 - Designing and managing data communications and telecommunications networks
 - Development and control of electronic forms
 - Developing information processing policies and procedures
 - Conducting feasibility studies of new automated systems
 - Researching potential systems, methods, or equipment that could improve cost-effectiveness or enhance productivity
 - Developing and implementing office automation systems

FY 2006-2007 Objectives

- Create a long-term plan of strategies and goals that align Information Systems services with organizational strategies
- Implement program development, packaged applications, and technology platforms that align to organizational strategies
- Focus on improved customer service
- Continue assisting in the deployment of the IRIS financial system
- Replace Personal Computers that do not meet minimum performance requirements
- Continue to consolidate and improve reliability of back office systems
- Continue to migrate the data center operations from Civic center to Service Center and Police
- Replace the Recreation Centers PBX/Phones with IP phones. Put all Recreation Centers on central voice mail system
- Redesign internal customer Web Site

Office of Management and Budget

1620 – GIS Division

Description of Major Activities

A Geographic Information System (GIS) combines layers of information about an area to give us a better understanding of it.

Evanston's GIS was created to offer a better way to organize, view and analyze Evanston features and events by combining layers of information. Data elements such as addresses, crimes, tax parcels, buildings, streets, water meters, parks, political boundaries, etc., can be incorporated into Evanston's GIS as a layer. Currently, Evanston's GIS is comprised of over 150 of layers of information which can be maintained, studied, and analyzed together in a visual context.

Some examples of GIS layers:

- 16,267 Tax Parcels
- 26,913 Building Structures
- 224 Miles of Streets and Alleys
- Zoning Districts, Parks, Parking Lots, Beaches, Census data, Wards, 911 Response Plans, Street Sweeping Zones and Tree Trimming Cycles

The goal of Evanston's GIS division is to make this information easily available to all employees and residents. The ability to view and analyze this information allows people to be more informed, more efficient, and able to make better decisions.

FY 2006-2007 Objectives

- Increase usage of web mapping applications by continually adding features
- Eliminate barriers to GIS usage and integration by: providing automated exports of GIS data; improving usability of web mapping application; and publishing a data dictionary of available GIS data
- Upgrade all server, desktop and web GIS software
- Improve ability to report on GIS efforts by implementing map request tracking software

Ongoing Activity Measures	2004-2005 Actual	2005-2006 Actual	2006-2007 Projected
Map requests	208	215	225
Permanent geographic layers created	18	28	20

Office of Management and Budget
1625 – Administrative Adjudication

Description of Major Activities

The Administrative Adjudication office conducts adjudicatory hearings for all City Code violations, with the exception of those involving incarceration and moving traffic violations. A City-managed hearings program was developed and has been proven to achieve the following outcomes:

- Provide a forum where charges of code violations can be resolved in an impartial and efficient manner
- Increase revenue by eliminating court costs previously paid to the county
- Increase the field work time of police, fire, parking enforcement, property inspectors and park rangers by eliminating court appearances
- Improve the quality of life of citizens by reducing and/or eliminating many nuisance violations, which took long periods of time to correct in circuit court
- Educate citizens about the adjudicatory process so they will utilize the system and appreciate the benefits the program offers to them and to the City

FY 2006-2007 Objectives

- Establish quarterly training for police, fire, property maintenance, and health divisions responsible for issuing compliance tickets
- Improve ease of readability and comprehension for online ticket submissions
- Perform evaluations of all administrative law judges

Ongoing Activity Measures	2004-2005 Actual	2005-2006 Actual	2006-2007 Projected
Number of parking summons issued	67,960	56,800	59,600

Expenditures:				
1705 – Legal Administration	579,788	690,600	639,686	714,600
Total Expenditures:	\$ 579,788	\$ 690,600	\$ 639,686	\$ 714,600
Revenues:				
56015 – Damage to City Property	45,489	50,000	40,774	50,000
Total Revenues:	\$ 45,489	\$ 50,000	\$ 40,774	\$ 50,000

Notes for Financial Summary

Actual personnel expenditures for FY 05-06 were below budget expectations. This shortfall in expenditures is a result of a vacancy in the staff attorney II position. As a result of reorganization and anticipated hiring, the Law Department will be fully staffed for FY 06-07.

Performance Report on FY 2005-2006 Major Program Objectives

The Truck Overweight Enforcement program was not implemented during FY 05-06 as further investigation and study demonstrated that the existing enforcement procedures were satisfactory.

In our efforts to coordinate all zoning matters with the Zoning Division and Community Development department, the Law Department has dedicated an assistant corporation counsel to work exclusively on community development matters. This senior attorney attends meetings of the Preservation Commission, Zoning Board of Appeals, and the Plan Commission on an as-needed basis, and meets regularly--daily or weekly--with department heads and the director of Community Development.

The Law Department continues to work with the Purchasing Division to simplify, coordinate, and streamline the purchasing process.

2006-2007 Department Initiatives

1. To draft ordinance, rules and regulations and quarantine policy
2. To draft major amendments to Liquor Code
3. To establish standards to help provide direction and consistency for City departments when certificates of insurance are being required
4. To reduce the inventory of lawsuits and open cases
5. To work closely with City departments and agencies to identify areas of potential liability and to develop procedures to minimize future litigation

City of Evanston

Legal Department

1705 – Legal Department

Description of Major Activities

The Legal Department provides for and supervises all legal services for the City. The department provides legal advice and/or opinions to the City Council and standing committees, City Manager, City staff, elected officials, and City boards and commissions. The department drafts or reviews ordinances and resolutions and researches the legal basis and constitutional limitations of home-rule authority on all legislative issues. The department represents the City in housing and traffic court prosecutions, administrative review appeals of administrative adjudication and, as necessary, at administrative adjudication hearings. The department represents or supervises attorneys in all general litigation matters including, but not limited to, general tort litigation, personal injury, property damage, employment discrimination, civil rights, and special assessment. The department prepares or reviews all contracts, leases, easements and plats, and by request, provides advice on public bidding and purchase procedures.

The department, through the Insurance Fund, supervises the general liability third-party administration of claims. The department recommends the purchase of insurance in all areas of exposure including general liability, all risk property, ambulance attendants, inland marine, and crime. The department, in conjunction with the City Manager's Office, reviews safety and risk issues and all third-party matters. The department is responsible for the risk transfer and subrogation programs throughout the City.

FY 2006-2007 Objectives

- Update the City Code to reflect current legislation with operations of the City
- Update the Zoning Code in conjunction with the Community Development department
- Implement workable rules of proceeding for the Zoning Board of Appeals and the Plan Commission (consistent with the requirements of the Klaeren decision)

Ongoing Activity Measures	2004-2005 Actual	2005-2006 Actual	2006-2007 Projected
Ordinance cases prosecuted (animal, aggressive panhandling, curfew, disorderly conduct)	550	350	300
Traffic prosecution cases	7,500	3,600	4,000
Ordinances written and/or reviewed	160	202	200

Notes for Financial Summary

This budget includes a new Human Resources Trainer/Coordinator position.

Performance Report on FY 2005-2006 Major Program Objectives

During FY04-05, 68 full-time positions were filled. To date, 41 full-time positions have been filled, with projections to fill 75 by the end of the fiscal year. Due to enhancements in the IRIS HR/Payroll computer system we have been able to track part-time and seasonal positions and determined that 150 part-time and 450 seasonal positions were filled. Three police officer testing cycles have been conducted, with one additional cycle scheduled during this fiscal year; the testing cycle for Firefighter/Paramedic is in process. Promotional examinations for fire captain, shift chief, and police sergeant have been completed this fiscal year. Human Resources staff continue to solidify and enhance properties of the HR/Payroll system; more information is available for analysis and evaluation, and quality control procedures are in place. Procedures for processing seasonal employees, both at the hiring stage and at the end of the employment season, were developed and implemented for more efficiency. Human Resources staff developed and conducted training for all City employees on the amended Ethics Ordinance and rules for City employees. The first Public Service Week celebration of our employees was very successful. Three contract interpretation arbitrations with AFSCME were resolved in the City's favor, with two additional arbitrations scheduled during the remainder of the fiscal year.

2006-2007 Department Initiatives

1. When completed, the City's strategic plan will have human resources implications in terms of organizational structuring to meet the goals and objectives; identifying needs and delivering the necessary training; monitoring performance, employee communications, and labor/management efforts
2. Several operating departments have ongoing studies of service delivery processes and planning, which will also require Human Resources involvement and recommendations adopted for improvement, such as restructuring jobs to more accurately describe the duties and responsibilities and meeting service delivery demands
3. The second AFSCME contract with the enlarged bargaining unit will require supervisory and management training in order to fully implement a new contract
4. Further enhancements of the IRIS HR/Payroll system in the areas of recruitment and competency will be undertaken in order to provide improved management information and analysis, leading to better strategic planning

City of Evanston

Human Resources

1805 – Human Resources

Description of Major Activities

Human Resources is responsible for compliance in all human resources activities with applicable local civil service ordinances and rules, State and Federal requirements, Equal Employment Opportunity guidelines and union contracts. Actions regarding employees are reviewed and approved to ensure such compliance. The department of Human Resources provides ongoing assistance to the operating departments and employees in all areas of employment, including recruitment, selection, position classification, salary administration, promotion, performance evaluation, training, benefit administration, discipline, on-the-job injuries, disability, employee problems, and labor relations with the City's four unions.

FY 2006-2007 Objectives

- By September 1, 2006, fully implement recruitment module on IRIS system in order to a) enhance communication with applicants; b) track length of time to fill vacancies; and c) track turnover by position, department, and reason
- Complete Personnel Manual update by June 30, 2006
- Beginning July 1, 2006, conduct analysis of benefit package(s) to determine feasibility of restructuring elements for a) attracting and retaining qualified employees, and b) to have the most cost effective utilization of resources
- Following adoption of the City's strategic plan, develop Human Resources operational plans, goals, and objectives in order to implement relevant portions of the strategic plan

Ongoing Activity Measures	2004-2005 Actual	2005-2006 Actual	2006-2007 Projected

1925 – Purchasing/AP/MWEBE	345,321	283,800	265,342	344,200
Total Expenditures:	\$ 2,083,772	\$ 1,762,600	\$ 1,873,786	\$ 1,768,500

Notes for Financial Summary

The General Support Division reflects a decrease due to the elimination of the Assistant Finance Director position and replacement with a vacant Management Analyst position formerly budgeted in the Budget Office.

The Revenue Division includes the inclusion of mail room operations in the FY 2006-2007 approved budget. The expenditures budgeted for mail room operations are partially offset by a services billed out line item supported by postage that is charged back to the departments that use the mail room. The new duties being assumed by Finance were transferred from Facilities Management.

Performance Report on FY 2005-2006 Major Program Objectives

The CAFR (Comprehensive Annual Financial Report) was completed by August 31, 2005. A Finance Department operations manual has been completed. The Accounts Receivable Module implementation was delayed due to the need to implement the new Oracle upgrade

2006-2007 Department Initiatives

1. Complete the annual CAFR
2. Stabilize the financial software with documentation and manuals

City of Evanston

Finance Department

1905 – Finance General Support

Description of Major Activities

The Finance Director is responsible for the central financial functions of the City. Duties include providing technical support and participating in the formulation and execution of the City's financial policies. The Finance Program includes accounting, collections, financial services, purchasing, and budgetary support. Direction and coordination are also provided for the following four divisions:

- Accounting
- Collections
- Purchasing and Accounts Payable
- Payroll

The department is also responsible for management of the City's Minority/Women/Evanston Business Enterprise program.

The department is responsible for investing the City's financial resources, which includes its short-term operating cash, bond proceeds, reserve accounts, and any long term investments. The department is also responsible for the issuance of all City debt in the form of bonds and/or loans. This includes the annual preparation of an official statement, securing a financial rating, and issuing the subsequent debt.

FY 2006-2007 Objectives

- Issue 2006 bonds
- Develop financial policies for the City
- Implement new investment program from GFOA
- Complete payroll disaster recovery system

City of Evanston

Finance Department 1910 – Revenue Division

Description of Major Activities

The City Collector's Office is the regulatory revenue-enforcement agency of the City of Evanston. It is the cashiering hub for the City, centralizing the cashiering satellite stations in many departments. The Collector's Office receives \$50 million annually and makes deposits daily; all other City revenue and payment streams are processed through daily deposits prepared by the satellite cashiering stations. The office also coordinates bank lockbox deposits originating from the bank processing center as well as Internet deposit information generated from water bill and parking ticket payments via the City website. In addition, the office is responsible for the credit card processing system used throughout the City.

The Collector's Office is directly responsible for the logistics and administration of several revenue generating streams, collecting over \$2 million in license revenues for General Fund purposes. These include the management of business license regulatory matters, vehicle licensing (Wheel Tax), animal and taxi cab industry licensing and regulation. Many of these activities are effectively accomplished by fostering relationships with partners and other departments within the Evanston community.

FY 2006-2007 Objectives

- Implement cashiering system
- Continue program of in-source processing of vehicle stickers
- Finalize implementation of parking ticket and vehicle sticker payments via the City web

Ongoing Activity Measures	2004-2005 Actual	2005-2006 Actual	2006-2007 Projected

City of Evanston

Finance Department 1915 – Payroll Division

Description of Major Activities

The Payroll Division is responsible for the ongoing, bi-weekly payroll for more than 1,100 permanent, part-time, and temporary City employees. During the summer, payroll increases by more than 500 employees due to the seasonal employment of recreational staff and the City's Summer Youth Program. The primary objective of the Payroll Division is to produce a timely, accurate payroll in compliance with federal and state payroll tax laws. This function performs quarterly and annual reconciliations of FICA, Medicare, federal- and state-withholding liabilities as well as unemployment compensation, which is used in preparing the federal and state payroll tax returns. Special year-end activities include preparation, balancing and distribution of W-2's as well as special year-end rollovers and audits of the City's payroll records.

The Payroll Division interacts with Finance, Budget, and Human Resources staff on an ongoing basis to develop and implement software enhancements that will streamline existing methods and automate manual processes with the assurance that good internal controls are in place.

FY 2006-2007 Objectives

- Continue staff education in the legal and payroll aspects of garnishments and child support orders
- Continue stabilization of the financial payroll system
- Continue to provide good customer service to internal and external customers
- Continue to develop and assist in implementing a disaster recovery plan for the Payroll Division

Ongoing Activity Measures	2004-2005 Actual	2005-2006 Actual	2006-2007 Projected

City of Evanston

Finance Department 1920 – Accounting Division

Description of Major Activities

Accounting Division staff records transactions to present the financial position of the City's funds in accordance with Generally Accepted Accounting Principles (GAAP) promulgated by the Governmental Accounting Standards Board (GASB). Staff compiles appropriate interim financial information to facilitate management control of financial operations and prepares the Comprehensive Annual Financial Report (CAFR). The division also oversees various special audits of the City's financial records and prepares the annual statements of the Police and Firefighter pension funds' to be filed with the Illinois Department of Insurance.

FY 2006-2007 Objectives

- Expand knowledge of financial system upgrade and crystal reports associated with software by June 2006
- Implement system of automated bank statements into City's investments software program by August 2006
- Implement new investment policy for the City by April 2006
- Utilize DisclosureUSA.org for required filings with repositories by August 2006

Ongoing Activity Measures	2004-2005 Actual	2005-2006 Actual	2006-2007 Projected

City of Evanston

Finance Department 1925 – Purchasing Division

Description of Major Activities

The Purchasing and Accounts Payable program element places purchase orders and contracts to obtain the equipment, materials, and services required by the City. The purchasing element also administers the accounts payable function by reviewing and processing all bills and accounts payable checks for payment. The Purchasing Director manages the contract solicitation process, works with other governmental jurisdictions for joint purchasing, and assures conformance with all legal bidding requirements. The director also promotes and supervises the Minority/Women/Evanston Business Enterprise program. Research is conducted on new technology, products and methods, and departments are assisted with pre-purchase commodity and vendor information.

The primary goal of the City of Evanston's Minority/Women/Evanston business unit is to ensure that firms in Evanston and those owned by minorities and women are afforded the maximum opportunity to participate in the City's procurement process and development projects. This goal is achieved in a variety of ways, including but not limited to:

- Consistently notifying firms of bidding opportunities
- Educating program participants about the bidding process
- Monitoring the utilization of progress participants on City contracts

A secondary, albeit equally important, goal of the program is technical assistance. The needs of program participants are identified through informal conversations and needs analysis surveys. Current technical assistance measures include seminars and referrals, but plans are underway for a newsletter and individual counseling (not already provided by the local Small Business Development Center).

FY 2006-2007 Objectives

- Complete implementation to EnterpriseOne 8.11 upgrade
- Incorporate change in bidding structure to accommodate the new CIP schedule and facilitate more off-season bidding
- Continue to complete master file of all City contracts

Ongoing Activity Measures	2004-2005 Actual	2005-2006 Actual	2006-2007 Projected

52180 – Cable Franchise Fee	603,122	660,000	657,546	660,000
Total Revenues:	\$ 675,818	\$ 782,900	\$ 743,826	\$ 782,900

Notes for Financial Summary

- Costs for building materials continue to rise at a rate higher than normal inflation would indicate.
- Additional funds were needed to cover the cost of the increased activity in the Emergency Management business unit.
- Funding for contracted painting as well as materials that will no longer be covered in the CIP is included.
- The Mail and Information Services function and associated budget has been moved to the Collectors Office, a division of the Finance Department.

Performance Report on FY 2005-2006 Major Program Objectives

Staff has begun the implementation of the BUILDER software, using the Levy and Fleetwood-Jourdain Centers as initial test beds. Room scheduling software has been purchased, is in final Beta test and will be in use in April, 2006. In coordination with our furniture vendor, a web page for selecting and purchasing approved items has been created and is in use. An architect for Fire Station #5 has been selected and the schematic design phase is in progress. Construction is to begin in the fall. Project supervision of the Sherman Plaza Garage continues with a planned Temporary Certificate of Occupancy scheduled for April 28, 2006. The roofs at Fleetwood, Chandler, and Service centers, delayed by winter weather, are near completion. Some shelving has been installed in the Civic Center attic as optimization of the attic storage area continues. National Incident Management System (NIMS) components have been added to the most recent state-approved Evanston Emergency Operations plan. Employee training requirements in NIMS has been developed and training directives and deadlines have been issued. Two Community Emergency Response Teams (CERT) have been trained, with two additional ones scheduled for training; one this spring and another in the fall. A Medical Response Corps (MRC) initiative has been started. Staff continues to work with the Civic Center Committee in finding resolution to the future of the Civic Center; which has been designated a National Historic Landmark. An extraordinary amount of staff time was spent in responding to citizen input on the condition of the Civic Center.

2006-2007 Department Initiatives

1. The use of the BUILDER software, as indicated in the Strategic Plan, will provide a much needed tool in the ability to forecast building expenditures over time and permit focused use of funds to extend the life of the City's facilities.
2. The NIMS training program has begun and training opportunities will be made available for all employees that need to complete the coursework.
3. Work with the City Managers office on the implementation of the City's Strategic Plan, specifically as it pertains to facilities and emergency services.
4. Homeland Security and Emergency Management activities that will improve the City's response to natural and man-made crises will continue to be a priority.

Facilities Management Department

2005 – Facilities Management General Support

Description of Major Activities

Staff in this business unit issue work orders for various types of trade work and ensure efficient utilization of allotted resources in the execution of these orders. Personnel provide space planning to other City departments and assist in the purchase and installation of office furniture. Personnel keep departmental and building records, inventories, and payroll data current.

Specifications for construction projects and purchases, preparation of the department budget, and implementation of the preventive maintenance program are provided by this business unit. General Support administers the complete purchasing cycle for requisitions up to the authorized dollar value, processes invoices and vouchers for commodities, and services other contracts in a timely manner. Historical records of all work done by this department are also maintained.

Supervision of Civic Center operations and office furniture standards is provided by this business unit. This includes training, maintenance, inventory control, and record keeping for purposes of internal work distribution. Software management of the Computerized Maintenance Management System (CMMS) and BUILDER, the financial planning software for buildings, is performed by staff. Full implementation of the Room Scheduling software EMS will provide for a customer friendly system of room reservation in the Civic Center and may, in the future, be used in other facilities.

FY 2006-2007 Objectives

- To add 5 more buildings into the BUILDER software, providing better long range planning on City facilities, by February 2007
- To ensure proper completion of the Sherman Plaza Garage, continue with coordination efforts until the completion of final punch lists by June 2006
- To better understand the true costs of operating a facility and implement systems to track performance measurements listed by ICMA by June 2006

Ongoing Activity Measures	2004-2005 Actual	2005-2006 Actual	2006-2007 Projected

**Facilities Management Department
2010 – Construction and Repair**

Description of Major Activities

This business unit provides for the routine maintenance and minor improvements of 46 City-owned facilities. These include the Civic Center, Service Center, the police station and outpost, 5 fire stations, fire headquarters, 9 park shelters, 7 beach shelters, 7 recreation centers, Noyes Art Center, Fountain Square, and Merrick Rose Garden fountains. In addition, the staff maintains the animal shelter, Evanston Art Center and coach house, Civic Center coach house, Central Street METRA station, 3 parking facilities, 15 bus shelters, and many drinking fountains and water supply outlets in the parks. The total footage exceeds 1,900,000 square feet. Work crews handle plumbing, electrical, boiler, air conditioning, carpentry, painting, concrete, and masonry and tile repairs. Work orders are received from the General Support business unit (2005). Crews also assist other City departments in the operation of some of their programs, including construction of barricades, movement of materials, and repairs to furniture.

FY 2006-2007 Objectives

- To provide for necessary power for the Data Center and critical fleet operations, oversee the installation of an emergency generator at the Service Center by January 2007
- To manage and coordinate construction, oversee the renovation of Greenwood, Clark, and Lee Street Beach buildings by June 2006
- Provide design, construction services and enlist the work of outside sub-contractor for ADA-related renovations at Bent Park by December 2006
- To manage and coordinate construction, oversee roof, siding, and fascia installation at Baker Park by December 2006
- To improve the operation of the Animal Shelter, provide assistance to the Police and CARE organizations for a new building addition and oversee replacement of all doors by April 2006
- To create a functional, attractive and environmentally sound Fire Station, oversee the process of pre-design, design and contract documents and bidding, and start construction of Fire Station #5 by September 2006
- To manage and coordinate construction, continue to oversee the design-build project of replacement and/or installation of HVAC and sprinkler system at Service Center by May 2006
- Enabling the improvement of operations by coordinating and overseeing renovation of the 2nd floor of the Police Station by January 2007
- To create a better customer response environment, achieve a 10% reduction in the number of open work orders by August 2006

Ongoing Activity Measures	2004-2005 Actual	2005-2006 Actual	2006-2007 Projected

**Facilities Management Department
2020 – Custodial Maintenance**

Description of Major Activities

Staff associated with this business unit receive and distribute equipment, supplies, and other items delivered to the Civic Center. Staff responds to Civic Center requests for repairs and maintenance in addition to monitoring heating and air conditioning units as necessary. Custodial staff provides janitorial services during normal business hours, monitors the janitorial contractor in the evenings, and opens the Civic Center for Saturday business. Staff from this business unit gathers and stages pick-up of recyclable office paper and delivers mail to and from the U.S. Post Office on an as needed basis.

FY 2006-2007 Objectives

- To provide for customer convenience in room scheduling, fully implement the new meeting-room manager software EMS by May 2006
- In order to provide better use of limited space, organize the attic by installing an additional 30 feet of metal shelving by March 2006
- Provide for customer comfort and a controlled temperature environment; install a new cooling tower at the Civic Center for the 2006 cooling season
- To ensure customer satisfaction with the Civic Center cleaning service, implement a quarterly custodial survey to measure the contractor's performance as viewed by the residents of the Civic Center by April 2006

Ongoing Activity Measures	2004-2005 Actual	2005-2006 Actual	2006-2007 Projected
Cooling system preparation	May 15, 2004	May 15, 2005	May 15, 2006

Facilities Management Department
2025 – Emergency Management

Description of Major Activities

The Evanston Emergency Management Agency is a state-accredited organization responsible for the coordination of all City departments to respond to emergency situations created by natural or man-made disasters, hazardous material incidents, nuclear accidents, or terrorist acts. Training of employees in the National Incident Management System (NIMS) as required by Federal mandate is coordinated and tracked by this business unit. An emergency operations plan is maintained and regularly updated and approved by the State, to provide guidance and instruction in times of disaster. A current resource list is maintained so that materials needed during an emergency can be identified and made readily available. Community Emergency Response Teams (CERTS) are trained and available for activation in time of local emergency. The Director of Facilities Management is responsible for managing this program, with an Evanston firefighter acting as the assistant coordinator.

FY 2006-2007 Objectives

- To better activate and manage assets during a crisis, conduct several tabletop exercises in order to increase departmental and City awareness of Homeland Security issues and the Emergency Operations plan by September 2006
- To create a realistic training environment, conduct a full-scale exercise to test the ability of the non-public safety departments by October 2007
- Create a well staffed volunteer group; train 2 additional Community Emergency Response Teams by January 2007
- Expand our ability to respond to crises in the medical arena, begin a Medical Reserve Corps program and have fully trained members by August 2006

Facilities Management Department
2030 – Cable Communications

Description of Major Activities

Staff serves as liaison between the City and the cable operator, tracking and monitoring cable consumer complaints. Staff also serves as administrator of the public-access service contract between the City and the Evanston Community Media Center. Live cablecasts are provided for all City Council meetings and various committee meetings, hearings, or presentations. For a cost and by request, videotaped copies of these meetings are provided to residents. Staffing support is also available to departments engaged in video production. Routine and emergency public-information broadcasts are programmed and transmitted on the City cable channel.

FY 2006-2007 Objectives

- To provide for on-line access, investigate and install, if funding is available, equipment to broadcast live, real-time video of City Council meetings on the Internet by September 2006
- To allow Evanston residents to have the latest in video, data and telephone services, track any new products that may become available and provide an environment of equitable service throughout the community

Ongoing Activity Measures	2004-2005 Actual	2005-2006 Actual	2006-2007 Projected

Notes for Financial Summary

The Building Permit Fee Revenue was revised during the budget process to reflect an increase in the fee for projects totaling over one million dollars.

Performance Report on FY 2005-2006 Major Program Objectives

The director has worked closely with the Law Department and with the ZBA and Plan Commission to implement the Klaeren rules for public hearings. The feasibility study for the West Evanston TIF has been completed, and the public hearing before the City Council has been held. The Council is currently considering the Tax Incremental Redevelopment Plan & Project for the West Evanston TIF and the West Evanston Neighborhood Plan. The Five Year Consolidated Plan was drafted and approved by the City Council. Downtown Visioning is complete, and the Plan Commission has committed to revising the Downtown Plan. The redevelopment of Main Street commons is complete, with the exception of two outlet parcels.

Planned developments approved by the City Council were the condominium development at 1228 Emerson, the redevelopment of commercial space at 1603 Orrington, and the redevelopment of the Three Crowns Retirement Campus. Property Standard's inspection staff continued the program of downtown alley inspections and expanded the program from summer to year round. The staff also began weekly inspections of all Type II restaurants to insure compliance with their City Council approved litter plans.

The Housing Rehabilitation guidelines were amended by increasing the amount of funding for single-family loans from \$30,000 to \$50,000 as well as the funding for rental units from \$7,500 to \$20,000. The City Council adopted the

Community Development Department

2003 International Building Code, 2003 International Residential Code, and other related trade codes. Inspections staff and plan reviewers have been trained in the new codes, which have been implemented. All permits were issued for the Sherman Plaza development, and inspections are ongoing. The 900 Chicago Avenue mixed-use development, containing 77 units, will be seeking occupancy permits by the end of September.

2006-2007 Department Initiatives

1. To implement changes to the development process as recommended by the development consultant and approved by the City Council and City Manager
2. A planning consultant will be retained to propose amendments to the Zoning Ordinance and zoning map
3. To work with a new zoning administrator, orienting him/her to the Evanston zoning environment, will be at the top of the director's priority list
4. We anticipate the Plan Commission will complete revisions to the existing Downtown Plan
5. Staff will work with the City Manager and Council on implementing the goals and objectives of the West Evanston TIF by initiating three development projects, including residential development, mixed-use development, and industrial expansion or relocation
6. To complete the Central Street Corridor study by June, 2006; staff will begin implementation of the design guidelines currently being drafted
7. Property Standard's inspectors will continue enforcement of the newly adopted 2003 International Property Maintenance Code
8. Existing programs of downtown alley inspections and litter control enforcement issues at Type II restaurants will continue to be a priority
9. Building inspection staff will continue the task of insuring all new construction, meeting the newly adopted 2003 International Codes; a new requirement in the code is for all existing buildings converted into condominiums must have an automatic sprinkler system
10. In Housing Rehabilitation, the maximum loan amounts on single-family homes are expected to be increased from \$30,000 to \$50,000; we will be able to help homeowners seeking assistance to greatly increase the amount of rehabilitation and value to their homes

Community Development Department

2101 – Community Development Administration

Description of Major Activities

This program element provides overall program administration and coordination for all housing, planning, zoning, and building permit activities. General support staff is provided to the City Council, Planning & Development Committee, City Manager, and other special committees. Specifically, this element provides for the administration of the Planning Division, Zoning Division, the Building Code Compliance Division, and the Property Standards and Housing Rehabilitation Division.

FY 2006-2007 Objectives

- The director will work closely with the development consultant, the City Manager, and affected department heads and staff to implement proposed changes to the development process approved by the City Council and City Manager
- The director and staff will assist and make recommendations to the zoning consultant on proposed amendments to the Zoning Ordinance and zoning map

Community Development Department
2105 – Planning Division

Description of Major Activities

The Planning Division is responsible for staffing the areas of housing, economic development, historic preservation, neighborhood planning, comprehensive long-term planning, CDBG administration and implementation, and electrical energy planning and reliability. Programmatic activities operated by this division include:

- Major redevelopment projects
- Neighborhood business district revitalization
- Stimulation of neighborhood revitalization
- Storefront improvements
- Facilitation and staffing of neighborhood planning processes
- Updating the comprehensive plan and monitoring performance
- Monitoring of ComEd performance and negotiating utility franchise agreements
- Multi-family rental housing acquisition finance
- New affordable housing development and condo conversions reviews
- The multi-family Security Grant Program
- Demographic reports and studies, including Census 2000 data analysis

The division provides staff support to the following committees and commissions: Economic Development Committee, Plan Commission, Housing Commission, Energy Commission, Historic Preservation Commission, the CDBG Committee, the Joint Review Board, and the Neighborhood Committee of the Plan Commission. The planning and development issues addressed annually feature the implementation of short-term projects in addition to future oriented multi-year activities, such as the City's comprehensive plan and the Chicago Avenue planning process, the Southeast Evanston revitalization efforts (Howard Street Corridor), and the West Evanston neighborhood-planning process. The division also provides Census, demographic and real estate information as well as services for many City departments. The activities of the Planning Division feature close interdepartmental cooperation.

FY 2006-2007 Objectives

- Implement goals and objectives of West Evanston TIF measured by the initiation of a minimum of three development projects, which will include residential development, mixed-use development, and industrial expansion or relocation
- To invest federal HOME resources to generate a minimum of 30 new or rehabilitated affordable units
- Implement housing goals of the West Evanston Plan with a special emphasis on rehabilitation of existing detached single-family housing, new housing construction and initiatives designed to help existing owners remain in their homes
- The completion of revisions to the Downtown Plan with the Plan Commission
- An evaluation of the implementation of the Preservation Ordinance during its first ten years, including the development and implementation of recommendations
- Implementation of the Chicago Avenue Streetscape plan, including securing funding for 50% completion
- Implement design review guidelines, including green building guidelines
- Evaluate the effectiveness of the condominium conversion regulatory process with recommendations
- Unify the planned development review process by the Plan Commission and the Preservation Commission through combined hearings and deliberations

Community Development Department
2110 – Zoning Analysis & Support Service

Description of Major Activities

The Zoning Division is responsible for enforcement of the Zoning Ordinance. The division continuously monitors the requirements of the ordinance to keep current with changes in development, maintain conformance with the City's land-use regulations, and keep pace with the City's ongoing planning efforts. The services provided by this division are:

- Review building permit applications and other development permit applications for conformance with the Zoning Ordinance
- Process and make determinations on applications for minor and fence variances
- Process and schedule hearing requests for appeals, major variances and special uses before the Zoning Board of Appeals
- Process and schedule hearing requests for planned developments, unique uses, and map and text amendments before the Plan Commission
- Process and schedule development permit review by the Site Plan and Appearance Review Committee
- Route zoning-related legislation through the City Council
- Staff the Plan Commission for zoning-related matters, the Zoning Board of Appeals, and Zoning Committee of the Plan Commission
- Respond to zoning-related inquiries from staff, elected officials, the business community and the general public
- Enforce the Zoning Ordinance through notice and citation of violations
- Disseminate zoning information, including general public notification of hearings
- Solicit community input in the progressive modification of the Zoning Ordinance

FY 2006-2007 Objectives

- To work closely with the director to implement any changes to the development process recommended by the development consultant and approved by the City Manager and City Council by February 2007
- Staff will assist and make recommendations to the zoning consultant, who will be conducting a comprehensive study of the Zoning Ordinance and zoning map, for the purpose of recommending amendments to the Zoning Ordinance

Community Development Department
2115 – Housing Code Compliance

Description of Major Activities

This element provides for the ongoing, systematic area inspections of non-owner-occupied rental dwellings and annual inspections of rooming houses. The Property Standards division adopted the International Code Council (ICC) of the International Property Maintenance Code (2003 edition) in May of 2005. With the adoption of the International Property Maintenance Code, multiple amendments were made, which included the incorporation of Burglary Prevention ordinance requirements, into the newly adopted code. As part of the inspection process, the interior of non-owner-occupied dwelling units and rooming houses are inspected as well as the building's common areas, exterior, premises, and accessory structures. Inspections consist of viewing all building surfaces and components to ensure that all items are in good repair, functioning as intended, and code compliant. Subsequent to an inspection of the building, inspectors produce a written list of code violations that the building owner must complete. The inspector monitors the progress of correcting the code violations until all are brought into compliance. When voluntary compliance fails to produce correction of the violation(s), the inspector initiates legal action through the City of Evanston administrative hearing process or Cook County Circuit Court.

Property Standards responds to citizen complaints regarding the condition of any building, structure, or premises, which includes building violations as well as violations for debris, weeds, garbage, graffiti; abandoned vehicles; over occupancy; lack of heat, electricity, gas or water; and ice/snow removal. Any violations not brought into compliance voluntarily are processed through the Evanston administrative hearing process or the circuit court as needed. As part of the inspection process, staff refers property owners and tenants to the appropriate department or agency for any needed assistance, e.g. Housing Rehabilitation, Emergency Assistance, Neighbors-At-Work, Commission on Aging, Health Department, and Human Relations.

Property Standards enforces the Vacant Building Ordinance--an ordinance adopted to regulate the building conditions as well as the amount of time a building may remain vacant or boarded-up--the Dangerous Building Ordinance, and provisions of the Zoning Ordinance and the City Code. The division also conducts ongoing inspections of downtown alleys to gain compliance regarding the storage of garbage and refuse.

FY 2006-2007 Objectives

- Progress toward International Code Council (ICC) certification for inspection staff through training and education by February 2007
- Establish operating procedures regarding interdepartmental inspections involving Property Standards by February 2007
- Continue with the ongoing downtown alley/dumpster inspections until February 2007
- Continue with the ongoing Type 2 restaurant inspections and expand inspections to food establishments until February 2007

2120 – Housing Rehabilitation Administration

Description of Major Activities

This element provides loans for repair and improvement to existing housing, including single-family, multi-family, and condominium units. Rehabilitation is targeted to low- and moderate-income households through a variety of programs designed to assist property owners with a multitude of possible repairs improvements. Under CDBG programs, loans are processed with staff, who

- Provide assistance to applicants with completion of applications
- Process verifications, contracts, and mortgage documents, and determine eligibility
- Conduct building inspections, including inspecting for lead based paint
- Prepare work specifications and cost estimates
- Assist in securing contractors, process contractor payouts, and monitor work
- Provide service of loan portfolio

Additionally, the division administers several programs, including:

- One- and two-family, Multi-family, and condominium rehabs
- Self-help exterior paint
- Emergency and abandoned building rehabs
- Garage demolition and the Diseased Tree Removal Program

These programs allow for low- and moderate-income households to have needed repairs completed without the cost of interest or fees (except for a very low rate associated with multi-family projects). The division works closely with the Commission on Aging, Health Department, and Evanston Neighbors-At-Work in providing services, including technical assistance to homeowners regarding tax, title, credit, and other eligibility issues. The division is responsible for the administration of the Evanston Housing Corporation First-time Homebuyer Program, handling all verification, processing, and servicing of these loans.

Housing Rehabilitation programs assist low- and moderate-income households with basic building improvements--for example, replacement of building systems or components such as roofing, heating, electrical, plumbing, walls, floors, doors, and windows. The Housing Rehabilitation division addresses and incorporates HUD Lead-Based Paint regulations within the scope of work on housing rehab projects, and it works closely with the Health Department in utilizing Cook County Lead-Based Paint grants within Housing Rehab projects. Housing Rehabilitation services helps low- and moderate-income households obtain needed repairs and improvements to their homes with typically no or little increase in monthly housing expenses. These rehab programs and services may assist a homeowners' ability to remain in their homes, which may be more difficult to accomplish through high-cost, market-rate loans.

FY 2006-2007 Objectives

- To fund the purchase of seven homes through the Evanston Housing Corporation by February 2007
- To continue use of Cook County Lead Grant funds in Housing Rehab projects until February 2007
- Progress toward International Code Council (ICC) certification for inspectors through training and education by February 2007
- Provide lead-based paint training refresher course for inspectors by February 2007

Ongoing Activity Measures	2004-2005 Actual	2005-2006 Actual	2006-2007 Projected

Community Development Department
2125 – Building Code Compliance

Description of Major Activities

The Building Division seeks to protect the health, safety, welfare, and property values of City residents. Major responsibilities are mandated by the adopted building codes. A comprehensive plan review, permit process, inspection procedure, and issuing of occupancy certificates are carried out by the Building Division. This ensures adherence to the codes in all residential, commercial, and industrial construction.

In an effort to achieve the goals of code conformance, the Building Division also issues tests for general and mechanical contractors, and requires licensing with the City of Evanston. The Building Division monitors the Elevator Inspection Program, issuing elevator certificates annually to all qualifying elevators. Additionally, Building Division personnel manages the Annual Sign License fee program.

FY 2006-2007 Objectives

- To develop a strategy for purchasing and implementing new permit tracking software for compatibility with Oracle database upgrades
- To train inspectors and plan reviewers in the 2003 International Energy Code, adopted by the State of Illinois for all commercial projects, whenever it becomes effective

Ongoing Activity Measures	2004-2005 Actual	2005-2006 Actual	2006-2007 Projected

Notes for Financial Summary

The Police Department Budget contains two partial-year freezes to vacant positions in order to offset the funding for the Juvenile Bureau where grant funding was reduced by \$50,000. A Deputy Chief position and a Commander position will each be frozen for six months in order to fund the Juvenile Bureau. Additionally, the final staffing change necessary to civilianize the service desk was made midyear in FY2006. A civilian supervisor position was approved.

During budget deliberations – a new police officer position was approved for ½ year funding. This position is being added in order to utilize a private donation that funds a new police canine.

Performance Report on FY 2005-2006 Major Program Objectives

FY 2005-2006 began with yet another period of declining crime rates. The crime index declined 5.5% for 2004 which represents the lowest crime rates since the 1960s.

City of Evanston

Police Department

The Department received Re-Accreditation from the Commission on Accreditation for Law Enforcement Agencies (CALEA). The Department received a Meritorious Award for being re-accredited for the 5th time, representing its continued goal for excellence.

In addition, the Department contracted with an independent consultant for a review of its Use of Force and OPS practices. The report concluded: "This assessment has revealed that Evanston is a progressive law enforcement agency with good leadership and a very good understanding of use of force issues associated with law enforcement agencies. The Evanston Police Department has in place a process for reviewing citizen complaints and officer misconduct investigation that is surpassed by none."

A major gang/drug operation conducted in conjunction with the Cook County Sheriff's Police was completed. Called "Operation Triple Play," it targeted 21 individuals involved in three gangs in three business areas of Evanston. All transactions were videotaped and involved the sale of "crack cocaine." The sting was dubbed "Operation Triple Play" because Evanston Police Department officers concluded three drug operations in the last sixteen months with three different law enforcement agencies.

