This map shows Hispanics or Latinos along with the non-Hispanic or Latino portions of the 3 largest single race groups in Evanston. This covers a little over 98% of the population of Evanston. The groups not shown on this map are the non-Hispanic or Latino portions of the American Indian and Alaska Native alone, Native Hawaiian and Other Pacific Islander alone, Some Other Race alone, and Two or More Races populations. The US Census Bureau treats race and ethnicity as separate and distinct identities. This means that for every Hispanic or Latino there is also racial data but it is not shown on this map. The complete breakdown is shown below. Each mapped dot represents 2 people.

Data source: 2010 US Census
