**Review of ZoomGrants Questions**
Ms. Feiler initiated the discussion by reviewing the Board recommendation to combine ZoomGrants statements 3 and 10. The Board voted unanimously to replace the two criteria with the following statement: Organization has a track record of delivering programs/services in collaboration with other agencies that does not duplicate, in order to provide service to the target population. The Board next voted unanimously to combine statements 9 and 15 into the following statement: Organization has proven experience and capacity to sustain its operations and to comply with local, state, and federal regulations.

The next point of discussion centered around the final three statements. Ms. Sales pointed out that programs that do not meet all priorities may be disadvantaged, she suggested combining the final statements related to priorities. The Board discussed statements that considered agencies versus programs. The final consolidated statement the Board voted unanimously to adopt is as follows: Program’s missions, goals and work reflect the current priorities of the Board.

The Board discussed services to Evanston residents versus services to a broader population. There was discussion about whether agencies could prioritize Evanston residents and if question 14 could be modified to clarify. There was further discussion about agency reporting and if agencies were able to record services to and outcomes for Evanston versus non-Evanston residents. Staff confirmed that programs reported quarterly the number of Evanston residents served and outcomes achieved. Mr. Pierce asked about programs that work with the homeless and ways to avoid penalizing agencies that serve this population. Staff reviewed ways agencies established residency. Ms. Taylor cautioned against asking agencies to prioritize Evanston residents. Chair Johnson requested that staff present demographic information including residency in chart form using information gathered from the prior year for applications requesting 2018 funding.

Members discussed different ways to compare program services. The Board voted unanimously to change statement 11 to the following: The number of Evanston residents served and depth of services provided are reasonable based on program costs.