After one year of data collection, the Department released the results of the Traffic Stop Study mandated by State law. The data showed that Evanston traffic stops reflect the driving population.

The Department developed and implemented several plans to address particular issues. The Summer Plan provided additional resources for the peak warm weather months. Both a fall and spring initiative was implemented to address issues related to off-campus students. Special plans were also developed for the 4th of July, Halloween, and 1st Night.

Preparedness efforts continued. All supervisory personnel completed NIMS certification. First line of defense training was conducted for city employees. The Department continued to work with Districts 65 and 202 on emergency preparedness plans and grants. Our CERT members received In-Service training. A mock exercise was conducted with the Health Department regarding drug distribution.

Leadership and organizational development continued in 2005-2006. Two consultants were used to facilitate these issues. Ten staff members received leadership assessment and training. All supervisors participated in four training sessions in order to take the Department to the "Next Level."

Our automation plans continued. A new digital in-car camera system was installed in police vehicles. The Records Bureau implemented a new management system called CRIMES. Records management packages were installed in Traffic and OPS. The General Order Book was converted to disc for all employees. Our website continued to improve with more information available to the public.

Various sting operations were conducted regarding tobacco and underage drinking. BASSET training was available to liquor establishments. The Department worked with the Chamber and EvMark on the new Anti-Panhandler initiative.

The Department continued to work on the sequential line-up study and came into compliance for the video taping of confessions.

Finally, the Department continues to work toward increasing grant funds for policing efforts in the City.

2006-2007 Department Initiatives

1. Our partnership initiatives continued in FY 2005-2006 as evidenced by the CommUNITY Picnic, National Night Out, Citizen Police Academy, Police Advisory Board, Evanston Citizens Police Association, and the Chaplain/Clergy Team

City of Evanston

Police Department

2205 – Police Administration

Description of Major Activities

The Chief of Police is responsible for overseeing the fiscal management of the Evanston Police Department and its resources to ensure an efficient and effective police organization that provides a high level of service to the community. The responsibilities of the Chief of Police include supervising and deploying personnel and resources, developing and implementing the department's goals and objectives, and monitoring performance of bureaus and divisions. The Chief also focuses on developing the organization, responding to community needs and assessments, improving department productivity and operational techniques, long-range planning, formulating policies and procedures, and attending public meetings.

FY 2006-2007 Objectives

- To implement and evaluate a pilot review system for CRs involving citizens by February 2007
- To implement the 5th edition of the CALEA standards by February 2007
- To create a PEER support program by February 2007

Ongoing Activity Measures	2004-2005 Actual	2005-2006 Actual	2006-2007 Projected

2210 – Patrol Operations

Description of Major Activities

The division of Patrol Operations responds to calls for police service twenty-four hours a day, seven days a week. Uniformed police officers continuously patrol on foot and in vehicles to deter crime, as well as to detect, apprehend, and process persons involved in criminal activity. The division members engage in problem solving initiative and partnership efforts with the community, and provide assistance to citizens such as directions, transportation to the hospital, referrals to other agencies, lost property, nuisance complaints, and towed vehicles.

FY 2006-2007 Objectives

- To train a Field Operations member in NIMS by August 2006

2215 – Criminal Investigation

Description of Major Activities

As part of the Criminal Investigation division, detectives conduct follow-up investigations of homicide, sex offenses, robbery, burglary, kidnapping, aggravated assault, auto theft, fraud, theft, and all other crimes not specifically assigned to other investigative bureaus. This element also conducts background investigations for the Liquor License Control Commission and other licensing bodies. The bureau also conducts proactive liquor license inspections and investigations.

FY 2006-2007 Objectives

- To re-evaluate the current solvability factor system, used in the assignment of cases for investigation, to a system that is value weighted with a recommendation by February 2007
- To enhance the crime scene photographic evidence collection process by implementing digital photography into the Evidence Technician Program by February 2007

2225 – Social Services Bureau

Description of Major Activities

The Police Social Services Bureau is comprised of two distinct entities: Victim Services and Youth Outreach, both working with community groups, schools, and individuals to assist the residents of Evanston in maintaining a high quality of life.

The Victim Services bureau provides social services to crime victims and witnesses and primarily assists sexual assault, child abuse and domestic violence victims, and other personal crime victims, including property crime victims when needed. The bureau also assists those who come in contact with the police for "non-crime" related situations yet are in need of service, such as crisis intervention, counseling, court advocacy, referrals, and emergency monetary assistance.

The Youth Service bureau provides Evanston youth, ages 8-17, and their families a broad range of social services including individual, family and group counseling, case management, outreach, information, and referral. Services are designed to improve the levels of functioning in areas of family relations and interpersonal relations, with an emphasis on early detection and prevention.

FY 2006-2007 Objectives

- To educate clients of Victim Services on the use of the Automatic Victim Notification Program by February 2007
- To develop a family violence workshop schedule in Victim Services for city employees by February 2007
- To expand the summer girls group in Youth Services into a year-round program by December 2006
- To develop assessment tool and report format for court referred family violence assessments in Youth Services by December 2006

Ongoing Activity Measures	2004-2005 Actual	2005-2006 Actual	2006-2007 Projected
Sexual crime victims assisted - adult	19	10	10

Police Department
2230 – Juvenile Bureau

Description of Major Activities

As part of the Investigative Services Division, the Juvenile Bureau investigates incidents involving a juvenile as an offender and/or victim. Youth officers investigate cases regarding dependent children, abused children, neglected children, and minors, requiring authoritative intervention to delinquent minors. Also, youth officers provide support and information to victimized juveniles and their families. Bureau personnel regularly patrol areas frequented by juveniles in an attempt to prevent victimization or misconduct.

FY 2006-2007 Objectives

- To complete at least two (2) tobacco compliance checks of cigarette vendors by February 2007
- To conduct surprise liquor inspections checking for underage drinking at various establishments in the downtown area by December 2006
- To establish a graffiti database and/or binder detailing all intelligence of offenders, locations, insignias, or wording involved in reported and non-reported cases by December 2006

Ongoing Activity Measures	2004-2005 Actual	2005-2006 Actual	2006-2007 Projected

2240 – Records Bureau

Description of Major Activities

The Records Bureau maintains the manual and automated systems of collecting, storing, retrieving, and disseminating information (e.g., crime incidents, descriptions of wanted persons, accident reports, special bulletins, police reports, criminal histories) throughout the department, as well as, other agencies and the public. It also provides fingerprinting services. The property officer assigned to the Records Bureau is responsible for the safekeeping of all found, confiscated and recovered property. In addition, the bureau issues department forms and copies materials.

FY 2006-2007 Objectives

- To implement a network-based Police Report Distribution System within the Evanston city government by February 2007
- To conduct four (4) roll-call training sessions with Patrol Operations and Investigative Services by December 2006

2245 – Communications Bureau

Description of Major Activities

The Communications Bureau is a centralized police operation for sending and receiving information between citizens, members of the Police Department, and other departments of the City, State, and nation, through the use of radios, telephones, and computers. Personnel assigned to this bureau handle all emergency and non-emergency calls for the Police and Fire departments. Communication operators are responsible for dispatching Police and Fire units and personnel, including ambulances, to calls for assistance, and then monitoring their availability for service. Personnel also monitor residences and businesses that are connected to the Police and Fire alarm board.

FY 2006-2007 Objectives

- To implement an annual Customer Service Training Program for Communications Bureau personnel by June 2006
- To present a written proposal with a cost estimate for replacement of all Communications radio equipment and software by June 2006
- To develop and implement a monthly training bulletin on communications-related issues to be distributed department-wide by February 2007
- To develop and implement an internal evaluation system on communications services and procedures by June 2006.

2250 – Service Desk Bureau

Description of Major Activities

Service Desk officers handle walk-in and telephone non-emergency complaints, requests for information and calls for service. In addition to providing support services (e.g. supplies, forms, computer information, emergency and non-emergency telephone numbers, referral information, warrant status information, etc.) to field units, the bureau is responsible for the processing, detention, feeding, monitoring, bonding, and transportation of prisoners. The officers administer the City's Alarm Ordinance and act as deputy clerks for the circuit court for bonding purposes.

FY 2006-2007 Objectives

- To implement an annual Customer Service Training Program for Service Desk Bureau personnel by June 2006
- To present a written proposal with cost estimate for replacement of Service Desk camera monitors and intercom system by June 2006
- To update and revise the Service Desk Bureau Standard Operating Procedures by June 2006

2255 – Office of Professional Standards

Description of Major Activities

The Office of Professional Standards (OPS) provides two separate functions: inspections and internal investigations. The inspection component evaluates the quality of departmental operations, ensuring that the agency's goals are being pursued and that control is maintained throughout the department. This component also performs audits of personnel sick time usage to identify potential abusers, audits the records of the various cash funds kept in the department, audits use of the department's main telephone line, and performs other audits and studies as directed by the Chief of Police. The internal investigations component investigates allegations of misconduct made against the department or its employees by citizens or other employees of the department/City.

FY 2006-2007 Objectives

- To implement the computerized version of the General Orders for use at multiple levels of the department by December 2006
- To develop a searchable database for discipline by category of infraction for the purpose of evaluating infractions that are most commonly violated so that timely solutions can be implemented and accountability will be increased at all levels of the department by December 2006

2260 – Office of Administration

Description of Major Activities

Responsibilities of this division include coordination of all personnel and training functions related to Police Department staff; planning and research operations; and all fiscal activities, including budget, payroll, accounts payable, grant reporting, and internal record keeping for personnel.

Training responsibilities include conducting basic and advanced programs for employees, provided by in-house and external sources.

Planning and research is responsible for analysis of crime statistics, maintaining the written directive system, completion of the annual report, and accreditation compliance.

FY 2006-2007 Objectives

- To complete a feasibility study for a replacement firearms range By December 2006
- To obtain laptop a computer and the necessary training for exclusive use by the Office of Administration for Power Point presentations by February 2007
- To train and equip members of the Evanston Police Department with a respiratory safety mask to ensure safety in the event of a disaster

Police Department

2265 – Neighborhood Enforcement Team

Description of Major Activities

The Neighborhood Enforcement Team (NET) is a part of Strategic Services. NET provides support services to Patrol Operations including tactical, gang, and narcotic operations. NET conducts criminal investigations of the sale, distribution, and use of illegal narcotics and other dangerous drugs. Responsibilities also include diffusing and controlling gang-related activities by investigating and monitoring gang activities, crimes and membership, and providing intelligence to the department. Personnel also act as back-up to patrol units and engage in many problem-solving projects. NET works with other local, State, and federal agencies to reduce crime and improve the quality of life of Evanston residents.

FY 2006-2007 Objectives

- To develop and implement a N.E.T. training curriculum to ensure officers gain knowledge as they gain experience. This will run the course of direct supervision, personal instruction & mentoring as well as formal (outside) training
- Assist in training the newer officers in the execution of N.E.T. problem solving techniques, including search warrants

Ongoing Activity Measures	2004-2005 Actual	2005-2006 Actual	2006-2007 Projected
Narcotic arrests	135	140	140
Search warrants	28	25	30
Problem oriented narcotic tip sheets	50	45	45
Adult gang members arrests	220	220	225
Juvenile gang member arrests	80	70	75
Felony arrests	100	105	100

2270 – Traffic Bureau

Description of Major Activities

Part of the Division of Strategic Services, the Traffic Bureau enforces traffic laws and ordinances, and regulates the flow of vehicular and pedestrian traffic. The Traffic Bureau manages and performs follow-up investigations to most hit and run accidents and administers the Tow Ordinance. The bureau also handles the towing of abandoned and junk vehicles.

FY 2006-2007 Objectives

- To implement training classes, demonstrations, and traffic speed reduction activities in conjunction with the State of Illinois Traffic Safety Challenge program by December 2006
- To conduct four (4) seat Belt enforcement operations by December 2006
- To conduct four (4) Roadside Safety Check operations by December 2006

2275 – Community Strategies Bureau

Description of Major Activities

The Community Strategies Bureau is responsible for developing a better partnership between the police and the community for the purpose of reducing crime. Bureau activities include crime prevention seminars, home security surveys, operation identification, Neighborhood Watch, Site Plan and Appearance Review committees, senior citizen programs, and the Citizen/Police Academy and Clergy Team liaison. The crime analysis element publishes a daily bulletin, weekly crime analysis reports, and monthly crime statistics by beat. Involvement in special events includes 4th of July festivities, Evanston CommUnity Picnic, and the Holiday Food Basket program.

FY 2006-2007 Objectives

- To provide better access to services by updating the listing of services on the department's web site by June 2006

2280 – Animal Control Bureau

Description of Major Activities

Part of the division of Strategic Services, the Animal Control Bureau handles requests and complaints from citizens dealing with domestic and wild animals, including birds and reptiles. It also counsels citizens on animal control problems and issues citations for violation of animal control ordinances. Moreover, it apprehends and impounds stray animals and handles adoption of unwanted dogs and cats in conjunction with CARE (a local volunteer group).

FY 2006-2007 Objectives

- To increase the number of sworn, humane investigators by training at least five additional police officers by January 2007
- To assist CARE in the development of a vision statement by January 2007

2285 – Problem Solving Team

Description of Major Activities

Part of the Patrol Operations division, the Problem Solving Team's (PST) uniformed officers provide regular and highly visible foot patrols in neighborhoods. PST officers serve as a community policing mechanism by making personal contacts with area residents and merchants as well as providing a broad range of proactive and preventive community services (block club development, security surveys, attending meetings, etc.).

FY 2006-2007 Objectives

- To enhance contact with the neighborhood by increasing the amount of time allocated to neighborhood foot patrols by June 2006

Notes for Financial Summary

The FY2007 Budget includes partial year funding for an additional Firefighter/Paramedic.

Performance Report on FY 2005-2006 Major Program Objectives

Fire Management element 2305 has made significant progress on the Fire Station #5 project. Partnered with Facilities Management, an architect has been selected. Fire Management has also put into place a procedure for supervisors to requisition station commodity supplies, helping streamline the process and taking advantage of available technology to improve the process. Fire Prevention element 2310 has put an alarm billing system into place, greatly improving the effectiveness and the efficiency of false alarm invoicing. Fire Prevention is continuing to work with District #65 and private schools to gain additional access to curriculum time for safety education programs.

Fire Suppression element 2315 offered an advanced course in cardiac life support. A skills enhancement certification offered under the aegis of the American Heart Association. Sixty-nine paramedics completed the course. Suppression also completed training on rescuing our own from danger during emergency incidents. The fire profession is placing a much-needed increased emphasis on rescuer safety. Suppression is developing a program that will enhance our water rescue capabilities by integrating personal water craft into the plan.

2006-2007 Department Initiatives

1. The department has applied for a federal grant (SAFER), which targets increasing firefighter staffing over five years with diminishing federal support each year. The grant would allow us to staff an additional ambulance and augment our rescue capabilities on emergency scenes. The application was for eight additional firefighter positions.

Fire Department

2305 – Fire Management & Support

Description of Major Activities

This element provides leadership and stewardship for administering efficient and effective departmental services. It develops strategies to support the organizational efforts toward achieving its mission. The element allocates resources and develops the request for those resources. The success of the department in accomplishing its goals is evaluated. Policies and procedures are adjusted as necessary. The environment is monitored and relationships with internal and external agencies are cultivated and supported.

FY 2005-2006 Objectives

- To develop, solicit, and evaluate a request a proposal for the remodeling of Fire Station #5, in cooperation with Facilities Management, by February 2006
- Assess the fire accreditation model for application in our department by February 2006
- Develop procedures for fire supervisors to request and account for resources to support their station houses

2310 – Fire Prevention Bureau

Description of Major Activities

In addition to Fire and Building code enforcement and investigating cause and origin, the Fire Prevention Bureau is responsible for performing several activities, including:

- Building inspections for Fire Building code violations
- Inspection and witnessing of fire and life safety systems
- Licensing of specialized occupancies
- Review of new construction plans for fire and life safety requirements, and site plan review

This division also oversees:

- Certificate of occupancy inspections
- Public education and fire awareness programs
- Enforcement of fire and life safety for public events
- Monitoring above ground storage tank installations

Finally, the bureau generates department activity reports, creates and implements specialized programs, responds to citizens' inquiries and complaints, and supports the Mutual Aid Box Alarm System. The bureau's main objective is fire prevention and awareness through a pro-active approach to fire and life safety.

FY 2006-2007 Objectives

- Develop a line company inspection program that includes structure pre-plan elements by February 2007
- Create a database to facilitate tracking and reporting Fire Prevention Bureau activities by February 2007

2315 – Fire Suppression Bureau

Description of Major Activities

Fire Suppression members mitigate all fires, explosions, accidents, and medical emergencies. This division conducts in-house medical training and continuing-education classes to upgrade emergency medical-care skill levels in addition to firefighting and its related skill demands. Suppression also responds to community service calls, including:

- Lock-outs or lock-ins
- Downed power lines
- Odor investigations
- Flammable liquid spills
- Other non-emergency incidents requiring prompt response, investigation, and/or action

Suppression provides the opportunity for members of our departments to participate in the MABAS Division III Water Rescue, Hazardous Materials, Technical Rescue, and Urban Search and Rescue teams. The division provides aid to other communities through the Mutual Aid Box Alarm System agreement.

FY 2006-2007 Objectives

- Provide an advanced course in pediatric life support to all paramedics by February 2007
- Provide firefighter orientation and training for five new members by February 2007
- Provide EMT-paramedic training for two members by February 2007
- Re-evaluate our mutual aid needs and design and implement any needed adjustments by February 2007
- In cooperation with Fleet Service, design a vehicle specification for a replacement pumper by February 2007
- In cooperation with Fleet Service, equip and place into service a heavy rescue vehicle by February 2007

Notes for Financial Summary

The major change to departmental expenditures is the result of the expiration of the Reach Learn and Grow Grant (formerly S.E.E.D.) funding – and the relative decrease in expenditures related to the grant.

Health and Human Services Department

Performance Report on FY 2005-2006 Major Program Objectives

The community health assessment is underway. Health indicator data has been collected and analyzed. Two community input sessions are scheduled for early November as well as interviews with key informants. It is anticipated that the assessment will be ready for City Council review in February 2006.

A major bioterrorism exercise is currently scheduled for mid-November. Evanston will participate in a regional exercise along with state and county partners. Department staff has completed incident command training in compliance with federal guidelines.

West Nile Virus increased in 2005 because of the extended hot weather. The department trapped and tested mosquitoes for the first time, and trap counts were consistently high all summer.

Swimming bans declined by 25% in 2005.

It is anticipated there will be sufficient flu vaccine available this year for all residents seeking vaccination.

The department is hosting a number of community education forums for older adults to assist them in deciding how to best utilize the new Medicare Prescription Drug Benefit.

2006-2007 Department Initiatives

1. Establishment of a civilian Medical Reserve Corps for public health emergencies
2. Implementation of online food service inspection reports
3. Implementation of the recommendations of the EPLAN Community Health Assessment
4. In cooperation with the Community Development Department, develop of a comprehensive lead-based paint policy

City of Evanston

Health and Human Services Department

2407 – Human Services Administration

Description of Major Activities

The Director of Health and Human Services coordinates and manages the Department of Health and Human Services. This included staff of the Public Health Division, Mental Health Board, Commission on Aging, and community intervention programs. The director serves as the Public Health Director and is responsible for interdepartmental coordination with federal, state, and county health officials. The director is also responsible for all public information related to infectious disease outbreaks and public health risks.

The director is responsible for the monitoring and evaluating all social services purchased by the City through the Evanston Mental Health Board. The director also serves as Director of the Evanston Mental Health Board and Evanston Commission on Aging. The director's office issues Group- and Residential-Care home licenses, Child Residential-Care home licenses, and home day-care permits.

The director's office provides primary staff support to the City Council, Human Services Committee, the Evanston Community Health Advisory Board, and the Homeless Task Force.

FY 2006-2007 Objectives

- In conjunction with the Legal Department, submit ordinance revisions allowing for local quarantine and isolation in the event of infectious disease outbreaks, for City Council consideration
- Submit a report on the impact of federal homelessness funding over the past ten years to the City Council
- To make food service inspection reports available online

2410 - Laboratory

Description of Major Activities

The Laboratory provides technical support and statistical information for other program elements within the Health Department. Specifically, the Laboratory performs tests for the Child Health clinic, Sexually Transmitted Disease clinic, Family Planning clinic, Head Start program, WIC program, and the Risk Assessment program.

The Laboratory tests distribution waters, by contract, for the villages of Glenview and Northbrook. Evanston beaches are tested for possible pathogenic bacteria on a daily basis during the summer months with Evanston swimming pools tested monthly.

FY 2006-2007 Objectives

Health and Human Services Department

2415 – Family Health

Description of Major Activities

Health Promotion and Health Education is provided to Evanston families through the Illinois Department of Human Services Family Case Management (FCM) program. Public Health Nurses perform health assessments, home visitation, counseling and support services to pre and post-natal mothers, high-risk infants and children, as well as families in crisis. Pregnant women, infants and young children in families that are below 200% of the Federal Poverty Level, qualify for the program services.

Home visitation services provided for high risk infants and women who are referred via The Adverse Pregnancy Outcomes Reporting System (APORS). Public Health Nurses receive referrals of high risk infants for follow up services and public health surveillance of birth defects and other adverse pregnancy outcomes for reporting. Public Health Nurses address policy development and research.

Genetic counseling, education and referral are provided to individuals and community groups. Family Health Services also conducts its immunization clinic twice per month, genetic counseling and education services, vision and hearing screenings, and offers state mandated school physical exams during the months of June through October. Family Planning Clinic is conducted providing services on a sliding scale and offers a variety of services that included physical exams, lab, pregnancy testing, individual and group education, counseling, contraceptives and social service/medical referrals.

Consultation and health presentations are provided to schools, community agencies and churches during health fairs, etc. as requested. Evanston Subsequent Pregnancy Project (ESPP) is an adolescent health program that is conducted that provides education and counseling to pregnant and parenting teens with emphasis in delaying subsequent pregnancies and completing high school.

A Public Health Nurse conducts at least one yearly inspection of 45 child care centers in Evanston to ensure a healthy and sanitary facility is maintained. Health education sessions are also provided for day care staff upon request.

FY 2006-2007 Objectives

- Expand outreach efforts with the Women, Infant and Children's Program (WIC) of Greater Evanston for case management services.
- Increase childhood immunizations by 25% for all family case management clients by 2007
- Establish relationships with hospital area discharge planners to increase APORS referral tracking and management

Health and Human Services Department

2420 – Infectious Disease Control

Description of Major Activities

Infectious Disease Control

Infectious Disease Control is responsible for the prevention, testing, monitoring and follow up of all reportable communicable diseases to prevent the spread of those infections in the community. Bi-weekly STD clinics are provided for the diagnosis, treatment and investigative follow up of sexually transmitted diseases, including behavioral modification, motivational and educational counseling. Confidential and anonymous HIV/AIDS counseling and testing is also provided. The Department offers Tuberculosis (TB) skin testing weekly and TB clinics monthly in conjunction with the Cook County Suburban Sanitarium District. Infectious disease consultations and educational services to schools, agencies and professional groups are also provided.

Promote the comprehensive viral hepatitis prevention program by ensuring that pamphlets and posters addressing hepatitis prevention and Hepatitis A and B vaccinations are available in the waiting room. Promote to all clients throughout the clinic process, and particularly those who inject and/or snort drugs, the need for acquiring protection against Hepatitis A, B and C through vaccinations and behavioral change. Provide information on services available through the Department's Immunization (IM) clinic to patients less than 18 years of age. (Clients less than 18 years must obtain parental consent to obtain vaccinations.)

FY 2006-2007 Objectives

Increase the number of clients receiveing the entire series of Hepatitis B, and Hepititis A vaccinations.
Develop a system of streamlining required communication and reporting of communicable diseases by January 07

2425 – Dental Services

Description of Major Activities

Comprehensive preventive, restorative, educational, and emergency services are provided to children on a sliding fee scale. These services include, but are not limited to:

- Prophylaxis and fluoride treatments
- X-rays
- Decay-preventive sealants
- Restorations
- Root canal therapy and surgical procedures
- Instructions on proper oral hygiene

The dentist and dental-health educator conduct dental health education programs and screenings for pre-school and school-age children in cooperation with Evanston School District #65 throughout the school year.

FY 2006-2007 Objectives

- By February 28, 2007, assess the impact of the amendment to the School Code mandating all kindergarteners, second- and sixth-graders in public, private, or parochial schools receiving dental exams

2430 – Adult Health

Description of Major Activities

This program identifies adult populations that are recognized as having a high risk of developing cardiovascular and other chronic diseases. Screening, education programs and monitoring activities are provided. Adult screenings include testing of blood pressure, HDL blood cholesterol, consultation and referral. Education and health promotion activities are conducted at selected community locations including churches, health fairs and food distribution sites.

The Evanston Health Department licensure review process is conducted annually for the eleven long term care facilities within the Evanston community.

FY 2006-2007 Objectives

- Expand mammography screenings for adult women
- Expand outreach and education awareness to long term care facilities
- Expand educational outreach efforts regarding the need for pneumonia vaccination to vulnerable adults by January 07

Ongoing Activity Measures	2004-2005 Actual	2005-2006 Actual	2006-2007 Projected

Health and Human Services Department

2435 – Food & Environmental Health Services

Description of Major Activities

The Food and Environmental Health programs provide population-based community health services. This includes risk-based food protection activities and community-based disease prevention activities. The major enforcement activities are food protection; rodent, vector, and public health nuisance inspections, and lead poisoning investigations. Other activities include coordination of community health planning and education, Health Division cash collections, and administration of the Illinois Smoke Free Communities grant.

Food establishment inspections are made in accordance with the Food Service Code of all facilities serving food. This includes:

- Restaurants
- Grocery stores
- Schools
- Nursing homes
- Hospitals
- Church kitchens
- Day care centers
- Food processing plants
- Temporary food vendors
- Food vending machines
- Food delivery vehicles

Re-inspections are made when necessary to assure compliance with applicable ordinances. All suspected cases of food-borne illness are investigated to determine the cause and prevent of recurrence. Plans for new or remodeled food establishments are reviewed, and owners are issued health licenses. Environmental health practitioners advise and assist food establishment operators on sanitation problems and conduct Food Manager Training and Certification programs. Food Safety Training sessions are provided for food handlers as needed.

Environmental Health programs provide inspections, investigations, consultations, and educational services. Rodent, vector, insect, and public health nuisance complaints are promptly investigated and appropriate corrective action is taken. Environmental Health practitioners conduct educational rodent control activities for neighborhood groups and facilitate extermination services for serious infestations on public property. Environmental Health staff provide mosquito surveillance and education about West Nile Virus.

Environmental lead assessments are conducted in dwelling units where children with elevated blood lead levels reside. The source of lead poisoning is determined, and corrective work is recommended. Health inspections and licensure audits are performed at licensed day care facilities. Periodic inspections are made of public swimming pools to assure safe and sanitary conditions. Staff enforces the Evanston Indoor Clean Air Act and the Adolescent Tobacco Act, licensing tobacco retailers and prohibiting the sale of tobacco to adolescents less than 18 years of age.

Community health needs are identified by IPLAN, the Illinois Process for the Local Assessment of Need. Health Division staff promote healthy life behaviors at health fairs, festivals, and in the schools. Staff work with community organizations, businesses, schools, and the faith-based community in this effort.

Youth tobacco prevention, youth- and adult-tobacco cessation, and improved indoor air quality are objectives of the Illinois Smoke Free Communities grant. Youth tobacco-prevention activities are being coordinated with the schools, the Evanston office of the American Cancer Society, and PEER Services. The fact that over 70% of the restaurants in Evanston are smoke free is being publicized. Seminars and clinics to help youth and adults quit smoking are periodically offered.

Health and Human Services Department

2435 – Food & Environmental Health Services

FY 2006-2007 Objectives

- Assess the community need for Indoor Air Quality program services by February 2007
- Provide web-based information to educate the community about food safety by February 2007
- With help from the Legal Department, review and consider updating the current Evanston Health Nuisance laws by February 2007

2440 – Vital Records

Description of Major Activities

This department registers all births and deaths that occur in Evanston and compiles certain birth and death data for statistical reports. Certified copies of birth and death certificates are issued by this office for any birth or death occurring in Evanston. Permits, as required by law, are issued to bury or otherwise dispose of a body.

FY 2006-2007 Objectives

- Assess options other than microfilming for birth and death records retention

2445 – Health & Human Services Department Grants

Description of Major Activities

Cook County Lead-Based Paint Hazard Control

The total number of Evanston Children infected by lead poisoning in 2004 2005 was 1,181.00 confirmed. Approximately 21,456 of Evanston's housing units, or 79% of the total housing units, are estimated to contain lead-based paint. Evanston's figures correlate to the age of the housing stock, with 93% of the housing units built prior to 1960, when lead-based paint was still used. The total number of pre-1979 housing units occupied by very low income individuals is 10,868. Assuming that a lower number of these homes have been abated or re-mediated, a conservative estimate is that 90% of these dwelling units (9782) will have lead based paint in them. About 90% of these units (8804) will have lead hazards in some form. The number of low and very low income households in Evanston is 8,716 or 31.2% of Evanston households. Low income homeowners (at or below 80% PMSI), in the first years of home ownership, will be targeted by this grant program.

Reach, Grow, and Learn (formerly Project SEED)

Through a three-year grant from the federal office of the Substance Abuse and Mental Health Services Administration (SAMHSA), the City of Evanston will implement Reach, Grow and Learn (Reach). The goal of Reach is to positively impact the lives of approximately 400 pre-school to kindergarten-aged children, and their families, who are in the community's public and private child care centers and classrooms. The goal is also to affect system-level change by expanding Evanston's capacity to build a network of early childhood prevention and intervention services after the term of the grant has been completed. Over the duration of the grant, Reach will implement The Incredible Years (TIY) program and evaluate client, system, and process outcomes. Evaluation data and analysis will be integrated into ongoing strategic planning involving parents, teachers, early childhood educators, and mental health and social service planners. Another goal for Reach is to act as a catalyst for community-wide attention to early intervention and prevention efforts. The Incredible Years program is delivered through a letter of agreement with Metropolitan Family Services. The City of Evanston's Department of Health and Human Services is the primary investigator for the SAMHSA grant.

NOTE: Reach was initially intended to be a 3-year project. Under an agreement with SAMHSA, Reach is being continued and funded for a 4th, "no-cost extension" year in 2006. As the result of a late grant start-up, this was anticipated and planned from the beginning implementation of the project in order to enable Reach to complete its planned deliverables and spend the balance of lapsing grant funds. However, this is budget neutral for the City because no additional funds were allocated nor can be expended other than those in the initial, 3-year grant award. Unless additional funds can be found to sustain the program efforts, Reach will terminate no later than June 30, 2006.

FY 2006-2007 Objectives

Cook County Lead-Based Paint Hazard Control Grant:

- Expand educational efforts to families living in residential and investor own dwellings.

Reach, Grow, and Learn (previously Project SEED):

- By November 30, 2006, to have provided a community-wide conference for families, child care workers, and professional on various aspects of early childhood mental health prevention, and the implementation of universal social and emotional learning interventions in the community.
- By June 30, 2006, through the project's research design, demonstrate significantly positive outcomes in the lives of the families and children who have received The Incredible Years training and curriculum during Year 4 of the SAMHSA grant.

Community Intervention Services funds emergency intervention services, disabled services, and outreach specialist services.

Performance Report on FY 2005-2006 Major Program Objectives

The division provided several workshops in FY 2005/2006. The division, in conjunction with the Progress Center for Independent Living, co-sponsored a fair housing workshop at the Evanston Police Outpost. Thirty people attended the event representing various agencies from around Evanston. The division sponsored the first ever Taste Of Hispanic/Latin America, where city departments were invited to attend and participate and had a large turnout. The division also sponsored several additional events, including a workshop dealing with the subject of sexual assault in the Evanston community, focusing primarily on the Latino community; the Health Fair, which focused on the Latino community of Evanston; and the first financial literacy workshops in conjunction with Consumer Action. Two workshops were conducted, one of which, entitled "Talking to Teens", focused on financial literacy training and taught financial literacy skills to members of the Evanston Summer Youth Employment program. The second workshop was entitled "Train the Trainer". This workshop provided an overview of all of the modules that are included in the Moneywise Financial Literacy program developed by Consumer Action. Approximately 33 people attended, including staff from various agencies throughout the Evanston community.

2006-2007 Department Initiatives

1. Refresh city staff on ADA-related issues with emphasis on Police and Fire
2. Community outreach specialist will provide awareness on a regular, continual basis and provide services to limited English-speaking residents with an emphasis on teaching community members about educational and social services, e.g. housing, social services agencies, Medicare, and other City of Evanston sponsored programs

Community Intervention Services

2450 – Community Intervention Services

Description of Major Activities

Community Intervention Services (CIS) includes a variety of direct and contract services designed to address the needs of special populations within the community. CIS includes outreach and a practical assistance service to those populations for whom English is not a primary language. CIS staff also coordinates City responses to persons with disabilities, including an Adaptive Device Program, and monitoring City compliance with the Americans with Disabilities Act. CIS staff manages City funding of homelessness assistance programs, including City funding of Evanston Township for emergency assistance, the federal Emergency Shelter Grant program and the Cook County Childhood Lead Prevention Program. CIS provides staff support to the Homeless Task Force, Citizen's Advisory Committee on Compliance with the Americans with Disabilities Act, Bilingual Service, Service Providers Interagency Network (SPIN), the Cook County Childhood Lead Prevention Program, and the Illinois Lead Safe Housing Taskforce.

FY 2006-2007 Objectives

- Expand educational efforts to families living in residential and investor-owned dwellings about Childhood Lead Poisoning.
- Develop and implement programs to provided counseling, job-placement and housing assistance to homeless ex-offenders, and continue to service the homeless population in the Overnight Shelter and Warming Center.

Community Intervention Services

2525 – Homeless Services

Description of Major Activities

Connections for the Homeless:

The agency operates Hilda's Place, a year-round, fixed-site emergency and transitional overnight shelter for adult men and women. The shelter provides 36 emergency beds and is open from 7:00 p.m. to 7:00 a.m. each night of the year. Emergency Shelter Grant Program (ESGP) funds will support the following operations of the shelter: (a) weekly in-person psychiatric assessments and evaluations of individuals in the shelter; (b) personnel costs associated with night supervisors and the mental health case manager; (c) personnel costs associated with the substance abuse case manager; (d) operational services and supplies for the shelter; (e) costs associated with the repairs and maintenance of the shelter; and (f) shelter rent. ESGP funds will also support personnel costs for Connections Family Housing Services Program prevention case manager.

Evanston Ecumenical Action Council:

The agency operates the Hospitality Center for the Homeless on a year-round basis. The center is open five days a week, Monday through Friday. The Hospitality Center provides guests with shelter from the elements during the day, ongoing case management services, and an on-site social worker and employment counselor. The Hospitality Center also provides a telephone voicemail, fax, and fare for transportation to enable its guests to get to work, job-related interviews, and appointments for entitlements and other benefits. When needed, the Hospitality Center provides hats, scarves, gloves, umbrellas, and other clothing items. The center also provides support services to assist guests in making the transition to a more stable living condition, and an employment counselor to provide guidance as guests strive to become self sufficient. Emergency Shelter Grant Program funds will support the general operating expenses of the Hospitality Center and the salary of the employment counselor.

Fresh Start:

Emergency Shelter Grant Program funds will be used to support Fresh Start, GRANTEE'S ex-offender program for homeless adults. Fresh Start reaches out to women and men who have been incarcerated, caught up in chronic substance abuse, and other forms of anti-social behaviors, but are now open to the challenge of change and a new life. Specifically, funds will be used to support the following activities: (a) provide services to aid ex-offenders with reintegrating into the community; (b) promote family restoration through reunification discussion groups; (c) Utilize spiritual leaders, motivational speakers, and Bible study; (d) provide assessments, counseling, and case management (e) to render employment assistance and transportation; (f) engage in advocacy, referral services and outreach, and to evaluate planning and follow-up on client progress (g) to act as a liaison to the court and job-placement centers; (h) investigate educational opportunities, training, and career options; and (i) conduct abuse education and support groups.

FY 2006-2007 Objectives

- Continue to provide counseling, job-placement and housing assistance to homeless ex-offenders and to service the homeless population in Overnight Shelter and Warming Center

Performance Report on FY 2005-2006 Major Program Objectives

The Mental Health Board (MHB) monitored 27 programs in 19 funded agencies. Each MHB member served as an agency liaison for regular, monthly contact with two agencies; monthly statistical reports were received about each funded program; and narrative program reports were received quarterly. In the last fiscal year, the MHB funded programs that provided services to 8684 unduplicated Evanston individuals and families, an increase of 17% above projections; 86% of those individuals were low-income. The MHB implemented a new, electronic quarterly reporting format that provides more extensive information about outcome objectives and measures. The reporting format and criteria now emphasizes the measurable impact of services that are funded upon clients of services and/or the community. The MHB developed and adopted new funding criteria and guidelines for the FY2006-2007 funding allocation process. Each program for which funds are requested is being evaluated and rated using 6 weighted category areas, each of which will have a number of criteria. The MHB will score each of these programs on how well they meet the respective criteria and funding priorities of the board; scores will impact funding decisions by the board.

The MHB sponsored, coordinated, and/or assisted in the production of the following conferences:

- Fourth Annual Naomi Ruth Cohen Charitable Foundation Mental Health Conference, “Depression in Adults 50 and Over: Prevention and Treatment,” which had more than 250 participating consumers, family members, and professionals.
- In conjunction with the Commission on Aging and a number of social service organizations, the seventh annual “Aging Well: Choices and Myths”, addressing mental health issues for older adults, with approximately 140 people in attendance.
- The second annual “Maximizing Children’s Potential” explored “the power of the brain” and raising emotionally healthy children. A keynote presentation and 12 workshops (offering 2 in Spanish) were presented about revealing research regarding “healthy brains and healthy communities” and how a host of factors contribute to the overall health and social/emotional development of the brains of our children. Approximately 160 parents and early childhood teachers attended.
- In conjunction with Answers for Special Kids, “The Reauthorization of IDEA” focused on changing laws regarding special education and the way that they will impact the child in the school. Approximately 45 parents attended this discussion, presented by a nationally recognized attorney in the field.
- With School District #202, Center for Independent Futures, and Community Alternatives Unlimited, “Preparing for Life After High School” provided training to 30 participating parents on how to begin effective transition planning for children with developmental disabilities.
- The local Mental Health Association of the North Shore's street banner campaign and kick-off event, where banners were displayed throughout the community with a mental health anti-stigma theme, designating May as Mental Health Month in Evanston.

MHB staff continued to oversee the implementation of Project Reach (previously SEED). This federally funded, evidence-based, mental health prevention program targets children (ages 3-5) enrolled in a day care program and offers training to their parents and teachers. The City subcontracts with Metropolitan Family Services to implement and coordinate Reach. As the result of a late grant start-up, the project is being continued and funded for one additional year, under an agreement with SAMHSA, in order to enable Reach to complete its planned objectives. Unless additional funds can be found to sustain the program efforts, Reach will terminate no later than June 30, 2006.

2006-2007 Department Initiatives

1. Continue the development and implementation of updated directory of community services that will be printed and distributed as well as made available to the community through the City’s website.

Mental Health Board and Community Purchased Services

2455 – Mental Health Board

Description of Major Activities

The Evanston Mental Health Board (MHB) is a public body established by state legislation and a 1969 local referendum to administer local tax dollars for mental health services. Its mission is to ensure the best possible environment for the promotion of mental health and emotional well being in Evanston. The MHB accomplishes this by working for system improvement, supporting and defending those residents with special needs, and educating the community about important mental health issues.

The MHB works to provide effective mental health programs in Evanston for people who have, or are at risk of having mental and emotional disorders or problems, developmental disabilities, and/or substance abuse problems. The programs and services are available to all Evanston residents. Additionally, the MHB has assumed responsibility for the City's Community Purchased Service budget. Using a consolidated funding process, the board allocates funds for programs that provide broad-based human services. The MHB plans for, coordinates, monitors, and evaluates programs to ensure that they are accessible, effective, and responsive to Evanston residents' needs. The MHB determines goals and objectives and develops funding guidelines, criteria, and priorities. An annual contract is written, data is collected from each funded program monthly and quarterly, and agencies are monitored for contract compliance.

