Subject: Health and Human Services Goals for 2018

Date: March 8, 2018

Summary:

At the January meeting of the Mental Health Board, members requested clarification of any responsibilities or expectations the City may have of the Board as the City works to address 2018 City Council Goals, as well as the Evanston Project Local Assessment of Need (EPLAN). The goals in question have been outlined below:

Goals for Health And Human Services 2018 Initiatives
- Work with the Evanston Mental Health Board and other community partners to develop a method for measuring ratio of Evanston population to Mental Health Providers

Goals from the Evanston Project of Need-Plan years 2016-2021
- Develop a comprehensive Mental Health resource and referral guide to share with city departments and community Mental Health partners and continue to update annually.
- Work with the Evanston Mental Health Board and other community partners to develop a method for tracking the wait times for the 5 largest mental health and substance abuse treatment programs and services.

Background:

One of the overarching goals of the Health & Human Services Department is to help create and support a comprehensive system of primary, dental and mental health care so that all residents have the same access to systems and services. In 1994 Evanston was federally designated a Medically Underserved Area/Population (MUA/P). MUAs are groups of census tracts with a sub-par population to provider ratio. MUPs are specific sub-groups of people with a shortage of services; these groups may face economic, cultural or linguistic barriers to accessing care. As a result of this designation, Evanston
receives federal funding to support Erie Family Health Center. Erie Family Health Center offers a wide variety of services including, but not limited to, Adult and Senior Health Services, Behavioral Health/Counseling, Children’s Health Services, Dental Care, Prenatal, Teen and Women’s Health Services. Many of Erie’s programs are at or over capacity, indicating that there are still people in need of services. One of the challenges to supporting a comprehensive system of care is understanding the barriers to accessing services and/or any gaps in services. Wait lists indicate where additional services may be needed.

The Mental Health Board is included as a partner in the goals listed above for several reasons. The Mental Health Board is seen as one of the ways non-profit agencies have of communicating with the City. Information received through the application and recommendation process is used to understand additional services available to Evanston residents, the subgroups receiving those services, and whether those programs are at or exceeding capacity. Programs that must maintain waitlists or turn people away from services indicate an area where residents are underserved or would benefit from additional services. Because this information is gathered under the purview of the Mental Health Board, the Board is listed as a partner in understanding ratios served and wait times or wait lists programs may have.

Additionally, through the application process, agencies are required to provide updated program and contact information. This information, updated annually, can be used to make the resource and referral guide more accurate. The guide is maintained by the Library; the Board is listed as a partner because it is through the Board that information is gathered.

Mental Health Board members also represent interested groups in the community (included but not limited to, medical societies, local welfare agencies, hospital boards, school boards, local comprehensive health-planning agencies, lay associations concerned with mental health, alcoholism, controlled substance addiction, or developmental disabilities, as well as labor, business and civic groups and the general public). City Council receives Board recommendations because members are viewed as resident experts. The City views the Board as a partner in understanding the needs of at-risk residents and services available to support this broad and varied population.

Mission

Section 1. The Evanston Mental Health Board is a public body established by City ordinance. The Board’s mission is to address gaps identified in the community in the availability and accessibility of social services for at-risk Evanston residents to ensure a high quality of life for all. At-risk residents are defined as those Evanston residents with, or at risk of having, mental and/or emotional disorders, developmental disabilities, substance abuse issues, or who face challenges with accessing basic needs including, but not limited to, housing, child care and senior care. The Board further recommends funding for programs and services that address the needs of at-risk residents. The Board recognizes and supports a broad definition of community mental health that includes a variety of social services.

Section 2. The Board is responsible for developing funding recommendations for agencies that request grants from the City for programs that offer needed mental health and other social services to Evanston residents. These programs and services shall be accessible and responsive to community needs and shall be available to all Evanston residents. Additionally, funded agencies must demonstrate how they are addressing the needs of at-risk Evanston residents. Annually, the Board will review applications and provide updated information about each funded program and agency throughout the funding year. The Board will also evaluate and facilitate inter-agency collaboration.

Section 3. Method of Funding. Funds are designated annually to the Human Services Fund out of the City’s General Fund account. Funding recommendations made by the Board shall align with City Council goals and with Mental Health Board annual priorities, will be reviewed by Human Services Committee and approved by City Council.
