City of Evanston
City Wide Asphalt Pavement Patching

Project Description
The City of Evanston will be patching large areas of asphalt pavement across the city beginning the week of April 17, 2017. The work is expected to take three weeks to complete, weather permitting.

Drivers should expect short delays in specific work zones as flagger’s route traffic around the work crews. NO PARKING restrictions will be short in duration and specific to a work area. The work in each location will take about an hour, but there are some locations where almost whole streets need to be resurfaced that will require more time to complete.

This project will remove the top two inches of asphalt pavement from large areas of distressed pavement with pot holes and replace the removed pavement with a fresh, smooth asphalt surface. After the contractor finishes, the street will be immediately ready for traffic.

The work will improve the condition of 26,000 square yards of pavement at 123 locations around the City. Please see attached map for patching locations. Funding for this project is from the City’s Capital Improvement Fund.

Contractor
The Contractor for this project is J.A. Johnson Paving, Inc. 1025 Addison Court, Arlington Heights, IL 60005. The contractor is contractually responsible for the means and methods of the work.

City Monitoring
The project is monitored by the City’s Bureau of Infrastructure Maintenance. If you have any questions or concerns, please contact Project Manager Don Cornelius at 847-366-9760. Questions about street maintenance should be directed to Jim Maiworm, Bureau Chief of Infrastructure Maintenance, at 3-1-1.