Mental Health Services provides staff support to maintain Mental Health board operations and assist the MHB in implementing its mission. They provide contract administration and assist in the monitoring of contract performance. Staff also provides information and referrals about local agency services and other public and private mental health programs. Short-term clinical intervention and case management are provided for people in crisis. A directory is published about all of the community's services. Assistance is provided to individuals to connect them with whatever services are needed, whether in Evanston or through programs in other communities. Staff also provides support for the Evanston Alliance on Homelessness, and coordinates and manages the group's proposal review process for the community's allocation of federal homeless funds. .

FY 2006-2007 Objectives

- By April 2006, to have completed an evaluation and assessed the utility of the MHB's new computerized funding-criteria model, and revised them for use in the 2006 allocation process
- By September 2006, to have developed funding priorities including both mental health and broad-based, human service issues
- By February 2007, to have organized and provided at least four community-wide educational presentations related to contemporary mental health and broad-based human service issues
- By February 2007, to have regularly monitored the MHB-funded agencies' use of City tax dollars by visiting program sites, meeting with agency staff, attending agency board meetings, and monitoring quarterly reports of outcome measures
- By February 2007, to have completed an update of the directory of community services and made it available to the community as a printed document as well as through an online version on the City webpage

City of Evanston

Mental Health Board and Community Purchased Services

2460 – Community Purchased Services

Description of Major Activities

As the local mental health authority, the Evanston Mental Health (708) Board is responsible for ensuring that there are effective mental health programs in Evanston for people who have, or are at risk of having, mental and emotional disorders or problems, developmental disabilities, and/or substance abuse problems. They are accountable for allocating, monitoring, and evaluating the use of local tax dollars to purchase broad based human services, for both mental health and broad-based human service issues, for Evanston residents

Annually, the MHB determines its goals and objectives, and develops funding guidelines, criteria and priorities. Every fall, the Board reviews and evaluates funding proposals from not-for-profit agencies, and allocates City funds to the program areas identified above. The MHB monitors and evaluates its funded programs to ensure that they are accessible, effective and responsive to the needs of Evanston's residents. An annual contract is written; data is collected from each funded program monthly and quarterly; and agencies are monitored for contract compliance.

In the FY06-07 City Budget, the MHB is funding 28 programs at 19 different agencies.

FY 2006-2007 Objectives

- Three outcome objectives and outcome measures are developed and written into each agency purchase of service contract for each of the 28 funded programs. The outcome objectives are program specific, and are monitored quarterly.
- Performance objectives for each of the funded programs are developed separately, and monitored monthly.
- In addition to the agencies submitting their reports on objectives to staff, each of the agencies is monitored monthly by the Mental Health Board Liaison who is assigned to the agency.

Commission on Aging

Financial Summary

	2004-2005 Actual	2005-2006 Appropriation	2005-2006 Estimated Actual	2006-2007 Appropriation Approved
Expenditures:				
2530 – Commission on Aging	113,218	117,500	115,609	127,500
2535 – Subsidized Taxi Program	240,233	212,400	285,833	252,400
Total Expenditures:	\$ 353,451	\$ 329,900	\$ 401,442	\$ 379,900
Revenues:				
55255 – Community Aging Grant – Advocate	30,775	33,000	31,998	41,600
53640 – Participant Contributions	80,289	68,000	97,779	88,000
Total Revenues:	\$ 111,064	\$ 101,000	\$ 129,777	\$ 129,600

Notes for Financial Summary

The Subsidized Taxicab Program usage continues to increase, providing increases in revenue as well as cost to the City. The 2005-06 budget includes an increase in the resident share for subsidized taxi rides of \$0.50 per ticket - making the cost a 50-50 share between the resident and the city. This increases the revenue by \$20,000.

The ombudsman program has received additional grant funding from the Illinois Department on Aging and the Illinois Department of Public Health to cover the cost of a .6 FTE ombudsman, who assists with program activities. Thirty-four percent of the Commission on Aging budget (2530) is covered by grants from the Illinois Department on Aging and the Illinois Department of Public Health.

Performance Report on FY 2005-2006 Major Program Objectives

Staff revised program brochures and resource directories and distributed them to City buildings and community agencies, including the Levy Senior Center, public libraries, senior service agencies, senior housing buildings, long-term care facilities, and faith-based organizations located in Evanston. In addition, resource directories were provided to the volunteers of three faith-based senior companion and volunteer organizations, and were distributed during flu clinics, the Aging Well Conference, and health fairs. A revised brochure containing information on City and community senior services is accessible through the City website. This past year information on senior services, including those sponsored by the City, were included in an issue of Highlights.

Staff established and coordinated a regular schedule of meetings with local bank officials, elder-abuse and senior-service agency staff, and City staff to enhance the identification, reporting and investigation of financial exploitation of seniors. In addition, staff consulted with long term care facility staff, the Evanston and State Police Departments and local bank officials to identify and investigate financial exploitation cases in long term care facilities.

Staff initiated the establishment of a complex case review team in conjunction with several community agencies and City departments. Although coordinated discussions of complex cases have occurred on an as needed basis, the establishment of a monthly schedule for case discussions was complicated by one agency's concern about confidentiality of client information.

Staff evaluated the availability of lift equipped vehicles to Subsidized Taxicab Program users. Currently one cab company has a lift equipped vehicle. This vehicle is not consistently available to program users due to demand. Staff are discussing ways to increase access to program users and to expand the number of lift equipped vehicles available through other companies.

2006-2007 Department Initiatives

1. Continue to evaluate program effectiveness and identify areas for improvement – further outreach and program development
2. Continue to improve driver courtesy and responsiveness in order to better serve taxicab program participants

City of Evanston

Commission on Aging

2530 – Commission on Aging

Description of Major Activities

The Commission on Aging advocates for older Evanston residents and persons of all ages residing in long-term care facilities. The commission operates the Long-Term Care Ombudsman Program, advocates on behalf of long-term care facility residents, and investigates complaints about care. In addition, the commission:

- Trains volunteers to advocate for the residents of long-term care facilities and senior housing buildings
- Provides information, assistance and referral services to callers
- Provides education to the elderly and their families about services for senior citizens
- Makes in-home assessments of at-risk seniors living in the community;
- Provides technical assistance to agencies in funding and coordination of planning for services
- Advises agencies, organizations, the community and members of the City Council on the needs of older adults and long-term care facility residents
- Encourages and facilitates activities between generations
- Administers a subsidized taxicab program with the City Collector's Office
- Administers a handyman program in conjunction with CEDA's "Neighbors at Work"

FY 2006-2007 Objectives

- Evaluate the impact of the increased number of isolated seniors referred for assistance to program staff, and establish a framework for the case management of these complex community situations by September 2006
- Establish a council that would work with families of residents living in Evanston long-term care facilities by June 2006
- By May 2006, provide education on the federal and state prescription drug programs and assist eligible seniors to sign up for available programs

Ongoing Activity Measures	2004-2005 Actual	2005-2006 Actual	2006-2007 Projected

2535 – Subsidized Taxicab Program

Description of Major Activities

The Subsidized Taxicab Program provides low-cost transportation for income-eligible Evanston residents 60 years or older, and to those under the age of 60 with mobility impairments. The program may be used anywhere in Evanston, with any Evanston cab company, 24 hours per day, 7 days per week. The coupons are returned by the taxi companies to the City for reimbursement. Coupons may be purchased by program participants for \$2.00, and are available at the Evanston City Collector's Office, the Levy Senior Center, and the United Way. The program is jointly administered by the Commission on Aging and the City Collector's Office.

FY 2006-2007 Objectives

- Evaluate the need to increase the price of taxicab coupons, including consideration of the amount reimbursed to taxi drivers, the amount charged to program users, and the cost assumed by the City of Evanston, based on the increased cost of gasoline.

Ongoing Activity Measures	2004-2005 Actual	2005-2006 Actual	2006-2007 Projected

Notes for Financial Summary

Performance Report on FY 2005-2006 Major Program Objectives

Public Works staff continued to produce results and deliver services at a high level. Street resurfacing (including work associated with water main replacement and sewer work) was completed on time and within budget. The continuing fleet-replacement program purchased three new garbage trucks. The Asbury bridge replacement over the CTA yellow line was started with completion anticipated by spring 2006. The "prototype block" of the Chicago Avenue Streetscape was completed; planning and design started on the remainder of this project. A consultant was hired to complete the evaluation of street conditions and develop a five-year plan in this area. In conjunction with Facilities Management, the 20-plus-year-old roof at the Service Center was replaced. Progress continued on the Bike Plan, with significant implementation to occur in 2006. The JULIE system was upgraded so that information is reported in real time online. A 60-ton per hour snow melter was purchased for use in the downtown and other business areas.

2006-2007 Department Initiatives

- Evaluate the current recycling program and consider changing the size and collection technique of the bins, with the goal being an increase in the amount of diversion from the refuse stream
- Evaluate the location of the salt dome and plan for its replacement
- Investigate the amount of un-permitted street work and decrease it by identifying and fining the violators
- Begin a benchmarking effort in Streets and Sanitation to record the current activity measures which will allow us to improve the effectiveness and efficiency of our service delivery

Public Works

2605 – Director of Public Works

Description of Major Activities

The Director of Public Works manages the planning, construction and maintenance of public improvements, and the delivery of public works services. This includes the design and implementation of work programs and the development of activities to accomplish policies and goals formulated by the City Council and the City Manager. The director also assists in developing alternative solutions to community problems for consideration by the Mayor and Council. Divisions within the department of Public Works include Streets and Sanitation, Transportation, Fleet Services, Water and Sewer Utilities, and Municipal Service Center operations.

FY 2006-2007 Objectives

- To double the amount of street resurfacing (contingent upon funding approval)
- To investigate the feasibility of adjusting vehicle life based on actual downtime and service cost
- To investigate the feasibility of increasing the size of recycling containers
- To develop a five-year plan for the Municipal Service Center

Public Works

2610 – Municipal Service Center

Description of Major Activities

The Municipal Service Center serves as the base of operations for all field service personnel and equipment. It provides operating space for the Public Works Department divisions of Streets and Sanitation, Traffic Engineering, Parking and Parking Enforcement, Fleet Services; Parks, Forestry and Recreation Department and the Facilities Management Department. The building includes maintenance garages, workshops, warehousing, office and employee areas, material storage and vehicle garages as well as the salt storage dome. Bulk products and supplies are dispersed from this location for all departments of City government. The center contains one dwelling unit for a city employee as well as the Parking Enforcement Division which allows for continuous on-site security and surveillance. The center also provides office and operating space for the Summer Youth Program. Additionally, the center is providing space for recycling spent lamps and household battery recycling storage.

FY 2006-2007 Objectives

- Continue to upgrade all internal lighting fixtures and electrical components in buildings A, B & C to provide better quality of light, longer life for the fluorescent tubes, and be more energy efficient
- Complete exterior painting of the entire facility by September 2006
- Complete replacement of all exterior doors with fiberglass and replace existing locking mechanisms with no key technology by September 2006
- Replace severely corroded steel gates and decorative fencing by September 2006
- Utilize fleet software inventory program for the first floor warehouse stored material

Ongoing Activity Measures	2004-2005 Actual	2005-2006 Actual	2006-2007 Projected

2635 – Traffic Signs	297,823	269,300	266,140	284,700
2640 – Signals & Streetlights	751,877	720,500	655,192	739,500
2645 – Enforcement & Tickets	1,169,131	1,093,500	1,059,126	1,305,400
2650 – School Crossing Guards	289,032	293,400	282,825	295,600
Total Expenditures:	\$ 3,715,006	\$ 3,488,500	\$ 3,418,213	\$ 3,845,200
Revenues:				
52010 – Vehicle Licenses	2,219,131	2,100,000	2,128,710	2,200,000
52530 – Boot Release Fee	114,250	121,500	91,825	115,000
52505 – Parking Ticket Fines	3,146,566	3,640,000	2,843,212	3,790,000
52131 – Visitor Parking Permits	14,107	18,000	13,608	14,000
52130 – Resident Parking Permits	123,345	116,000	118,141	120,000
56175 – Ryan Field Parking Permits	11,560	12,000	13,020	12,000
Total Revenues:	\$ 5,628,959	\$ 6,007,500	\$ 5,208,516	\$ 6,251,000

Notes for Financial Summary

Revenue for parking tickets underperformed in 2005-06 due to the construction of the Sherman Avenue development, which upset street parking and required more leniency in the distribution of parking fines.

Performance Report on FY 2005-2006 Major Program Objectives

The Division of Transportation has completed the following projects in the FY2005-06 fiscal year:

STREET INFRASTRUCTURE AND ADA COMPLIANCE

- Engineering and construction of the expanded alley-paving projects with 15 alleys constructed in 2005
- Annual street resurfacing projects with 22 resurfacing projects completed
- Installation of all traffic calming devices approved by City Council through July 2005
- All 50/50 sidewalk project requests
- 1,160 feet of curb and 9,700 sq. ft. of sidewalk under the CBDG Block Curb and Sidewalk programs
- 47 ADA ramps including 960 ft. of curb and 8,870 sq. ft. of sidewalk under ADA Ramp program
- Advertisement for construction of the McCormick Boulevard Reconstruction project

TRAFFIC SIGNAL AND INTERSECTION UPGRADES

- Construction of Dodge Avenue/Church Street intersection signal upgrade
- Design of traffic signals at Ashland/Central and Asbury/Central
- Pavement markings inventory for citywide pavement markings program
- Prequalification of Traffic Signal Studies consultants to address operational issues Citywide

PARKING SYSTEMS IMPROVEMENTS

- Purchase and installation of approx. 900 new parking meters to accommodate the onstreet meter rate increase
- RFP issued for coordinated management contract of Evanston parking facilities

Division of Transportation

OTHER CITYWIDE PROJECTS

- Construction of Asbury Avenue Bridge - bridge approaches to be completed spring 06
- Coordinated/Authorized traffic control and project phasing for CTA Main Street Viaduct project
- Roadway surface inventory to feed 5-year Street Resurfacing program
- Initiation of Skokie Swift North Shore travel market analysis
- Initiated design of Chicago Avenue signal system upgrade project
- Construction of Chicago Avenue Streetscape prototype block and Des/Const. of Chicago/Main Streetscape
- Completed design of Chicago Avenue Streetscape

2006-2007 Department Initiatives

- Completion of 5-year Street Resurfacing Program (2007 to 2011)
- Completion of 5-year Traffic Signal Upgrade Plan (2007 to 2011)
- Completion of 5-year Capital Plan for Downtown Parking Garages (2007 to 2011)
- Completion of Skokie Swift North Shore Travel Market Analysis
- Completion of McCormick Boulevard Project
- Completion of Ridge Avenue Traffic Signal System Upgrade
- Completion of Sheridan Road and Ridge Avenue Jurisdictional Transfer
- Implementation of Evanston Bike Plan (CMAQ Funded Portion)
- Coordinated Management Contract for Evanston Parking Facilities
- Construction of Streetscape segments of the Chicago Ave. Streetscape in conjunction with planned developments (Autobarn/Mazda and 801Chicago)
- Completion of design of Chicago Avenue Signal System upgrade
- Implementation of an emergency street width policy Citywide
- Upgrade of Church Street self-park revenue control equipment
- Develop agreement with CTA for use/improvement to Foster and University Place parking lots

Division of Transportation

- Application for federal transportation funding to support and expand the street resurfacing program
- Develop Manual for Site Development permitting process to include review, submission and inspection guidelines

City of Evanston

Division of Transportation

2620 – E.D.O.T. Administration

Description of Major Activities

The Evanston Division of Transportation (EDOT) manages and administers work in the following areas:

- Engineering
- Traffic Engineering
- Traffic Signs
- Traffic Signals
- Street light maintenance
- Parking garages, lots, meters, residential districts, enforcement and ticket processing
- School crossing guards

The Evanston Division of Transportation Administration includes the Director of Transportation and an executive secretary.

FY 2006-2007 Objectives

- Construct the Ridge Avenue Signal CMAQ Project
- Design and bid the Ridge Avenue Roadway Rehabilitation Project (for 2007 construction)
- Complete the jurisdictional transfer of a section of Sheridan Road
- Construct the McCormick Boulevard Roadway Improvement plan
- Complete Phase II design of the Chicago Avenue Streetscape
- Complete Phase II design of Chicago Avenue Signal Upgrade and Coordination Project
- Continue implementation of the Chicago Ave. Streetscape - eastern side - Kedzie to Main and Lee to Greenleaf
- Implement new 5-Year pavement management system (2007 - 2011)
- Develop 5-Year traffic signals upgrade plan (2007 - 2011)
- Complete the Skokie Swift North Shore Corridor travel market analysis
- Secure funding for plan to coordinate transit services along Central Street
- Complete the 5-Year plan for parking facilities structural improvements
- Implement multi-space parking meters at select locations
- Secure single point management agreement for operation of Evanston parking garages
- Complete Evanston Bike System Plan by 2006
- Continue Tallmadge streetlight upgrade program
- Continue Improvement to Engineering plan review and permitting guidelines document

Division of Transportation

2625 – Engineering

Description of Major Activities

The Engineering section administers and supervises:

- The field construction of all Motor Fuel Tax, General Obligation Bond funds, Community Development block grant and special assessment construction projects
- Provides engineering services for street, alleys, sewer and water main projects
- Manages signal upgrade projects and furnishes engineering services for other City departments (as required)
- Oversees construction involving the public right-of-way, coordinates the Block Curb and 50/50 Sidewalk and Curb Replacement Programs
- Attends meetings with technical personnel from other communities on behalf of the City.

This section investigates and coordinates various funding sources to improve the City infrastructure. The Engineering section is also responsible for review and approval of private development plans, utility permits, easements and permanent use of public right-of-way in the City.

FY 2006-2007 Objectives

- Spot sewer repair and sewer replacement project
- Street resurfacing program
- 50/50 sidewalk program
- Block curb & sidewalk program
- Watermain replacement project with street resurfacing
- Special Assessment Alley paving program
- Alley and Street Vacations, Dedications and Easements
- ADA ramps program
- McCormick Boulevard - Complete construction
- Main & Lee Street - Complete watermain installation project
- Complete an isolated signal upgrade project (TBD)
- Complete cul-de-sac construction identified through neighborhood traffic calming program
- Complete bi-annual bridge inspections

Ongoing Activity Measures	2004-2005 Actual	2005-2006 Actual	2006-2007 Projected

Division of Transportation

2630 – Traffic Engineering Administration

Description of Major Activities

This element manages and administers the operations of the division of Traffic Engineering, and performs engineering work to assist with the planning, implementation and monitoring of traffic engineering projects. Traffic counts are made and reviewed, signal timings are updated, and intersection control studies are performed. Traffic-related suggestions and requests, and complaints from citizens, Council members, police, and staff are investigated. This element also reviews plans to ensure that future developments have adequate access, circulation, loading, and parking. The City's Traffic Calming Program, a cooperative effort between citizens and staff to slow and reduce traffic in neighborhoods, is also administered by this element.

FY 2006-2007 Objectives

- Neighborhood Traffic Calming Program - To construct all traffic calming devices approved by the City Council through July of 2006 by October of 2006
- Continue maintaining accident data on the new Accident Information Management software program.
- Continue Traffic Count program
- Continue administration of Obstruction Permit process
- Central St./Gross Point Rd./Crawford Ave. signals and lights - Complete the signal and street upgrade upon timely approval by IDOT
- Central St./Girard Ave. and Central St./Ridge Ave. signals - Complete the signal upgrade pending IDOT and State Historic Preservation approval of decorative mast arms

Division of Transportation

2635 – Traffic Signs

Description of Major Activities

The Traffic Signs element has major activities in three areas: traffic signs, pavement markings, and special events. In the traffic signs area all regulatory, warning, and guide signs on the right-of-way are installed, maintained, replaced or removed as necessary. Also, decorative banners on street light poles are installed and removed according to guidelines approved by City Council.

In the pavement-marking area, paints and thermoplastic markings are applied to the pavement by City crews and by contractors under supervision by the City. This includes lane markings, centerlines, arrows, legends, and parking stalls.

Traffic control for special events is provided by this element, ranging from small events, such as block parties, to large events, such as Northwestern football games and the City's 4th of July festivities.

FY 2006-2007 Objectives

- To continue sign fabrication, installation, maintenance, and removal as needed
- To continue implementing a multi-year Citywide pavement-marking plan
- To continue to supply traffic control for special events

Ongoing Activity Measures	2004-2005 Actual	2005-2006 Actual	2006-2007 Projected
Signs removed	1,000	1,249	1,000
Signs repaired/replaced	1,540	1,462	1,600

Division of Transportation

2640 – Traffic Signals & Street Light Maintenance

Description of Major Activities

The Traffic Signals and Street Light Maintenance element performs routine maintenance and repairs and replaces all components of the signals and street light systems. Over 100 signals and over 6000 street lights are maintained. A major portion of the work is related to the JULIE system (Joint Utility Location Information for Excavators), which requires that we mark the location of underground cables for both the signal and street light systems for all excavations in the right-of-way. In the street light area, bulbs and ballasts are changed, knockdowns are repaired, and power centers are maintained.

FY 2006-2007 Objectives

- Paint and maintain street lights as required
- Maintain traffic signals as required
- Upgrade Tallmadge street lights with new QL lighting units
- Locate underground cable through the JULIE marking system

Ongoing Activity Measures	2004-2005 Actual	2005-2006 Actual	2006-2007 Projected

Division of Transportation

2645 – Parking Enforcement & Ticket Processing

Description of Major Activities

This element enforces parking ordinances throughout Evanston, including parking meter, time limited areas, permit lots, residential parking districts, "No Parking" zones, street cleaning, and local and state vehicle registrations. During FY2002-03, Parking Enforcement was expanded to cover the extended parking meter hours in the downtown and to enforce the nighttime street cleaning regulations. In addition, this program element is responsible for identifying and booting vehicles which owe the City for outstanding parking tickets. At the present time, Parking Enforcement officers are on-street 23 hours per day during the summer months, Monday - Saturday, and 22 hours all other months. The Parking Enforcement officers are brought back on Sunday evenings to enforce the "No Parking" zones along the lakefront.

Parking Enforcement officers provide traffic control during special events: including 6 NU football games, the July 4th parade and fireworks programs, NU homecoming, summer festivals, Farmer's Market, and First Night Evanston. Also, they provide traffic control and street closings during emergencies, such as fires, traffic accidents, and utility collapses.

Supervisory staff members in this program element also coordinate, train, and supervise the school crossing guard program.

This program element is also responsible for the management and maintenance of the City's parking ticket issuance and collections software, which services the Parking Enforcement program, the City Collector's Office, administrative hearings, and the parking system in collection of parking ticket fines and sales of permits and services throughout the City.

FY 2006-2007 Objectives

- Implement new ticket-writing equipment and software by 12/31/06.

Ongoing Activity Measures	2004-2005 Actual	2005-2006 Actual	2006-2007 Projected

2650 – School Crossing Guards

Description of Major Activities

School crossing guards are assigned to major intersections and heavy traffic areas to provide safe crossing of school children from one side of a street to the other. All employees in this division are seasonal.

FY 2006-2007 Objectives

- Initiate a contract with a traffic and safety engineer by August 31, 2006, to evaluate vehicular and pedestrian approaches to schools and develop short-range and long-range recommendations to improve safety for children walking to and from schools.

53615 – Special Pickup Fees	67,163	50,000	58,239	50,000
53650 – State Highway Maintenance	133,109	90,000	94,099	130,000
Total Revenues:	\$ 842,210	\$ 768,000	\$ 752,390	\$ 1,008,000

Notes for Financial Summary

Revenue for the residential recycling surcharge is proposed at a \$200,000 increase – the result of an increase in the recycling charge which will cover the actual cost of providing recycling pickup in the city.

Performance Report on FY 2005-2006 Major Program Objectives

Five more alleys were blacktopped as part of an experimental program focused on improving alley surface conditions at a lower cost. The alleys already completed in this program continue to hold up well. A 40-ton-per-hour snow melter was used in the winter of 2004-05, and a 60-ton-per-hour unit was purchased for use in upcoming winters. A request for proposals was issued for condominium garbage collection, with implementation of the new contract expected in early 2006. Conversion of unpaved alleys to recycled asphalt continued, which improves the surface conditions and reduces maintenance requirements.

2006-2007 Department Initiatives

- Begin a benchmarking effort in Streets and Sanitation to record the current activity measures which will allow us to improve the effectiveness and efficiency of our service delivery
- Evaluate the current recycling program and consider changing the size and collection technique of the bins, with the goal being an increase in the amount of diversion from the refuse stream

Streets and Sanitation

2665 – Streets & Sanitation Administration

Description of Major Activities

The administrative staff prepares work programs, analyzes service effectiveness, and monitors all Streets and Sanitation division functions, including street cleaning, street and alley maintenance, leaf collection, compost site compliance, snow removal operations, refuse and yard waste collection and monitoring contracts with private companies. Day to day supervision is provided, records are kept, and citizen contact is maintained.

FY 2006-2007 Objectives

- To hire a second full time office worker to increase level of customer service; position is split

Streets and Sanitation

2670 – Street & Alley Maintenance

Description of Major Activities

This program provides ongoing maintenance of paved streets and alleys. Pot holes are patched Citywide as needed. A permanent crew does the major asphalt street repairs and maintenance, repair work on the paved streets and alleys, utility openings, and curbs and sidewalks.

Each year, less than one mile of unimproved streets and forty-three miles of unimproved alleys are graded, patched and repaired. Most alleys have been changed from a crushed limestone surface to recycled asphalt, which is less expensive and holds up better in wet weather.

This element also performs leaf collection and maintains the City's compost site. All residential streets posted with alternate parking signs are cleaned at least twice during the leaf collection operation. This operation begins in mid-October and continues until the end of November. During the seven week period, streets requiring special posting are cleaned during the first two weeks of November. The leaves are collected and taken to the James Park composting facility for processing. Processing takes about six months and when completed, finished compost is made available to interested parties at no cost.

FY 2006-2007 Objectives

- Continued success with black topping alleys has convinced the division it is the best way to serve the public and maintain the cost of alley maintenance
- Concerns of creating a heat island and drainage issues point to the weaknesses in this approach; however, the long term cost and the frequency of maintenance are strengths not to be ignored
- It may be the time to have a serious discussion about the black topping of unpaved alleys as an alternative to the current practices

Ongoing Activity Measures	2004-2005 Actual	2005-2006 Actual	2006-2007 Projected
Cubic yards of concrete used for repairs	556	300	300

Streets and Sanitation
2675 – Street Cleaning

Description of Major Activities

Almost all paved streets in the City are cleaned on a twice-per-month basis approximately eight months of the year. All streets posted with alternate parking signs are cleaned on a schedule established by the City Council. Streets which require special posting for sweeping are cleaned four times per year. Areas of high usage, such as business districts, are swept as needed as part of regularly scheduled routes. Sidewalks in business districts, parking lots, and viaducts are cleaned with hand equipment by a permanent crew.

FY 2006-2007 Objectives

- It may be appropriate to reconsider the type of sweeper used by the division, as it may be more cost effective over time to adopt another style of sweeper. For example, the Pelican (Elgin) is being challenged by the advances in other design styles

Ongoing Activity Measures	2004-2005 Actual	2005-2006 Actual	2006-2007 Projected
Number of street sweepings on regular streets	18	18	18

2680 – Ice and Snow Removal

Description of Major Activities

Salt is spread on streets to prevent any accumulation of ice or minor amounts of snow. Streets are plowed to remove accumulations of snow of more than two inches in order to provide safe travel. Personnel involved in ice and snow control operations are budgeted in other Street Section program elements, other Public Works divisions, and other departments.

The City's snow removal goals are as follows:

- To clear snow routes within twelve hours
- To clear one lane of residential streets within twenty-four hours
- To clear the other lane of residential streets within forty-eight hours
- To remove snow from all municipal parking lots within five days after the initial snowfall

FY 2006-2007 Objectives

- Evaluate performance of recently purchased 60 ton-per-hour Snow Melter

Ongoing Activity Measures	2004-2005 Actual	2005-2006 Actual	2006-2007 Projected
Number of snow emergency days	4	2	4
Number of snow route parking bans	4	2	4

Total Expenditures:	\$ 477,981		\$ 598,000		\$ 543,678		\$ 591,600

Notes for Financial Summary

The FY 2007 budget represents a change in staffing for the Human Relations Commission. The Human Relations Specialist Position in this business unit has been reduced to a part-time position - resulting in a reduction of 0.5 FTE in this department. Funding may be provided as part of the Summer Youth Employment Program.

Performance Report on FY 2005-2006 Major Program Objectives

The executive director has returned, but one of two human relations specialist positions is vacant and has been for 7 months. Coupled with unanticipated expectations, a prioritization of objectives may not be addressed, are incomplete, or have been replaced by other objectives, this fiscal year.

An Equal Employment Opportunity Plan for the organization is in the process of being developed, as required by federal statutes. This serves to evaluate the utilization of women and minorities in each department by job classification, to proportionately represent our recruitment area and community.

Given the diversity of our community and work force, we introduced a diversity training program to the City's administrative/management/supervisory personnel. The program was well received.

The Summer Youth Employment Program was a success with 107 teens hired by the City and 53 hired by the private or public sector, some of whom participated in the 50/50 component. This year a team created a Public Service Announcement (PSA) regarding security deposits. This PSA will be aired on ECMC and posted on the City's website as an educational tool.

An amendment to the Residential Landlord and Tenant Ordinance allowing enforcement will be reintroduced, requiring landlords and/or tenants be cited for violating conditions of the ordinance and adjudicated internally.

It was determined that the ordinance creating the Human Relations Commission predated civil rights laws, e.g., Title VII. The current ordinance was believed to be dated, not necessarily addressing prevalent issues and concerns. We seek to create a document that ensures the rights of all and promotes acceptance, celebrating our diversity.

2006-2007 Department Initiatives

1. Given the positive outcome of the diversity training that was provided to administrative, managerial, and supervisory personnel, along with the suggestions/recommendations from those who participated, our objective will be to ensure that all 800+ employees receive diversity training.
2. The knowledge and skill base that will be learned will have a positive impact relative to interactions with customers/clients and co-workers.

City of Evanston

Human Relations

2705 – Human Relations Commission

Description of Major Activities

Human Relations provides services, programs, and activities to maintain the rich diversity of our community. We foster, encourage, and stimulate the improvement of human relations among and between citizens of all races, colors, creeds, national origins, sexes, ages, familial status, marital status, religions, physical/mental disabilities, sexual orientation, and economic and educational levels. The goal is to provide all individuals with an equal opportunity to grow, participate, and share in the City's economic, educational, political, social, and judicial systems. To this end, all of the commission's services, programs, and activities are administered through this element.

The department administers and enforces the Fair Housing Ordinance and the Residential Landlord and Tenant Ordinance and provides mediation services through our Neighborhood Justice Center/Alternative dispute resolution. The commission also investigates and/or refers allegations of civil rights violations and/or discrimination based on race, color, religion, sex, national origin, sexual orientation, familial status, physical/mental disability or age; conducts and/or coordinates training programs and community functions/activities; advises City administration, City Council, and the community on human relations issues; and serves as a resource on related issues. Department staff investigates and prepares responses to allegations of employment discrimination filed through the Illinois Department of Human Rights and/or the U. S. Equal Employment Opportunity Commission against the City by employees, or those attempting to become employees, and advises the City Manager on appropriate courses of action. Moreover, the commission monitors the workforce to ensure appropriate levels of minority and female representation, administers the City's sexual harassment program and investigates charges of sexual harassment, and serves as a resource to City employees on a wide range of issues.

FY 2006-2007 Objectives

- Provide diversity training for all 800+ employees by February 2007
- Provide sexual harassment training for all departments by February 2007
- Provide Equal Employment Opportunity plan training for all employees by February 2007

2710 – Housing Advocacy

Description of Major Activities

Housing, particularly affordable housing, has and will continue to present the City with some very difficult challenges. In an effort to maintain the diversity coveted by our residents, Housing seeks to eradicate discrimination and ensure landlords and tenants remain aware of their respective duties, rights, obligations, and remedies. To accomplish this goal, Housing assumes responsibility for the administration and enforcement of the Fair Housing Ordinance (FHO) and the Residential Landlord and Tenant Ordinance (RLTO).

The FHO prohibits discrimination in the sale or rental of residential property based on race, color, religion, sex, age, sexual orientation, marital status, disability, and familial status. The RLTO establishes rights, obligations, and remedies for property owners who rent or lease residential property, and for the tenants who lease or rent. To enforce and administer these ordinances, commission staff provides a myriad of services including, but not limited to, technical support, training, advocacy, investigation, mediation/conciliation, and arbitration.

Our services include assisting landlords and tenants in completing the required judicial forms to file civil actions pro se in the circuit court. Because the RLTO does not grant any specific authority to the commission to enforce its provisions, many tenants are intimidated by their landlords and the judicial system, and some mom-and-pop landlords do not understand their responsibilities and/or do not have the resources to exercise the available remedies. Though we are unable to provide legal representation, we will accompany the party to the appropriate venue and assist in the filing of the complaint.

To augment our advocacy, we work independently and as a part of a larger network, which includes other City departments, community groups/organizations, governmental agencies, elected officials and the like to address housing and housing-related issues, such as affordable housing, Housing Choice Voucher Program, and anti-social/criminal behaviors and perceptions.

FY 2006-2007 Objectives

- Rewrite the Fair Housing Ordinance and rules by February 2007

Ongoing Activity Measures	2004-2005 Actual	2005-2006 Actual	2006-2007 Projected
Fair housing complaints perfected and processed	1	3	3

2715 – Summer Youth Employment Program

Description of Major Activities

The Summer Youth Employment Program provides summer employment opportunities for Evanston youth, ages 14 through 18, who for a variety of reasons are unable to secure summer employment. Available jobs (both full-time and part-time) include community clean-up, maintenance, and departmental support. Community clean-up teams are assigned to pre-determined geographical areas throughout the community for a nine-week period. During this time, crew members assume responsibility for keeping the right of ways, traffic calming circles, cul-de-sacs, parks, and alleys free of debris. They also cut back excess vegetation in alleys to increase driver visibility and to reduce vehicular damage, e.g., broken side view mirrors, scratches, etc. In addition, program participants have also taken on the responsibility of scraping, priming, and painting traffic signal and street light poles.

A job fair is held to provide employers the opportunity to meet and interview prospective job seekers, and provide job seekers with an opportunity to learn more about available positions. The job fair typically attracts in excess of 400 job seekers.

In addition to providing employment opportunities with the City, a Mayor's initiative encouraging private-sector participation was implemented. The 50/50 Program provides businesses and public-sector employers with 50% of the minimum wage for the teens they hire.

FY 2006-2007 Objectives

- Identify and train a team of teens to educate summer campers about litter and its impact on the community by August 2006
- Identify and train a team of teens to collect information about agencies, and community groups, in tandem with Northwestern University, to develop a booklet for public consumption by August 2006

Ongoing Activity Measures	2004-2005 Actual	2005-2006 Actual	2006-2007 Projected
Number of participants who complete the program	114	104	100
Number of participants who participate in training	95	98	100
Number of alleys cleaned	204	150	165
Number of participating businesses	9	14	15
Traffic poles, lights and control boxes scraped, primed and painted	139	201	569
Youth served in 50/50 Program	17	53	60
Number of camps trained	0	0	25
Number of agencies interviewed	0	0	40

Notes for Financial Summary

The North Branch Rental Income has been eliminated in preparation for sale of the rental property.

Performance Report on FY 2005-2006 Major Program Objectives

- The migration from the DRA Classic Integrated Library System to the SIRSI Unicorn system operating in the Cooperative Computer Services' consortium environment occurred on Saturday, August 13th.
- The inventory of the North Branch collection, the children's fiction collection, and the Main Library Dewey numbers 100 – 500 did not take place this summer because the migration from one integrated library system to another made this work impossible. This work will be rescheduled for FY 06 – 07.
- The Library Board approved schematic designs for the Youth Services Renovation Project in July. The library is currently working its way through a value engineering process.
- Leadership for the Youth Service Renovation Project capital campaign is currently being selected and organized.
- The library received a \$200,000 construction grant from the Illinois State Library to be used in the Youth Services Renovation Project.
- The library continues to offer an ambitious schedule of juvenile and adult programs. Adult programs include the Reeltime Film and Video Forum, a collaboration with Northwestern University's Block Museum, that received grant funding from the Illinois Arts Council, the Illinois Humanities Council, and the Hugh M. Hefner Foundation this past year.

City of Evanston

Library Department

- The Children's Outreach program in 2005 reached children from infant to teen. Older students at Family Focus participated in staged readings of A Raisin in the Sun, and teen mothers with their infants attended musical storytimes right where they attended summer school. The outreach librarian brought poetry and storytelling to Dawes Elementary School after-care and to Washington Elementary School's before-care, where he won the School Community Award for his work. At Fleetwood-Jourdain, young volunteers processed and began circulating a children's lending library. Kindergarten Nation, a first-time concert for new kindergarteners, drew over a hundred attendees.
- The library completed the weeding and renovation of its social science collection in FY 05 – 06, funded in part by a Library Services and Technology Act grant.

2006-2007 Department Initiatives

The Major Library initiatives for FY2006-07 intended to improve customer service include:

1. The renovation of the Youth Services area of the Main Library
2. The renovation of both branch libraries
3. More timely processing of library materials
4. Extended evening hours at South Branch
5. Adequate development and maintenance of the Library's collections

Library

2805 – Children's Services

Description of Major Activities

Children's Services provides library services for all Evanston children (from infancy through junior high), parents, teachers and adults interested in reading books to children. It provides and maintains a collection of books, reference materials, magazines, pamphlets, CD's, audio and video cassettes, and software designed specifically for children. It provides assistance in using these collections, answers reference inquiries and provides programs and displays that complement the book collection and promote children's literature, library services, and literacy. The Children's Services collection comprises over 97,900 books and 7,500 audio-visual items.

FY 2006-2007 Objectives

- Provide literary, educational, and cultural programs for a combined audience of 20,000 children during FY 06-07.
- Establish 25,000-child book links in FY 06- 07.
- Answer at least 85% of reference questions to the satisfaction of Library patrons. To measure this performance with an exit survey to be conducted in April 2006.
- Visit all District 65 kindergarten classrooms as part of a kindergarten library card drive.
- Bring at least three weekly book-based programs for school-aged children to before- or after-school sites.

Ongoing Activity Measures	2004-2005 Actual	2005-2006 Actual	2006-2007 Projected
Circulation of materials	293,275	294,000	294,000

2810 – Reader's Services

Description of Major Activities

Reader's Services provides assistance to patrons in locating materials in the Library and in other resource centers; answers reader's advisory questions; promotes understanding and use of the Library through bibliographies, tours and displays; and selects all adult books and audio-visual materials for circulating collections. The Reader's Services Department responds to patron questions both in person and by telephone. The adult circulating collection comprises over 280,000 books and 18,000 audio-visual items.

FY 2006-2007 Objectives

- Answer at least 85% of reference questions to the satisfaction of Library patrons. To measure this performance with an exit survey to be conducted in April 2006.
- Make at least 70% of the titles that patrons search for immediately available when patrons visit the Library. To measure this performance with an exit survey to be conducted in April 2006.
- Fill 30% of reserves for adult materials within 7 days and 75% within 30 days and to measure the performance on this objective by collecting and reviewing data in October, 2007.
- Review 25% of the adult non-fiction collection for retention, replacement, and enhancement by February 2007.
- Provide the community with 100 high quality literary, educational, and cultural programs for a combined audience of 3,000 during FY 2006 – 07.

2815 – Reference Services & Periodicals

Description of Major Activities

Reference Services & Periodicals provides assistance to patrons in locating information and materials within the Evanston Public Library and from other sources; selects all materials for the reference collection; maintains a periodicals collection; responds to questions in person, by telephone and by written correspondence; and collects Evanston documents and materials. The reference collection consists of approximately 25,000 volumes, 30 on-line databases, and a large collection of clipping files and pamphlets. There are specialized collections on careers, grants and foundations, and small business. The periodicals collection consists of approximately 900 titles.

FY 2006-2007 Objectives

- Answer at least 85% of reference questions to the satisfaction of Library patrons. To measure this performance with an exit survey to be conducted in April 2006.
- Provide 80 classes on the use of the Internet and other electronic resources in FY 2006 – 07.
- Host at least 10 class or tutoring group tours or work sessions either in the Reference department or at local schools or tutoring centers.
- Have 30% of Library cardholders successfully use an online subscription product remotely.
- Give at least 10 presentations to community groups on the Library's reference resources.

