

**Climate Action And Resilience Plan Mitigation Task Force  
Meeting Notes  
Monday, May 21, 2018 at 6pm  
Lorraine H. Morton Civic Center, 2100 Ridge Avenue, Room 2404**

Attending: Vickie Jacobsen, Lauren Marquez-Viso

**6:05 Meeting called to order**

Task force members discussed progress in the CURB tool development and determined that missing data present challenges. The group decided to use it as a background source and not as the basis for our GHG emissions reduction calculations.

Task force members reviewed new material added to draft of the Mitigation Plan, including transportation and waste strategies, particularly how to address construction waste and what other communities have done to address this issue.

The group assigned research and writing tasks to work towards completion of the plan document by the July CARP meeting.

**7:30 Marquez-Viso motioned for meeting to adjourn; seconded by Jacobsen; meeting adjourned.**