2820 – Circulation

Description of Major Activities

The Circulation Department processes the borrowing and return of book and non-book materials; processes reserve items; re-shelves returned items; answers and routes incoming telephone calls; answers general and directional questions; explains library circulation policies to users; registers new patrons and keeps patron files current; sends reminders to patrons holding overdue materials; and collects fines and payment for lost items.

FY 2006-2007 Objectives

- Re-shelve all adult library materials within two day of their return.
- Keep the wait time for service at the Circulation Desk less than four minutes.
- Inventory the North Branch collection, the children's fiction collection, and the Main Library Dewey numbers 100 through 500.

Library

2825 – North Branch

Description of Major Activities

The North Branch, located 2026 Central Street, is an extension of the Main Library. It provides library service to the adjacent neighborhoods through a collection of popular materials, assistance in using the materials, programs, and displays for children and adults. It serves as a community center in a busy business district. The North Branch has a collection of over 38,000 books.

FY 2006-2007 Objectives

- To complete planning for branch capital improvements.
- Present four adult programs.
- Develop a bibliography of teen books for recreational reading and promote it at Haven Middle School.

Description of Major Activities

The South Branch, located at 949 Chicago Avenue, is an extension of the Main Library. It provides library service to the adjacent neighborhoods through a collection of popular materials, assistance in using the materials, programs, and displays for children and adults. The South Branch has a collection of over 29,000 books.

FY 2006-2007 Objectives

- To complete planning for branch capital improvements.
- Enhance juvenile audio book, DVD, and video collections and add feature length family DVDs in English and Spanish to the Branch's AV collection.
- Enhance the juvenile graphic novel collection and begin a graphic novel collection for adults.

Ongoing Activity Measures	2004-2005 Actual	2005-2006 Actual	2006-2007 Projected
Circulation of materials	41,319	43,000	43,000

Library

2835 – Technical Services

Description of Major Activities

Technical Services is responsible for the ordering, cataloging, classifying, recording and processing of all library materials given to or bought with the funds of the Evanston Public Library. It coordinates the annual addition of approximately 34,000 new volumes for the collection. It prepares and maintains computer databases for the recording of and access to the materials in the Library's collection. Technical Services is responsible for the proper operation and maintenance of all computer hardware and software for all of the Library's automated systems. The automated systems include the integrated on-line library system, the local area network, the Internet connection, and on-line databases.

FY 2006-2007 Objectives

- To catalog, process, and make available to Library patrons all library materials within 30 days of receipt.
- To have all automated library public and staff services available 99% of the hours that the Library is open and to have the integrated library system and the Evanston Information Server available 95% of the remaining hours of published availability.

Ongoing Activity Measures	2004-2005 Actual	2005-2006 Actual	2006-2007 Projected
Volumes added to the collections	34,576	31,000	36,000
Volumes withdrawn from the collections	16,076	16,000	18,000

2840 – Library Maintenance

Description of Major Activities

The Library's Maintenance Division provides for the maintenance and cleaning of the Main Library, the North Branch, and the South Branch. The Maintenance team inspects, maintains, and repairs all components of the Library facilities, including the electrical system, plumbing system, HVAC systems and controls, structural elements, and landscaping. In addition, the staff supervises outside contractors and assists with special programs and meeting room set-ups.

FY 2006-2007 Objectives

- Manage the first phase of the branch improvement program. To be completed by February, 2007.

Ongoing Activity Measures	2004-2005 Actual	2005-2006 Actual	2006-2007 Projected

Library

2845 – Library Administration

Description of Major Activities

The Administrative staff implements the policies of the Library Board and conducts all administrative, management and business activities of the Library. This element provides the direction, planning and evaluation for all library services, facilities, and fiscal management. Personnel administration and staff evaluation are primary activities. The administrative staff maintains relationships with community groups and other City departments. The Administration and other Library units work with numerous library-related groups in the area and throughout the State of Illinois.

FY 2006-2007 Objectives

- At least 90% of the Library's patrons will rate the courtesy and professionalism of Library staff members as "Very Good" or "Good" in an exit survey to be conducted in April 2006.
- Begin Youth Service Renovation Project construction.
- Facilitate and direct the Youth Service Renovation Project fundraising campaign.

Notes for Financial Summary

An addition al \$291,430 of deferred revenue was collected for FY 2005-06 related to programs in the Recreation Department.

City of Evanston

Recreation Department

Performance Report on FY 2005-2006 Major Program Objectives

Staff continues to identify, develop and submit grants for all five divisions. During FY 2005-06, the following grants were awarded: a Local Arts Agency Program grant from the Illinois Arts Council; a Community Arts Access grant from the Illinois Arts Council; a Summer Food Program grant from the U.S. Dept. of Agriculture through the Illinois State Board of Education; an Open Space Lands Acquisition & Development (OSLAD) grant to renovate Mason Park, from the Illinois Department of Natural Resources; and the Cons Vehicle Procurement Capital Assistance for a Levy Center bus, from the Illinois Department of Transportation.

A significant new Dutch elm disease prevention program was implemented. For further details, please refer the Forestry section.

Staff was trained on the AED machines, which were placed at each community and beach. Staff and the Law Department will continue to research insurance for the festivals. Increased participation in Evanston baseball programs as well as the increased need for field usage/maintenance was successfully accommodated.

In order to maximize the use of the new financial system, the Business division is in the process of reorganization and reengineering. The writing of new policies and procedures for the new financial system and RecTrac has begun. This entails upgrading the RecTrac system. Upgrading the WebTrac is being discussed. The Finance Department continues to implement recommendations.

In conjunction with Evanston Community Media Center, footage for a video promoting the Parks/Forestry and Recreation Department has begun in Communication Services. This project will continue in the following year.

General Support held quarterly meetings for full- and part-time maintenance staff at their individual centers. General Support is working with the Recreation Board to update the board's by-laws and policies. General Support has also revised training materials for all summer staff, eliminating duplicate items and adding further material concerning customer service. Staff also received training through outside sources, which included a speaker on West Nile virus.

On Saturday, November 13, 2005, the first Carnival Night was held at the Chandler-Newberger Center, with 288 in attendance. During the summer of 2005, the Center opened its gym for basketball, available thirteen times for men and twenty-six times for women.

Community outreach programs were conducted at the Fleetwood-Jourdain Community Center during the fall, spring and summer session, serving 55 youth per day. Activities included staff meetings with community and church groups to promote the summer camp and food programs; middle-school staff at middle school to promote "Books and Basketball;" and theme events, group discussions, and field trips. After-school programs increased focus on the theater program, introducing poetry, dramatizations, and creative writing activities and offered students an opportunity to showcase their talents during Kwanzaa and Black History Month. A new program, After School Parent Group, focused on adults, offering workshops on nutrition, health and wellness, with pot-luck meals, cards, and table games.

The theatre program at Fleetwood-Jourdain produced the annual Liturgical Dance Concert for Black History Month. "The Way the Spirit Moves You" featured the FJCC ensemble, comprised of young adults from several local church dance groups offering various areas of creative dance, presentation, and costuming. The concert's attendance was over 300.

At-Risk Opportunities received a grant from the Illinois State Board of Education in the amount of \$130,000 for the implementation of a 10-week Summer Lunch Program that operated at four park sites. Since Mason Park was under construction, staff opened a replacement site at Nicolas School. The program also offered limited recreational activities, including table games, arts and crafts, and movies. Throughout the year, participants took part in holiday programs and went on field trips to the movies, Philsan Community Center, and Little Village Art gallery in Chicago.

The Levy Center email management project was started September 2005 in order to communicate with participants regarding programs, events, and Center announcements. About 100 members receive one or two messages a month from the Levy Center. This list has served as an effective marketing method and a cost effective way to manage relationships with participants. Additionally, new strategic alliances with other agencies serving seniors such as houses of worship in the community, Apna Ghar, Northwestern University's Osher Lifelong Learning Institute, Evanston Skokie Valley Senior Services, Evanston Northwestern Hospital, Arthritis Foundation, the American Cancer Society, CEDA Neighbors at Work, Area Agency on Aging and Adult Education at Evanston Township High School have been established. These relationships have demonstrated cooperation, reciprocal support, and mutual assistance.

City of Evanston

Recreation Department

The dog beach was schedule to be cleaned following days of rain; however, due to low precipitation this summer, the beach was only cleaned five to six times. Since the attendance at other beaches was high, this became the first priority for cleaning; therefore, the dog beaches were not cleaned as often as desired. Preliminary research has been completed for the reconstruction of the Dempster Street Boat Storage facility. The Lifeguard Training Program, intended for the 2005 season, has been postponed until further research has been performed.

Recreation Facility Maintenance added ten tons of "turface" to James Park soccer, which improved drainage on the playing surface; sod was also replaced in the goal mouths of the soccer field; and the softball infield at Fleetwood-Jourdain was successfully renovated.

Two additional skating programs were created at the Robert Crown Ice Rink and, because of their success, will continue. Super Tots was added for skaters ages 3 to 5 who have passed the Tot Advanced Level as well as an Advanced Adults class for adults, in the Beta level or above, who want a daytime class. The Adult Men's Hockey Learn-to-Play Program replaced the co-ed hockey program. Weekly power skating clinics were added for all levels of hockey players. Open skate expanded its themes to include Halloween, Valentine's Day, and themes related to the Nutcracker prior to its Ice Show performance. These theme-skates included contests and raffles for free tickets to the Ice Show.

Sports Leagues now offer a list of softball schedules available through the City website. This site is updated with new information concerning change of games, times, and places as well as when games are cancelled or rescheduled. The Arbor Day 5-K was not replaced by the "fun run" as envisioned, but continuing efforts will look into having the event in the upcoming year.

Due to the overwhelming demand for Aquatics camp, an additional one-week mini session for children, a new adult camp, and a new parent/child camp were added. While the mini session was successful, staff hopes to increase next year's participation through earlier marketing efforts. The adult aquatics camp focused on participating in water sports while the parent/child camp allowed parents and children to spend time together while enjoying such activities as sailing, kayaking, canoeing, tubing, and water-skiing. The private sailing instruction and group kayak lessons exceeded all expectations while increasing awareness of the rental program. Kayak and sailboat rentals surpassed predictions by 20% and are expected to increase in the future.

The tennis program restructured the middle school tennis league to involve the Evanston middle schools. In total, there were forty-two participants from Baker Demonstration, Haven, Chute, Nichols, and King Lab, and were divided into five teams.

Special Recreation developed a social skills group for high-school aged children in response to parental requests. This group, Teen Club, was offered February through June, once every three weeks, from 6:30 to 9:00 PM. Approximately fifteen teens participated in a variety of activities including "getting to know you" interview sessions, creating banners and decorating the room, viewing ETHS performances, and baking cookies from scratch. Additionally, a Thursday evening basketball program was created with intentions of competing in the Special Olympics. The program manager visited special education classrooms providing services to Evanston residents to gain new ideas. To increase awareness, flyers are now being sent to Park School parents so that they have easier access to a list of Special Recreation programs.

Bus Program staff updated sections of the Bus Program Safety Information to make it more easily understood.

Park Rangers in the Park Service unit perform routine inspections of playgrounds recording damaged or broken equipment, benches, etc. to be reported to their supervisor.

In 2004, ten girls participated in the youth golf program and increased by 28 % to fourteen in 2005.

2006-2007 Department Initiatives

1. Continue to address the needs of the Robert Crown Center
2. Continue to work with District #65 in obtaining a City/School agreement a long-term lease for Foster Field
3. Continue to update the department's equipment inventory
4. Update the summer camp staff-training manuals
5. Implement on-line Recreation class registration using WebTrac

City of Evanston

Recreation

3005 – Management & Support

Description of Major Activities

The administrative division of Parks/Forestry and Recreation, together with the business office and the public information office, provides all management and administrative support services for all departmental divisions-- Parks/Forestry, Recreation, Ecology, Cultural Arts, and Citywide special events.

The administration division works to create a vision for Evanston's future. This is accomplished by long-range planning in collaboration with elected officials, City administrators, advisory boards and the general public.

The administration division provides the following services:

- Reviews the conditions of facilities and the relevancy of programs
- Investigates and resolves citizen's concerns
- Reviews, evaluates, and implements the Capital Improvement Program (CIP)
- Prepares general correspondence and reports
- Monitors affirmative action programs and overall budget activity
- Interviews and evaluates personnel
- Trains full and part-time staff and oversees staff training programs, including customer service and safety
- Prepares, coordinates, and submits grants
- Acts as liaison to all City Council committees
- Assists and coordinates all boards, commissions and councils within the department's responsibilities

Administrative staff implements policies approved by the governing body. Staff works with elected officials, appointed officials, and boards and commissions, including the Playground and Recreation Board, Arts Council, Public Art Committee, Public Place Names, Ladd Arboretum Committee, and the Evanston Environment Board. In addition, personnel work directly with various Recreation advisory boards, community groups and associations, all of which contribute input to the department.

In order to provide greater opportunities for citizens, cooperative arrangements are coordinated with school districts #65 and #202, the Metropolitan Water Reclamation District, Peter N. Jans Golf Board, and various community agencies. Interagency collaboration prevents duplication of services and broadens the number of programs, services and facilities available to the public.

The administration division's public information staff informs residents about programs offered by the Recreation, Cultural Arts and Ecology divisions, as well as those offered by local arts organizations, through "Arts + Recreation" magazine. Other promotional materials include press releases, flyers, advertising, and brochures. The Administration division also coordinates special events held within the City of Evanston.

FY 2006-2007 Objectives

- Complete the City/School agreement by March 2007
- Amend the Park and Lakefront ordinances by May 2006
- Continue to research and apply for grants and donations--ongoing
- Develop and implement a plan for affiliated shared field usage by October 2006
- Hold quarterly staff meetings with all managers, program managers, and supervisors--ongoing
- Implement WebTrac registration for the community by January 2007
- Continue to improve the RecTrac data base information--ongoing

3010 – Business & Fiscal Management

Description of Major Activities

The business office is responsible for the following activities:

- Auditing and recording revenues from fees and charges resulting from departmental activities
- Controlling and processing purchases and disbursements of both City and restricted account funds
- Maintaining financial records relative to both expenditures and revenues
- Performing bank account reconciliation and preparing journal entries and monthly reports for Finance Department review
- Preparing financial reports for Recreation board meetings and staff use
- Processing payroll for permanent and temporary staff
- Administering the RecTrac registration system
- Providing customer service to patrons who register for Recreation division programs at the Civic Center office
- Troubleshooting RecTrac system problems
- Providing technical assistance to staff

In conjunction with the director, the business manager coordinates the preparation and presentation of the budget and monitors budget performance.

FY 2006-2007 Objectives

- Complete the reorganization and reengineering of the business division by May 2006
- Complete WebTrac implementation and going online with the citizens by January 2007

Recreation

3015 – Communications & Marketing Services

Description of Major Activities

The Communications & Marketing Services office produces approximately 400 press releases annually and a wide variety of promotional materials for the Parks/Forestry and Recreation department, which includes four community centers, the Cultural Arts division, the Ecology Center, the Parks division, and the Forestry division. Promotional materials include fliers, posters, brochures, post cards, newsletters, banners, billboards, advertising, and public service announcements. Managers rely on the office for the layout, design and production of various program support materials, such as invitations, notices, tickets, programs and punch cards.

The department's major marketing tool is "Arts + Recreation" magazine, which is published quarterly and mailed to 31,000 residential households in Evanston (ZIP codes 60201 and 60202) and approximately 500 non-residents in the Recreation registration system. The magazine incorporates the department's classes, programs, and special events; class and special event listings from Evanston artists and arts organizations; feature stories; and maps, news, and general information. Partial funding comes from display advertising revenue and listing fees paid by independent arts organizations and Evanston residents who teach classes in the arts.

Other major promotional pieces produced by the Communications and Marketing staff are a 36-page summer camp guide promoting camps offered by the Recreation division, Ecology Center and Cultural Arts division, and a 12-panel pocket calendar promoting summer concerts and festivals.

Staff responds to requests for information from local media and the public, manages information to be posted on the City's website, coordinates and produces display and classified advertising for the department, and sells and produces display advertising for the magazine. They write, produce, and distribute a school newsletter (8,200 copies) six times a year; a monthly department newsletter; a monthly program narrative/activity summary; and various reports. Staff also assists in grant writing, taking photographs, and providing marketing and communications expertise during senior management team meetings.

FY 2006-2007 Objectives

- Following the RecTrac system's conversion to electronic program masters, to redesign magazine class listings to take advantage of the opportunity to reduce magazine key-stroking by at least fifty percent by May 2006
- Assist marketing analyst with accreditation project to be submitted to the Commission for Accreditation of Park and Recreation agencies, a major long-term project that will continue throughout fiscal year 2006-07 and into FY 2007-08

Recreation

3020 – Recreation General Support

Description of Major Activities

All Recreation administrative functions are part of Recreation General Support. This business unit includes the superintendent of recreation and a clerical staffer who are responsible for overseeing and developing Recreation programs offered in the community and for developing and implementing policies and procedures associated with use of those facilities and programs. Activities include:

- Evaluation of programs and facilities observations
- Staff training
- Applying for grants and other available funding sources
- Improving customer service
- Coordinating special events
- Providing permits to park rental groups
- Working with community groups, advisory boards, and the Recreation Board

The clerical staffer provides customer support services for the Recreation department as well as processes program registrations, scholarship requests, completes daily batch work, assists the center staff with RecTrac registration system questions, and provides clerical support.

FY 2006-2007 Objectives

- Update the field rental policy and procedures by September 2006
- Begin holding a quarterly meeting with the center managers in order to review and better coordinate upcoming program offerings by May 2006
- Develop an information manual for members of the Recreation Board by October 2006

Recreation

3030 – Robert Crown Community Center

Description of Major Activities

The Robert Crown Community Center provides comprehensive recreational activities for all ages. These activities are designed to serve residents with diverse interests, such as sports, art, hobbies, and preschool learning. Leisure activities are scheduled at convenient times for each age group. The community center continues to coordinate programs with those of the adjacent Ice Center facility. The Robert Crown Community Center's hours of operation are Monday thru Sunday, 9am till 11pm, to accommodate early and late rentals for various events, including volleyball and soccer in the early mornings, and private parties and room rentals for group meetings in the late evenings.

Regular private gym rentals include basketball 6 days a week, volleyball 3 days a week, soccer 3 days a week and cricket once a week. The karate program offers 16 introductory, 8 beginning, and 12 advanced classes annually. The center also offers 36 gymnastics classes per year. There is a large dance program containing 4 different types of dance: salsa, Chicago stepping, couples ballroom, and social dance. Salsa classes are held 12 times per year; Chicago stepping classes are offered 8 times per year; couples ballroom classes are offered 8 times per year; and social dance classes are offered 8 times per year.

There is a basketball league for 4th and 5th graders titled "4th & 5th Grade Boys' Basketball". Schools participating in the youth basketball program are:

- Baker Demonstration
- Bessie Rhodes Magnet School
- Dawes and Dewey
- King Lab and Kingsley
- Lincoln and Lincolnwood
- Oakton and Orrington
- Park and Pope John XXIII
- Roycemore
- Saint Athanasius, and
- Walker, Washington and Willard

The after school program coincides with the District #65 school schedule and provides after-school care for 40 children during the school year. This program also provides care for 20 District #65 children during school holidays and vacation periods, such as Spring Break and Christmas vacation.

FY 2006-2007 Objectives

- Increase the number of fitness participants by 5 by revamping the old aerobics fitness classes and replacing them with more up-to-date fitness workouts, such as cardio-kickboxing and Tae-bo classes, by fall 2006
- Create an open gym program on Sundays with an emphasis on middle school aged participants by fall 2006

Recreation

3035 – Chandler-Newberger Community Center

Description of Major Activities

Chandler-Newberger Community Center is open 4,000 hours per year offering comprehensive programs for infants through adults. Programs and activities facilitate positive self-development through learning skills and individual improvement. The 16,000-sq-foot facility also provides room, racquetball court and gymnasium rentals to community groups, youth birthday party groups and recreation enthusiasts. The center is also the central base for several large community-wide programs, including the indoor/outdoor tennis program (see 3110 tennis budget), school-based youth sports leagues and the indoor/outdoor volleyball program.

The Chandler-Newberger Summer Sports Camp is offered for children ages 5-12 years old in two 4-week sessions. It is the largest program conducted at the center. Almost 600 youth register for this program, which provides basic sports instruction in basketball, softball, flag football, soccer, floor hockey and other sports. Approximately 20-25 seasonal staff work at the sports camp. Other highlights of the camp include various field trips, including bowling, miniature golf, beach trips, camp "Olympics," rock climbing, and a field trip to Great America. Basketball camps are held during summer and winter break sessions for ages 7-14. Camps typically meet 2-3 hour a day for 4-5 days each.

Summer Sports Mini-camp is offered for 1-week sessions during the last three weeks of August. This program has over 300 registrants ages 5-12; the sessions are an extension of the Summer Sports Camp. Activities and trips include basketball, soccer, and field trips.

The gymnastics program is offered in the fall, winter, and spring. Each session offers classes for children age 18 mo. through 12 years. Various levels are offered, allowing children to advance from beginning to advanced levels. There are almost 500 registrations each year. The program also includes cheerleading and tumbling classes.

Camp Leahy is a preschool program for ages 3-5 years. It's offered for four 2-week sessions and one 1-week special session. Each summer 130 children participate in art projects, songs, games, and activities centered around the camp theme. Children take field trips to the beach and the library during 2-week sessions. Pee Wee Sports Camp will be offered mornings at Bent Park and afternoons at Leahy Park. Over 120 children ages 4-5 are introduced to the world of sports through games, fun activities and field trips to the beach and bowling. Winter Sports Camp is offered during the winter break session. Children ages 5-12 participate in sports activities and take a field trip. The Chandler-Newberger Youth Sports Program includes classes and activities for children in grades K-5 and ages 3-5. Classes are offered throughout the day for preschool-aged children and after school for school-aged children. Activities include basketball classes and leagues, soccer classes, and flag football classes. Programs for home-schooled children are also offered through the youth sports program. Yearly attendance is around 500 participants.

The center offers a variety of programs for children ages birth through 4 years old in conjunction with the Family Room, an Evanston-based private not-for-profit group. The popular drop-in play program, Time Together, offers families an environment to come and play with other families. The Preschool Program offers children ages 2-4 an opportunity to "learn through play." The I Can go to School 2 program offers children age 2 or 3 and their caregiver an opportunity to sing songs, play, and create in a supervised environment. Terrific Threes and Fabulous Fours offer a more traditional preschool program from fall to spring.

Chess Wizards, Inc. is a contracted vendor that conducts the various chess camps for children ages 5-12. Each camp is offered for one week. Chess is offered for children from beginning to intermediate levels.

The fencing program offers classes for beginners to advanced fencers to prepare for competition classes for adults and children. In addition to the many classes offered, a summer fencing camp is offered at the end of the summer for children in grades 4-7. In addition, several fencing tournaments are held at the center throughout the year.

The Youth Garage Sale is held on a Saturday every spring. The program offers children an opportunity to sell their gently-used toys and other unwanted items in a garage sale atmosphere.

The Chandler-Newberger Anniversary Party will celebrate the 25th anniversary of the current building. Games, activities, and other big events are planned, as well as prizes and keepsakes.

The City's Indoor and Beach Volleyball programs are all based at Chandler-Newberger. We will be in year two of a three year contract with Sports Endeavors, Inc. We have year-around programming, which includes adult classes and leagues, youth classes and leagues, and summer and winter break camps.

Recreation

3040 – Fleetwood-Jourdain Community Center

Description of Major Activities

Fleetwood-Jourdain programs are developed to encourage family participation in a wide variety of recreation, sports, fitness, dance, drama, special events, cultural programs and events, drop-in activities, and arts & crafts. Programs enhance participants' ability to learn through direct involvement, group participation, and intergenerational programs and activities. Participants maximize their use of leisure time through diverse programs tailored to special interests during the fall, winter, and spring.

An extensive nine-month after-school program offered during the school year for kids ages 5-12 is designed to meet the needs of working families. The program served 85 participants and provided bus transportation for 79 participants. After-school hours for middle school aged youth involved participants in the Tiger Woods Foundation, a program promoting community service; social skills development; and community leadership. For middle school aged girls, the Butterfly Project was offered to enhance self-esteem, personal skills, communication skills, and self-enrichment through creative arts and improvisation. The founder and author presented a lecture about the inspiration that led to the development of the program, explained its benefits to the community, and gave an award to each participant. Middle school programs serve 70 participants daily throughout the school year.

A 10-week camp program is offered in the summer, providing 171 youth with rewarding recreational opportunities through programs, activities, special events, music, drama, and dance. Offered were weekly field trips to Chicagoland sports, recreational, educational, and cultural facilities and institutions. The spring and summer youth basketball programs and leagues for school aged youth served 374 participants, with the high school basketball program serving 155 participants.

Special themed events, cultural programs and events, musical concerts and dance performances served over 4,000 participants. The language program in Spanish and French served 18 participants and will be incorporated into the after-school program. The center is also the site of Senior Nutrition Network, a federally funded program that provides hot, home-style nutritional lunches for approximately 20 seniors, and home delivery for over 100 home-bound seniors every day. In addition to the numerous programs sponsored by the department, the center also accommodates community groups such as Community Awareness Block Club, Foster Neighbors, and VWF. Program space and staff support is also provided for affiliate organizations such as FAAM, COE-POPS/MOMS, Junior Wildkits, and AYSO.

Fleetwood-Jourdain coordinates and implements the annual Black History Month program, Kwanzaa, and the Dr. Martin L. King, Jr. Birthday Community Celebration. The staff also manages offsite operations for summer drop-in programs at Mason and Clyde-Brummel parks, and oversees the coordination, implementation, and management of the Illinois State Board of Education Summer Lunch Program and four park sites.

FY 2006-2007 Objectives

- Implement a long-range program development plan addressing needs of challenged youth and families by January 2007
- Restructure Fitness Center memberships to include Families-Partners-Teams and promote the benefits of fitness and wholesome lifestyles by February 2007
- Develop a social recreation program for young adults promoting positive community participation and recreational leadership by September 2006

Recreation

3045 – Fleetwood-Jourdain Theater

Description of Major Activities

Fleetwood-Jourdain Theatre programs increase community awareness of the performing arts. The theatre presents shows relevant to the community, which enables a better understanding of the community. The program showcases outstanding talent in our area and fosters a sense of pride and enthusiasm. The Evanston Children's Theatre program produces three productions--classical musicals, fairy tales, and adaptations. Participants are involved in acting, singing, costume assistance, lighting, and set decoration.

FY 2006-2007 Objectives

- Restructure Adult Theatre program to accommodate the new space at Noyes Cultural Center Room 107, focusing on theatre classes, workshops, seminars, and playreading and improvisation techniques by October 2006
- Provide workshops in performance techniques, stage presence, voice and diction for youth, adults, and older citizens by November 2006
- Showcase spoken-word artists, comedians, readers' theatre, and one-act plays by January 2007
- Provide professional theatre and dance troupe performances for Black History Month celebrations by February 2007

3050 – Recreation Outreach Programs

Description of Major Activities

At-risk programs are structured to increase participation of grade and high school youth and young adults in need of non-traditional leisure services. Programs and services offered in this element are free to the participant(s) and offered at various recreation centers, including Fleetwood-Jordain, Mason, Robert Crown, Clyde/Brummel Park, and other locations throughout the community. The program choices are designed to create alternatives in lifestyle, better self-image, and ultimately a better quality of life.

Recreational and sports activities are held at the lakefront and at Elks, James, Robert Crown, and Mason Park. The Summer Food Program provides nearly 1,000 nutritional meals per day to Evanston youth at four sites:

- Fleetwood-Jourdain
- Mason Park
- Robert Crown
- Elks Park* (a Ridgeville Park District Park)

FY 2005-2006 Objectives

- Submit an application for a reimbursable grant from the Illinois State Board of Education for a summer lunch program to serve five sites: Fleetwood-Jourdain, Mason Park, Robert Crown, and Elks Park. The program will serve 40,000 lunches over a 10-week period by August 2005

Recreation

3055 – Levy Center

Description of Major Activities

The Levy Senior Center primarily serves senior citizens and continues to be an important resource used by older adults in the community to socialize, meet people, and make new friends. The center offers an opportunity for seniors to participate in recreational, educational, safety, and health and fitness programs. The center is open Monday through Friday, from 7:30am to 9:00pm, and Saturday and Sunday, from 9:00am to 2:00pm, for older adults age 55+ and to other ages in the early morning hours, in the evenings and on weekends. The center offers lunch and free transportation to and from the center each weekday.

The Levy Senior Center computer lab is utilized to teach and enhance participants' computer skills and is open to Levy members and the general public during non-class hours. The library offers a quiet space for those wanting to meditate and/or read. The game room boasts two pool tables, a shuffleboard table and dart board. This is a popular place for physically-active seniors who want to socialize and partake in some friendly competition. The gym/auditorium is a grand space used for basketball, volleyball, shuffleboard, badminton, music and dance programs, and exercise classes. The center's program offerings include theme parties, holiday gatherings, day and long-distance trips, arts & craft classes, card games, dance classes, woodcarving, writing workshops, social groups and more. The health & wellness classes and the fitness room are popular with people over age 18 and seniors alike. A nurse from the Health & Human Services department, a senior crime prevention officer from the police department, and a social worker operate from the health screening room to provide information and referral on a variety of issues affecting older adults.

The Hulda B. and Maurice L. Rothschild Garden, located in the center's courtyard, is a source of pride for the garden club members who assist in its maintenance. Classes and special events are held in the courtyard. The Levy Center's building and courtyard are also popular as a meeting and rental space in Evanston.

Weekend and evening hours allow for additional activities at the center for all ages. For adults, there are a variety of fitness classes, Spanish classes, computer classes, crafts, woodcarving, line dance classes, etc. Currently, martial arts classes for young children and adults have played a role at the Levy Center during evening hours.

FY 2006-2007 Objectives

- Develop a marketing strategy to increase participation in all facility programs by 10% by June 2006
- Develop 5-10 evening and weekend programs specifically geared for people 55-65 years old, in order to address the recreational needs of the working Baby Boomer generation, by December 2006
- Continue to seek partnerships with similar agencies to increase awareness of the Levy Center, increase memberships, and maintain good public relations

3065 – Church Street Boat Ramp

Description of Major Activities

The Church Street Boat Ramp is located at Church Street on the lake. The boat ramp provides Evanston residents and non-residents an opportunity to launch motorized boats (15'- 22'), sailing vessels too large for the Dempster St. facility, and personal water craft (jet-skis) in Lake Michigan. The facility consists of two ramps and a parking facility, open (weather permitting) May 1 through October 31. The boat ramp and Dog Beach are staffed by two employees from 7:00 AM to 8:00 PM during weekends in May, 7 days a week between Memorial Day and Labor Day, and weekends from Labor Day until October 31. The boat ramp is also used to launch the Aquatic Camp boats and to harbor Rescue Boat EL-1 during hours of beach operation. The boat ramp offers seasonal permits for residents and non-residents as well as one-day special event permits on the 4th of July and during the Venetian Night and Air and Water Show weekends. This is the only drop-in launch offered between Montrose Harbor (in Chicago) and Tower Road in Winnetka.

The Dog Beach is a 150 yard stretch of beach east of the Church Street parking lot permitting Evanston residents and non-residents the opportunity to allow their dogs to swim and play on the beach. Dog Beach is open during the same hours as the boat ramp and share staff with the boat ramp. Only seasonal permits are allowed at this beach.

FY 2006-2007 Objectives

- Re-evaluate the staffing and supervision of the boat ramp in an effort to better supervise the area by May 2006
- Increase the number of times Dog Beach is cleaned from once to twice a week beginning May 2006
- Consider alternatives for dredging the Church Street boat launch by April 2006

Ongoing Activity Measures	2004-2005 Actual	2005-2006 Actual	2006-2007 Projected

3075 – Boat Storage Facility

Description of Major Activities

The Dempster Storage/Launch Facility provides 209 racks for storage of small sailboats and kayaks, with allocated beach space for 15 double hull crafts (Hobie Cats) and additional storage space for 30 sailboards. This facility also provides winter storage for up to 30 appropriate-sized vessels. The large sandy beach provides an excellent area for any boater having purchased a Dempster Street boat launch permit.

This facility is open for use from May through October. During the swimming season, staff is on duty seven days a week, monitoring the entry points and assisting boaters as needed.

This program enables Evanston residents to store and launch their carry-in boats, helping to give them an all-around lakefront experience.

FY 2006-2007 Objectives

- Begin the planning/redesign of the boat storage and locker facilities by winter 2006, with work starting in the spring of 2007
- Increase awareness of the boat launching facility through the rental program by Sept. 2006

3080 – Beaches

Description of Major Activities

The Dempster Street Beach office collects all revenue generated by the lakefront, including all seasonal and daily beach entrance fees, both Dempster and Church launch facility fees, and all lakefront area picnic reservation fees, from May through Labor Day. The Dempster St. Beach office serves as the base of operations for all lakefront staff, including approximately 60 lifeguards, 15 beach managers, 6 assistant beach managers, 8 Aquatic Camp counselors, 1 Aquatic Camp director, 4 sailing instructors, 1 sailing coordinator, 20 gate attendants, and 3 office staff. Before their shift, all lakefront staff report to the office to punch in and be assigned duties. The guard room is utilized in the training of all the staff and as a classroom for the Aquatics Camp participants on bad weather days. The garage area is utilized by the service crew as a headquarters.

The service crew works under the umbrella of the recreation maintenance supervisor. The crew works 7 days per week, May through mid-September. Pre-season (before the beaches open) duties include putting up snow fences and guard chairs; moving equipment from storage to the beaches, and boats stored for patrons over the winter to the racks; and getting the picnic areas ready for use. Seasonal duties include opening and cleaning lakefront bathrooms, launching and retrieving of City boats, repair beach fencing, and picking up litter in the lakefront parks. They also perform routine general maintenance along the lakefront, such as sign replacement. After the beaches close on Labor Day, the service crew readies the beaches for winter months by moving snow fencing to reduce the build up of blowing sand; moving all guard chairs to the beach entrances and equipment into winter storage; and putting up closed signs. They also move the 30 boats belonging to individuals renting winter-storage space to the Dempster Street garage, which also serves as a storage area for two Aquatic Camp boats. In the winter, the garage area is utilized to store patrons' sailboats for a fee.

FY 2006-2007 Objectives

- Develop an off-season lifeguard training program by December 2006
- Continue developing the lifeguard manual by adding sections for sailing and boater distress by May 2006
- Develop a program to promote swim lessons at other Evanston institutions by May 2006

3085 – Recreation Facility Maintenance

Description of Major Activities

This maintenance service ensures the efficient operation of our recreation programs and facilities. Services provided include: maintenance of five public swimming beaches, Dog Beach, Greenwood Sailboard Beach, and Dempster Street Sailing Beach

Seasonal jobs performed include:

- Daily cleaning of the sand and collecting daily water samples and weekend tests
- Launching aquatic camp boats and boat rack repairs
- Cleaning 14 lakefront bathrooms and 14 park bathrooms
- Litter pickup and graffiti removal throughout the park system

Field maintenance of 23 soccer fields, four football fields, and 18 baseball fields is also provided 9 months of the year. Maintenance includes seeding, aerating, fertilizing, dragging and lining. During the summer months, two staff are dedicated to daily work on these fields. Custodial services are also provided to seven park shelters and seven lakefront buildings used for programs and activities and include bathroom cleaning, mopping, sweeping and litter pickup. Major cleaning, painting, and minor carpentry, pick-up/deliveries are provided to our six Parks/Forestry and Recreation buildings.

Five natural ice rinks are maintained during the winter months. Snow removal is provided for parkways, sidewalks, and parking lots for all recreation buildings and the Civic Center. There is close cooperation with the EBSA (Evanston Baseball and Softball Association) with its 1,200 players; ESA (Evanston Soccer Association) with its 450 players; Evanston AYSO with its 1,300 players; and the Junior Wildkit program with its 110 players. We assist these organizations in conducting their programs which include dragging and lining baseball fields at Evanston Township High School for the EBSA games.

FY 2006-2007 Objectives

- Begin replacing old soccer goals throughout the city beginning with the set on James # 3 by May 31, 2006
- Begin replacing irrigation heads on soccer fields starting with those at Lovelace Park (\$3,700 per field)
- Clean up the entrance at Greenwood Beach by removing the rip rap, grading down the sand, and replacing the rip rap by May 1, 2006
- Improve soccer field with 10 tons of Turface (a soil amendment) on field # 2 at James Park by August 31, 2006
- Determine a method to correct and prevent water from entering the batting cages at James Park by June 1, 2006
- Evaluate and develop a plan to improve turf conditions at the main football field at Crown Park by August 1, 2006
- Plant and maintain flower beds behind Dempster Street beach office to enhance the area by May 1, 2006

Recreation

3095 – Robert Crown Ice Rink

Description of Major Activities

The Robert Crown Ice Rink serves the community by providing comprehensive year-round ice related programs. The building is open daily from 5:30 a.m. until 11:00 p.m. and provides 168 hours of ice time per week. Staff strives to maintain a high quality indoor iceskating facility at a competitive fee rate. Participants of all ages and abilities, as well as a broad spectrum of special-interest groups are served by the various recreation programs. The services and facilities of the Robert Crown Ice Rink and Robert Crown Community Center are structured to complement each other.

The Figure Skating School provides skating programs for over 600 participants ages 2 through adult. On-ice class offerings include: Tot Learn to Skate, Child and Teen Learn to Skate, Adult Learn to Skate, advanced skating for child through adult, competitive skating, Ice Dance, and synchronized skating. Practice ice for tots through advanced competitive skaters is also offered. Skating school off-ice classes include: ballet for skaters, pilates, conditioning, and off-ice jump techniques. The skating school also produces two ice shows and offers one competition per year.

The Hockey Program, which is run by the hockey director working 30 hours per week, provides both Learn to Play hockey classes and competitive leagues. There are 120 players in house-league hockey and 30 participants in learn-to-play hockey classes. House-league hockey programs skate nine hours per week. The Evanston Youth Hockey Association skates 21 hours per week and has eight competitive league hockey teams with a total of 120 participants. In addition, adult open hockey is offered 8 1/2 hours during the week. Chicagoland Metro North High School Hockey League rents 30 hours of ice per year. The Tigers Women's Hockey program has 6 teams with 12 players on each. They rent 60 hours of ice per year. The Broomball program provides league play on the studio rink with 12 teams of 9 players each. Evanston Speed Skating Club skates at Robert Crown Center twice a week and also hosts a speedskating competition each spring. All skaters are welcome to participate.

Public skating is offered 12 times per week for a total of 18 hours to people of all ages and abilities. Both figure and hockey rental skates are available during public skating times. Many individuals and private groups rent ice time on both the main and studio rink for private use. School groups, including ETHS, skate at Robert Crown during the winter months as part of their physical education class curriculum.

FY 2006-2007 Objectives

- Further develop and expand the Ice Dance program through one additional class and 2 additional practice sessions by Winter 2006
- Continue to market the Skating School by offering learn to skate drop-in classes during selected public skating times. Once the participants are interested in skating, we can then promote our weekly skating classes by Summer 2006
- Continue to market the Adult Men's Hockey existing drop-in program and develop it into a non-competitive league of 10 teams by Winter 2006
- Continue to offer different themes for Open Skate during specific holidays such as Valentine's Day, Halloween, Sweetest Day and President's Day.

Recreation

3100 – Sports Leagues

Description of Major Activities

Activities contained in this business unit include the adult softball leagues, outdoor ice rinks, and security for snow day at the James Park hill.

The Recreation Division offers Adult softball leagues twice per year: our spring/summer leagues (April-July) and our fall leagues (August-October). We offer leagues for Men's 12", Women's 14", and co-ed mushball teams. All games are played on the two lighted diamonds at Robert Crown Park.

In our 2005 leagues we had 30 Men's summer 12" teams, 11 co-ed mushball teams, four Women's 14" teams, 18 Men's fall 12" teams, and six co-ed mushball teams. Each team has an average of 15 players on its roster (1,035 total).

Outdoor ice rinks are located at the Dawes Park Lagoon, Ackerman Park, Baker Park, and Larimer Park. Recreation Maintenance and Parks Division staff begin making ice (weather permitting) in late December. The outdoor ice rink season runs from the District #65 winter break thru mid-February (when temperatures are too warm to maintain good ice). This program gives Evanston residents the opportunity to skate in neighborhood outdoor rinks, in addition to the indoor rink at Robert Crown Center.

The ice rink attendants open and close the warming houses and bathrooms located at each outdoor rink. During their shift they monitor ice conditions to ensure that the ice is safe for the skaters. If during their shift the ice becomes unsafe, they will close the rink. They also monitor the area, making sure the skaters are following the rules and regulations.

The softball coordinator is responsible for the nightly managing of the adult softball programs. Duties include setting up the fields, collecting scorecards and maintaining the league standings. The softball coordinator is responsible for the calling off of games due to heavy rain, lighting or unsafe playing conditions. They are also responsible for re-scheduling games. The softball coordinator is the front line staff member responsible for customer relations with the teams/players participating in our leagues. Softball programs and outdoor skating give residents the opportunity to be involved in community recreation activities.

This business unit also includes funding for a private security firm that will be hired to provide personnel at the James Park hill on snow days. Security personnel will be responsible for informing sledders that the middle section and back of the hill is closed on days that snow is covering the hill's surface.

FY 2006-2007 Objectives

- Offer a senior softball program for players age 50 and over, with a drop-in program on Sunday nights beginning in June of 2006
- Establish a senior softball league by June 2007

Ongoing Activity Measures	2004-2005 Actual	2005-2006 Actual	2006-2007 Projected
Adult softball teams (summer & fall)	69	69	69
Outdoor ice rinks	4	4	4

City of Evanston

Recreation

3105 –Aquatic Camp

Description of Major Activities

The Aquatics Camp program is offered to youths age 8-13 and consists of two 4-week sessions (Monday through Friday), with a morning and afternoon group (88 participants per group) in each session (4 groups total). There is a counselor to camper ratio of 1:11 and all Aquatic Camp counselors are lifeguards with certifications in Lifeguarding, CPR for the Professional Rescuer, AED's, and have worked for the City of Evanston as lifeguards for at least one year. Each year there is typically a waiting list comprised of over 70 people for all of the groups combined. Aquatic Camp activities include swimming, water skiing, sailing, canoeing, and kayaking. In addition to water activities, campers participate in land-related activities such as kickball, volleyball, special event days, and other games and contests. There is also a Parents' Night for every group where the parents participate in the aquatic fun.

The Aqua Action Camp was developed in 2005 to provide an opportunity for parents to experience aquatic activities with their children. Just like in Aquatic Camp, parents can sail, water ski, tube, canoe, and kayak with their children. This camp was conceived by watching the experience that the Aquatic Camp parents had during Parents' Night.

The Adult Aquatic Adventures Camp was developed in 2005 to provide the adults with the Aquatic Camp experience. This program offers the same skill set as the Aquatics Camp, but it is for adults who want to enjoy this activity without the children.

Sailing private lessons and kayak group lessons were developed in 2005 and provides an opportunity for the City's citizens to learn how to sail and paddle from highly skilled instructors. This program increased our ability to better monitor the sailors and kayakers that launch from the Dempster Street Beach.

FY 2006-2007 Objectives

- Increase participation in the new Parent/Child AquaAction Camp and the new Adult Aquatic Adventures class by 30 people by including them in the 2006 Summer Camp Guide, offering two 4-week sessions, as opposed to the one 6-week session offered in 2005
- Introduce the new Teen Aquatic (evening) Camp, which will allow teens an opportunity to continue the Aquatic Camp experience, by May 2006
- Increase the number of boat rentals and private lessons by 15% by better incorporating programs in pre-season advertisements and press releases
- Begin incorporating the Barnett 1400 sailboats into the Aquatic Camp program by 2007

Ongoing Activity Measures	2004-2005 Actual	2005-2006 Actual	2006-2007 Projected
Aquatic Camp revenue	\$95,020	\$100,700	\$113,275

City of Evanston

Recreation

3110 – Tennis

Description of Major Activities

The City-wide tennis program based at the Chandler-Newberger Center, is described as a “grass roots” recreation/park instructional program conducted in public facilities throughout Evanston. Programs include participants age 3 and up and encompass all playing levels. The year-around tennis program is conducted primarily on the major tennis court sites in Evanston, including James Park, Robert Crown Park, Leahy Park, and Lovelace Park for the outdoor season (April-October), and in the Fieldhouse at ETHS during the indoor season (November-March).

Summer camps bring in a considerable portion of the total attendance and revenue for the program. There are 5 different summer camps for kids and 1 adult summer camp. In 2005, we successfully targeted pee wee (age 5-7) and junior (age 7-8) players with two new camps attracting a total of 88 separate registrations. The total gross revenue for summer camps in 2005 was \$60,271 with 349 total registrations. Our non-camp programs include adult and youth classes, adult and youth leagues, free clinics, special focus clinics/classes, private and semi-private lessons, winter-break “camps” and community/outreach programs. Classes are offered year-around for both adults and kids and are the core of the program. There are 7 total sessions each 6-8 weeks long. Adult classes are 1.5 hours long, and youth classes vary from 45 minutes to 1.5 hours depending on age and ability level.

In 2005, we restructured and focused on expanding the middle school spring league. Success was achieved by drawing 42 participants from Evanston schools. Our goal for 2006-2007 is to continue to increase this program from 5 to 7 teams and also recruit more adult volunteers to assist with that program and other community tennis programs.

We also a good inaugural year for our free lesson program. This program ran in the summer and we offered 2 concurrent 7-week sessions of free classes at James Park. They drew a consistent turnout of over 40 people per week. This program included both youth (starting at 4 years) and adults and included several couples and families. In 2006-2007 we will combine this program with our youth community program, which targets kids considered (by their teachers) to be “at risk”. Goals for this program are two-fold: introduce tennis to people of all ages who might not otherwise consider it an option, and get kids involved in tennis as an outlet for stress and a road to healthful, lifelong sports participation. One of the key goals for the 06-07 budget year is to grow this program by recruiting more volunteers from the community to help teach.

The contract with our current tennis vendor expires in October 2006. If we do not renew with this vendor we may either have a new contracted vendor or we may conduct the program in-house at that time. Overall, the City-wide tennis program has doubled in size every seven years since 1992.

FY 2006-2007 Objectives

- Recruit 8 volunteers to assist with tennis instruction in the community/free lesson program area through Evanston Community Tennis Association, other tennis groups and individuals by August 2006
- Increase attendance in the middle school tennis league from five to seven school teams by May 2006
- Market the indoor tennis program by having tennis staff contact at least 100 former indoor/outdoor tennis participants by November 2006

Ongoing Activity Measures	2004-2005 Actual	2005-2006 Actual	2006-2007 Projected
Adult outdoor lesson/league participants	347	345	350
Youth outdoor lesson/league participants	231	200	200

3125 – Drum and Bugle Corps

Description of Major Activities

The Drum and Bugle Corps allows Evanston youth to participate in an organized free band. The youth also have an opportunity to advance to local High School music programs. The band performs in local parades and state and national competitions.

FY 2006-2007 Objectives

- Youth will receive instruction on how to read and play music at an intermediate level, which will allow advancement in the level of competition
- Transition the drum corps into a dual musical program that includes military and contemporary instrumental presentations

Ongoing Activity Measures	2004-2005 Actual	2005-2006 Actual	2006-2007 Projected

Recreation

3130 – Special Recreation Programs

Description of Major Activities

Through the Evanston Recreation Division, Special Recreation offers specialized recreational programming for individuals, starting at 3 years old through adulthood, who have varying degrees of sensory, physical and/or developmental disabilities. Depending on the type or severity of a disability, staff-to-participant ratios can range from 1:4 to 1:1. The low staff-to-participant ratio ensures participant safety and allows for greater staff-provided assistance so participants have a more active role during programs. Participants enrolling in Special Recreation programs come from homes both inside and outside the Evanston city limits. 189 different families have participated in Special Recreation programs during the 2005-06 fiscal year, enrolling approximately 720 individuals. Of the 189 unique families, 50 live in residential homes where they require constant supervision to meet their basic needs. 76 percent of the families enrolling in Special Recreation programs are residents of Evanston.

Programs such as swimming, bowling, the arts, athletics, after-school activities, special events, and Special Olympics competition are offered during the year. A One-Day Camp program is offered during the summer in conjunction with District #65 programs for special-education students. A mini-day camp program is offered during the month of August as a recreational opportunity prior to the start of the District #65 school year. Special Recreation programs are held at the following sites in Evanston throughout the year: Robert Crown, Fleetwood-Jourdain, Levy Center, Chandler-Newberger, Park School, Ecology Center, and Lovelace Park.

Youth Programs:

- Drama and Music Therapy
- Ecology Program
- After-School Swim
- Cooking Program
- Fitness Training
- Special Olympics Track and Field, Aquatics and Bowling Training including Area, District and State Competition
- Park Camp, Camp REAL, and Family Camp Weekend
- Special Events- Weekend full day trips
- Basketball
- Teen Club

Adult Programs:

- Recreational Swimming
- Fitness Training
- Special Olympics Bowling, Track and Field, and Aquatic Training including Area, District, and State competition
- Special Events-Weekend full-day trips
- Family Camp Weekend
- Gadabout activities, cooking and craft programs
- Basketball

The Inclusion program provides supportive services to qualified individuals with disabilities to assure equal access to all recreation programs offered through the City of Evanston Parks/Forestry and Recreation Division in the least restrictive and appropriate environment as required by the Americans with Disabilities Act (ADA). Services must be available to any qualified individual with a disability under Title II of the ADA. All public entities must take actions to assure that reasonable accommodations are available.

Some of the accommodations provided by our program include:

- Sign language interpreters for children with hearing impairments to attend ecology-based summer camps
- Inclusion aides for children in after-school programs, summer camps, gymnastics, hockey, figure skating, pre-school programs, holiday programming (SHAG), winter break and Spring Break camps

Recreation

3130 – Special Recreation Programs

- Training of staff in behavior management, disability awareness, ADA, administration of medication (epinephrine) and peer relationships
- Adaptation of equipment and supplies
- Group goals and expectations
- Family consultations and resources

FY 2006-2007 Objectives

- To increase program enrollment for all programs, especially for special events, by 3% in Special Recreation by June 2006
- Increase summer program offerings by 3% in Special Recreation by June 2006
- Use Special Recreation funding to provide scholarships to individuals who require fee assistance but are not eligible according to City guidelines beginning January 2007
- Provide staff training to all summer camp programs at each camp site in the Inclusion program, to identify camp inclusion needs, at least 2 times per summer by August, 2006
- Expand training offered to staff in the Inclusion program to include epinephrine in emergency situations and put into effect food/allergy action form by July, 2006
- Establish a universal medication protocol in the Inclusion program to be utilized by all centers/summer camps by May, 2006
- Develop an on-call list of staff available to work inclusion issues as they arise throughout the school year by December, 2006

Recreation

3140 – Bus Program

Description of Major Activities

The Recreation Division provides after-school bus transportation from District #65 schools to the community centers. This program serves children who would be unable to participate in after-school activities and who would, in some cases, return to an empty home due to lack of transportation. There is a minimum charge of \$20.00 per child per month for this service. There are a total of three buses used for this program: two recreation buses and, on occasion, the Levy Senior center bus. The 8-passenger rec van is on standby mode in case unforeseen mechanical problems arise.

Each vehicle is subject to an interior and exterior inspection before use by the driver, who immediately reports any problems found to superiors. There are approximately 90 children between the ages of 5-12 years currently using this program on a weekly basis throughout the entire school year. The buses make stops at Fleetwood-Jourdain Community Center, Chandler-Newberger Center, and Robert Crown Center every weekday during the school year. Participating schools are:

- Dr. Bessie Rhodes Magnet School
- Dawes
- Dewey
- King Lab
- Kingsley
- Lincoln
- Lincolnwood
- Oakton
- Orrington
- Walker
- Washington
- Willard

The buses are also used during the City of Evanston Ethnic Arts Festival and the Lakeshore Arts Festival. Vendors are transported in the morning and patrons are transported from the Northwestern parking lot to the festival site the remainder of the day. For the July 4th holiday, one bus is used to transport the Pride of Evanston Drum and Bugle Corps group and participants from Special Recreation to and from the parade. Two buses are used to transport the band to and from the fireworks display.

FY 2006-2007 Objectives

- Increase rider usage by 10 participants by Fall 2006
- Continue to update safety procedure information provided to the bus drivers by Fall 2006
- Find and employ more bus drivers by Fall 2006

City of Evanston

Recreation

3150 – Park Service Unit

Description of Major Activities

Park rangers check all city parks, the lakefront, and all community centers on a routine basis, seven days per week. In the summer months there are two rangers scheduled each night, one covering city parks and the other covering the lakefront. During the fall, winter, and spring months there is one ranger scheduled. During the spring, summer and fall months, when local youth sports organizations are using the parks for games, there is a ranger scheduled on Saturday and Sunday mornings. Special emphasis is given to the lakefront and other highly-used areas. Rangers inform patrons of regulations and ordinances and enforce the regulations when needed. Park rangers also contact the Evanston Police Department if needed. Rangers check and secure park buildings, rest rooms, and gates each evening. They also identify broken equipment, reporting the problem to the Recreation Maintenance or Parks Department, report the need for trash pickup in parks to the Parks Department, assist with traffic control and parking at special events, inspect park equipment for safety, and check users of athletic fields for permits.

Rangers issue citations for:

- All provisions of City Code Chapter 9
- All provisions of City Code Chapter 10
- Subsection 8-4-6-3(A) of this code, littering on public way.
- Subsection 8-4-6-3(C) of this code, littering from vehicle.
- Subsection 9-4-7(C) of this code, dogs/cats on beach.
- Subsection 9-4-7(D) of this code, restraint of dogs/cats.
- Section 9-4-12, "Control Of Defecation", of this code.
- Section 9-4-13, "Excessive Barking, Actions", of this code.
- Subsection 9-5-12(B) of this code, criminal damage to city property.
- Subsection 9-5-23(G)1 of this code, loud radios prohibited.
- Parking violations in city parks, in or around City recreation facilities, on or near the lakefront, and any parking violations related to lakefront/park activity (Ord. 12-0-02)

Park rangers perform a much-needed service to the community, they are the eyes and ears of the Parks/Forestry and Recreation Department and the Evanston Police Department while during patrol of city parks. Over the years they have been instrumental in assisting patrons, identifying broken equipment, and monitoring special events. Park rangers are not the park police.

FY 2006-2007 Objectives

- Certify all park rangers in the use of AED units by June 2006

3155 – Youth Golf Program

Description of Major Activities

The City-wide Youth Golf Program, coordinated by Chandler-Newberger Center, provides youth golf instruction spring through fall at Peter N. Jans Community Golf Course, which is adjacent to the center. The primary purpose of the program is to provide an introduction to golf, including skills instruction, etiquette, and rules of the game.

FY 2006-2007 Objectives

- Increase participation of girls in the Golf Program by 25% by offering a free girls' golf clinic by September 2006
- Increase boys' and girls' awareness of and participation in the Golf Program by offering a free chipping and putting contest by August 2006

Total Expenditures:	\$ 3,192,686	\$ 4,190,600	\$ 3,818,337	\$ 3,697,000

Notes for Financial Summary

Changes to the Dutch Elm Inoculation Program are the result of the first year of inoculations being completed. In the first year, all signature and parkway elms were inoculated through a contractor – FY2007 shows in-house costs for remaining trees and amortization to pay for the inoculation of all signature elms again in FY2009.

Performance Report on FY 2005-2006 Major Program Objectives

Staff implemented and oversaw the fungicide injection program for all signature public elms 30" and larger City wide. The contractor completed the injections of 1,770 trees between the last week in May and the third week in August. Although the long-term results of this new program will take at least two more years to measure accurately, the losses of parkway elms in 2005 were significantly lower than 2004 (149 vs. 230). The number of other City-owned elms infected by the disease also showed a significant decrease (59 vs. 89) as well. Staff also performed fifty cut-outs by detecting symptoms of Dutch Elm Disease in its early stages.

Despite attempts to increase awareness of the benefits of our Dutch Elm Disease insurance program, participation dropped from 455 trees in 2004 to 443 trees in 2005. In addition, the costs associated with the removal of insured trees increased significantly, which resulted in the annual premiums only covering 67% of the actual costs. Staff is calculating how much to increase the premiums to keep up with the increase in removal costs.

The Ladd Arboretum master plan is moving forward, albeit slowly. Staff will have a consultant on board by May, 2006 to oversee this project in conjunction with the Ladd Arboretum Committee.

A formal tracking procedure has been put into place to record all removals of plant material from any park property. This will allow for more timely replacements to occur whenever appropriate.

The first full year of the enhanced tree planting program has been successfully implemented. Staff, along with the planting contractor hired through the Suburban Tree Consortium, will plant more than 650 new parkway trees City wide. This has already resulted in a significant decrease in the time between a tree removal and when that tree is replaced from nearly three years down to just over one year. Staff has also been working with the Suburban Tree Consortium to develop increased availability of new tree species for parkway planting. This has resulted in three previously unavailable trees being placed into full scale growing by participating nurseries. These trees are just beginning to become available, with significant increases expected in the coming years.

2006-2007 Department Initiatives

1. Transfer the fungicide injections of public elms from a contracted service to Forestry Division staff in order to decrease the costs of the overall program
2. Maintain the increase in tree planting efforts both on City parkways and in parks so that all public trees are replaced within one year or less of being removed whenever appropriate
3. If the incidence of Dutch Elm Disease continues to decrease, staff will be deployed increasingly to the area trimming efforts in order to try and maintain the six-year trimming cycle

Parks and Forestry

3505 – Parks & Forestry General Support

Description of Major Activities

The administrative functions of the Parks/Forestry Division in this business unit include the work of the superintendent, a landscape architect/project manager, and a secretary. Activities include public relations and education, program development, employee training programs, and oversight of all departmental capital-improvement projects.

FY 2006-2007 Objectives

- Continue development of the Ladd Arboretum master-planning process with the intent of completing the final plan by October, 2006
- Develop an educational mass-mailing to increase participation in the Private Elm Tree Insurance Program by April, 2006
- Increase the use of the City's web site to promote and educate residents about the activities undertaken by Parks/Forestry staff, including park redevelopments, division policies and procedures, and proposed work tasks in different neighborhoods

3510 – Horticultural Maintenance

Description of Major Activities

This Business Unit provides the horticultural maintenance of all public grounds within the City. Over 300 acres of land, encompassing 97 sites, are maintained by employees assigned to this business unit. These sites include 76 parks, 50 playgrounds, 9 roadside plantings, the grounds of 8 public buildings, and 4 civic beautification plantings. The major components of horticulture maintenance are lawn care, small tree, shrub and ground cover care, perennial bed maintenance, weed control, and refuse removal from all park properties. Employees assigned to this unit also assist in citywide snow removal and recreation facility maintenance when necessary. Additionally, employees maintain the equipment used for the upkeep of the grounds, and make repairs to all the different site furnishings such as playground equipment, tables, benches, and fencing. Employees also oversee landscape and irrigation system maintenance contracts.

FY 2006-2007 Objectives

- Develop and implement a maintenance tracking system with the use of MainTrac software in order to provide enhanced and timely maintenance activities citywide.
- Continue to enhance park property aesthetics with the increased use of low-maintenance perennials.
- Track and replace all dead trees and shrubs within one year of removal in all City parks.

3515 – Maintenance of Parkway Trees

Description of Major Activities

All parkway tree maintenance is responsible for maintaining 27,639 park trees. Tasks include but are not limited to-- regular cycle trimming of all parkway trees, cabling trees, responding to and repairing storm damage and fertilizing young trees to promote good development. Other problems such as vandalism and suppression of any insect or disease outbreaks (other than Dutch Elm Disease) that occur and threaten the health of the trees are also the responsibility of employees in this division.

FY 2006-2007 Objectives

- Implement a biannual inspection program for all parkway trees identifying potential hazards and re-measuring the size of all trees by October, 2006
- Investigate the use of outside contractors to remove stumps and restore the parkway areas after tree removal by August, 2006

Ongoing Activity Measures	2004-2005 Actual	2005-2006 Actual	2006-2007 Projected

Parks and Forestry

3520 – Dutch Elm Disease Control

Description of Major Activities

If uncontrolled, Dutch Elm Disease (DED) has the potential to kill nearly all American Elm trees in a community within 12 years. The comprehensive control program currently in place consists of intense scouting of all public and private American elms during the growing season and prompt removal of all diseased limbs and trees within 30 days of detection. This program has enabled the City of Evanston to “manage” the disease for more than 50 years. The City currently has a parkway American Elm population of 3,100 trees, in addition to 261 American elms on other public property.

FY 2006-2007 Objectives

- Continue aggressively scouting all American elms for symptoms of Dutch Elm Disease during the summer months in order to perform as many cut-outs as possible, thereby saving more trees from removal
- Decrease the time interval between initial disease identification to actual tree removal to less than the required 30 days by September, 2006

Ongoing Activity Measures	2004-2005 Actual	2005-2006 Actual	2006-2007 Projected
Parkway elms infected with DED	351	199	185
Percentage of parkway elms infected	10.09%	6.12%	5.97%
Number of cut-outs performed on parkway elms	121	50	60
Newly infected parkway elm removals	197	130	110
Removals due to unsuccessful cut-outs	33	19	15
Total of parkway elms removed	230	149	125
Percentage of parkway elms actually removed	6.61%	4.59%	4%
Other City owned elms removed	89	59	40
Average work days from disease identification until tree removal	44	34	28

Parks and Forestry

3525 – Tree Planting

Description of Major Activities

Planting of new trees on parkways throughout the City is facilitated by staff from this business element during the spring and fall months. Maintenance of the urban forest population is facilitated by planting in proportion to the number of trees removed during the previous year. The City is divided into six planting areas to insure equitable replacement of trees on a citywide basis. New trees with a 2.5" diameter are planted at no charge to the residents. As an address comes to the top of the list for a replacement tree, the resident is notified prior to planting and given an option to upgrade to a 3.5" diameter tree for a fee of \$175.00. At the same time, residents are also given a choice of at least three different tree species for each planting site. Species selection is developed with regard to specific site characteristics such as salt tolerance, parkway width, adjacent structures, traffic conditions, nearby existing tree species, and soil type.

FY 2006-2007 Objectives

- Work with Suburban Tree Consortium member nurseries to continue to develop availability of new tree species for parkway planting
- Increase the survival rate of newly planted trees by educating residents on how to assist staff with the care of their new tree by December, 2006

Ongoing Activity Measures	2004-2005 Actual	2005-2006 Actual	2006-2007 Projected
Percentage of new tree survival	94%	95%	98%
Percentage of residents choosing tree species	39%	32%	35%
Percentage of residents choosing larger size tree	8%	6%	7%
Total number of new parkway trees planted	493	654	650

3530 – Private Elm Tree Insurance

Description of Major Activities

This Business Unit allows residents to insure their private elm tree to cover the costs associated with removal if the tree contracts Dutch Elm Disease in a given year. Residents participating in the program pay an annual premium to the City of Evanston by June 1 of each year. These premiums are then used to cover all costs associated with removal if the tree is diagnosed with Dutch Elm Disease. Premium amounts are based on the size of the tree to be insured and staff's projection of the amount needed to cover the costs of all insured removals within the fiscal year. There is no City share for the removal costs, and the removal of the stump is not included as part of this program.

FY 2006-2007 Objectives

- Investigate methods to expand participation in the program by May 2006 through additional educational programs, mailings, and publicity
- Increase annual premiums in order to cover 100% of removal costs by April, 2006

Ongoing Activity Measures	2004-2005 Actual	2005-2006 Actual	2006-2007 Projected
Percentage of removal costs covered by premiums	87	67%	100%

3535 – Dutch Elm Inoculation Program

Description of Major Activities

This business unit was added in FY 2005-06 to track the activities of the new inoculation program, implemented to reduce the incidence of Dutch Elm Disease (DED). This program will entail the injection of all publicly owned elm trees with a fungicide that is effective in controlling the spread of DED by elm bark beetles for a three-year period. This is a 50/50 cost-sharing program with all property owners that have either American or Red elms located on the parkways directly adjacent to their property.

FY 2006-2007 Objectives

- Continue training Forestry employees in the methodology of fungicide injections so that all injections can be performed by City employees
- Re-measure all public American elms that were between 27" and 29" in the initial survey (performed in February, 2005) by April, 2006, to see if they have reached the "Signature" size of 30" and should be included in the 2006 injection program

Ongoing Activity Measures	2004-2005 Actual	2005-2006 Actual	2006-2007 Projected
Number of parkway elms injected	71	1,521	550
Number of park elms injected	5	249	0
Total number of public elms injected	76	1,770	550
Number of City employees trained in injection methods	0	4	6
Percentage of injected elms contracting DED	0	1.5%	0.5%

Total Revenues:	\$ 228,950	\$ 221,600	\$ 197,500	\$ 230,500

Notes for Financial Summary

Revenue sources were expanded to 13 this year to accurately reflect the different programming categories. Types of school programming categories are differentiated by funding source (grant or direct payment). Campfire permits for the fire ring at Lighthouse Park (80) are issued and fees collected through the Ecology Center. Use of the multi-purpose room has increased, and we expect that to continue. A number of community-service rentals are accommodated without charge (75). Private functions (80) provide the basis for rental income. Multi-purpose room rentals are expected to increase 15%.

Summer Camp extended care revenues were transferred from 3605 to 3610. Operation costs for the Summer Camp program are supplemented with staffing from Special Recreation Inclusion specialists, an average of \$16,000 per year, the Summer Youth Employment program, with an annual average of \$15,000, and staff who augment and assist with camp staffing.

Performance Report on FY 2005-2006 Major Program Objectives

Display cases were refurbished as an Eagle Scout project and are used to house temporary educational exhibits on natural history topics such as bird nests, fossils, animal skins and bones. The uniform finishing on the cases is attractive and fits with the center's natural décor. As interest in renting the multi-purpose room increases, a brochure/information packet will be developed and serve as a comprehensive informational piece for rental use.

Storage space is still in short supply; staff has reorganized material supplies and what space is available is utilized well. The first steps of a master plan for the Ladd Arboretum are underway with staff and the board members of the Ladd Arboretum Committee researching and educating themselves on urban arboretums and the unique features of mature arboretums. An RFP was issued in November 2005. Staff and the board will be working with a consultant to develop the planning process, which will continue to be developed through the course of 2006.

Ecology Center

2006-2007 Department Initiatives

1. The Ecology Center has experienced a dramatic increase in building use over the last year. At least 150 requests for use of the multi-purpose room had been processed. As a result, we are refining our building use and rental policies to be specific for a number of rental types and situations. Brochures, rental packs, and rental fees are being evaluated and refined to balance community requests with current staffing levels
2. The Ecology Center education staff is working with District #65 for the second year as part of the Millennium Grant project. After school science clubs and classes are being held at 6 schools. Early analysis from District #65 regarding the effectiveness of this and other initiatives to increase achievement scores is still too early to be definitive. The staff is also part of the District #65 Science Power program, which provides live TV broadcasts to students on science topics
3. Staff has participated with the Board of the Evanston Environmental Association (EEA) and the Executive Service Corps (ESC) on a year-long project to improve the effectiveness of the EEA and position the EEA for the future. The EEA's mission is to support the environmental objectives of the Ecology Center primarily through financial support. The board development process should be completed by spring 2006
4. Ecology Center and Parks/Forestry staff are beginning the process of working with the Ladd Arboretum Committee to develop a master plan for the Arboretum. Currently staff is researching and investigating public arboretums. Planning documents will be developed through a RFP process. Staff will undertake issues such as tree signage and identification, developing a map with specific trees listed, and documenting the Memorial Tree program and working on repairing identification labels on Arboretum trees

City of Evanston

Ecology Center

3605 – Ecology Center

Description of Major Activities

Program personnel, made up of one center manager and two environmental educators, provides environmental education programs and services to the community. The Ecology Center manager works with the Ladd Arboretum Committee, which reports to Human Services Committee; the Evanston Environmental Association (501c3) membership organization and its members; the Evanston Environment Board, which reports to Human Services Committee; program participants; and the public.

Services at the Ecology Center include school programs, including after school science programs in 6 schools with 50 programs directly to school classrooms; 120 annual public education programs; administering 5 summer nature day camps; teacher workshops; and community gardening for 210 Evanston gardeners. The Ecology Center program instructors provide nature education programs to the Fleetwood Jourdain Community Center on a weekly basis, monthly to the Robert Crown Center, and run an 8-week fall and spring session of environmental programming for the Special Recreation program.

The Ecology Center is responsible for 4 City buildings: the Ecology Center, the Carlson Educational Greenhouse, and the North and South fog houses at Lighthouse Park. Fund-raising projects from EEA membership drives to 5 special events provide additional revenues (\$3,000) for operations. Ecology Center staff work with 8 Evanston garden and bird clubs to promote environmental projects and information. A resource library consisting of 500 volumes of curriculum materials, natural history, and environmental books is maintained for use by the staff and the public. Outdoor recreation programming includes a canoeing program on the North Shore Canal with a fleet of 11 donated canoes and approximately 1000 paddlers per year, as well as a six-month free public fishing program on Saturdays at Lovelace Park, which draws 30 - 50 people per day. The Ecology Center also coordinates volunteer work groups, comprised of high school and university groups, in the Ladd Arboretum and other city parks. The multi-purpose room at the center is used for private rentals, community events, public meetings/hearing, and hosts approximately 75 training seminar/meetings.

FY 2006-2007 Objectives

- Participate with the Ladd Arboretum Committee on developing a master plan for the Ladd Arboretum with completion of a proposed plan by December 2006
- Integrate a conservation plan for the Ladd Arboretum based on working with Chicago Wilderness principles and resources along with Ladd Arboretum master plan by December 2006
- Develop and complete landscaping directly around the Ecology Center in conjunction with the McCormick Boulevard reconstruction project by November 2006
- Implement new community garden program at Eggleston Park by May 2006

Ongoing Activity Measures	2004-2005 Actual	2005-2006 Actual	2006-2007 Projected

Ecology Center

3610 – Eco-Quest Day Camp

Description of Major Activities

The Ecology Center Summer Camp program provides 5 different camp experiences for children ages 3 - 12 years of age. All Ecology camps are designed to provide an appreciation for the natural environment through science activities, outdoor games, crafts, and stories. Camps are child-centered, providing a "hands-on" approach to exploring the world around us. The summer camp programs are the largest single source of revenue for the Ecology Center, averaging \$160,000, with an average of 30 - 35 seasonal summer camp counselors. Each camp has one director with the appropriate number of counselors, assistant counselors, and inclusion aides. EcoQuest, for 1st through 3rd graders, and Kinglet, for children entering Kindergarten, provide full-day and half-day sessions. EcoExplorer, designed for 4th - 6th graders, is full day-only camp, with a counselor/camper ratio is 1:8. Campers are placed in a core group with a lead counselor who provides consistent leadership throughout the camper's day. Inclusion aides and assistant counselors work with campers in their group as well as in large activities. Before (7:30 AM - 9 AM) and after-camp care (3 - 6 PM) is available at each camp. The after-camp program has a separate curriculum and a minimum ratio of 1:8.

Wildflower, our longest-running camp with 4 sessions of 20 campers each, provides opportunities for children ages 3 and 4 to investigate the natural environment using pre-school curriculum and teaching practices. Wildflower is located at the Ecology Center and uses an animal-enhanced classroom. The camp meets 4 days a week for 2.5 hours. Counselor to camper ratio is 1:4, with additional assistant counselors working with campers.

Kinglet Camp meets at Lovelace Park utilizing the fieldhouse and surrounding park and has 24 campers with a 1:8 counselor to camper ratio. This camp is exclusively for 5-year-olds entering Kindergarten.

EcoExplorer, comprised of approximately 32 campers, addresses a more advanced camping and outdoor experience for 4th - 6th graders and is housed at the fog houses at Lighthouse Beach. Adventure education focuses on land and water ecosystems, includes a 3 day 2 night overnight campout, and has a 1:8 camper/counselor ratio.

EcoQuest, our largest camp, 64 full-day and 32 half-day campers, is housed at a District #65 school.

Summer Summit, a 2-week camp at the end of summer, is typically made of 64 campers grades K - 6 who are in need of a full-day camp. The camp is divided into two groups, K- 2nd grade and 3rd - 6th grade. Each camp has a director and has a 1:8 ratio. Sites for the camp include the fog houses at Lighthouse Park, several beaches, and the Ecology Center. Before and after-camp care is available. Field trips and outdoor activities focus on canoeing, swimming, and fun.

FY 2006-2007 Objectives

- Review and revise camp supervision structure to strengthen oversight responsibilities
- Delineate summer camp job descriptions and evaluations by May 2006 to use for the 2006 summer season
- Develop a comprehensive conservation ethics program for summer camps to include recycling efforts, waste reduction, and service projects for each camp; proposals to be developed by June 2006 and instituted June 2006 - August 2006

Ongoing Activity Measures	2004-2005 Actual	2005-2006 Actual	2006-2007 Projected

Notes for Financial Summary

Performance Report on FY 2005-2006 Major Program Objectives

The City of Evanston has a long history of enthusiastic support for our lively and diverse cultural arts community. The 2005-06 Cultural Arts Division programs included:

- The Evanston Ethnic Arts Festival
- Evanston Lakeshore Arts Festival
- Starlight Concert Series
- Public Art Program
- Evanston Arts Camp
- Arts Week Evanston
- Young Artist Program
- Cultural Fund grant program
- The management of the Noyes Cultural Arts Center

A new Cultural Arts/Arts Council director was hired in 2005 to lead the division.

The Evanston Ethnic Arts Festival marked its 20th anniversary in 2005. A two-day celebration of cultural diversity presenting the best in ethnic art, food and performance, the festival annually attracts more than 25,000 people to Evanston's lakefront during the third weekend in July. More than 80 cultures were represented through 125 juried artists/craftspeople exhibiting and selling their work, a dozen food vendors, family art activities, a poetry/storytelling tent, and two stages of continuous entertainment with performances of ethnic music and dance.

The Evanston Lakeshore Arts Festival presented 125 juried artists exhibiting ceramics, sculpture, textiles, paintings, jewelry, photography, glass, and woodwork of the highest quality to an audience of over 20,000. Entertainment includes live classical and jazz music, a silent auction of nearly 100 items donated by exhibiting artists and community groups, an array of food vendors, a Family Activity area featuring family entertainment.

The Starlight Concert Series provided a dozen free weekly summer concerts held in Dawes Park on the lakefront and in James Park in southwest Evanston. Thousands of Evanstonians flocked to the concert series to picnic in the park and enjoy a wide array of musical styles, including reggae, blues, classical, jazz, and rock.

Arts Week Evanston, a citywide celebration of arts and culture, was held in October. This annual event highlights arts in Evanston, attracting an audience of over 5,000 people to more than 50 events. From a sold-out dance showcase at the Levy Senior Center, to a legislative breakfast with Evanston's state and federal legislators, to

City of Evanston

Cultural Arts Division

concerts, workshops and tours, Arts Week Evanston turns its spotlight on the truly rich variety of arts produced in Evanston. The Cultural Arts Division, Evanston Arts Council, and Public Art Committee organized and hosted a half dozen events during Arts Week.

The Public Art Committee dedicated several new public art works in 2005-06, including the Penelope sculpture and panels on the exterior of Fire Station #3. The committee conducted a nationwide search to commission a new sculpture at Sherman Plaza, and conducted a public forum during Arts Week to help chart the future course of public art in Evanston. The committee also began work developing a comprehensive inventory of Evanston public art works.

Arts camps provided learning experiences in the arts for youngsters ages six through 15. Full- and half-day Summer Camp and the Young Artist Program (YAP) offer programming for both Evanston youth and non-residents. Arts camps organized an Evanston appearance by Jim Dale, the internationally renowned books-on-tape voice of Harry Potter, at Levy Center in July 2005. A new media camp was added in 2005 in partnership with the Evanston Community Media Center. The success of our Winter Break Camp has spurred the introduction of Spring Break Camp in 2006.

The Cultural Fund grants program awarded \$28,250 to a dozen arts organizations that requested support for high quality, innovative projects. The Evanston Arts Council worked with a consultant to review and revise the Cultural Fund guidelines for 2006-07.

The Noyes Cultural Arts Center continues to be a unique model of a community's commitment to art as a vital social, historical and economic component of the community. Minor ceiling renovations were completed in the basement of the building. The Noyes Art Gallery featured six exhibitions of work by artists from Evanston and elsewhere, generating enthusiastic press coverage in the Chicago Sun-Times, La Raza, The Daily Northwestern, and other media outlets.

2006-2007 Department Initiatives

1. Assist Evanston artists and arts organizations to foster collaboration and communication
2. Identify community arts needs and develop programs and opportunities to meet them
3. Foster arts education and integrate the arts into the community
4. Increase resources to support the arts in the community
5. Insure artistic and cultural diversity
6. Propose and promote the creation and preservation of public art in the community

City of Evanston

Cultural Arts Division

3700 – Arts Council

Description of Major Activities

The Arts Council provides an environment that encourages arts activities and the creation of art by supporting Evanston's wide variety of arts organizations and individual artists of every discipline. The Cultural Fund awards matching grants of up to \$4,000 per grant to Evanston-based not-for-profit arts organizations and up to \$2,500 to individual artists for innovative arts programming of high quality that benefits the community. The Arts Council provides additional ongoing support to the arts industry, including the collective marketing of Evanston arts organizations in metropolitan Chicago. The Public Art Committee supports the City's Percent for Art Program through the selection of site-specific commissions.

FY 2006-2007 Objectives

- Review and monitor the community service requirements of Noyes Center resident artists by February 2007
- Review and make recommendations to City Council for Cultural Fund grants by March 2007
- Increase number of Cultural Fund Grant recipients from 12 to 18
- Develop a master plan for Public Art, including a comprehensive maintenance schedule by January 2007
- Develop creative ways to promote and market the arts through collaborations with the local business community

Cultural Arts Division

3710 – Noyes Cultural Arts Center

Description of Major Activities

This element manages the Noyes Cultural Arts Center, which rents studio, rehearsal, classroom, performance and office space to professional artists and arts organizations, including the Piven Theatre Workshop, the Next Theatre Company, Art Encounter, The Actors Gymnasium, and Light Opera Works.

The center's 190-seat theater is rented on an hourly, weekly or monthly basis. The center also has two galleries and a mid-sized (826.6 sq. ft.) studio that is rented by the hour. Rental activities include but are not limited to: summer arts camp, theater productions, lectures, board meetings, auditions, receptions, and workshops. The Noyes Gallery exhibits works by metropolitan artists. Exhibits change bi-monthly.

Classes, workshops, and performances offered by Noyes Center resident artists and Cultural Arts Division-sponsored events, such as Arts Week and Black History Month, draw thousands of people into the Center each year. In addition, Noyes resident artists provide more than \$39,000 in community service each year.

FY 2006-2007 Objectives

- Continue updating the ongoing study of artists' facilities to compare amenities and fees for space and services
- Assess the community's cultural programming needs to link services via Noyes resident artists' community service obligations

Cultural Arts Division

3720 – Cultural Arts Programs

Description of Major Activities

Cultural Arts programs include:

- The Young Artist Program
- Arts Camp
- Winter Arts Camp
- Ethnic Arts Festival
- Lakeshore Arts Festival
- Starlight Concert Series
- The Noyes Center Gallery
- Arts Week
- The Mayor's Award for the Arts
- Community Service at Noyes

The administrative functions of the Cultural Arts Division are included in this business unit which involves the work of the Cultural Arts/Arts council director, secretary, senior program coordinator and program manager.

The Young Artists Program offers intensive summer arts instruction and mentoring to youths ages 12 to 15 interested in pursuing in depth creative experiences. Courses are offered in visual and performing arts by professional artists.

Arts Camp offers young people ages 6 to 11 creative instruction in drama, movement, theatre, visual arts, and interdisciplinary arts and mixed media in theme based camps in several locations. Families may choose a full day camp or a half day camp and are offered in two 4-week sessions and one 2-week mini-camp.

Now in its 19th year, the Ethnic Arts Festival is a two-day celebration of cultural diversity and presents the best in ethnic art, food, and performance. Over 65 cultures are represented each year on the third weekend in July, through 125 artist exhibitors, 12 food vendors, family art activities, poetry/storytelling tent, and two stages of continuous entertainment with performances of ethnic music and dance.

Now in its 34th year, the Lakeshore Arts Festival features outstanding fine arts and crafts. Held the first weekend in August, 125 juried artist from across the country exhibit ceramics, fiber, glass, jewelry, mixed media, painting, prints and drawings, photography, watercolor, wood, and sculpture. Other highlights include live jazz and classical music, a silent art auction, and the family activity area with live family entertainment and a children's craft tent. We also host 12 fabulous food vendors serving up culinary delights.

Throughout June, July, and August, the City of Evanston's Cultural Arts Division features 12 outdoor concerts, 6 held at Dawes Park on the lakefront and 6 at James Park. The concerts are free to the public and highlight a wide variety of music and performance styles. Many Evanston and neighboring residents picnic in the park while enjoying everything from Classical to Cajun music.

The Noyes Art Gallery hosts approximately 12 shows annually in a wide variety of visual arts media. Known as a leader in the display of contemporary art, the gallery showcases cutting-edge art not often seen in Evanston.

Arts Week Evanston is part of a statewide celebration of the Arts. Visual artists, musicians, dancers, and actors all combine in a series of special performances and activities that highlight Evanston's rich and varied arts community. Now numbering over 50 performances, Arts Week has become a major kick-off for the artistic season in our town.

For many years, the Mayor of Evanston has awarded recognition to both an individual and organization for contributions to the cultural life of Evanston. Each recipient is honored at the Mayor's State of the City Address before the Chamber of Commerce.

The Community Service program is a component of the Noyes Cultural Arts Center. Tenants must give 15% of the value of their monthly rent back to the community in the form of community service. In FY2005-06 Noyes tenants were required to give \$41,040 and they actually gave more than \$75,000. Community service projects range from scholarships to arts classes to workshops in the schools to recent paintings by Richard Halstead that hang in the

City of Evanston

Cultural Arts Division

3720 – Cultural Arts Programs

Civic Center. In FY 2004-05, the Arts Council agreed to take on the administration of the program and staff is assisting them.

FY 2006-2007 Objectives

- Expand community access to Starlight Concert Series by adding two concerts at Twiggs Park during summer 2006
- Increase sponsorship support for 2006 summer festivals and concert series
- Add a Spring Break camp for children ages 6 to 10 by April 2006
- Award an individual and an institution a Mayor's Award for the Arts in January 2007

Motor Fuel Tax Fund Summary

Performance Report on FY 2005-2006 Major Program Objectives

The Motor Fuel Tax fund is used for the street maintenance programs, signal projects, and other capital improvement projects authorized by the Illinois Department of Transportation (IDOT). Financing is provided from the City's share of the gasoline tax which is appropriated by IDOT. FY 2005-06 funds were used for various projects as listed below.

Signal Modernization Project:

Motor Fuel Tax funds were used to modernize the Church Street/Dodge Avenue Intersection

Motor Fuel Tax Funds were used to resurface the following streets:

BURNHAM PLACE	MICHIGAN AVENUE	SHERIDAN ROAD
CENTRAL PARK AVE.	SIMPSON STREET	GRANT STREET
EAST RAILROAD AVE.	DEAD END	EMERSON STREET
HINMAN AVENUE	DEMPSTER STREET	LAKE STREET
HARTREY AVENUE	CHURCH STREET	EMERSON STREET
KIRK STREET	DODGE AVENUE	FLORENCE AVENUE
RIDGE COURT	MAIN STREET	GREENLEAF STREET
SEWARD STREET	DODGE AVENUE	ASBURY AVENUE
SHERIDAN ROAD	HAMILTON STREET	BURNHAM PLACE
SHERMAN AVENUE	EMERSON STREET	FOSTER STREET
WARREN STREET	WEST END W/ GREY AVE.	DODGE AVENUE

2006-2007 Department Initiatives

Projects to be initiated in 2006-2007 are:

1. 2006 Street Resurfacing Program
2. Intersection Improvements to:
 - Central Street/Ashland Avenue
 - Central Street/Asbury Avenue
3. McCormick Blvd. Reconstruction Project
4. Chicago Avenue CMAQ - Engineering
5. Ridge Avenue CMAQ Project

Description of Major Activities

In accordance with Illinois Public Act 85-978, in December of 1990 the City of Evanston enacted Ordinance 133-O-90, by referendum. The purpose of the Ordinance was to establish an Enhanced 9-1-1 system. Per the legislature an Emergency Telephone Systems Board (ETSB) was established. The stated function of the ETSB is to design and implement an Enhanced 9-1-1 system for the City of Evanston and monitor the system once in place.

Notes for Financial Summary

Under Funds Provided: Community Development Block Grant amount is the amount of funds allocated to budget element 5220, CDBG Administration. Estimated Entitlement includes reallocation of unused funds from prior years' CDBG activities.

Under Expenditures: Administration funds includes all funding in the Administration/Planning category - currently, CDBG Administration; Housing Advocacy; and the Minority, Women and Evanston Business Program.

An estimated entitlement of \$2,022,319 is based on current recommended funding by Congress for 2006 CDBG program, an 8% reduction from 2005/06 entitlement of 2,247,201; an estimate of \$34,321 in reallocated funds from completed prior years'; and \$200,000 in 2006/07 estimated program income, make up the combined estimated 2006/07 total for CDBG Program Funds of \$2,256,640.

Performance Report on FY 2005-2006 Major Program Objectives

Submitted to HUD 2004/05 CAPER (Consolidated Plan Annual Performance and Evaluation Report) covering Evanston's use of 2004/05 CDBG, HOME and ESG funds.

Forty-four new CDBG projects were implement for FY 2005/06 totaling \$2,883,385.
Continue to provide project management to nineteen ongoing CDBG funded activities from prior years.

The financial services portion of the CDBG program continues to be performed as a contractual service. Current monthly expenses for this service range from \$2,610 to \$3,780, or a total of \$35,110 for the year. The CDBG fund pays for 2/3 of the cost of the financial services consultant and 1/3 of the cost for the HOME program.

1.8 FTE positions are charged back to budget element 5220, CDBG Administration: Secretary II Planning Division (50%), General Planner (50%), Housing Planner (30%), Senior Accountant Finance Department (30%), and Assistant Community Development Director for Planning (20%).

The Neighborhood Planner continues to work with CDBG target-area neighborhood organizations, including the West Evanston Dr. Hill community, the Howard Street Redevelopment Committee, Chicago Avenue Streetscape redevelopment, and the CDBG Target-Area Neighborhood Security Program. The West Evanston Plan for neighborhood improvement projects has been approved by the Evanston Plan Commission and will be submitted to the City Council for adoption during this program year.

HUD approved the City's 2005-2009 HUD Consolidated Plan and the City has begun to implement its goals through funded 2005/06 CDBG, HOME, and ESG activities. The Consolidated Plan also discusses the City's use of HOME, ESG, and other funding sources for implementaiton of the City's affordable housing, economic development (creation of jobs for low- to moderate-income residents), and programs and services for homeless persons and families in Evanston.

Community Development Block Grant Fund Summary

CDBG and HOME staff continue to work with HUD's IDIS (Integrated Disbursement and Information System) to report accomplishments with CDBG, HOME and ESG funds, and to draw those funds from the City's letter of credit with the U.S. Treasury. The CDBG grants administrator and housing planner (HOME) attended a 3-day workshop in the spring to improve their skills and understanding of the IDIS system, which has resulted in improved reporting to HUD--acknowledged by HUD in a monitoring letter received from HUD's Chicago office in July.

2006-2007 Department Initiatives

1. Provide technical assistance to applicants for the 2006/07 CDBG program. The CDBG grants administrator conducted two orientation workshops for applicants, including a new workshop for neighborhood groups interested in applying for CDBG funds.
2. Facilitate 2006/07 application/funding process for applicants and the Housing & Community Development Act (CD) Committee.
3. Prepare One Year Action Plan for FY 2006/07, which will discuss the City's plans for utilizing 2006 CDBG, HOME, and ESG funds. The One Year Action Plan will be prepared after the CD Committee makes its funding recommendations for the 2006/07 CDBG program in November 2005, and will be submitted for City Council approval in January 2006.
4. Continue to provide staff support to the Housing & Community Development Act (CD) Committee (14 meetings a year).
5. Continue to monitor all ongoing CDBG activities for compliance with program and contractual obligations, including Davis/Bacon federal prevailing wage requirements.
6. Continue to improve reporting to HUD via HUD's IDIS system.
7. Prepare a written manual for CDBG program applicants and update guidelines for the Housing & Community Development Act Committee.

City of Evanston

CDBG Fund

5220 – CDBG Administration

Description of Major Activities

This activity provides overall management of the City's Community Development Block grant (CDBG) program and administrative support to coordinate planning, monitoring and implementation of CDBG projects. Specific tasks include:

- Provide staff assistance to the Housing & Community Development Act Committee.
- Prepare the One Year Action Plan for FY 2007/08 (City's application to HUD for annual funding from HUD for CDBG, HOME and ESG programs).
- Prepare annual CDBG program CAPER (Consolidated Annual Performance and Evaluation Report), which reports to HUD on the use of Evanston's CDBG, HOME, and ESG funds.
- Financial management and record keeping for the CDBG program.
- Staff liaison with the U.S. Department of Housing & Urban Development (HUD) on CDBG matters.
- Provide technical assistance to citizens, neighborhood groups and local agencies.
- Management of CDBG projects with related monitoring and reporting, such as Davis/Bacon Prevailing Wage requirements and environmental review.
- Neighborhood Planning, included in this budget element, who works with CDBG target area neighborhoods in building citizen consensus, development of neighborhood comprehensive plans and assists in the facilitation of neighborhood projects.

FY 2006-2007 Objectives

- Prepare for approval by the Housing & community Development Act Committee and City Council and submit CAPER (Consolidated Plan Annual Performance Report) for FY 2005/06 to HUD no later than May 31, 2006
- Provide staff assistance to the Housing & Community Development Act (CD) Committee, including coordinating the 2007/08 CDBG application/funding process, preparation of the City's One Year Action for FY 2007/08, which includes the 2007/08 CDBG budget) for approval by the CD Committee and City Council and submission to HUD
- Prepare/submit other reports and information to HUD, as required. Continue to streamline reporting on HUD's IDIS (Integrated Disbursement Information System) so that Evanston's accomplishments can be accurately reported to HUD, Congress and the public
- Provide neighborhood planning support to CDBG Target neighborhood groups and assist neighborhood stakeholders with meeting their community development objectives
- Provide technical assistance to CDBG grantees and potential grantees, monitor all CDBG funded projects for compliance with City of Evanston and CDBG program regulations, and provide administrative oversight of the City's CDBG program

Performance Report on FY 2005-2006 Major Program Objectives

The following projects have been undertaken during the 2004-05 fiscal year--the completion of Howard Street TIF; the planned development application for the Bristol Development Project was approved; redevelopment of former Builder Square site completed (Food for Less); financing of Sherman Plaza completed; the completion of a preliminary study for proposed West Evanston TIF; and completion of annual review of Tax Increment Financing districts through the annual Joint Review board meetings. Staff has also worked on several expansion and relocation projects of industrial and commercial properties within Evanston.

Description of Major Activities

The Economic Development Fund provides support for many of the City's economic development initiatives as well as staff to support these activities. Many of the redevelopment efforts assisted by the City are initially supported by resources from the Economic Development Fund to finance consulting services, legal counsel, and staff support. In addition, the fund provides grants to intermediary entities, such as Evanston Inventure, the Evanston Convention and Visitors Bureau, and neighborhood business districts.

FY 2006-2007 Objectives

- Complete review of West Evanston TIF
- Redevelopment of former Belmont Steel site for commercial use
- Implement economic development objectives of West Evanston Planning Report approved by the Plan Commission
- Improve condition of neighborhood business districts through façade improvements and other assistance
- Implement objectives of Howard Street TIF District

Description of Major Activities

The Mayor's Special Housing Fund was formed to oversee and make recommendations on the expenditure of Special Housing Fund dollars to support housing related programs as adopted by the City Council. The goals of this program include the following:

1. To address boarded up structures.
2. To provide funds for the rehabilitation and new construction of affordable housing.
3. To provide funding support for transitional housing.

FY 2006-2007 Objectives

- Rehabilitate affordable housing.
- Address financing gaps to enable the new construction of affordable housing.
- Leverage other funds, include HOME, to produce new affordable housing units.
- Provide support for transitional housing needed by Evanston residents.

Washington National Special Tax Allocation Debt Service Fund Summary

Description of Major Activities

The City Council adopted the Washington National Tax Increment District (TIF) on September 15, 1994. The TIF District consists of approximately 83,000 square feet of land (bounded by Church Street on the north, Davis Street on the south and Chicago Avenue on the east) located in the downtown business area of the City. The development project consists of an apartment tower containing approximately 261 units with an attached parking garage, a retail food store, and other retail units with total square feet of about 33,000 square feet.

The City issued \$3.8 million in 1997 Series General Obligation TIF bonds, of which \$3 million was distributed to the developer for eligible tax increment district development costs for the project. The City issued \$35 million in 2002 Series General Obligation Variable Rate Demand bonds. These bonds will be used to construct a parking garage for the new Sherman Plaza Project, which will consist of a new 200-plus unit condominium development and retail space of over 100,000 square feet.

The City issued \$29,270,000 in 2005 Series General Obligation Bonds. The funds are allocated as follows:

- \$9,540,000 pays a portion of the cost of capital improvements
- \$465,000 pays for additional alley improvements
- \$13,060,000 is allocated to finish constructing the new parking garage at the Sherman Plaza Development
- \$6,205,000 is allocated for use to refund outstanding General Obligation Bond Series 1998

Notes for Financial Summary

Description of Major Activities

The City Council adopted Special Service Area No. 5 on June 27, 1994. Special Service Area No. 5 is comprised of the City downtown business district.

The City Council also approved a \$9,500,000 Downtown Public Works Improvement program for Area No. 5. The ordinances establishing the area authorized the issuance of up to \$5,000,000 Special Service Area bonds.

On June 21, 1995, \$3,060,000 of the Special Service Area bonds were sold and on July 9, 1996, the City sold another \$1,940,000 issue of special service bonds at public bid.

The two bond issues, totaling \$5,000,000, are being retired from the annual property tax levy on the real property located within the special service area. The debt service fund is utilized to account for the timely retirement of these bonds.

Notes on Financial Summary

Description of Major Activities

The City Council adopted the Southwest II Tax Increment Finance (TIF) District – also called the Howard-Hartrey TIF – on April 27, 1992. The TIF District consists of a 23 acre site located at 2201 West Howard Street on the southwest corner of the City. The development consists of a shopping center with several large stores. The total project cost is estimated to be \$39,266,932, of which the City provided \$7,390,000 in land acquisition and public improvement costs.

On April 13, 1993, the City sold \$46,820,000 in Series 1993 General Obligation Anticipation bonds. A portion of this sale provided for capitalized interest and \$5,532,750 for the redevelopment costs of this project. In addition, the City sold Series 1994 general obligation bonds on April 12, 1994, which allocated an additional \$1,857,250 to this project. The City sold \$6,750,000 in general obligation bonds in 1996 to provide proceeds to refund the Series 1993 anticipation bonds dedicated to this project.

Notes on Financial Summary

Description of Major Activities

The City Council adopted the Southwest Tax Increment Finance District (TIF) on June 25, 1990. The TIF District consists of approximately twelve acres of contiguous land located in the area generally known as the City's southwest industrial corridor and is roughly bounded by Main Street on the north, Pitner Avenue on the east, the North Shore channel and the Main Street Shopping Plaza on the west.

In order to provide initial funding to implement the plan, the City sold \$15,155,000 worth of Series 1990 General Obligation (GO) bonds on September 24, 1990, of which \$2,100,000 of the proceeds were used for the redevelopment project. Debt service on the TIF District share of the obligation is eventually expected to be met by property tax increment revenues derived from the project. This separate debt service fund is established in accordance with law and is called the Southwest Special Tax Allocation Fund in order to account for the payment of the debt service associated with municipal debt issued for the Southwest TIF District.

Debt Service Fund Summary

Description of Major Activities

The property tax levy reported in this budget is stated on the full accrual basis. The property tax revenue represents the 2004 levy, almost all of which will be collected in the 2005-06 fiscal year. The expenditures for the general obligation bonds represent debt service payments due in fiscal year 2005-06.

During fiscal year 2004-05, the City issued Series 2004B general obligation refunding bonds in the amount of \$11,730,000 to refund Series 1997 bonds. The City also issued \$13,355,000 Series 2004 general obligation bonds. Proceeds from this issue are being used to finance the Capital Improvement budget.

Description of Major Activities

In January 1985, the City Council adopted the Downtown II Tax Increment Financing (TIF) District consisting of 26 acres of contiguous land located in the northwest portion of the central business district of the City. Bonds were issued in 1986, 1992, 1996, and 1999. In June 29, 2000, the City sold \$37.1 million in Series 2000 bonds, which were used to pay for redevelopment costs, construction of a senior center, and the construction of a parking garage.

Total Operating Expenses:	\$ 6,369,978	\$ 7,017,700	\$ 7,017,700	\$ 7,252,100

Notes for Financial Summary

The main increase reflected in operating expenses is in debt service for the repayment of bonds issued to fund construction of the structure.

A facilities maintenance worker II has also been funded in order to keep up with the maintenance

Description of Major Activities

The daily cashiering and operations of the 1,400-space Maple Avenue Self Park are performed under various contracts. A management contractor oversees the daily use of the garage and collects all revenues. A security guard services contractor will provide personnel to patrol the building 24 hours every day. General cleaning and janitorial services are performed by an operations/management contractor or subcontractor.

Revenue Projections

Revenue projections reflect the rate increases to two-hour parking meters in outlying areas, to the space rentals in off-street lots, and the hourly fees charged in the Church Street Self Park, all of which were approved by the City Council in the summer of 2005. The opening of the new Sherman Plaza Self Park will reduce some usage of the Church Street Self Park.

Revenues from the Parking Tax are accounted for in the General Fund; these revenues will be used to off-set the funds needs of the Parking Fund. Revenues from the Maple Self Park and from the new Sherman Plaza Self Park are identified in the budgets for these TIF programs. Upon expiration of the TIF for each garage, those revenues and expenses will be incorporated into the Parking System Fund budget.

Notes for Financial Summary

Performance Report on FY 2005-2006 Major Program Objectives

The major focus this year was evaluation of the financial state of the Parking Fund, considering present and future needs, Fund balances and reserves, and forecasted revenues. Recommendations were proposed and approved to increase the lot permit parking rates, hourly rates for 2-hour meters in all regional business areas, redirection of the Parking Tax toward parking needs; and development of a long-range rate increase program for both meters and lot permits. Parking meter equipment was reviewed, and equipment was ordered for implementing the rate increases in the regional business areas. The new rates will be installed in the spring of 2006.

A request for qualifications was issued to identify a professional parking garage management and operations firm capable of handling revenue collections, general cleaning, and security in the two existing garages and for the Sherman Plaza Self Park, which is scheduled to open in May of 2006. This direction provides cohesive operations among the City facilities while reducing overhead.

2006-2007 Department Initiatives

1. With the impending opening of the Sherman Plaza Self Park in the spring, additional changes will be made to parking time limits on-street around the downtown. Private developments continue to require interim parking plans.
2. Examination and experimentation with newer technology revenue equipment for on-street uses and off-street uses will be a major focus.
3. Repairs to surface lots and to the garages which could not be undertaken in 2005-06 will be addressed during 2006-07.

City of Evanston

Parking System Fund

7005 – Parking System Management

Description of Major Activities

This element manages, coordinates, and oversees operations related to the City's on-street and off-street parking operations and the City's civilian parking enforcement and booting operations. The on-street parking operations include installation, maintenance, and collection of parking meters as well as the implementation and sales of residential parking district permits, collection of parking ticket fines, and sale of city vehicle stickers. The off-street operations include installation, maintenance, and collection at metered parking lots, reserved (permit) parking lots, and City parking garages. All boot releases are processed by this program element, including the collection of ticket fines and boot release fees.

This program element works with residential neighborhoods and commercial business districts to provide parking for all of the various user groups. This element performs parking studies and recommends changes in parking regulations in order to meet the parking demands for on-street and off-street parking.

The physical condition of the parking lots and garages is assessed and capital improvement programs developed from this program element. Contracts for garage management and operations as well as security services and custodial services are managed from this program element.

The Parking System Management element is also responsible for the software system which is used to issue automated parking citations as well as to manage the database for all parking citations and the collection of parking ticket fines and fees.

FY 2006-2007 Objectives

- Develop a 5-year maintenance program for all parking garages by October 15, 2006
- Develop a 5-year capital improvements plan for upgrading parking lots by October 15, 2006
- Identify and evaluate multi-space parking equipment for on-street and off-street uses and develop a program for purchasing recommendations by November 30, 2006

7015 – Parking Lots & Meters

Description of Major Activities

This program element is responsible for installation, maintenance, and collections of approximately 2400 parking meters throughout Evanston and for the maintenance and landscaping of 32 lots, 18 traffic circles, and numerous cul-de-sacs. This element also assists with special events by covering meters and posting temporary signage. The installation and maintenance of speed bumps in alleys continues to be performed by this program. During the winter months, this program element provides snow plowing in the parking lots and maintains the sidewalks adjacent to these lots.

FY 2006-2007 Objectives

- Surface 2 public parking lots by November 30, 2006, if an agreement can be completed with the CTA
- Resurface Lot 35 at Main & Judson by November 30, 2006

Ongoing Activity Measures	2004-2005 Actual	2005-2006 Actual	2006-2007 Projected

7025 – Church Street Self Park

Description of Major Activities

The Church Street Self Park provides approximately 600 public parking spaces in the downtown. Daily operations for cashiering and management are performed by a contractor. Security guard services are also provided 24 hours per day, 365 days per year by a security contractor. General cleaning and maintenance are provided by the management contractor. Major repairs to the electrical and mechanical systems are provided by City employees or outside service companies. Landscaping services are contracted by Evanston Place apartments and the City pays a portion of the total costs of this contract.

FY 2006-2007 Objectives

- Using an engineering consultant, develop a 5-year program of maintenance and repairs by November 15, 2006
- Evaluate lighting fixtures and develop cost estimates for replacing overhead lighting system and painting ceilings on public parking levels of this garage by October 1, 2006

Revenue Projections

The 2006-2007 water fund revenues are projected to remain stable. Revenue projection for sale of water to the Village of Skokie was revised slightly downward to reflect actual water sales over the past 5 years. Revenue from the sale of water to the Northwest Water Commission was projected to increase 2% based on contract provisions.

City of Evanston

Water Fund Summary

Notes for Financial Summary

The overall operating budget request represents a 2.4% increase over the 2005/2006 appropriation level. There are no major changes to the operating or capital budgets.

Performance Report on FY 2005-2006 Major Program Objectives

During FY 2005-2006 the Water Division has continued to work on a number of capital improvement projects as well as the continued maintenance and operations of the facilities. Proposals were solicited for the preparation of a water and sewer rate study. The study has been completed and results planned for council presentation in April 2006.

Completed this spring were the construction of new garages, an accessway from the chemical building to the chlorine facility, and the installation of a chlorine scrubber. Specifications were prepared, a contract was awarded, and construction is underway for the replacement of the membrane roofs on the Filter Building headhouse and garages. A request for proposal was prepared and a consultant hired to investigate and prepare conceptual design and costs for expanding the Administrative Building and Filtration Workshop.

Staff has worked closely with engineers and contractors in the completion of new water main on Chicago Avenue from South Blvd. to Howard St.; on Dempster from Judson to Forest; on Main St. from Ashland to Dodge; and on Fowler from Dempster to Church. In addition, Distribution division staff has installed a new in-house water main on Haven between Orrington and Shiridan. Our crews installed over 1400 feet of new water main on McDaniel and Bradley, replacing the badly deteriorated pipe that was continuously breaking. Plans were also submitted into the IEPA for a permit to install new water main on Payne Street between Crawford and Prospect. This section will be done by in-house crews in the spring of 2006.

The Filtration Division replaced three 16-inch gate valves in the basins to improve sludge removal. The valves were purchased, the basin dewatered and crews installed the valves in-house. A new booster pump was purchased for the chlorination system and was installed in the fall.

The Pumping Division has completed the installation of High Lift Pumping Unit #7. This work was done by in-house mechanics. The division has also completed the replacement of the gasoline engine on Low Lift Pumping Unit #4 with a natural gas engine. The division is working closely with the contractor overseeing the installation of Low Lift Pumping Unit #7.

The Meter Division has been continuing the replacement of the older style meters (Trident 8s) with new meters that provide better remote reading resolution and leak detection. Due to the extensive amount of construction activities in the City this season, Meter Division crews have spent a substantial amount of time locating underground utilities for contractors.

2006-2007 Department Initiatives

1. The Water Division continues to strive to be a leader in the public drinking water industry by providing high quality water to the over 350,000 customers. Our number one initiative is to continue vigilantly monitoring the quality and quantity of water provided
2. In 2006-2007 we will be looking at the feasibility of expanding the Administrative Building to enable more effective service
3. The division is continuing to work to improve Evanston's Distribution System through continuous field monitoring and planning for needed replacements and repairs. One initiative is to expand the hydraulic model to include the determination of flow patterns and associated water quality
4. Customer service remains a central focus as we look at new water billing software and work to integrate this system with other financial systems and GIS to improve our ability to provide fast and accurate data to the public

City of Evanston

Water Fund

7100 – Administration

Description of Major Activities

The administrative staff consists of the superintendent, two assistant superintendents, an executive secretary, and one-half of the salary for the GIS analyst. The superintendent guides, promotes, checks, implements and oversees the total operation of the water and sewer utilities. This includes planning, budgeting, training, safety management, and engineering. The assistant superintendent of operations provides direct support, which relates to the following business units: Operating Maintenance, Pumping, Filtration, Distribution, and Sewer. The assistant superintendent of administration oversees the office staff, meter division, and laboratory functions as it relates to compliance with federal and state regulations. This includes preparation of the budgets, personnel functions, and regulatory reporting.

FY 2006-2007 Objectives

- To work with engineers to determine the feasibility of expanding the administrative building and the filtration division workshop to enhance performance by June 1, 2006
- To work with the Finance Department toward the installation of new water billing software compatible with existing meter reading and financial systems to improve water billing efficiency by February 28, 2007

Water Fund

7105 – Pumping Division

Description of Major Activities

This program element operates the low lift and high lift pumping units. The six low lift pumps, with a daily rated capacity of 130 million gallons, take water from the intake system and pump it to the treatment plant. Eight high lift pumps, with a daily rated capacity of 147 million gallons, pump the finished treated water to the distribution system. Water plant operators, working rotating shifts on a weekly basis, provide around-the-clock supervision. The master mechanics maintain and repair the pumping units, hydraulic and electric controls, instruments, electric switch gear, standby engines, heating plant, pipe systems, building and grounds.

The Pumping Division operates and maintains four booster pumping stations with seven pumps, two 4.9 million gallon storage tanks, one 5 million gallon storage tank, and one 7.5 million gallon storage tank. All equipment is remotely controlled over leased telephone lines to maintain pressure in the distribution system. This element also provides pumping to the Northwest Water Commission and remotely controls an in-line booster station with three booster pumps and control valves at the Northwest Water Commission reservoir.

FY 2006-2007 Objectives

- To disassemble, inspect, and make all necessary repairs and replace worn parts on Low Lift Pumping Unit # 9 and High Lift Pumping Unit #2 by February 28, 2006
- To oversee the contractor selected to tuckpoint the pumping facility during the summer, 2006
- To assist outside contractor in the retubing of the east boiler to ensure safety and increase operating efficiency by February 28, 2006
- To install second vacuum pump and tank in low lift basement, ensuring that proper priming and maintenance of the low lift pumps occur at all times, by February 28, 2006

Water Fund

7110 – Filtration Division

Description of Major Activities

The Water Filtration element provides supervision for the operation of chemical storage facilities, chemical feed equipment, mixing and settling basins, and the filter and backwash system. Filter plant operators work rotating shifts, with one operator on duty at all times to monitor the operation of all treatment equipment, perform laboratory tests, and make adjustments as needed to meet water demands that vary with the seasons, weather, and time of day.

Maintenance personnel perform maintenance and repairs of 24 filters, chemical feeders, control equipment, motors, pipe systems, and other related systems to provide reliable service. The buildings and grounds assigned are also maintained by division personnel. Maintenance is performed twice per year on the flocculating equipment, settling basins, detention tanks, and clear wells.

Metropolitan Water Reclamation District of Greater Chicago user charges for basin sludge disposal are funded in this element. The water chemist monitors and tests the quality of the water at various stages of its treatment. The latest technology available and modern instruments are used in the analysis of the finished water. Changes in chemical feed rates are made by the chief of the filtration division and chemist to provide water of the best possible quality with the lowest expenditure for chemicals. Dutch elm cultures are analyzed by the chemist for the division of Parks and Forestry.

FY 2006-2007 Objectives

- To install digital scales under the alum and polymer day tanks to improve tracking of chemical feeds by February 28, 2007
- To install 24 flow and head-loss transmitters on the west filter control panels by February 28, 2007

Water Fund

7115 – Distribution

Description of Major Activities

The Water Distribution element repairs water mains and a portion of customer service lines, replaces or adjusts service boxes and valve vaults and inspects and maintains fire hydrants. Additions are made to the distribution system (i.e. short sections of water mains, valves, hydrants and new service taps) and routine maintenance is performed with equipment and personnel funded from this program element.

Other services include; maintenance and repair of water meters; replacement of water pipes when disrupted in digging, backfilling, and temporary asphalt of street openings; locations and measurements of services/mains for other utilities for contractors; snow plowing assigned parking lots; removal of snow around hydrants; and the on-the-job training of personnel.

FY 2006-2007 Objectives

- To install 400 feet of 8 inch water main on Payne Street between Crawford and Prospect, replacing the existing deteriorated 6" water main, to improve hydraulics in the area and to eliminate maintenance concerns by November 1, 2006
- To install 400 feet of 8 inch water main on Hayes Street between Crawford and Prospect, replacing the existing deteriorated 6" water main, to improve hydraulics in the area and to eliminate maintenance concerns by November 1, 2006
- To insure that all necessary repairs and replacements to water distribution assets are done prior to all street resurfacing

Water Fund

7120 – Meter Maintenance

Description of Major Activities

The Water Meter Maintenance element provides for the coordination and scheduling for customer services, including special meter readings and removal, testing, repair, and installation of water meters. It also provides customers with an emergency water connection when there is a service-line failure. Inspections are made for high or low water consumption. This element establishes accounts for new customers, reviews water usages prior to billing, shuts off delinquent accounts, locates boxes and shuts off water for plumbing repairs, and checks on water cooled air conditioners and fire lines to large buildings. The meter division also maintains the remote meter reading equipment associated with the automatic meter reading system.

FY 2006-2007 Objectives

- By February 28, 2007, replace 300 of the the older-style residential meters (Trident 8s), which were installed in 1985, with newer-style meters that have leak detectors and better resolution for meter reading
- To study and test various styles of meters, designed to register both high and low flows, to determine design with the fewest maintenance problems for our water system, by February 28, 2007

Ongoing Activity Measures	2004-2005 Actual	2005-2006 Actual	2006-2007 Projected

7125 – Other Operating Expenses

Description of Major Activities

This element provides for special operating expenses such as worker's compensation insurance, property insurance, water billing and other administrative charges paid to the City's General Fund. These expenditures reflect services and personnel charges that are not ongoing, or are not generally anticipated in multiple budget years. Operating expenses that are directly related to the operation and maintenance of Evanston's water system are accounted for in other Water Fund accounts, such as Administration, Pumping, Filtration, Distribution, and Meter Maintenance.

Description of Major Activities

This element provides for the scheduled replacement of existing capital equipment as well as any required additions to the inventory of equipment in the water system. The expenditures reflected here do not represent the large capital projects undertaken by the water department and which are generally funded through the Capital Improvement Plan. Information regarding large multi-year capital improvement projects can be found in the Capital Improvement Plan, located at the back of the City of Evanston Budget.

7160 – 7185 Transfers

Description of Major Activities

This element assures that the appropriate amount of funding is transferred to the water utility depreciation reserve, bond reserve, and improvement and extension accounts. Funds from the depreciation reserve and improvement and extension account provide monies for the 2004/05 Capital Improvement Program. Funds are transferred to the General Fund as a return on investment.

7200 – Debt Service

Description of Major Activities

In November 1997 the City issued Series 1997 Water Revenue Refunding bonds in the amount of \$10,485,000. The proceeds were used to retire, on January 1, 1998, the outstanding balance of Series 1980, 1988, and 1990 water revenue bonds. The 2005/06 debt service payment on this issue is \$427,600.

In 1999 the City issued Series 1999 Water Revenue bonds in the amount of \$3,500,000. The 2005/06 debt service on this issue is \$320,200.

In September 2002 the City issued Series 2002 Water Revenue Refunding bonds in the amount of \$2,400,000. The proceeds were used to retire the 1992 water revenue bonds. The 2005/06 debt service payment on the issue is \$294,500.

Notes for Financial Summary

There are no major changes in this year's budget proposal for the Sewer Fund. The budget request is consistent with the recently completed Sewer Rate Study. Debt Service during the 2006/2007 FY is projected to be 77% of the total budget amount. No increase in the sewer rate is projected.

Revenue Projections

Sewer Revenue projections are consistent with the Sewer Rate Study. Projected revenues are slightly less than the 05/06 revenue that is estimated to be generated by this year's higher than normal water sales.

City of Evanston

Sewer Fund Summary

Performance Report on FY 2005-2006 Major Program Objectives

During 2005-2006 the Sewer Division crew cleaned over 11,500 feet of sewer pipeline and 123 drainage structures. Division personnel have replaced 20 drainage structures and installed 9 new ones. The division has televised 79,242 linear feet of sewer mains to determine the condition to ensure that any needed repairs are made prior to any future planned construction in the area.

During the first six months of the 2005-2006 fiscal year, construction on the Long Range Sewer Improvement Program continued. Contractors are nearly complete with the work associated with the Phase X, Contract A project. This work has been located in the area south of Davis Street, east of Hinman, and north of South Blvd. It involved the installation of a relief sewer and the replacement of some portions of the water main. Phase X, Contract B began this year which involves the installation of flow restrictors in catch basins in the Phase X, Contract A area. Also, as a part of this contract work is underway installing relief sewers and some new water main in the area east of the high school, between Davis and Greenwood. Engineers completed the plans and drawings for the Colfax/Bryant storm sewer. This project was bid this fall. Design was also completed on the Basin S82B Project. Construction on both the Colfax/Bryant project and Basin S82B began early Spring 2006. This work will involve replacement of portions of the existing combined sewer and water main and the installation of relief sewers in the areas south of Noyes St, east of Sherman Ave and east of Sheridan Rd.

2006-2007 Department Initiatives

1. To increase the number of catch basins cleaned by in-house crews, reducing the amount of cleaning previously contracted
2. This is made possible by the purchase of an additional sewer cleaning machine
3. Work to identify manholes that are structurally unstable and evaluating these structures to determine if rehabilitation can be done by the lining method
4. Continue to utilize the Cityworks Maintenance Management system, and move toward making data available to crews in the field electronically, for more efficient and effective operations

City of Evanston
Sewer Fund

2006-2007 SEWER SERVICE CHARGE CALCULATION

Ordinance 94-0-05, adopted August 15, 2005 established the sewer rate as of August 31, 2005. In accordance with this ordinance, the rate as depicted in the Fiscal Year 2006-2007 budget is \$3.94 per one hundred (100) cubic feet of water consumed.

Estimated Meter Water Usage in One Hundred Cubic Feet (CCF) for Evanston Customers:
4,187,500 CCF

Operating and Maintenance User Charge	Capital User Charge	Debt Service User Charge
Operating and Maintenance Costs: \$2,855,300	Capital Costs: \$998,800	Debt Service Costs: \$12,794,900
Investment Income: \$150,000		
O & M Charge Per CCF: \$0.64	Capital Charge per CCF: \$0.24	Debt Service Charge per CCF: \$3.06
Total User Charge : \$3.94		

CALCULATIONS

OPERATING USER CHARGE =
$$\frac{(\text{Operating Costs}) - (\text{Investment Income})}{(\text{Metered Water Usage})}$$

CAPITAL USER CHARGE =

TOTAL USER CHARGE = (Debt Service Charge) + (Operating & Maintenance Charge) + (Capital Charge)

City of Evanston

Sewer Fund

7400 – Sewer Operations & Maintenance

Description of Major Activities

The ongoing tasks of the Sewer Maintenance division are to rod sewer lines, either on a routine basis, in known trouble areas, or when lines are obstructed or backed up due to a pipe failure. This element also provides cleaning, repairing and replacing of catch basins and manholes; replaces old sewer pipes that have deteriorated; and adjusts frames and grates on street resurfacing projects.

Miscellaneous work includes restoration of lawns or parkways damaged by sewer system work, maintenance of the south tank storage area, inspection and personal contact with residents to identify sewer problems and determine responsibility (private or City), and assistance to other departments in emergency repair work and snow plowing.

FY 2006-2007 Objectives

- To clean over 5,000 feet of large diameter sewers with in-house equipment and crews by February 28, 2007
- To televise 30,000 feet of large diameter sewers with in-house equipment and crews by February 28, 2007
- To inspect and evaluate 1,000 manholes for possible rehabilitation by lining by February 28, 2007
- To complete 15 sewer spot repairs with in-house equipment and crews by February 28, 2007

Ongoing Activity Measures	2004-2005 Actual	2005-2006 Actual	2006-2007 Projected
Repairs to manholes, basins, and inlets	252	141	160
Basins and inlets cleaned	254	588	3,000
Number of feet of sewer pipe rodded	36,512	22,881	25,000

Sewer Fund

7410 – Other Operating Expenses

Description of Major Activities

This element provides for special operating expenses including pension contributions, service charge bill and administrative charges paid to the City's General Fund. These expenditures reflect services and personnel charges that are not ongoing, or are not generally anticipated in multiple budget years. Operating expenses that are directly related to the operation and maintenance of Evanston's sewer system are accounted for in the Sewer Operations and Maintenance business unit.

7415 – Sewer Capital Outlay

Description of Major Activities

This element provides for scheduled replacements or additions to the capital equipment of the sewer system. The expenditures reflected here do not represent the large capital projects undertaken by the sewer department and which are generally funded through the Capital Improvement Plan. Information regarding large multi-year capital improvement projects can be found in the Capital Improvement Plan, located at the back of the City of Evanston Budget.

Sewer Fund

7420 – Capital Improvement Account

Description of Major Activities

In order to reduce backups and basement flooding, sewer improvements are required to either replace or repair existing sewers that have experienced structural failures, or to increase the size of sewers that are too small to convey an adequate amount of storm water during intense rainstorms. Funding in this element provides for emergency repairs, improvements required when the surface of the street is affected by special assessment paving projects or resurfacing, catch basin replacements, and sewer lining. In addition, funds are provided to the General Fund for administrative expenses.

City of Evanston

Sewer Fund

7490 – Sewer Debt Service

Description of Major Activities

The Long Range Sewer Improvement Program is comprised of nearly \$200 million dollars of improvements to the City's sewer system to eliminate basement sewer backups and mitigate street flooding as outlined in the Sewer System Facilities Plan Report. The majority of the funding for these improvements has been obtained from the Illinois Environmental Protection Agency (IEPA) revolving loan program. A portion of the funding has been obtained from GO Bonds. The total debt service for repayment of these obligations in FY 2006/2007 is anticipated to be \$12,794,900. A summary of the debt service is provided below:

In 1991, the City entered into a loan agreement with the Illinois Environmental Protection Agency (IEPA) for Phase I of the planned long-range improvements as outlined in the Sewer System Facilities Plan Report. In 1992, G.O. bonds totaling \$23,700,000 were sold to finance construction of the Phase II Improvements. G.O. Anticipation bonds to finance the Phase III improvements, including the Main Street Combined Sewer Project, were sold in 1993 in the amount of \$22,175,000. Also during 1993 the City received approval from the IEPA Loan Fund for \$10,840,969 in loan funds to cover a portion of the Phase III costs. As a result of these loan funds, the net amount due from G.O. bond sales for Phase III improvements was reduced to \$12,180,000.

The Phase III IEPA loan agreement was provided in three separate agreements: Main Street, Contract A, and Contract B. The Phase IV IEPA loan agreement was provided in four separate agreements: Contracts A, B, C, and D. Phase V loan funds were awarded in 1996 and were provided in three separate agreements; Contracts A, B, and C.

Phase VII loan agreements were awarded in six separate agreements. A \$3,000,000 bond was issued in 1998 to fund costs that were not eligible for IEPA funding associated with the sewer improvement program.

The Phase VI project was divided into three contracts (A, B, and C). Phase VI, Contract A was awarded IEPA loan funds in 1999. Phase VI, Contract B was awarded IEPA loan funds in 2001; however, the project was stopped as a result of a court order. Phase VI, Contract C was awarded IEPA funding in 2002 and loan repayments began in the 2003-2004 fiscal year.

The Phase VIII project was divided into two separate contracts, and both Phase VIII, Contract A, and Contract B have been funded from the IEPA. Repayment of the following debt began during the 2002-2003 fiscal year: Phase VI, Contract A; Phase VII, Contract H; and Phase VIII, Contract A. For Phase IX, Contract A, IEPA loan funds have been received and repayment began during the 2004-2005 fiscal year. Phase X, Contract A and Contract B were funded primarily through the IEPA. Repayment of Phase X, Contract A began in fiscal year 2005-2006. Repayment of Phase X, Contract B is anticipated to begin in the 2006-2007 fiscal year.

Notes for Financial Summary

The Fleet Service Fund is now operating with cash and all issued debt has been retired.

Fleet Services Fund Summary

Performance Report on FY 2005-2006 Major Program Objectives

The Five Year Vehicle Replacement Plan was updated. The division completed training of the mechanics and operators of new vehicles prior to the new vehicle being placed into service - with each employee receiving at least one training program to enhance technical skills. All programmed vehicle replacements were purchased prior to January of 2006. All snowplows and spreaders were sandblasted and painted prior to December, 2005.

2006-2007 Department Initiatives

1. Prepare an update of the Five Year Vehicle Replacement Plan
2. Complete training of each employee prior to placing a new vehicle into service
3. Provide each employee with at least one training program annually, to enhance technical and interpersonal skills
4. Repair, sandblast and repaint all leaf pushers, snowplows and spreaders as needed
5. Work with the City's safety director to create a safety program for all mechanics and parts technicians

City of Evanston

Fleet Service Fund
7705 – General Support

Description of Major Activities

Fleet Service General Support maintains operating cost records, provides billing and chargeable data to all user City departments, develops vehicle specifications, and purchases vehicular and other equipment. Overall supervision of department personnel is provided, as is training, direction and coordination of all activities to assure effective and efficient operations.

Key emphasis is placed on reducing down time; that is the time a vehicle or a piece of equipment is out of service for repair.

FY 2006-2007 Objectives

- To prepare an update of the Five Year Vehicle Replacement Plan by July, 2006
- To complete purchase of all programmed vehicles and equipment before January 2007
- To implement a monthly safety program with rotating presenters (fleet supervisors) by April 2006
- To paint the interior of the shop areas by February 2007

Ongoing Activity Measures	2004-2005 Actual	2005-2006 Actual	2006-2007 Projected
Computer training hours per employee	5	2	2
Safety training hours per person	4	3	12
Specifications written for new vehicles	13	19	20

7710 – Major Maintenance

Description of Major Activities

The Major Maintenance element provides repair services (except body repairs) to all City vehicles, including Fire and Police emergency vehicles, on a scheduled and a non-scheduled basis. A vehicle parts inventory for all vehicles is maintained and controlled via a computerized fleet management program. The Major Maintenance division responds to emergency road repairs and breakdowns. In addition, specialized non-vehicular equipment with gasoline or diesel engines, such as stump cutters and chippers, are maintained. All equipment attachments, such as blades, plows, and spreaders are also repaired.

FY 2006-2007 Objectives

- Order 100% of the replacement scheduled vehicles by January 2007
- Complete training of mechanics and operators prior to placing new vehicles into service
- Provide each mechanic and supervisor with at least one training program annually to enhance technical and interpersonal skills
- Perform at least one A, B, D and E pm service on every City vehicle and piece of equipment during the year

Fleet Service Fund

7715 – Vehicle Body Maintenance

Description of Major Activities

Personnel in this element repair minor damage to City vehicles resulting from accidents, rusting, and deteriorating parts. The service technicians perform preventative maintenance work such as oil changes to cars and light duty trucks. Other work includes changing tires, lights, and wiper blades and other non-highly skilled vehicle and equipment repairs. Service technicians also serve as porters, picking up and delivering City vehicles to local dealer agencies for warranty repair work. Installation of special/emergency equipment such as light boards, radios, sirens and prisoner cages on police cars and other special use vehicles is outsourced, as is all major body damage repair work.

Funding for the maintenance of vehicles comes from the annual maintenance contributions charged to the department in which the vehicle is assigned and from insurance claims collected on behalf of the City.

FY 2006-2007 Objectives

- Repair all leaf pushers prior to September 2007
- Repair all snowplows prior to October 2007
- Sandblast and repaint all steel spreaders prior to October 2007
- Sandblast and repaint all small snowplows prior to October 2007

City of Evanston

Fleet Service Fund
7720 – Capital Outlay

Description of Major Activities

This element provides for the scheduled replacement of existing vehicles and automotive equipment for all City departments. Funds for the replacement of vehicles come from the annual depreciation contributions charged to the department to which the vehicle is assigned.

In addition to these resources, a \$2,225,000 Bond Issue in 1994, a \$1,940,000 Bond Issue in 1995, a \$1,510,000 Bond Issue in 1996, a \$1,265,000 Bond Issue in 1997, and a \$1,165,000 Bond Issue in 1998 have provided funds to replace older equipment in the fleet. In December 2005 the final bonds were retired. No additional bond issues are contemplated for vehicle replacement needs.

FY 2006-2007 Objectives

- Provide user departments with safe, appropriate, and economical vehicles that meet the needs of the various tasks performed
- Meet with user department personnel prior to development of specifications so that vehicles and equipment are ordered to accomplish the first objective

Ongoing Activity Measures	2004-2005 Actual	2005-2006 Actual	2006-2007 Projected

Notes for Financial Summary

Description of Major Activities

The City maintains excess liability coverage for general tort matters. The City's self-insured retention is \$2,000,000,000. The City maintains insurance in the additional areas of property, inland marine, and paramedic. Claims are recorded when a determinable loss has been incurred, including reported losses and an estimated amount for losses incurred, but not yet reported, at year-end.

The general liability claim account is administered by the Law Department. The workman's compensation account is administered by the Human Resources department.

FY 2006-2007 Objectives

- Reduce risk to the public and the City through prudent loss prevention measures
- Continue to implement third-party claims processing
- Collect and analyze loss of information from filed claims to identify and reduce the causes of loss as well as to establish internal benchmarking
- Facilitate funding of the Insurance Fund to maintain adequate reserves for claims

Notes for Financial Summary

Description of Major Activities

Every Illinois municipality having a population of not less than 5,000 and not more than 500,000 must have a Fire Pension fund, as prescribed in Chapter 108 1/2 - Article 4 of the Illinois Revised Statutes.

The Board of Trustees of the Firemen's Pension Board consists of the City clerk, fire chief, comptroller, three members chosen by the active firemen of the City, and one chosen from the retirees. The board has those powers set forth in the statutes, among which is the control and management of the Pension Fund.

Description of Major Activities

Every Illinois municipality having a population of not less than 5,000 and not more than 500,000 must have a Police Pension Fund, as prescribed in Chapter 108 1/2, Article 4 of the Illinois revised statutes.

The pension fund is administered by a five-member board, the majority of whom must be residents of Evanston. Two members of the board are appointed by the Mayor, two are elected by the active members of the regular police, and one member is elected by and from among the beneficiaries of the fund. The Board of Trustees of the Police Pension Fund has those powers and duties set forth by state statutes, among which powers and duties are the control and management of the fund.

** The overall change to the FTE count is due to:

3.9 Increases in service hours in the recreation department that total 135 hours per week & equate to 3.9 FTE.

-0.5 Decrease in FTE in the Human Relations Division.

1.0 Increase for a firefighter that will only be funded and hired for 1/2 of the budget year.

1.0 Increase for a police officer that will assist with the new police canine.

Explanation of Changes to FTE Count

City of
Evanston

CAPITAL IMPROVEMENT PLAN

Capital Improvement Program

The Capital Improvement Plan is a process by which the City designs a multi-year plan for major capital expenditure. It represents the City's plan for physical development. The program is reviewed each year to reflect changing priorities. It provides an ongoing framework for identifying capital requirements, scheduling projects over a period of years, coordinating related projects, and identifying future fiscal impacts. Generally the CIP includes improvements that are relatively expensive, have a multi-year useful life, and like capital outlay items, result in fixed assets. These include the construction of new buildings, additions to or renovations of existing buildings, construction of streets, sewer improvements, land purchases, and major software or equipment purchases. Due to the nature and total costs of the identified projects, bond proceeds are one of the major sources of revenue. The CIP is a dynamic process, with anticipated projects being changed, added, and deleted, from the plan as the five year timeline moves forward.

During the past several years staff has undertaken a variety of comprehensive assessments of many of the City's capital assets to provide a more complete understanding of the City's future needs. These have included: the Comprehensive Pavement Study; Parks, Forestry, and Recreation Strategic Plan; the analysis of the Civic Center; the Crown Center study, the Ten Year Sewer Improvement Program; Street Lighting; Chicago Avenue Corridor; Downtown Streetscape Audit; the assessments of Fire and Police Stations; the current development of the IS Strategic Plan, as well as development of the City's Strategic Plan. These studies serve as the foundation for the staff recommendations set forth in the attached Capital Improvement Plan. As we move forward we must continue to assess the ongoing infrastructure needs of the community.

Formal City Council adoption of the Capital Improvement Program indicates the City's commitment to the plan, but does not in itself authorize expenditures. The necessary funding mechanisms must be adopted each year to pay for the improvements – year one is the approved Capital Budget for which Council approval authorizes expenditures, with years two through five reflecting the City's plan for improvements. During the 2006-2007 Budget Process the Council approved a change in the Capital cycle, with the Fiscal Year 2007-2008 CIP being approved in May 2006, 10 months prior to the beginning of the fiscal year. This change in cycle was designed to allow projects to receive funding approval and begin the planning stages earlier in order to benefit from more advantageous bidding seasons and prepare construction to begin in early spring of the approved year. To allow for this change in cycle, and facilitate future planning, the 2006-2007 CIP does not contain a five year plan; rather it is a transitional year between the past cycle matching the fiscal year and the future years with adoption occurring in May.

Multi Year Capital Improvement Funding

The City of Evanston has developed a multi-year plan for capital improvement funding. This plan is part of the ongoing effort by the City Council and Management to meet the needs of our community, while limiting increases in the tax burden of the citizens of the City. This strategy includes managing the cost of capital projects, aiming for a steady annual increase of 4% on debt service payments, and utilizing alternative funding sources when possible. This year, due to the transition between adoption cycles, \$8 million will be allotted to capital improvements and \$2 million to the Insurance Fund to address future liability issues.

General Obligation Bonds Payable

The City issued general obligation bonds to provide funds for the acquisition and construction of major capital facilities. General obligation bonds have been issued for both governmental and business-type activities.

General Obligation bonds are direct obligations and pledge the full faith and credit of the City. These bonds generally are issued as 20 year serial bonds with equal amounts of principal maturing each year.

In November 2001, the City entered into an interest rate swap agreement with Bank of America relating to the City's \$19,000,000 General Obligation (GO) Variable Rate Demand Bonds, Series 2000A and the \$10,400,000 Variable Rate Demand Bonds, Series 2000C with a fixed rate of 3.125%, effective December 1, 2001 through November 30, 2005. During the 2005 fiscal year, the City paid an additional \$507,712 due to the swap agreement. Additional payments for the remainder of the agreement are estimated at approximately \$153,000. In November 2002 the City entered into a rate cap agreement with JP Morgan Chase Bank relating to the City's \$35,000,000 GO Variable Rate Demand Bond, Series 2002A and B, with a cap rate of 4.75% effective December 1, 2002 through November 30, 2005.

On May 13, 2004 the City issued Series 2004 \$13,355,000 in GO Bonds as a net interest cost of 4.6291740%. The proceeds are being used to partially finance the City's Long Range Capital Improvement Program and Special Assessment Alley Program.

On July 27, 2004 the City issued Series 2004B \$11,730,000 in GO Bonds at a net interest cost of 3.739542%. The proceeds are being used to partially refund \$11,085,000 of the 1997 bonds.

Annual debt service requirements to maturity for general obligation bonds are as follows:

Year Ending February 28 th	Governmental	Activities	Business-type	Activities
	<u>Principal</u>	<u>Interest</u>	<u>Principal</u>	<u>Interest</u>
2006	57,535,000	5,499,342	19,370,000	2,323,367
2007	6,765,000	3,706,794	2,635,000	1,445,218
2008	6,670,000	3,472,764	2,785,000	1,282,325
2009	5,415,000	3,216,629	2,980,000	1,109,885
2010	5,535,000	3,022,240	3,170,000	925,328
2011-2015	31,470,000	11,785,382	11,315,000	2,060,810
2016-2020	20,780,000	5,229,706	1,400,000	169,194
2021-2015	9,285,000	1,024,913	-	-
Total	143,455,000	36,957,770	43,655,000	9,316,126

Special Service District Bonds Payable

The City also issued debt in the Special Service District No. 5 fund to provide funds for the principal and interest payments on unlimited ad valorem tax bonds issued for this special taxing district.

Annual debt service requirements to maturity for special assessment bonds are as follows:

Year Ending February 28 th	Governmental	Activities
	<u>Principal</u>	<u>Interest</u>
2006	255,000	183,749
2007	265,000	170,563
2008	285,000	157,313
2009	295,000	143,063
2010	305,000	128,313
2011-2015	1,780,000	393,625
2016-2020	405,000	21,263
Total	3,590,000	1,197,886

Revenue Bonds Payable

The City also issued revenue bonds where the City pledges income derived from the acquired or constructed assets to pay debt service. The bonds were issued to finance construction projects related to the water treatment plant.

Revenue bond debt service requirements to maturity are as follows:

Year Ending February 28 th	Business type	Activities
	<u>Principal</u>	<u>Interest</u>
2006	865,000	177,355
2007	470,000	145,088
2008	485,000	128,713
2009	510,000	110,913
2010	525,000	91,556
2011-2015	1,720,000	159,988
Total	4,575,000	813,611

Notes Payable – Sewer IEPA Loans

As of February 28, 2005, the City currently has 23 outstanding loans from the IEPA. The City will repay the loans solely from revenues derived from the sewer system; the loans do not constitute a full faith and credit obligation of the City. They will be repaid with equal installments consisting of principal plus simple interest, on unpaid principal balances, over a period of 20 years. Initial principal balances will consist of disbursements and interest accrued during construction. Repayments begin not later than six months after completion of construction.

Notes payable – Sewer IEPA debt service requirements to maturity are as follows:

Year Ending February 28 th	Business-type	Activities
	<u>Principal</u>	<u>Interest</u>
2006	5,953,538	2,743,747
2007	6,372,036	2,679,152
2008	6,560,609	2,490,494
2009	6,754,849	2,296,167
2010	6,954,928	2,095,999
2011-2015	35,520,979	7,314,190
2016-2020	24,747,261	2,844,832
2021-2025	9,100,614	519,262
2026-2030	235,197	3,022
Total	102,200,011	22,986,865

Prior Year's General Obligation Bond Defeasances

In 1999, the City defeased a portion of Series 1994, Series 1995, and Series 1996 Corporate Purpose bonds, by placing a portion of the proceeds of Series 1999 Bonds in an irrevocable trust to provide for the advance refunding of the callable portion of the bonds.

In 2004, the City defeased a portion of Series 1997 Corporate Purpose bonds, by placing a portion of the proceeds of Series 2004B in an irrevocable escrow account.

The trust account assets and the liabilities for the defeased bonds are not included in the City's financial statements. At February 28, 2005, the following remaining outstanding balances are considered defeased:

GO Series	Original Amount Defeased	Outstanding Defeased Amounts
1996	9,765,000	9,765,000
1997	11,085,000	11,085,000

The outstanding balances of Series 1996 and 1997, not defeased at February 28, 2005, are recorded as a liability in the City's financial statements. Those balances are as follows:

GO Series	
1996	1,040,000
1997	16,660,000

Prior Year Project Review

Environment

Final restoration work is underway to complete the Long Range Sewer Improvement Program Phase 10 Contract A project. This project involved the installation of relief sewers in the area south of Davis Street, east of Hinman, and north of South Blvd as well as the area east of the High School between Davis and Greenwood. Phase 10, Contract B which involves the installation of restrictors is currently underway. In addition, in 2005 the relief sewer was extended on Lee Street from Maple to Ridge.

The membrane roofs were replaced on the Water Filter Building headhouse and garages at the Water Plant Facility. In 2005 water main was replaced on Chicago Avenue from South Blvd. to Howard Street, on Dempster from Judson to Forest, on Main Street from Ashland to Dodge and on Fowler from Dempster to Church. A number of sections of water main are currently being replaced as a part of the 2006 construction season.

Parks, Forestry, and Recreation

Several projects have been completed in the recent year – Ackerman Park tennis courts, new baseball backstops at James Park, a renovation of Noyes Gallery which was funded by a grant, and general renovations at Leahy Park, Levinson Tot Lot, Cartwright Park, and Eggleston Park.

Transportation

The 2006-2007 CIP represented a large increase in the funding allocated to street resurfacing and maintenance. This funding has been fully programmed and construction projects are now beginning. By maintaining the increased allocation staff estimates that in approximately five years the City will have caught up with deferred street resurfacing and be on top of maintaining this vital and extensive aspect of the City infrastructure.

Facilities

Facilities Management has completed a wide variety of projects this year including new roofs at Chandler and Fleetwood Jourdain, a new fire alarm system at Fleetwood and a new roof, sprinkler system and ventilation system at the Municipal Service Center. Additionally, Sherman Plaza Garage has been a large project overseen by the Facilities Management department - this project has been in progress for four years and will be ready for Evanstonians to utilize in summer 2006.

Information Systems

The implementation of the JD Edwards financial system has been completed. Responsibility for the various aspects of the system and day to day administration has been transitioned to internal city staff and plans are being implemented to expand staff training in order for end users to more fully utilize all the available resources that the system provides.

Interdepartmental Memorandum

To: Julia A. Carroll, City Manager
From: Capital Improvement Team
Subject: Annual Capital Improvement Program
Date: December 6, 2005

ISSUE

The City of Evanston's Capital Improvement Program is approved in February each year in conjunction with the City Council's approval of the operating budget. Staff recommends that a modified schedule be considered.

BACKGROUND

The City of Evanston adopted its first Capital Improvement Program in the early 1980's. Each year the proposed Five Year Capital Improvement Program is used by the City Council to guide capital investments in order to provide community facilities that function well and contribute to the attractiveness, public health and safety of the City. The first year of the Capital Program is the Capital Budget, which is approved concurrently to the City's operating budget in February. The remaining four years of the Plan provide general planning direction for staff for future years' development.

The City's capital infrastructure continues to age and we estimate that the total cost to address all of the City's capital needs exceeds \$300 million. To date, our annual funding level has been \$6 million. The annual level of funding has been established to complement the operating fund and not to place a greater burden on the property owners since the real estate property tax revenue is the dedicated revenue stream for the annual debt service. Annual funding of \$6 million will not allow the City to meet our infrastructure needs. During the past several years, while we have sought and received federal and state funds for more projects, our needs far exceed what is available. In addition, the City has attempted to establish a mix of bonded debt and pay-as-you-go financing in the funding of capital projects. We no longer bond for the fleet replacement which means that we no longer take 20 years to pay for the purchase of a vehicle or piece of equipment that has a much shorter useful life.

In 2003, the City Council agreed to:

- \$12 Million Capital Plan for 5 years for:
 - o Capital Projects
 - o Insurance Fund
- \$100 million debt limit
- 4% Annual debt service levy

Since that time, fiscal constraints have been such that we achieved the following:

- 2003- Issuance
 - o \$ 9 million Capital Program
 - o \$ 3 million Insurance Fund
- 2004 – Issuance
 - o \$5.5 million Capital Program
 - o \$8 million Insurance Fund

CAPITAL PROJECTS PLANNING & IMPLEMENTATION

After the Budget is approved in March, staff begins to plan for project implementation. Many projects require extensive planning, plan development, bidding, and construction. It is not unusual for a project to take 12 to 24 months to complete. Therefore, few projects are completed in the year they are funded. A very rough schedule is usually:

- a) Selection of a consultant, architect, etc. (2-3 months);
- b) Developing a concept plan (3-4 months);
- c) Public and/or interdepartmental staff input (2-3 months);
- d) Development of plans and specifications (3-5 months, depending upon the scope of the project);
- e) Bidding the project (2-3 months)
- f) City Council approval of the project/contractor and start of construction (1-2 months)

Obviously, the scope of a project will greatly impact the project schedule. During the past several years, we have tried to plan projects so the City was bonding the least amount of money required to complete projects. We have been able to phase projects to reduce the amount of bonding required any given year; and enable more projects to be funded in any given year. The phasing of projects, however, may have some negative results:

- o will the additional funds be approved;
- o potential cost increases due to labor and material increases
- o other emergencies arise during a year requiring the funds
- o grants are not approved so adequate funding is not available

The goal is to use the capital funds in the most efficient and effective manner. The time to plan and implement a project may extend beyond one funding cycle but the timing of the cycle presents issues for staff. There are many times that because of the time to get a project to the bidding stage, a project will go to bid in the height of the construction season. The result of that is that there are many projects which do not receive multiple bids and some where no one bids. In addition, because funds to initiate the planning phase may not be available until the late summer, sometime staff is unable to engage the consultant and begin a new project. These are some examples which we believe are detrimental to the capital program, and while the Capital Improvement Team supports phasing projects, we recommend a change in the timing of Capital Improvement funding cycle year.

CAPITAL IMPROVEMENT CYCLE

We recommend that the approval of the Five Year Capital Improvement Program be changed from February with the operating budget to May. Thus the 2007-2011 would be approved in May 2006. In the past, the City did approve the Capital Budget in May.

Former City Manager Eric Anderson recommended that the review of the Capital Budget be concurrent with the operating budget and the schedule change was made. While there is some benefit to review and approval of the Capital Budget concurrent to the operating budget, we believe that there are planning and implementation issues which suggest that a change in the schedule is prudent.

There are several reasons for the recommendation to change the review and approval of the Capital Budget to May. First, this change will enable staff to do more planning in the summer and fall and bid projects in winter when contractors are developing their work schedule for the following spring and summer. Second, the city should receive more competitive bids and a greater number of bids. Third, the City Council's adoption of the Strategic Plan in February may result in new priorities which need to be incorporated into the five year capital program.

We are recommending that we begin this modified process for May 2006. Therefore, staff will begin to plan the five year 2007 Capital Program in March 2006. The proposed five year plan would be presented to the Administration & Public Works Committee and City Council for consideration in May and June. The recommended schedule will also more time for consideration by the Committee and Council. A new schedule will allow for more long-term planning by the City Council members. There are many long range projects which require policy discussions and a modified schedule will facilitate such opportunities for policy discussions. Staff is recommending approval of a change in the calendar for capital planning.

2006 CAPITAL BUDGET

Staff does not want to delay any projects so a one year Capital Budget will be transmitted with the 2006 Budget. This 2006 Budget will focus on the continuation of projects already underway and/or projects where matching funds are necessary to maintain a federal/state grant. We look forward to discussing the 2006 Capital Budget with the Council in January.

RECOMMENDATION

It is recommended by the Capital Improvement Team that:

1. The 2006 Capital Budget be transmitted in December for consideration by the City Council in conjunction with the 2006 City Budget;
2. The Capital Improvement Program Approval be rescheduled to May of every calendar year; and
3. The city staff presents the 2007-2011 Capital Improvement Program to the Administration & Public Works Committee and City Council in May 2006.

Capital Improvement Fund Policy

Capital Improvement Fund Policy

Section I: Objectives and Priorities

The overall goal for Evanston's capital improvement effort is:

A comprehensive capital improvement program that is used by decision makers to guide capital investments, make the best use of limited resources and provide community facilities that function well and contribute to the attractiveness, public health and safety of the City.

To accomplish this goal, a broad set of objectives and policies has been developed to guide preparation and monitoring of the capital improvement program. These broad objectives, priorities and policies adopted by the City Council guide staff each year as a capital program is developed and presented to the City Council for review and consideration.

Objectives

- Undertake a comprehensive assessment of all capital needs and develop a strategic plan to meet the city's capital needs, so that projects and funding are rationally sequenced, coordinated and kept on the public agenda.
- Undertake capital improvements that are needed to maintain existing public facilities, increase operating efficiency and reduce operating costs.
- Undertake capital investments that encourage and support economic development or directly produce income.
- Undertake capital improvements that are of the highest quality that the city can afford which enhance Evanston's physical appearance, public image, and quality of life and promote public health and safety.
- Limit the extent to which local property taxes are required to finance capital improvements.
- Plan all capital projects to meet ADA requirements.

Priorities

- Project major capital improvement replacement needs to cover a 20 to 30 year period so that a long-range capital maintenance plan can be developed.
- Set priorities for capital improvements and match projects with appropriate funding sources.
- Monitor implementation of the Capital Improvement Program through periodic capital improvement staff meetings and reports to the Administration and Public Works Committee.
- Undertake an annual review of capital improvement funding sources and an assessment of capital improvement projects proposed for the following years.
- Commit funds annually for improvements so that incremental progress can be made toward long-range goals.
- Coordinate planned capital improvement projects where opportunities exist to do so.
- Leverage local capital improvement funds to the extent possible.
- Give priority to projects that further the objectives of the Comprehensive General Plan.

More specific policies have also been written to guide the scheduling and prioritization of projects within each of the major project classifications.

Economic Development

- Make capital investments needed to realize the full potential of the Downtown Redevelopment.
- Coordinate improvements made in retail and commercial areas.
- Develop and implement programs to upgrade and maintain streetscapes in each neighborhood business district within the city.
- Develop and implement plans for capital needs of neighborhood economic development.

Environment

- Maintain water system improvements needed to ensure a safe and adequate water supply.
- Develop and implement programs to eliminate environmental hazards where they exist in City facilities and on public grounds.
- Participate in development of area wide solutions to the problem of solid waste disposal and promote local recycling and waste reduction efforts to minimize solid waste disposal requirements and conserve resources.
- Complete the long-range comprehensive sewer plan.

Parks and Recreation

- Rehabilitate parks through periodic replacement of pavement, athletic fields and courts, equipment, site furnishings, infrastructure and landscaping.
- Undertake improvements to enhance and protect the lakefront park system.
- Maintain Evanston's community recreational facilities to the high standard expected.
- Bring play equipment into compliance with current CPSC and ASTM safety guidelines and ADA requirements.

Public Buildings

- Consider life cycle costs (long-term costs of maintenance, operation, utilities and financing) in making decisions concerning construction, purchasing, disposal or rehabilitation of public facilities.
- Continue to undertake preventive maintenance, energy conservation, and rehabilitation programs for public buildings.
- Undertake projects needed to improve the security of public buildings and facilities.
- Complete the fire station construction and improvement plan.
- Complete the rehabilitation of the Police/Fire Headquarters.

- Undertake projects and improvement to municipal facilities to meet the standards of the Federal Americans with Disabilities Act (ADA).
- Develop and implement a plan for the municipal offices.
- Implement policy advocating art within city building projects, in compliance with Title 7, Chapter 16 of the City Code.

Transportation

- Improve the condition, efficiency and safety of Evanston's circulation system.
- Undertake improvements needed to keep municipal parking facilities well maintained, safe and attractive.
- Plan and implement expanded public parking inventory.
- Continue the City's programs for maintaining curbs, gutters and sidewalks.
- Evaluate all sidewalks and develop an improvement schedule.
- Enhance livability of neighborhoods by implementing various traffic controls.
- Improve Evanston's remaining unpaved streets and alleys.
- Implement a citywide bike plan and encourage intermodal transportation.
- Ensure adequate street lighting to balance crime prevention, safety and residential atmosphere.
- Develop plans and programs to improve the appearance and maintenance of rail embankments, viaducts and rail stations.

Section II: Fiscal Management

Capital Expenditure Policies

- Drawn from the long range capital needs list, a five year capital improvement program will be developed and updated annually, including anticipated funding sources.
- The City will maintain all its physical assets at a level adequate to protect the City's capital investment and to minimize future maintenance and replacement costs.
- The City will coordinate development of the capital improvement budget with the development of the operating budget. Future operating costs associated with new capital improvements will be projected and included in operating budget forecasts.
- If a new project (non-emergency) is identified during the fiscal year, staff shall prepare a report to the City Council describing the project, and if necessary recommend a decrease in another approved project so as not to alter the overall appropriation for the capital budget.

Capital Financing Policies

- Long-term borrowing will not be used to finance current operations or normal maintenance.
- Capital projects financed through the issuance of bonds will be financed for a period not to exceed the expected useful life of the project.
- The City will establish an appropriate mix of bonded debt and pay-as-you-go financing in the funding of capital projects. The City will strive to find more streams of revenue to support pay-as-you-go financing of its future capital improvements.
- Dedicated revenue stream options include but are not limited to excess funds, additional taxes (i.e. motor fuel tax for street improvements) and use of tax increment financing revenues as they become available.
- Outstanding tax-supported debt shall not exceed \$90 million.

Capital Project Planning and Cost Containment

- City staff will meet monthly to review the progress on all outstanding projects. Semi-annual reports will be presented to the Administration & Public Works Committee.
- Identification of funding opportunities should be included within the project development phase.
- Recognize that most projects will take at least two years to plan and implement.
- Where appropriate, separate project planning and execution costs, acknowledging that approving a study does not guarantee the implementation of the project.
- For any enterprise fund or storm water management fund that is supporting debt, an annual rate study will be performed to ensure that the fees or rates are sufficient to meet the debt service requirements.
- A five –year projection of revenues and expenditures for the general, special revenue, and enterprise funds should be prepared to provide strategic perspective to each annual budget process.

Contingencies Account

- A contingency line item should be included for each project equal to 10% of the project's estimated cost.
- A bond funded capital plan contingency account shall be included at the beginning of each fiscal year. This shall be equal to 10% of the current year general obligation capital improvement projects.

- Funds from the overall CIP contingency account can be used to supplement a project if none are available within the department's existing projects.
- Any unused contingency funds could be reallocated by the City Council at the end of the fiscal year.

Emergency Fund Reserves

- An emergency account within the capital improvement fund shall be established to fund emergency capital needs.
- The emergency account shall be initially funded through a one-time revenue source and replenished with a percentage of project surpluses at the end of the fiscal year.

Grants

- City staff should seek grants for projects which are in the current fiscal year, the five year plan, or fund a recognized city need.
- For projects not currently funded or in the 5 year plan, the Council must approve the reduction or elimination of a previously planned project
- If a grant is received, the original funds can be used in any of the following ways:
 - Reallocated to a new project within the 5 year plan within the same area.
 - Reallocated to a priority list of projects approved by the City Council during consideration of the capital plan.
 - Used to expand the scope of the existing project for which the grant is received.
 - Placed in the contingency fund for future matches or cost overruns.
 - Placed in an emergency fund for unanticipated projects.

Community Development Block Grant Funds

- A comprehensive program for all capital projects in the CDBG target area will be presented to the CDBG Committee.

Service Center Exterior Wall Repair

BU# 415225

Project Description	Estimated Project Costs	
During snow removal operations a portion of the brick wall in front of the fleet services vehicle storage area fell. The city's consulting engineers suggested replacement of the wall structure because, while there is rebar inserted into the concrete base of the brick wall, the rebar is not mortared to the brick and, consequently, there is no interior steel support for the wall. Total reconstruction of the courtyard brick wall is estimated at \$100,000.	Consulting	0
	Construction	100,000
	Furniture/Fixtures/Equipment	0
	Contingency	0
	Capital Expenditures	0
	Total	100,000
Justification	Funding Sources

Parks Capital Maintenance

BU# 415307

Project Description	Estimated Project Costs	
Contingency funding for unanticipated annual repairs throughout Evanston's Park system.	Consulting	0
	Construction	0
	Furniture/Fixtures/Equipment	0
	Contingency	0
	Capital Expenditures	50,000
	Total	50,000
Justification	Funding Sources	
Repair and replacement of failing or damaged site furnishing, play equipment and plant material on an ongoing basis to maintain the park system.	Reallocated Project Funds	50,000
	Select Funding Sources	0
	Select Funding Sources	0
	Total	50,000
Operational Impact		
Since this funding is designed to absorb unknown and unanticipated repairs, potential maintenance impacts are currently unknown.		

Smith Park Renovations

BU# 415362

Project Description	Estimated Project Costs	
Reconstruct playground and general park grounds and install safety lighting system. Improvements will be based on input from public involvement process scheduled to occur in fall 2006. Design is scheduled for fall/winter 2006. Construction is scheduled for spring/summer 2007.	Consulting	10,000
	Construction	430,000
	Furniture/Fixtures/Equipment	0
	Contingency	0
	Capital Expenditures	0
	Total	440,000
Justification	Funding Sources	
Park renovation is required due to failing play equipment, surfacing, edging, site furnishings and non-compliant (ADA, ASTM, CPSC) playground and pavement elements. A safety lighting system is required to enhance area security. This park was last renovated in 1992 with minimal playground safety modifications only.	Reallocated Project Funds	340,000
	CDBG Funds	100,000
	Select Funding Sources	0
	Total	440,000
Operational Impact		
This project will increase bi-annual maintenance costs to replenish ADA accessible wood chip playground surfacing. Currently, non ADA compliant wood chips are procured at no cost from the city's Forestry operations. The new playground will require the purchase of ADA compliant engineered, wood fiber mulch. It is not possible to quantify this increased cost at this time as the amount of material required will depend on the physical design and layout of the new playground area (to be determined through a public input process). Additional annual cost increases will occur with periodic maintenance needs for the proposed safety lighting system.		

Megowan Park Renovations

BU# 415372

Project Description	Estimated Project Costs	
Reconstruct playground, lighting and general park grounds. Improvements will be based on input from public involvement process scheduled to occur in fall 2006. Design is scheduled for fall/winter 2006. Construction is scheduled for spring/summer 2007.	Consulting	10,000
	Construction	340,000
	Furniture/Fixtures/Equipment	0

	Capital Expenditures	0
	Total	350,000
Justification	Funding Sources	
Park renovation is required due to failing play equipment, surfacing, edging, lighting, site furnishings and non-compliant (ADA, ASTM, CPSC) playground and pavement elements. This park was last renovated in 1988.	Bonds Property Tax Supported	350,000
	Select Funding Sources	0
	Select Funding Sources	0
	Total	350,000
	Operational Impact	
	This project will increase bi-annual maintenance costs to replenish ADA accessible wood chip playground surfacing. Currently, non ADA compliant wood chips are procured at no cost from the city's Forestry operations. The new playground will require the purchase of ADA compliant engineered, wood fiber mulch. It is not possible to quantify this increased cost at this time as the amount of material required will depend on the physical design and layout of the new playground area (to be determined through a public input process).	

Robert Crown Center Capital Maintenance

BU# 415553

Project Description	Estimated Project Costs	
Contingency funding for unanticipated annual repairs at the Crown Center and Ice Rink.	Consulting	0
	Construction	0
	Furniture/Fixtures/Equipment	0
	Contingency	0
	Capital Expenditures	40,000
	Total	40,000
Justification	Funding Sources	
Repair/replacement of failing equipment and systems on an ongoing basis to maintain service and building viability.	Reallocated Project Funds	40,000
	Select Funding Sources	0
	Select Funding Sources	0
	Total	40,000
	Operational Impact	
	Recreation programs will need to be scheduled around construction activities.	

Crown Center Fire Alarm

BU# 415564

Project Description	Estimated Project Costs	
This project will install an emergency fire alarm system throughout the entire Crown Center as required by the State Fire Marshall.	Consulting	0
	Construction	120,000
	Furniture/Fixtures/Equipment	0
	Contingency	0
	Capital Expenditures	0
	Total	120,000
Justification	Funding Sources	
Camp and preschool program licenses require this system to be in place to protect users.	Bonds Property Tax Supported	120,000
	Select Funding Sources	0
	Select Funding Sources	0
	Total	120,000
Operational Impact		
Recreation programs will need to be scheduled around construction activities.		

Police – Fire HQ Interior

BU# 415718

Project Description	Estimated Project Costs	
<u>Year 1 work:</u> Architectural Design Renovation of Youth Services and Men's/Women's locker rooms to convert into offices per concept design of the master plan Convert basement storage into "Evidence Technician offices" Convert basement locker room to bunker rooms for Men's & Women's <u>Year 2 work</u> Replace floor coverings at the Southeast corner of the second floor Replace doors to staircase and retread (damaged) rear staircase Abatement of ACM floor tile and mastic Replace existing carpet with combination of carpet & rubber tiles Install Fire alarm for Police Station Install parapet flashing to cover ceramic weep block Install exterior signage Replace/upgrade AHU of 911 Center Landscaping on Lake Ave. side	Consulting	150,000
	Construction	1,280,000
	Furniture/Fixtures/Equipment	0
	Contingency	25,000
	Capital Expenditures	0
	Total	1,430,000
Justification	Funding Sources	
The work described in this proposal represents the final phase (IV) in the renovation of the Police Facility. The majority of work required in Phase IV is required to fix the code compliance violations in the northwest second floor portion of the Police Facility. This entire area needs to be redesigned in order to provide points of egress. The second floor Locker Rooms will be moved to the basement area. The floor coverings are torn and need to be replaced. This is a safety issue. The fire alarm system is also a safety issue. Basement painting and lighting has been included as well as signage (interior and exterior). Overall, this phase represents needed changes required by code for the overall safety and security of employees and customers. Once Phase IV is completed, the Police Facility will be very functional.	GO Bonds	200,000
	Reallocated Project Funds	200,000
	Total	400,000
Operational Impact		
Bring second floor into exiting compliance, increase energy efficiency of existing mechanical equipment. Improve appearance on exterior and interior. Accommodate increased staff with new locker rooms. Upgrade flooring to reduce tripping hazards.		

Fire Station #5**BU# 415802**

Project Description	Estimated Project Costs	
Construct New Fire Station. Remove and replace Fire station #5. \$230,000 was allocated in 2004-05 CIP, and \$300,000 was allocated in the 05-06 CIP. Additional Costs are necessary to lease additional space adjacent to existing firehouse, re-hab that space, then put it back as it was after the Fire Dept. is finished with it.	Consulting	300,000
	Construction	4,700,000
	Furniture/Fixtures/Equipment	200,000
	Contingency	200,000
	Capital Expenditures	0
	Total	5,400,000
Justification	Funding Sources	
The existing facility is inadequate to properly house the existing fire fighting equipment. Newer, larger equipment requires increased space. The Fire Department is requesting additional meeting space and the use of the adjacent building during the construction period to maintain service to the northwest side of Evanston. These factors increase the anticipated project costs.	Bonds – Property Tax Supported	200,000
		0
		0
	Total	200,000
	Operational Impact	
	This new facility will be larger, and more complex. It will cost more in energy consumption, maintenance, and service agreements. It will most likely have an elevator which is not present in the existing station.	

Special Assessment Alley Paving – City Share**BU# 415854**

Project Description	Estimated Project Costs	
The Special Assessment alley paving program provides for paving of the existing gravel alleys. Alley construction includes the necessary sewer improvements, installation of drainage structures and paving the alley with Portland Cement Concrete, 8" thick.	Consulting	0
	Construction	600,000
	Furniture/Fixtures/Equipment	0
	Contingency	0
	Capital Expenditures	0
	Total	600,000
Justification	Funding Sources	
This alley paving program is quite popular and many residents prefer paved alleys instead of gravel alleys. The funding is for City's share of the Special Assessment alley construction cost, which is funded 50% by the City and 50% by the property owners.	Bonds Property Tax Supported	450,000
	CBDG Funds	150,000
	Select Funding Sources	0
	Select Funding Sources	0
	Total	600,000
	Operational Impact	
	Paved alleys are virtually maintenance-free for 50 years. This reduces maintenance costs for the Streets Division, eliminating the need to grade these alleys. Alley grading is the most expensive single maintenance operation for the streets area.	

Special Assessment Alley Paving – Private Share

BU# 415856

Project Description	Estimated Project Costs	
The Special Assessment alley paving program provides for paving of the existing gravel alleys. Alley construction includes the necessary sewer improvements, installation of drainage structures and paving the alley with Portland Cement Concrete, 8" thick.	Consulting	0
	Construction	500,000
	Furniture/Fixtures/Equipment	0
	Contingency	0
	Capital Expenditures	0
	Total	500,000
Justification	Funding Sources	
This alley paving program is quite popular and many residents prefer paved alleys instead of gravel alley construction cost, which is funded 50% by the City and 50% by the property owners.	Go/Special Assessment Bond	500,000
	Select Funding Sources	0
	Select Funding Sources	0
	Select Funding Sources	0
	Total	500,000
	Operational Impact	
	Paved alleys are virtually maintenance-free for 50 years. This reduces maintenance costs for the Streets Division, eliminating the need to grade these alleys. Alley grading is the most expensive single maintenance operation for the streets area.	

Street Resurfacing Program

BU# 415857

Project Description	Estimated Project Costs	
This is the annual program to resurface the streets in poor condition throughout the City.	Consulting	200,000
	Construction	4,000,000
	Furniture/Fixtures/Equipment	0
	Contingency	0
	Capital Expenditures	0
	Total	4,200,000
Justification	Funding Sources	
The City Council has approved a 5-year street resurfacing plan to address deficiencies. The 2007-2011 Street Resurfacing Plan is expected to gain City Council approval in the spring 2006. These improvements are coordinated with other infrastructure improvements to minimize utility work on newly paved streets.	Bonds Property Tax Supported	3,000,000
	Motor Fuels Tax	1,200,000
	Total	4,200,000
	Operational Impact	
	This street maintenance effort improves safety and ride quality for users, and reduces street maintenance costs. Finally, it extends pavement life and greatly delays road reconstruction which is a much more expensive undertaking than regular resurfacing.	

Traffic Signal System Studies

BU# 415862

Project Description	Estimated Project Costs	
Consultant studies to include intersection capacity analysis, accident reviews and pedestrian safety analysis at various locations. Recommendations will be made to City Council to determine what measures, if any, should be taken.	Consulting	50,000
	Construction	0
	Furniture/Fixtures/Equipment	0
	Contingency	0
	Capital Expenditures	0
	Total	50,000
Justification	Funding Sources	
A number of intersections are operating at low level of service, have pedestrian and vehicular conflicts, and have either accident problems or significant accident potential. The study will identify corrective measures that can be taken to mitigate the problems.	Bonds Property Tax Supported	50,000
		0
		0
	Total	50,000
	Operational Impact	
	Improved pedestrian and traffic safety and better flow of traffic. Also, it may ultimately reduce our liability as fewer accidents are anticipated. Maintenance costs should go down after the recommended measures are implemented.	

50/50 Curb & Sidewalk Program

BU# 415864

Project Description	Estimated Project Costs	
A cost sharing program that allows Evanston residents to have deteriorated sidewalks and curbs replaced. It pays 50% of the construction cost and the residents pay the remainder.	Consulting	0
	Construction	100,000
	Furniture/Fixtures/Equipment	0
	Contingency	0
	Capital Expenditures	0
	Total	100,000
Justification	Funding Sources	
Existing curbs & sidewalks are in poor condition at several locations throughout the City. The program encourages residents to participate in the program by cost sharing.	Bonds Property Tax Supported	100,000
		0
		0
	Total	100,000
	Operational Impact	
	The program reduces maintenance costs and eliminates drainage problems due to uneven curb grades. It makes the City more walkable and safer for pedestrians.	

Block Curb & Sidewalk Program

BU# 415867

Project Description	Estimated Project Costs	
This program provides for the replacement of deteriorated curbs and sidewalks for large areas, generally full blocks.	Consulting	0
	Construction	175,000
	Furniture/Fixtures/Equipment	0
	Contingency	0
	Capital Expenditures	0
	Total	175,000
Justification	Funding Sources	
As sidewalks and curbs age, they deteriorate and cause street ponding and uneven walking surfaces for pedestrians. This program is needed to eliminate these problems and to upgrade the City's infrastructure.	Bonds Property Tax Supported	100,000
	CDBG Funds	75,000
		0
	Total	175,000
	Operational Impact	
	The program reduces maintenance costs and eliminates drainage problems due to uneven curb grades. It makes the City more walkable and safer for pedestrians.	

Streetlight Upgrade Program

BU# 415868

Project Description	Estimated Project Costs	
Replacement of mercury vapor streetlights with induction lighting units in accordance with City Council approved plan.	Consulting	0
	Construction	500,000
	Furniture/Fixtures/Equipment	0
	Contingency	0
	Capital Expenditures	0
	Total	500,000
Justification	Funding Sources	
This program is needed to replace existing lighting system with a more environmentally friendly induction lighting system. The new lights will be brighter than the existing mercury vapor lights resulting in better visibility and safer street and sidewalks for pedestrians and motorists.	Bonds Property Tax Supported	500,000
		0
		0
	Total	500,000
	Operational Impact	
	Upon completion, the costs to maintain the system will be reduced due to the much longer bulb life and the lower power consumption.	

Traffic Signal Upgrades

BU# 415871

Project Description	Estimated Project Costs	
Upgrade two antiquated traffic signal systems.	Consulting	0
	Construction	250,000
	Furniture/Fixtures/Equipment	0
	Contingency	0
	Capital Expenditures	0
	Total	250,000
Justification	Funding Sources	
Traffic signals that have aged and need to be upgraded to latest standards. The selection of the two intersections is made from the EDOT 5-Year signal improvement plan and will be approved by the City Council.	Bonds Property Tax Supported	250,000
		0
		0
	Total	250,000
	Operational Impact	
	Improved pedestrian and traffic safety, as well as lower maintenance costs and power consumption costs. Intersections selected are typically at (or past) the end of their useful life.	

McCormick Blvd Reconstruction

BU# 415882

Project Description	Estimated Project Costs	
The McCormick Blvd. Reconstruction Project includes the roadway reconstruction of McCormick Blvd. from Golf/Emerson Street to Green Bay Rd. The project was bid in November, 2005 and the low bid of \$5.4 Million was approximately \$1.4 Million over the engineer's estimate of \$4.0 Million. The project was re-bid and has a bid opening date of January 20, 2006. It has been recommended that an additional \$1.4 Million in city funding be programmed to cover the cost of the project in case the January 20, 2006 low bid does not come in under the November low bid amount.	Consulting	0
	Construction	1,400,000
	Furniture/Fixtures/Equipment	0
	Contingency	0
	Capital Expenditures	0
	Total	1,400,000

	Bonds Property Tax Supported	1,400,000
	Select Funding Sources	0
	Select Funding Sources	0
	Total	1,400,000
	Operational Impact	

Planned Technology Replacement Schedule

BU# 416001

Project Description	Estimated Project Costs	
This is funding for the "Planned Technology Replacement Schedule" which consists of Personal Computers, Printers, Servers, Network devices, and Office Productivity Tools.	Consulting	0
	Construction	0
	Furniture/Fixtures/Equipment	200,000
	Contingency	0
	Capital Expenditures	0
	Total	200,000
Justification	Funding Sources	
Information technology has become an integral part of the City's operations. Without replenishing the technology it would fail and there is little the City could do to provide everyday services. The useful life of this computer equipment and software varies and is driven by many factors such as how long the technology is supported by the vendor, capacity requirements, the cost of repairs, the risk and ramification of equipment failure, the ability to support the product, and new needed services the City wants to provide.	Bonds Property Tax Supported	200,000
	Select Funding Sources	0
	Select Funding Sources	0
	Total	200,000
	Operational Impact	
	No impact in first year	

Traffic Signal & Streetlight Maintenance

BU# 416028

Project Description	Estimated Project Costs	
Regular maintenance is necessary to operate traffic signals and street lights. This item includes such major maintenance items as pole painting and repair, pole replacement, controller replacement, power center replacement and repair, and related tasks.	Consulting	0
	Construction	80,000
	Furniture/Fixtures/Equipment	0
	Contingency	0
	Capital Expenditures	0
	Total	80,000
Justification	Funding Sources	
During the course of the year we encounter unexpected jobs due to construction, both City and private development work, which require us to make adjustments in our electrical systems. Also, we need to repair and replace poles which become deteriorated to the point where they are unsafe to the public.	Bonds Property Tax Supported	80,000
		0
		0
	Total	80,000
	Operational Impact	
	Improved pedestrian and traffic safety.	

Reimbursement to the General Fund

BU# 416051

Project Description	Estimated Project Costs	
Services for capital improvement projects.	Consulting	0
	Construction	0
	Furniture/Fixtures/Equipment	0
	Contingency	0
	Capital Expenditures	300,000
	Total	300,000
Justification	Funding Sources	
A transfer is needed to the general fund for all of the services provided by general fund staff on capital projects.	Bonds - Property Tax Supported	300,000
	Select Funding Sources	0
	Select Funding Sources	0
	Total	300,000
Operational Impact		
This is the fund reimbursement needed to keep the CIP program viable.		

Contingency Funds

BU# 416052

Project Description	Estimated Project Costs	
In accordance with the Capital Improvement Policy adopted by the City Council, a bond funded capital plan contingency account shall be included at the beginning of each fiscal year. Funds from the overall CIP contingency account can be used to supplement a project if non are available within the department's existing projects.	Consulting	0
	Construction	0
	Furniture/Fixtures/Equipment	0
	Contingency	0
	Capital Expenditures	200,000
	Total	200,000
Justification	Funding Sources	
This "project" provides supplementary funding for capital projects.	Bonds - Property Tax Supported	200,000
	Select Funding Sources	0
	Select Funding Sources	0
	Total	200,000
Operational Impact		
Not significant.		

Viaduct Bird Screening**BU# 416097**

Project Description	Estimated Project Costs	
Continuing program to eliminate bird nesting under both the CTA and Metra viaducts in the City by placing bird screening and using other bird elimination techniques.	Consulting	0
	Construction	100,000
	Furniture/Fixtures/Equipment	0
	Contingency	0
	Capital Expenditures	0
	Total	100,000
Justification	Funding Sources	
Improves cleanliness of the areas under the viaducts and reduces public health issues related to pigeon waste on the sidewalks. Contract is in place for one more year after this and it is anticipated all viaducts will be completed in 2007.	Bonds Property Tax Supported	100,000
	Select Funding Sources	0
	Select Funding Sources	0
	Total	100,000
	Operational Impact	
	Reduces need to clean sidewalks under viaducts; reduces health risk.	

Library Youth Services Renovation Project**BU# 416129**

Project Description	Estimated Project Costs	
Renovation and expansion of the Youth Services area, relocation of the Browsing Collection from the 1 st to 2 nd floor, and construction of new Young Adult Room on the 3 rd floor of the Main Library. FY06 funding of \$450,000.	Consulting	287,000
	Construction	1,004,000
	Furniture/Fixtures/Equipment	1,004,000
	Contingency	125,000
	Capital Expenditures	0
	Total	2,420,000
Justification	Funding Sources	
This project is required to meet the contemporary needs and expectations of high quality library services for Evanston's youth, from birth through young adulthood.	GO Bonds	250,000
	Illinois State Grant	200,000
	Private Sources	260,000
	Total	710,000
	Operational Impact	
	When the project is completed, a net increase of 0.36 FTE is required to meet the additional services, programs and collections used by patrons in the new facilities.	

Emergency Telephone System Capital Purchases

BU# 5150

Project Description	Estimated Project Costs	
The ETSB funds the purchase of capital items to be used for the Emergency Telephone System.	Consulting	0
	Construction	0
	Furniture/Fixtures/Equipment	0
	Contingency	0
	Capital Expenditures	810,000
	Total	810,000
Justification	Funding Sources	
	ETSB Funds	810,000
	Select Funding Sources	0
	Select Funding Sources	0
	Total	810,000
Operational Impact		
Increased efficiency of first responder communications.		

Filter & Service Building Expansion

BU# 733055

Project Description	Estimated Project Costs	
Provides funding for the expansion of the existing filter shop and water plant administration service building. Expansion of the service building includes substantial remediation of the existing subgrade structures which are more than 100 years old. Work will include structural reinforcement of the suction wells located beneath garage #2, provision of handicap access to the facility, and expansion of the offices to provide more efficient operations. The existing Filtration Division work shop is located on top of two existing filters. This project will provide funding to expand the existing Shop further west over the remaining four filters, which will triple the size of the work area.	Consulting	0
	Construction	0
	Furniture/Fixtures/Equipment	0
	Contingency	0
	Capital Expenditures	3,000,000
	Total	3,000,000
Justification	Funding Sources	
Expansion of the Water Plant Administration building will incorporate the reinforcement of the 100 year old suction wells, replacement of the existing windows and the provision of handicap access to the facility. The existing administrative building built in 1949 has been adapted over the years to accommodate changes in services with storage space being converted to offices. Currently two supervisors share an 11 X 10 office, 3 employees share an office with all of the GIS equipment and record storage kept in several places. Filter Shop expansion will provide greater efficiency & increase safety by providing more space. Current configuration makes machining equipment very cumbersome. The tight quarters represents a safety hazard as well as impacts efficiency.	Water Fund – DIE	1,000,000
	Select Funding Sources	0
	Select Funding Sources	0
	Total	1,000,000
Operational Impact		
Expansion of the administrative building will enable much more efficient operations. Individual office spaces for supervisors to conduct employee meetings, conference room to enable meetings with regulatory agencies, vendors, engineers; and space for a potential plumbing inspector or engineer working out the water plant facility.		

Security Improvements

BU# 733067

Project Description	Estimated Project Costs	
Provides for security enhancements to the Water Treatment Plant & remote facilities.	Consulting	0
	Construction	0
	Furniture/Fixtures/Equipment	0
	Contingency	0
	Capital Expenditures	250,000
	Total	250,000
Justification	Funding Sources	
The recently completed vulnerability assessment for the water utility facilities recommends a number of security enhancements. Funding allocations provide for a gradual installation of these improvements.	Water Fund – DIE	50,000
	Select Funding Sources	0
	Select Funding Sources	0
	Total	50,000
Operational Impact		
Increased security provides greater protection of the water supply for over 350,000 people.		

Water Main Engineering Services

BU# 733071

Project Description	Estimated Project Costs	
Provides annual funding for engineering services for the design and during construction of the annual water main replacements.	Consulting	0
	Construction	0
	Furniture/Fixtures/Equipment	0
	Contingency	0
	Capital Expenditures	250,000
	Total	250,000
Justification	Funding Sources	
The recent distribution system hydraulic analysis identified over \$17 million dollars (2003 dollars) of water main Improvements necessary to meet minimal fire flow recommendations. An aggressive water main replacement program is essential to maintain needed flow capacity and structural integrity. Engineering Services are required to adequately perform the quantity of water main replacements scheduled.	Water Fund – DIE	250,000
	Select Funding Sources	0
	Select Funding Sources	0
	Total	250,000
Operational Impact		
Adequate maintenance and replacement of the water distribution system is essential to the reliable provision of water on a daily basis.		

Repair Zebra Mussel System

BU# 733074

Project Description	Estimated Project Costs	
Provides funds to repair the chlorine feed line that is currently broken located within the 48" intake in the lake.	Consulting	0
	Construction	0
	Furniture/Fixtures/Equipment	0
	Contingency	0
	Capital Expenditures	100,000
	Total	100,000
Justification	Funding Sources	
The zebra mussel control system enables us to periodically feed chlorine through the intakes to eliminate the buildup of mussels at the mouth of the intakes and the potential reduction of flow capacity. The chlorine lines were installed in 1992. One of the lines now has a leak and we are unable to disperse chlorine to the end of one of the intakes. We are currently investigating the location of the leak and the options for repair/replacement.	Water Fund – DIE	100,000
	Select Funding Sources	0
	Select Funding Sources	0
	Total	100,000
	Operational Impact	
	Should the buildup of zebra mussels continue to grow, the flow capacity of our intakes will be reduced.	

Repair & Recoating of the Alum Tanks

BU# 733075

Project Description	Estimated Project Costs	
Provides for the repair and recoating of the three tanks used for storing the chemical Alum which is used in the water treatment process.	Consulting	0
	Construction	0
	Furniture/Fixtures/Equipment	0
	Contingency	0
	Capital Expenditures	75,000
	Total	75,000
Justification	Funding Sources	
The three present underground alum storage tanks are 40 years old. Alum is corrosive and it is critical to periodically line the tanks to prevent structural tank failure. The tanks were last coated in 1995. Repairing and recoating the tanks at this time is necessary to prevent possible costly replacement.	Water Fund – DIE	75,000
	Select Funding Sources	0
	Select Funding Sources	0
	Total	75,000
	Operational Impact	
	Adequate chemical storage is essential to the daily operation of the water treatment facility.	

Garage #5&6 and Retaining Wall Repair

BU# 733077

Project Description	Estimated Project Costs	
Provides for the cleaning, repair and painting of the interiors of garages #5 & #6. Also provides funds for the reinforcement and concrete overlay of the retaining wall between upper and lower garage entrance ramps.	Consulting	0
	Construction	0
	Furniture/Fixtures/Equipment	0
	Contingency	0
	Capital Expenditures	75,000
	Total	75,000
Justification	Funding Sources	
This work is necessary to prolong the life of these essential plant structures.	Water Fund – DIE	75,000
	Select Funding Sources	0
	Select Funding Sources	0
	Total	75,000
	Operational Impact	
	Maintaining these structures is essential to the daily operations of the facility.	

SCADA System Improvements

BU# 733078

Project Description	Estimated Project Costs	
Provides funding for and engineering review of our existing Supervisory Control and Data Acquisition System (SCADA) with recommendations for phased replacements.	Consulting	10,000
	Construction	0
	Furniture/Fixtures/Equipment	0
	Contingency	0
	Capital Expenditures	400,000
	Total	410,000
Justification	Funding Sources	
The SCADA equipment monitors all major systems in the water treatment process, i.e., pumps, valves, filters and chemical feeders as well as the remote booster stations in Evanston, Skokie, and on the Northwest Water Commission transmission main. The existing system is manufactured by Bristol and was installed over 20 years ago and upgraded approximately 10 years ago. Upgrades are essential as technology advances and it is critical to maintain compatibility with existing hardware.	Water Fund – DIE	10,000
	Select Funding Sources	0
	Select Funding Sources	0
	Total	10,000
	Operational Impact	
	Upgrading of the system will need to be done in a phased manner to ensure continuous operation of the plant.	

Water Main Installations

BU# 733702

Project Description	Estimated Project Costs	
Provides annual funding for water main replacements as planned in conjunction with the street improvement plan.	Consulting	0
	Construction	0
	Furniture/Fixtures/Equipment	0
	Contingency	0
	Capital Expenditures	2,800,000
	Total	2,800,000
Justification	Funding Sources	
The recent distribution system hydraulic analysis identified over \$17 million dollars (2003 dollars) of water main Improvements necessary to meet minimal fire flow recommendations.	Water Fund – DIE	2,800,000
	Select Funding Sources	0
	Select Funding Sources	0
	Total	2,800,000
Operational Impact		
Adequate maintenance and replacement of the water distribution system is essential to the reliable provision of water on a daily basis.		

Emergency Sewer Work

BU# 7420

Project Description	Estimated Project Costs	
This project has been funded at a level of \$75,000 per year to provide funding for emergency sewer failure situations.	Consulting	0
	Construction	75,000
	Furniture/Fixtures/Equipment	0
	Contingency	0
	Capital Expenditures	
	Total	75,000
Justification	Funding Sources	
These funds are necessary to maintain the integrity of the existing combined sewer system.	Sewer Capital	75,000
	Select Funding Sources	0
	Select Funding Sources	0
	Total	75,000
Operational Impact		
Provides a mechanism to handle the financial impact of sewer emergencies.		

Sewer Lining

BU# 7420

Project Description	Estimated Project Costs	
These funds provide for the lining of the existing combined sewer system to insure its structural integrity. Sections of sewer are selected for this process based on the results of TV inspection contacts. The sewer system is video taped, and deteriorated sections are identified and then included in the contract work for lining.	Consulting	0
	Construction	250,000
	Furniture/Fixtures/Equipment	0
	Contingency	0
	Capital Expenditures	0
	Total	250,000
Justification	Funding Sources	
These funds are necessary to maintain the integrity of the existing combined sewer system.	Sewer Capital	250,000
	Select Funding Sources	0
	Select Funding Sources	0
	Total	250,000
	Operational Impact	
	Sewer lining is considered to have a life of 80 to 100 years. Extending the life of these old sewers reduces the impact on operations in terms of potential collapses and infiltration.	

Street Improvement Projects

BU# 7420

Project Description	Estimated Project Costs	
Provides funds for sewer repairs on streets scheduled for resurfacing and street improvement projects.	Consulting	0
	Construction	550,000
	Furniture/Fixtures/Equipment	0
	Contingency	0
	Capital Expenditures	0
	Total	550,000
Justification	Funding Sources	
These funds are necessary to maintain the integrity of the existing combined sewer system. Coordination of these underground repairs and improvements prior to street resurfacing minimizes the long term disruption to the neighborhoods.	Sewer Capital	550,000
	Select Funding Sources	0
	Select Funding Sources	0
	Total	550,000
	Operational Impact	
	Taking care of sewer repairs in conjunction with the resurfacing of the street reduces the likelihood of needing to disrupt the area in the future for repairs. This allows sewer crews to focus efforts in other areas of the city.	

Engineering Services for Sewer Main Design and Construction Services

BU# 7425

Project Description	Estimated Project Costs	
Provides for the design of upcoming sewer main work and engineering services during the construction.	Consulting	117,000
	Construction	0
	Furniture/Fixtures/Equipment	0
	Contingency	0
	Capital Expenditures	
	Total	117,000
Justification	Funding Sources	
This work is necessary to facilitate the installation of these sewers in conjunction with the MFT street resurfacing program.	Sewer Reserves	117,000
	Select Funding Sources	0
	Select Funding Sources	0
	Total	117,000
	Operational Impact	
	Provides for the installation of sewers prior to resurfacing reducing the need for disruption to the neighborhood in the future.	

Phase S82B Construction

BU# 7475

Project Description	Estimated Project Costs	
Provides funds for the construction of phase S82B of the Long Range Sewer Improvement Program. This work will take place in the area around Orrington, between Noyes and Emerson. It will involve the installation of a 78" relief sewer tunnel on Orrington between Noyes and Foster, replacement of the combined sewer and the water main on Orrington between Noyes and Emerson, a relief sewer tunnel on Foster and open cut construction in the surrounding area.	Consulting	0
	Construction	10,312,800
	Furniture/Fixtures/Equipment	0
	Contingency	0
	Capital Expenditures	
	Total	10,312,800
Justification	Funding Sources	
This work is necessary to reduce the flooding in this area during rain events. This area was originally addressed in the Long Range Sewer Improvement Plan in Phase VI B. Litigation resulted in major delays and the project has been broken down into two separate contracts and reconfigured to provide relief to this area..	IEPA Loan Fund	7,425,216
	Sewer Reserves	825,216
	Select Funding Sources	0
	Total	8,250,240
	Operational Impact	
	The installation of relief sewers in this area is essential to the mitigation of flooding. When this area is addressed we anticipate reduced calls for sewer crews in rain events.	

Phase S82B Construction Engineering Services

BU# 7476

Project Description	Estimated Project Costs	
These funds will provide for engineering services during the construction of Phase S82B, Long Range Sewer Improvement Program work. This project takes place in the area around Orrington, between Noyes and Emerson.	Consulting	0
	Construction	1,317,312
	Furniture/Fixtures/Equipment	0
	Contingency	0
	Capital Expenditures	0
	Total	1,317,312
Justification	Funding Sources	
This work is necessary to reduce the flooding in this area during rain events. This area was originally addressed in the Long Range Sewer Improvement Plan in Phase VI B. Litigation resulted in major delays and the project has been broken down into two separate contracts and reconfigured to provide relief to this area.	IEPA Loan Fund	970,065
	Sewer Reserves	107,785
	Select Funding Sources	0
	Total	1,077,850
	Operational Impact	
	The installation of relief sewers in this area is essential to the mitigation of flooding. When this area is addressed we anticipate reduced calls for sewer crews in rain events.	

Fleet Capital Outlay

BU# 7720

Project Description	Estimated Project Costs	
This is the funding for the replacement of all City Fleet vehicles.	Consulting	0
	Construction	0
	Furniture/Fixtures/Equipment	0
	Contingency	0
	Capital Expenditures	2,041,000
	Total	2,041,000
Justification	Funding Sources	
Scheduled replacement of vehicles and equipment reduces maintenance costs and helps keep vehicles in service.	Fleet Services Fund	2,041,000
	Select Funding Sources	0
	Select Funding Sources	0
	Total	2,041,000
	Operational Impact	
	Regular replacement reduces major maintenance as well as unanticipated failure and financial impact of unplanned purchases.	

City of
Evanston

GLOSSARY

Glossary

ACCRUAL BASIS: The basis of accounting under which transactions are recognized when they occur, regardless of the timing of estimated cash flows.

ACCRUED EXPENSES: Expenses incurred but not due until a later date.

ACTIVITY: A specified and distinguishable line of work performed by a Division.

AFSCME: American Federation of State, County and Municipal Employees, a labor union representing some City of Evanston employees.

ALERTS: Allows officers to access to driver's license, registration, warrant and other computerized law enforcement data. The ALERTS system also provides for inter-car communications via in-car data terminals.

APPROPRIATION: A legal authorization granted by the City Council to make expenditures and incur obligations for specific purposes. The Council appropriates funds annually by department, agency, or project, at the beginning of each fiscal year based upon the adopted Annual Fiscal Plan. Additional appropriations may be approved by the Council during the fiscal year by amending the Annual Fiscal Plan and appropriating the funds for expenditure.

ASSESSED VALUATION: A value that is established for real or personal property for use as a basis for levying property taxes. (Note: Property values are established by the Cook County Assessor's Office.)

AUDIT: An examination of an organizations' financial statements and the utilization of resources.

BOCA: Building Officials and Code Administrators International, an organization that writes the guidelines for basic community building codes.

BOND: A written promise to pay a specified sum of money, called the face value or principal amount, at a specified date in the

future, called the maturity date, together with periodic interest at a specified rate.

BOND RATING: An assessment of the likelihood that a bond issuer will pay the interest on its debt on time. Bond ratings are assigned by independent agencies, such as Moody's Investors Service and Standard & Poor's. Ratings range from AAA or Aaa (highest) to D (in default). Bonds rated below B are not investment grade and are called high-yield or junk bonds. Since the likelihood of default is greater on such bonds, issues are forced to pay higher interest rates to attract investors. Evanston is rated as a Aaa community by Moody's Investors Service.

BONDED DEBT: Portion of indebtedness represented by outstanding bonds.

BUDGET: A fiscal plan showing estimated expenditures, revenue, and service levels for a specific fiscal year.

BUDGET ADJUSTMENT: Legal procedure utilized by the City staff and Council to revise a budget appropriation. The City of Evanston has a written budget adjustment policy that allows adjustments in accordance with the City Code.

BUDGET CALENDAR: The schedule of key dates or milestones, which the City departments follow in the preparation, adoption and administration of the budget.

BUDGET DOCUMENT: Instrument used by the budget-making authority to present a comprehensive financial plan of operations to the City Council.

BUDGET MESSAGE: The opening section of the budget document, which provides the City Council and the public with a general summary of the most important aspects of the budget, including current and previous fiscal years, and the views and recommendations of the City Manager.

BUDGETARY CONTROL: The control or management of a governmental or enterprise fund in accordance with an approved budget to keep expenditures

Glossary

within the limitations of available appropriations of revenue.

CAPITAL IMPROVEMENT PROGRAM (CIP): A plan for capital expenditures to provide long-lasting physical improvements to be incurred over a fixed period of several future years.

CAPITAL IMPROVEMENT PROGRAM BUDGET: A capital Improvement Program (CIP) budget is a separate budget from the operating budget. Items in the CIP are usually construction projects designed to improve the value of government assets.

CAPITAL OUTLAY: Refers to the purchase of land, buildings and other improvements and also the purchase of machinery and equipment items which have an estimated useful life of three years or more and belong to the classes of property commonly considered as fixed assets.

CAPITAL PROJECT: A specific identifiable improvement or purpose for which expenditures are proposed within the capital budget or capital improvement program. Examples of capital improvement projects include new roads, sewer lines, buildings, operating systems, recreational facilities, and large scale remodeling.

CAPITAL PROJECT FUND: A fund created to account for financial resources to be used for the acquisition or the construction of major capital facilities or equipment.

CASH BASIS: A basis of accounting under which transactions are recognized only when cash changes hand.

CITY COUNCIL: The Mayor and nine (9) Aldermen collectively acting as the legislative and policy making body of the City.

COMMODITIES: All expenditures for materials, parts, supplies and commodities, except those incidentally used by outside firms performing contractual services for the City.

COMMUNITY DEVELOPMENT BLOCK GRANT (CDBG): Federal funds made available to municipalities specifically for community revitalization. Funds may be used by internal City divisions, or distributed to outside organizations located within the City's boundaries.

COMPREHENSIVE ANNUAL FINANCIAL REPORT (CAFR): A governmental unit's official annual report prepared and published as a matter of public record, according to governmental accounting standards.

CONTINGENCY: A budgetary reserve, set aside for emergencies or unforeseen expenditures not otherwise budgeted.

CONTRACTUAL SERVICES: Expenditures for services which are obtained by an express or implied contract. Major types of contractual services are: (1) advertising and printing; (2) maintenance and repair services; (3) public utility services; and (4) travel and training.

DEBT SERVICE: The City's obligation to pay the principal and interest of all bonds and other debt instruments according to a pre-determined payment schedule.

DEBT SERVICE FUND: A fund established to account for the accumulation of resources for the payment of principal and interest on long term debt.

DEFICIT: The excess of the liabilities of a fund over its assets; or the excess of expenditures over revenues during an accounting period; or, in the case of proprietary funds, the excess of expense over income during an accounting period.

DEPARTMENT: Administrative subsection of the City that indicates management responsibility for an operation.

DEPRECIATION: That portion of the cost of a capital asset that is charged as an expense during a particular period. This is a process of estimating and recording the lost usefulness, expired useful life, or diminution of service from a fixed asset that cannot or will not be restored by repair and will be

Glossary

replaced. The cost of the loss of usefulness of a fixed asset is the depreciation or the cost to reserve in order to replace the item at the end of its useful life.

DISTINGUISHED BUDGET RESENTATION AWARD: A voluntary program administered by the Government Finance Officers Association to encourage governments to publish well organized and easily readable budget documents and to provide peer recognition and technical assistance to the fiscal officers preparing them.

ENCUMBRANCE: Obligations in the form of purchase orders and contracts which are chargeable to an appropriation and for which a part of the appropriation is reserved because the goods or services have not been received. When paid, the encumbrance is liquidated.

ENTERPRISE FUND: A fund established to account for operations that are financed and operated in a manner similar to private business enterprises – where the intent of the governing body is that the costs of providing goods or services to the general public on a continuing basis be financed or recovered primarily through user charges.

ETSB: Emergency Telephone Systems Board.

EXPENDITURES: This term refers to the outflow of funds paid or to be paid for an asset obtained or goods and services obtained, regardless of when the expense is actually paid. Note: An encumbrance is not expenditure. An encumbrance reserves funds to be expended for a future date.

EXPENSES: A decrease in net total assets. Expenses represent the total cost of operations during a period regardless of the timing of related expenditures.

FEMA: Federal Emergency Management Agency.

FICA: Federal Insurance Contribution Act, the name of the piece of federal legislation that established the Social Security payroll tax. The current FICA tax rate is 15%, half of

which is paid by the employer and half by the employee.

FISCAL YEAR (FY): The time period designating the beginning and ending period for recording financial transactions. The City of Evanston uses March 1 to February 28 (29 in a leap year) as its fiscal year.

FIXED ASSETS: Assets of a long term character which are intended to continue to be held or used, such as land, buildings, machinery and equipment.

FRANCHISE FEE: The fee paid by public service businesses for use of City streets, alleys and property in providing their services to the citizens of a community. Services requiring franchises include electricity, telephone, natural gas and cable television.

FULL ACCRUAL BASIS: The basis of accounting under which transactions are recognized when they occur, regardless of the timing of estimated cash flows.

FUND: An accounting entity with a separate set of self-balancing accounts which comprise its assets, liabilities, fund balance, revenues and expenditures.

FUND ACCOUNTING: A governmental accounting system that is organized and operated on a fund basis.

FUND BALANCE: The assets of a fund less liabilities, as determined at the end of each fiscal year. Any reservations of fund balance are deducted to result in an "unreserved fund balance."

FUND TYPE: In governmental accounting, all funds are classified into eight fund types: General, Special Revenue, Debt Services, Capital Projects, Special Assessment, Enterprise, Internal Service, and Trust and Agency.

GENERAL FUND: The largest fund within the City, the General Fund accounts for most of the financial resources of the government. General Fund revenues include property taxes, licenses and permits, local taxes, service charges, and other types

Glossary

of revenue. This fund usually includes most of the basic operating services such as fire and police protection, parks/forestry and recreation, libraries, public works, health and human services, community development, and general administration.

GENERAL ACCEPTED ACCOUNTING PRINCIPLES (GAAP): Uniform minimum standard of and guidelines to financial accounting and reporting. They govern the form and content of the basic financial statements of an entity. They encompass the conventions, rules and procedures necessary to define accepted accounting practice at a particular time. They include not only broad guidelines of general application, but also detailed practices and procedures. They provide a standard by which to measure financial presentations.

GENERAL OBLIGATION BONDS: Bonds that finance public projects such as streets, municipal facilities, and park improvements. The repayment of these bonds is made from property taxes, and these bonds are backed by the full faith and credit of the issuing government.

GFOA: Government Finance Officers Association.

GPS: Global Positioning System, equipment that has the ability to survey the location of an object.

GRANT: A contribution by a government or other organization to support a particular function. Typically, these contributions are made to local governments from the state and federal governments.

IDOT: Illinois Department of Transportation.

IDPH: Illinois Department of Public Health.

IEPA: Illinois Environmental Protection Agency.

IMRF: Illinois Municipal Retirement Fund, a pension plan for employees of member cities within the State of Illinois.

INCOME: A term used in proprietary fund type accounting to represent revenues, or the excess of revenues over expenses.

INFRASTRUCTURE: The underlying permanent foundation or basic framework.

INTEREST EARNINGS: The earnings from available funds invested during the year in U.S. Treasury Bonds, Government agencies, and Certificates of Deposits.

INTERFUND TRANSFER: Amounts transferred from one fund to another.

INTERNAL SERVICE FUND: Fund used to account for the financing of goods or services provided by one department to another department on a cost reimbursement basis.

INVESTMENTS: Securities and real estate held for the production of revenues in the form of interest, dividends, rentals, or lease payments. The term does not include fixed assets used in governmental operations.

ISO: Insurance Services Office, a non-profit organization that grades the Fire Department's ability to provide service to a community, which is reflected in the insurance premium paid by the occupier.

LEVY: To impose taxes, special assessments, or service charges for the support of City services.

LIABILITIES: Debts or other legal obligations arising out of transactions in the past which must be liquidated, renewed, or refunded at some future date.

LONG TERM DEBT: Debt with a maturity of more than one year after the date of issuance.

MABAS: Mutual Aid Box Alarm System, This system was established to provide a swift, standardized and effective method of mutual aid assistance for extra alarm fires and mass casualty incidents. The MABAS system is divided into over 20 Divisions from the communities along I-53 and the Northwest Tollway corridor.

City of Evanston

Glossary

MAINTENANCE: All materials or contract expenditures covering repair and upkeep of City buildings, machinery and equipment, systems, and land.

MFT: Motor Fuel Tax, represents revenues for the City's share of gasoline taxes, allotted by the state for street improvements.

MODIFIED ACCRUAL BASIS: The accrual basis of accounting adapted to the governmental fund type spending measurement focus. Under it, revenues are recognized when they become both "measurable" and "available" to finance expenditures of the current period. Expenditures are recognized when the related fund liability is incurred except for (1) inventories of materials and supplies which may be considered expenditures either when purchased or when used; (2) prepaid insurance and similar items which need not be reported; (3) accumulated unpaid vacation, sick pay, and other employee benefit amounts which need not be recognized in the current period, but for which larger than normal accumulations must be disclosed in the notes to the financial statements; (4) interest on special assessment indebtedness which may be recorded when due rather than accrued, if offset by interest earnings on special assessment levies; and (5) principal and interest on long-term debt which are generally recognized when due.

MOODY'S INVESTMENT RATING SERVICE: An independent agency that analyzes the financial credit ratings of organizations. These ratings are based on debt issuance and carry a three letter coding. The City possesses the highest rating level, which is Aaa.

MUNICIPAL: Of or pertaining to a city or its government.

NORTAF: North Regional Major Crimes Task Force, this task force was established to serve as a standing task force that would be available to its member agencies for the investigation of major crimes, including homicides and non-parental kidnappings. Member communities include Evanston,

Glencoe, Glenview, Kenilworth, Lincolnwood, Morton Grove, Niles, Northbrook, Northfield, Skokie, Wheeling, Wilmette, and Winnetka.

OBJECTIVES: The objectives in the performance area of the budget are statements of one-time projects. These statements are intended to address either a new service or project, or a significant change in focus or priority in response to a special community need or City effort to improve productivity. Objectives are generally limited to one fiscal year.

ONGOING ACTIVITY MEASURES: These measures provide annual workload data on the activities of the City, which occur on an ongoing basis, year after year.

OPERATING BUDGET: A financial plan outlining the estimated revenues and expenditures, and other information for a specific period (usually a fiscal year). The "proposed budget" is the financial plan presented by the City Manager for consideration by the City Council, and the "adopted budget" is the financial plan ultimately approved and authorized by the City Council.

OPERATING EXPENSES: Proprietary fund expenses that are directly related to the fund's primary service activities.

OPERATING INCOME: The excess of proprietary fund operating revenues over operating expenses.

OPERATING REVENUES: Proprietary fund revenues that are directly related to the fund's primary service activities. They consist primarily of user charges for services.

PEER Services: Fiscal agent for Evanston Substance Abuse Prevention Council.

PER CAPITA COSTS: The cost of service per person. Per capita costs in Evanston are based on a 74,239 estimated population provided by the 2000 Census.

Glossary

PIMS: Police Information Management System, a computerized record system developed and maintained by the State of Illinois Criminal Justice Information Authority.

PROPERTY TAXES: Used to describe all revenues received in a period from current taxes, delinquent taxes, penalties and interest on delinquent taxes.

PUBLIC HEARING: The portions of open meetings held to present evidence and provide information on both sides of an issue.

RESERVE: An account used to indicate that a portion of fund balance is restricted for a specific purpose. An account used to earmark a portion of fund balance to indicate that it is not appropriate for expenditure. A reserve may also be an account used to earmark a portion of fund equity as legally segregated for a specific future use.

REVENUES: All amounts of money earned or received by the City from external sources. It includes such items as tax payments, fees from specific services, receipts from other governments, fines, forfeitures, grants, shared revenues and interest income.

REVENUE BONDS: Bonds whose principal and interest are payable exclusively from a revenue source pledged as the payment source before issuance.

ROI: Return on investment, a method to assist management decision making by evaluating the return on various investment alternatives.

SALES TAXES: The City receives two types of sales taxes – one from the state and the other from a home-rule sales tax. The state tax rate is 1% and the local home rule sales tax rate is 1%.

SAMSHA: Substance Abuse and Mental Health Services Administration.

SERVICES BILLED OUT: Includes revenues received for services provided by

one department to another within the same fund. An example would be the revenue received by the Parks Department from the Recreation Department for services provided in support of Recreation programs.

SYEP: Summer Youth Employment Program.

TAX BASE: The total value of all real and personal property in the City as of January 1 of each year, as certified. The tax base represents net value after all exemptions.

TAX LEVY: The resultant product when the tax rate per one hundred dollars is multiplied by the tax base.

TAX RATE: A percentage applied to all taxable property to raise general revenues. It is derived by dividing the total tax levy by the taxable net property valuation.

TAXES: Compulsory charges levied by a government for the purpose of financing services performed for the common benefit. The term does not include charges for services rendered only to those paying such charges, for example sewer service charges.

TIF: Tax Increment Financing or the act of capturing the amount of property taxes levied by a taxing unit for the year on the appraised value of real property located within a defined investment zone. The tax increments are paid into the TIF fund and used to pay project costs within the zone, including debt service obligations.

TRUST AND AGENCY FUNDS: Funds created to account for assets held by the City in a trustee capacity or as an agent for individuals, private organizations, other governmental units, and/or other funds. These include pension trust funds and agency funds.

USER CHARGES: The payment of a fee for direct receipt of a public service by the party benefiting from the service.
